STREAMS in Desert Places
 By Orelle Stephens

"You are the light of the world; a city that is set on a hill cannot be hid." Matt. 5:14.

There was a time when man walked in darkness, but a light shined on them which was Jesus Christ. In Him was life; and the life was the light of man. When man follows after Christ they do not walk in darkness but they have the light of life. This life is a radiant light clearer than the noon day, and it shines forth as the Morning.

When man is saved, filled with the Holy Spirit of God, the person Jesus Christ lives within. Man thinks different, talks different, acts different, and sees things in a different light. He sees truth and loves it. He takes hold of it and establishes himself upon it. It governs his walk, his talk, his ways and his thoughts. He sees evil and hates the very presence of it. For he is guided by the Spirit of love, truth and right. Truth guides you by divine light that shows you the ways of God. He that walketh in this light is blessed of God and is used in His Kingdom work. But he that walketh not in this light is a curse to the cause of Christ. Remember every man shall give account of himself to God for every word spoken, everything done in the body, even to every thought he thinks.

How thankful we should be for His Mercy that endureth forever, and we can get hold of Him through this mercy, and having mercy ourselves. We are commanded to have Mercy, which means to have a compassionate and forgiving love for our fellowman. A love that will reach out and help the weak and fallen ones to be strong in Christ. Help bring the Streams of Living Light to a world darkened by sin and sorrow. Let God make you a blessing every day. He wants to—He will.

How "big" should government be?

Lincoln was President at a time when the federal government had to take away from its citizens more rights and liberties than ever before.

But he didn't like it. He believed, with the writers of the Constitution and the Declaration, that our government should protect people's independence, not push people around.

"In all that the people can individually do as well for themselves, government ought not to interfere," Lincoln once said.

Lincoln never let Americans forget that. He kept reminding the nation that the government's vast wartime powers must be only temporary.

He made powerful enemies. For there are always those who want to see the government run things—and run people—permanently.

We have them today. They think up all sorts of reasons why the federal government should over this or that business, industry, or service. They never say they want socialism. Maybe they even realize it. But that's actually what they propose.

Most Americans don't want socialism any more than you do. The job is to recognize it—and it—no matter what disguise it wears!

The people who plan and work for a realistic U. S. A. know that permanent control of a few key industries and services will give government the power to take over about everything. One of the key industries that they're trying to take over is electric light and power.
