ROUND UPS

by "The Wrangler"

The reaction among Republican politicians at the Chicago headquarters to the Lemke candidacy and the Townsend convention is interesting. In the first place they are not greatly excited by the terrific lambasting given Mr. Roosevelt and the New Deal by the Townsend-Coughlin-Smith combination. Their own candidate, it will be recalled, got a number of stout kicks from leaders, they agree that the Lemke ticket will help Mr. Landon and hurt Mr. Roosevelt.

Stressing the necessity of a spirit of friendliness between Canada and the United States, President Franklin D. Roosevelt addressed a multitude of Canadians at Quebec last Friday. He called for frank dealings and a spirit of give and take in settling all problems facing the world. The President told our neighbors to the north that the trade agreements made last fall between the two countries was tangible evidence that it was the desire of both Canada and the United States to practice what they preach when they speak of the neighbor.

"The ladder of life is full of splinters, but they always prick the hardest when we are sliding down." William L. Brownell.

Almost everyday we read of mothers who have cruelly murdered their children because of the lack of funds to support them. When a woman has become the victim of circumstances so cruel that she kills her child to save him from the thousand human ills to which her flesh has been heir, there is no question that she is mentally sick. It is a question whether juries should administer kindness, not throw stones.

James E. Ferguson, former Governor of Texas, has suspended publication of his Forum and abandoned all hope. The former Governor said that he has given up the idea of supporting a sales tax, predicted a bright political future for Governor James V. Allred, and took a final slap at the Governor in a prediction that gamblers and horse racers will be able to continue their business under the liberality of the present administration. "WE QUIT" was the name of the editorial announcing the demise of the Forum after nineteen years of publication.

Stark Young, author of "So Red the Rose", terminated his secondary education in a small Mississippi school all because a small pig had fallen in the cistern of the school and typhoid fever broke out. The school was closed and the loved author later studied very hard and managed to stay in a university. He says today he does not regret his early schooling was cut short because he missed the "minor masterpieces of literature which children usually read. He regards his minor bits of literature as "literary measlies".

Perhaps you have a boy or girl entering college this fall and are expecting him to take an academic success. You think this success depends on the grades that he makes, but is only a trifle. Nicholas Murry Butler, president of Columbia University says: "The capacity to pass intellectual tests should rank third in the progress of a student. Evidence of his character building should come first, and evidence of his good manners and respect and concern for others should come second; and these lacking, no amount of intellectual performance of any kind should win him advancement or graduation."

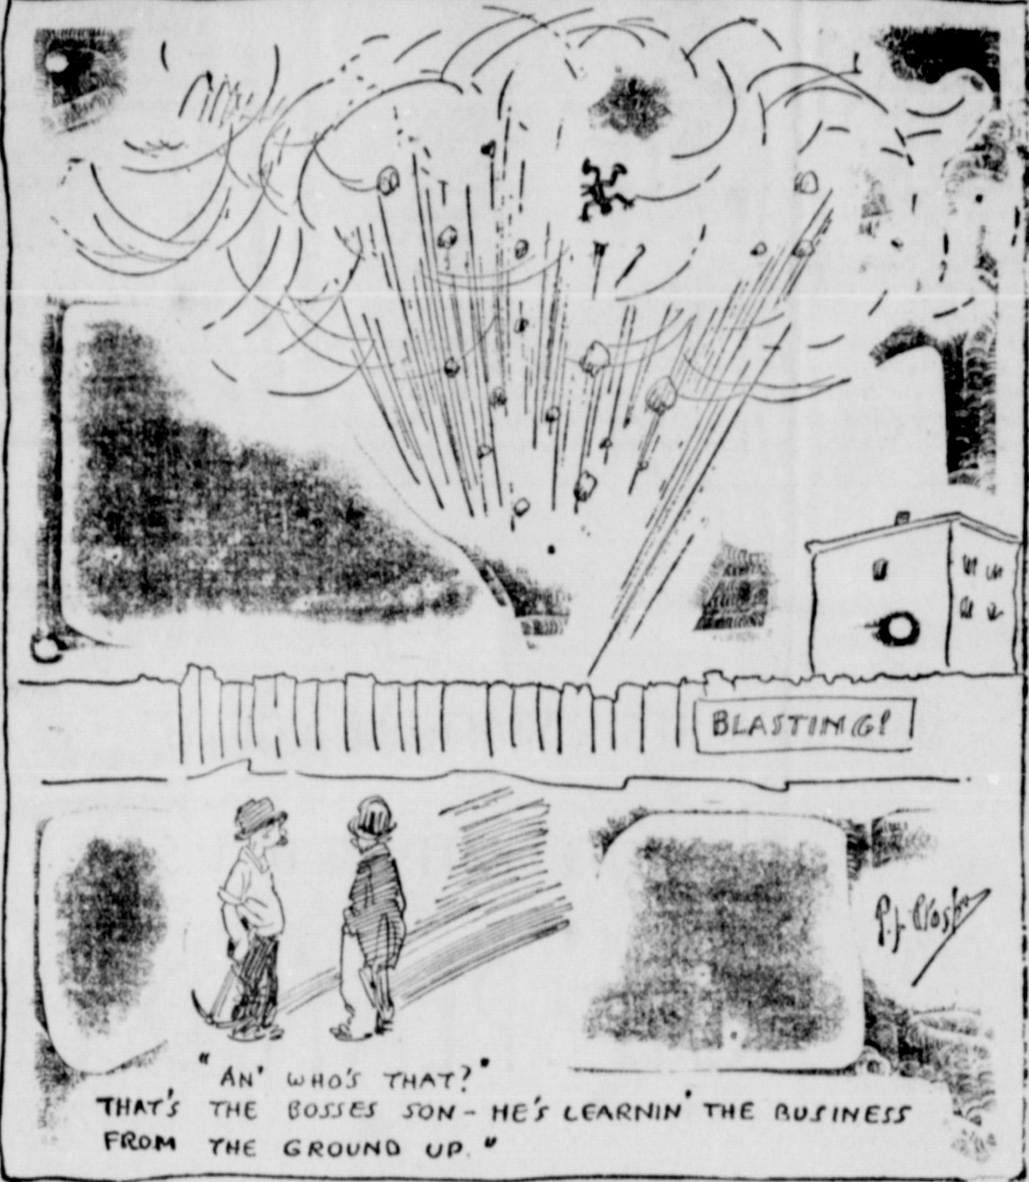

A very absent-minded fellow of fifty-two who lives at Salt Lake City tied his team of horses to one of the shiny new posts on the city's main street this week and remarked that the city chaps were getting thoughtful of horses. A policeman disallowed him. "Those are automobile parking meters," he explained.

SWIMMING HAZARDS SHOULD BE HEEDED

In Texas, during 1933, there were 371 deaths from accidental drowning, according to records in the State Bureau of Vital Statistics. This is an increase of 54 over the number reported for the year 1934, and an increase of 85 over the number reported for 1933.

"While water spots are the greatest of all sports during the summer season, they present certain hazards which should be heeded," said Dr. John W. Brown, State Health Officer. "Accidental drowning would not occur if each individual respected the fact that water is not man's natural element and governed his activities in the water by standards of safety."

"Certain precautions should be taken by all swimmers:

1. Never swim alone—especially in deserted places where no rescue is available in case of an emergency.
2. Do not let young children go out in deep water even if they know how to swim, unless some older person proficient in life saving is with them.
3. Do not go in bathing directly after eating. Wait two hours before taking the plunge.
4. Do not dive in unfamiliar places until you are sure of the depth of the water and the absence of rocks.
5. Do not overtax your strength work up gradually to a long swim by strengthening the muscles first.
6. Do not swim when fatigued.
7. Do not create a hazard for other swimmers by childish pranks and smart tricks.

"Accidental drownings with few exceptions, occur through lack of proper safeguards or in places without adequate supervision. Take your swim in one of the approved sanitary swimming pools now available in most communities, and help reduce the deaths in Texas from drownings."

Mr. and Mrs. J. S. McBeth and son and Mr. and Mrs. B. F. Bearden and children returned home the middle of this week from a trip to Corpus Christi and through the valley. Mr. McBeth states that cotton picking is well on in the valley. One example he cites is a farmer cultivating 2-3 acres of cotton, has already picked 218 bales and will pick enough more to average a bale to the acre. This is not irrigated land either. This cotton is bringing 13 to 13 1/2 irrigated land. Mr. McBeth states, has already produced one bale to the acre and picking not over. He further states that all creeks and rivers crossed were running.

Mrs. J. P. Durham spent last week here with her daughter Mrs. W. E. Clonts. Mrs. Durham went from here to the plains to visit other relatives before returning to her home in Dallas.

THE CONGRESSMAN

(Copy of Editorial Appearing in the Wichita Banner for July 31, 1936)

In the congressional run-off it seems that McFarlane has such an advantage over Gossett that another contest is hardly necessary. Gossett is a nice young man but wholly without legislative experience. In the present program of national affairs, since the other 20 districts of the state, with one single exception, have seen fit to keep their present representative in Congress, it certainly behooves the 13th district, because the record of McFarlane from every angle is good. He has not been found wanting in any particular.

In the primary returns Gossett showed strength only in his home county, Wilbarger, though he carried Foard County by a small margin. Gossett talks about the handicap of having two opponents from his home county. The figures show that Gossett lacked 351 votes carrying his home county over all opponents, while McFarlane carried his home county, Young, by a majority of 471 over all opposition.

The returns from which we are measuring are incomplete but account for practically all the votes cast. They show that eliminating Gossett's two candidates at home won't help him much in a run-off. McFarlane's plurality in Wichita County is practically 2500. The same is true in 13 of the 15 counties in the district.

In McFarlane's home county, he received more than four times as many votes as the three candidates from Wilbarger County combined. In Cooke County he received twice as many.

Mr. Gossett will probably carry his home county in the run-off, depending entirely upon how many of the more than 2500 who didn't vote for him in the first primary want to vote for a loser in the run-off. The figures indicate McFarlane will easily carry the other 14 counties.

FIRST GRADE QUALITY—The new Firestone Standard Tire is built of first grade materials, by skilled workmen, and embodies the Firestone patented construction features of Gum-Dipping and two extra layers of Gum-Dipped cords under the tread.

GUM-DIPPED CORD BODY—Every cotton fibre in every cord in every ply is soaked in liquid rubber. This is the only process known that prevents internal friction and heat, providing greater strength, blowout protection and longer life.

TWO EXTRA LAYERS OF GUM-DIPPED CORDS UNDER THE TREAD—This patented Firestone feature binds the whole tire into one unit of greater strength, cushions road shocks, gives extra protection against punctures.

LONGER NON-SKID MILEAGE—The new scientifically designed non-skid tread is wider, flatter, with more and tougher rubber on the road, giving longer even wear and thousands of extra miles.

LOW PRICES—These low prices are made possible by volume production in the world's most efficient factories.
