INTEREST SHOWN AT SOIL FERTILITY SHORT COURSE
The Soil Fertility Short Course held in the Munday Chamber of Commerce and Agriculture Meeting Room was attended by a group of very interested producers February 26-27.

John Box, Extension Associate Agronomist conducted the first afternoon meeting. Mr. Box presented interesting information on soil condition, fertilizer applications, and summaries of many result demonstrations in this area. It was noted fertilizing of wheat at seeding time with both nitrogen and phosphorus and top dressing with nitrogen in the late winter have in the majority of cases paid well. Many of these demonstrations showed extra income of \$10.00 to \$15.00 per acre over fertilizer cost. John pointed out that sandy soils usually show more response than the clay soils.
Dr. Carl Gray, Extension Soil Chemist conducted the second afternoon session. Dr. Gray covered fertilizer materials and interesting information on what happens to them in the soil. Micro-nutrients were also discussed with the comment we have a great deal to learn in this field. Plant deficiencies, such as zinc, iron and nitrogen were discussed with several color slides showing symptoms of these.

Both speakers stressed taking care of the major plant nutrients N-P-K first and then start thinking of the Micro-nutrients.
Evidence of good meetings are often measured by questions from the group. Mr. Box and Dr. Gray were well pleased with the questions asked and added meetings like these are real interesting to them.
Coffee was furnished by the Munday Chamber of Commerce and Agriculture.

Time Limit On Medicare Bills

There is a time limit for claiming medical insurance payments under medicare, and time is about to run out for medical bills incurred over a year ago, according to Edwin Draughon, Manager of the Vernon Social Security Office.

"If someone in your family who is 65 or older had doctor bills of more than \$50 for services in the last half of 1966 and these bills have not been sent in to medicare, now is the time to request medicare benefits for them.

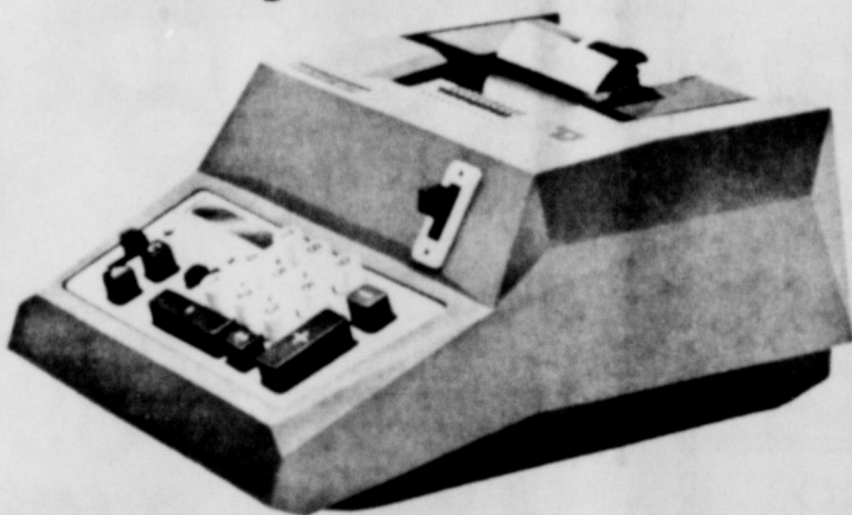

No payment can be made on bills for services in July, August or September of 1966 unless a request for payment is received by April 1, 1968."

"The employees of the Vernon Social Security Office, 1728 Fannin St., will be glad to assist medicare beneficiaries in filing medical insurance claims," said Mr. Draughon.

Leaders To Discuss Mental Health Services March 12

Creation of mental health and mental retardation services for over a million people living in this 15-county rural area will be discussed by local medical leaders and county judges with Texas Department of Mental Health and Mental Retardation representatives, Tuesday, March 12, at the Vernon Country Club in Vernon at 6:30 p.m. "Vernon Geriatric Center, now under construction, and Vernon Branch of Wichita Falls State Hospital can realistically be the focal point for both mental health and mental retardation resources," Department Commissioner John Kinross-Wright, M. D., said. "We are appealing to those with intimate and professional knowledge of local needs to guide us in developing workable plans for this new center," he added.

County judges, doctors, hospital and nursing home administrators from Archer, Baylor, Childress, Cottle, Dickens, Foard, Hall, Hardeman, Haskell, King, Knox, Motley, Throckmorton, Wilbarger and Young counties have been invited to the open session.

"If intent of the law is followed, community agencies, the new Center, and Vernon Home will work together to meet the demand for expanded services. The law encourages local public and private organizations to assume responsibility for mental health and mental retardation programs," pointed out Dr. Kinross-Wright.

Gary Miller, M. D., director of hospital development; W. G. Kirklind, assistant deputy for grants management; Robert Vassallo, director of vocational rehabilitation planning, Austin; and Charles M. Galtz, M. D., chief of the gerontology research section of the Texas Research Institute of Mental Sciences, Houston, will also represent the Department in Vernon.

Folks are finding out... about Purina's great new sow ration—

NEW PURINA FARROWING CHOW

..specially developed to fit the sows needs at farrowing time

New Purina Farrowing Chow is the result of five years of testing at the Purina Research Farm Brood Sow Unit. It's developed to fit the sows' needs for a palatable, bulky, well-balanced, vitamin-fortified ration from five days before farrowing through seven days after farrowing.

This new 14% protein ration, containing grain, is fed as sow's sole ration. It comes in Checker (pellet) form only, which helps maintain freshness. An NF-180* option to help control scours in baby pigs is available. New Purina Farrowing Chow has the "just right" nutrients sows need at this critical time. It's economical, too.

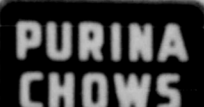

THIS IS THE YEAR to do everything possible to help your sows farrow lots of pigs and wean big litters. Give them the built-in advantages of New Purina Farrowing Chow.

COME AND GET IT! New Purina Farrowing Chow is available at our store right now. Try this New Purina product this spring.

Members of the Truscott Home Demonstration Club visited department stores in Crowell Thursday, February 29 to look at new materials and dress styles. The first stop was at Fisch's where Mr. Fisch gave several pointers on buying. "Stick to nationally advertised products he suggested. You can't go wrong if you do be-

cause they want you back as a repeat customer and must stand behind their products."

He said at a recent style show he attended with his wife in Dallas all the models wore short dresses, however he predicted that by fall all hems will be at least to just above the knee. "But the merchants don't really know what to do he said, we've got to buy but we sure hope we don't get stuck with a lot of short dresses we can't sell.

Mrs. Fisch said a problem they have is in buying designs for the young matron in her thirties who wants a youthful design but does not want a skirt so short she will be accused of "trying to dress like a teenager." She said that when she admires a dress at market her husband always asks, "Yes, but will it sell?" "He wants me to guarantee sales on each dress," she laughed.

MR FARMER :

1968 IS THE YEAR TO PLANT COTTON

REMEMBER MARCH 15 IS THE DEADLINE TO SIGN UP FOR YOUR ALLOTMENTS

• STRONG MARKET DEMANDS SEEN FOR 1968 CROP
 • 1968 GOVERNMENT PROGRAM ENCOURAGING MORE PRODUCTION

PLANT MORE COTTON IN '68

LOOK WHAT'S HAPPENED TO THE COTTON SURPLUS

- U.S. government cotton has moved into domestic textile mills and into export markets at the same price.
- Domestic consumption of cotton in the U. S. has increased substantially.
- Exports of cotton during the 1966-67 marketing year reached nearly 4.7 million bales compared to less than 3 million bales for the preceding year.
- The August 1, 1966, record high carryover of 12.8 million bales of cotton is expected to be about 4.7 million bales by August 1, 1968.
- The August 1, 1966, record high Commodity Credit Corporation stock of cotton consisting of 18 million bales was reduced to 5.8 million bales by August 1, 1967, and is expected to be only 1.2 million bales as of December 31, 1967.
- The U. S. Government loan rate on marketing one bale cotton, at average location, in 1955 was 21 cents per pound, and in 1957 was reduced to 16.25 cents per pound. These loan rates compare to an average loan rate of 19.8 cents per pound for the five years 1961 thru 1967.

NEW CHANGES IN 1968 COTTON PROGRAM

The 1968 program, as announced by the U. S. Department of Agriculture is designed to increase cotton production to a level about 10% above the 1967 level. The program is designed to encourage production of a higher percentage of the medium and longer staples.

Principal changes from the 1967 program include:

- A reduction in the percentage of a producer's cotton allotment which must be planted in order to qualify for program payments.
- The payment rate for secondary allotments is 4.0 cents per pound -- down from 10.75 cents in 1967.
- The price support payment rate is 12.84 cents per pound -- up from 11.25 cents for the 1967 crop.
- The rules for marketing cotton planted in a 500-row pattern have been changed to those rules used from 1962 thru 1965. By planting cotton in 500-row patterns producers can materially increase their yield per acre.
- The National average allotment remains at 15.2 million acres, while the loan rate for marketing one-bale cotton, at average location, remains at 19.8 cents per pound.
