## Hospital Notes

Patients who have recently been released from the Hospital are: Mr. West of Rule, Mr. J. D. Hammitt of Rule, Jannell Burleson of Rotan, Mrs. S. E. Youngblood of Knox City, Mrs. J. J. O'Brien of Knox City, Mrs. M. Denison of Rule, Mrs. Rouse of Benjamin and Miss Inez Liles of Iowa Park.

Patients in the Hospital this week are Mrs. B. C. Hancock of Rochester, Mrs. Emmett Partridge of Munday, Miss Vola Daniels of Knox City, Miss Lois Huntsman of Knox City, Miss Hazel Orell of Rhineland, Mrs. Alice of Munday, Mrs. Raegan of Munday and Mrs. Hall of Benjamin. The two doctor Farringtons of Munday made professional calls at the Hospital Tuesday.

Mrs. Tanzer and Miss Albus visited Stamford Sunday.

## Mitchell News

Mr. Johnnie Pearl Carver was sick last week but is up at this time.

Miss Bobbie Irene Nance has a sore eye, we hope it will soon get right.

Mrs. Daniel Cummings, Carl

Brother Maddox and boys

at Lake Kemp fishing the first

home Saturday brought back

many fish.

A few from here attended

at Needmore Sunday and

Saturday.

and Mrs. Carl Carver, Mr. and

Mister Nance spent the day

with Mr. and Mrs. Charles

J. W. Carver and Mrs. Roy

spent the day Sunday, with

P. Luckey.

Maggie Leffler spent the day

with Mrs. George Carter of

Carter.

Margaret Moore who has been

visiting her sister Mrs. Tom Osborn

back to home Sunday.

James Mae White of Needmore

her sister, Mrs. McBeth one

week.

Widow has joined the Ball

Yates. He will be

by Mr. Clarence Woodward

Ball season.

## JUNIOR-SENIOR BANQUET

The spirit of "The Old Spanish Custom" with its ribbons, sashes, fans and tassels, with his gay colors moon lights and man and maid was provided Friday night as the Senior class, accompanied by their hostess and hostesses, the Junior class entered the handsomely arrayed hall of the Methodist church to the strains of "It's an Old Spanish Custom."

The guests all found their places at tables arranged by the seniors and were carried back to old Spain in th folklore song and dance which were given by a group of spanish young ladies.

A lovely banquet was served on the individual tables. Long tapers centered each table while hand decorated programs, rose nut cups, metallic fans and miniature spanish jugs furnished other table adornment.

During the evening program was given in which the honor guests, the Seniors, were placed upon the imaginary pedestal of perfect achievement, whom the Juniors admire and which they aspire to achieve.

The class prophecy as given by Miss Sydne Virginia Edwards wrought smiles to the faces of dignified graduates and out bursts of laughter to the seniors of next year, the Juniors as yet.

The whole evening was a huge success, an occasion which the two classes will marvel over even in years to come.

Mrs. E. Q. Warren is in Dallas this week taking a special piano course in His Method of Instruction by the Professor Thompson. Mrs. Warren's classes are being instructed during her absence by Miss Elsie Graham. Elsie has been an excellent substitute for the teachers in the primary and intermediate grades this year. She has taught on several occasions when one of the teachers was unavoidably absent. Miss Graham attended the College of Industrial Arts last year. In addition to her regular literary course, she studied music. She states that she plans to attend C. L. A. again this summer.

Mr. and Mrs. N. E. Noble of Lubbock spent Friday night of last week here with friends. Mr. Noble has been selected superintendent of the Rockwell school.

It is stated by ladies of the Methodist church that a project soon to be in operation by the Missionary Society will be a Peddlers pack. The object of such a pack is to have each person to whom the pack is given, buy an article therein, deposit the money in the sealed bank and also contribute an article that some one else may buy.

Articles to be placed in the pack are not to be valued for more than fifty cents and must be well worth your price. Start now Methodist lad-chief or something for the Peddlers Pack.

The Vacation Bible School will be the second to be conducted in Knox City, the first being that of last year held of the same church. The school includes children from the ages 4 to 15 and from any and all the churches. The program of study includes devotionals, singing, physical training, Bible stories and class work.

Mrs. J. C. Mann has been selected

Dean of the school. Other officers

to assist in the work will be four supervisors and all the teachers

needed. The workers in the school

plan to have, at least 2 teachers from

all the churches in town, and to enrol children in classes from all the

churches.

A school of this kind is incomplete with out the cooperation of all

churches, which cooperation the

Methodist is looking forward to being given.

## Program

### SEVENTH GRADE GRADUATION EXERCISE

MAY 14, 1931 8:30 P. M.

BAPTIST CHURCH

Processional	Mary Leone Hoge
Invocation	Reverend C. B. Stovall

Joe Smith

Mr. and Mrs. G. W. Coates and little daughter spent the last Sunday in Seymour.

We are equipped to repair all makes of cars. Ashcroft Chevrolet Co.

Bert Huntsman and his wife were here a few days this week.

### Gifts for the Graduate

Do not fail to remember that the lively boy and girl have been diligent in driving through to graduation and their achievements are worthy of notice.

This year calls for practical gifts. Gifts in personal apparel are not only practical but are today most appreciated by young people. We make a few suggestions.

#### For the Boy

Ties  
Belt  
Shirt  
Socks  
Silk Underwear  
Handkerchiefs

#### For the Girl

Hose  
Brassiere  
Bloomers  
Step-ins  
Vanities  
Handkerchiefs

Let us help you select your gifts.

**BRYANT-LINK**

## FORD BRAKES ARE UNUSUALLY EFFECTIVE

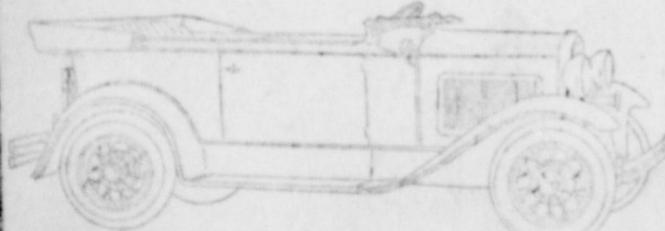

*Reliability and safety  
due to simple design and  
careful construction*

ONE OF the first things you will notice when you drive the Ford is the quick, effective action of its four-wheel brakes.

They are unusually safe and reliable because they are mechanical, internal expanding, with all braking surfaces fully enclosed. This prevents mud, water, sand, etc., from getting between the band and drum and interfering with brake action.

Other outstanding features of the Ford are the Triplets shatter-proof glass windshield, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, torque-tube drive, more than twenty ball and roller bearings, Rustless Steel, reliability, economy, and long life.

You save when you buy the Ford and you save every mile you drive.

THE FORD DE LUXE PHAETON

#### THIRTEEN BODY TYPES

\*430 to \*630

(F. o. b. Detroit, plus freight and delivery. Bumpers and spare tire extra at low cost. You can purchase a Ford on economical terms through the Authorized Ford Finance Plans of the Universal Credit Company.)

Entered in the Postoffice at Knox City, Texas for transportation through the mails as second class matter.

SUNDAY, MAY 10

This is the day that we come to pay tribute to Mother.

Her office as "Mother" is the greatest and therefore the most responsible office occupied by any earthly being. Her's is the work of exercising daily, yes, hourly that most glorious virtue, which includes all others, called LOVE.

Love is not only the greatest thing in the world but is also the greatest in the universe of God. In Heaven itself, love is supreme, for "God is Love". This being true, the person who has most of love is most like him.

The love of mothers is the crowning glory of humanity.

The love of God, as expressed in His Son, is the crowning glory of both heaven and earth, both time and eternity, both human and divine.

The most effective way in which man can conceive of the infinite love of God is to realize that His love is a thousand times as great as even the love of a mother. It will be conceded by all that mothers have more an intense and deeper love than others of God's creation. Thus it is that they seem to be most like him.

This conclusion appears to have the approval of the creator, for it is unto the hands of mothers that He has confided the care of little children.

So faithful is this mother love, so transforming in power, so glorious its heroic and self-sacrificing impulsion, that it could come from no other than the Fount of Love.

In proportion to the importance of one's vocation and duties are one's responsibilities, always. This being true, no other human being's responsibility is so great as that of a mother. Bringing into the world a child, giving it sustenance and training it for living the right life, is beyond all question the greatest work, and therefore the greatest responsibility, that it is possible for any one to be charged with.

This fact makes a mother's example of tremendous importance. It is of many times greater importance, because of its influence upon the life and character of a child, than that of all other sources. Her influence is for both time and eternity.

Her son may become profligate, dissipated, criminal, sodden, hopelessly snuffed in sin and shame. Yet she still loves him. Although she may see in him the ignoble man, she clasps him again to her bosom in love and sees the innocent, pure, sweet baby that God gave her.

World history, while composed for the most part, of records telling of the deeds of man, has nevertheless running through the entire fabric the golden threads of love and self-sacrifice of noble, heroic motherhood.

Thus we see that even a short meditation upon the heart-moving theme of mother, increases our reverence for all mothers, intensifies our love for them, magnifies our respect for them and causes us to glorify Motherhood.

Mother! In her responses humanity's greatest love, its greatest asset. In her rests largely the hope of mankind. By her the cross of Christ is upheld and Christianity magnified and God glorified. Without her, we would languish, society decay, tenderness and loving kindness disappear from the earth.

Her name is graven by the finger of God upon the table of every heart. Her lullabies are sweeter than the songs of the Choir Invisible". No flower is so fragile yet indestructible as her tenderness. Earth's richest jewels are poor when we think of placing them in a crown for her brow.

She is best loved by little children, most respected by men and most honored by God.

She it is who has been honored by God above all other human beings in that He made her Mother of His Son.

In all the experiences of life—war or peace, in sickness or health, in prosperity or adversity, in poverty or wealth, in circumstances of stress and tension, in conditions of fear and calamity—Mother's love and heroism, her self-denial and sacrifice, her fidelity to duty and adherence to principle, are an inspiration, a comfort, a benediction.

No sacrifice is too great, no suf-

fering too intense, no grief too poignant, for Mother to endure without a murmur for her child.

Next to God, whom the Apostle says is Love, she certainly loves best.

Mother love is deeper than depth, wider than width, more enduring than time.

"Behold thy Mother".

One would judge from the number of fish brought in by Knox City fisherman last Friday, Saturday and probably even Sunday, that some one else caught all the big ones before our representatives arrived at the lake.

Benjamin lake fishermen returned as they went, only probably a little in need of sleep.

Several men went to Lake Kemp where, it is reported, they met with success.

Well, the editor did not get off fishing Saturday as we had planned, and since we have already been warned about "fish stories" we won't tell the one we had in mind.

It is stated that a "May the first fish tale" will be accepted by most any one before that of the lady editor. And we don't feel so bad at that, for we realize our inability at this art as compared with some people take for instance, that person who occupies the "no loans here today" chair at the Citizens State Bank.

We don't think that Mr. Robbie has walked out with his fishing pole yet, but when he does?

Miss Ruth Short, a Knox City girl, was elected to represent her school Sul Ross, at Alpine, at the annual convention of the Texas Intercollegiate Press Association held this year at Nacogdoches. Miss Short is editor and chief of the Sky Line at Sul Ross. She is valued much as a girl student by the entire faculty of Sul Ross.

The convention at Nacogdoches convened on Thursday April the 31st and was concluded Saturday May the 2nd. Miss Short reports that she enjoyed the convention very much.

Dr. Frizzell, Mercer Armstrong, J.

M. Averitt and O. L. Jamison proved winner in an endurance contest Wednesday night with the whales in the Benjamin lake. The boys just naturally froze the fish out.

#### BREEZY-POINT

"Breezy-Point" the Camp Fire Girls' play given last Thursday night was fine. The play was specially selected for the girls by their coun-

selors on the stage. Mrs. O. L. Jamison, the character how it made me or and story development were developed that one seeing the play had a face like I grew this

Mrs. Henry Jones. The characters and story development were developed that one seeing the play had a face like I grew this

Although the attendance was small those who were present enjoyed the play to the utmost.

O. L. Jamison, S. M. Clonts, smooth, walked in H. Clonts and Albert Frazier were and inquired:

## Now Laugh

*Lahg and the World Laughs  
With You  
Weep and You Weep Alone*

Mary S: I wonder what causes the  
light of time.

Lila D: It is probably urged on  
by the spur of the moment.

It was customary for the congregation to repeat the 23rd Psalm in unison, but invariably Mrs. Speiffert would keep about a dozen words ahead of the rest. "Who?" asked a visitor of an old church member one Sunday, "was the lady who has already by still waters while the rest of us were lying down in green pastures."

Husband: From the glimpse I had of her this morning, I rather like our new cook. There seems to be plenty of go about her.

Wife: Yes; she's gone.

Grape: What happened that you didn't go on the Zeppelin flight around the world?

Vine: Too expensive—my bankroll wouldn't stand the Graf."

"Why Snoots, how did you come to get those holes in your umbrella?"

I made them myself, Auntie, so could see when it stopped raining."

Mrs. Nedore: "How much a week do you pay your maid?"

Mrs. Hiram O'Man: "Really, I can't say I always pay them by the hour. They never stay a week."

Mr. and Mrs. Joe Withrow moved to Truscott. Joe will work in the tailor shop there.

Miss Lucille Williams of Munday spent the weekend here with Mrs. M. Deets.

Mrs. Vernon Bridges was hostess to the Bridge Club Tuesday afternoon.

Mr. and Mrs. R. B. Easton are the proud parents of a fine baby girl who arrived on Sunday.

Mr. and Mrs. E. E. Asker left Tuesday for Mineral Wells for a stay of two weeks.

When you start joy riding, drive by and gas with Otto at the Ashcroft Chevrolet Company.

H. M. Warren and family and C. G. Bell and family spent Sunday afternoon in Haskell.

Mr. and Mrs. C. H. Keck had as their guests Sunday Mr. and Mrs. Frank Keck of Seymour and Mr. and Mrs. Ogle Robinson of Rochester.

For Sale—One good Remington typewriter. A bargain for some one. Also a good Atwater Kent battery Radio. Hughes Radio Shop.

**BAYER ASPIRIN**  
is always **SAFE**

## Beware of Imitations

GENUINE Bayer Aspirin, the kind  
that doctors prescribe and millions of  
users have proven safe for over thirty  
years, can easily be identified by the  
name Bayer and the word genuine as  
above.

Genuine Bayer Aspirin is safe and  
sure; it is always the same. It has the  
unqualified endorsement of physicians  
and druggists everywhere. It does not  
depress the heart, and no harmful effects  
follow its use.

Bayer Aspirin is the universal anti-  
date for pains of all kinds.

Headaches      Neuritis  
Colds      Neuralgia  
Sore Throat      Lumbar  
Rheumatism      Toothache

Aspirin is the trade-mark of Bayer  
manufacture of motosalicylic acid.

We don't sell Germ-Processed Oil on claims...we just  
show you the test results, figured out in fractions...

IT'S comfortable to know that the oil you are using  
will result in gasoline and oil economies. A prominent  
southwestern bus line (name on request) wanted  
to know. They put Germ-Processed Motor Oil to the  
test in a 25-passenger bus. Competent engineers checked  
every detail of operating cost and  
maintenance during 7,488  
miles of regular passenger service, comparing  
the results with  
an equal test of  
the competing oil.

When the test ended it was found that Conoco  
Germ-Processed Motor Oil had reduced oil consumption  
by 13% and had lowered gasoline consumption  
by 14.3%.

Such economies are also possible in your car. And  
there are other advantages which soon become evident  
to the user of Conoco Germ-Processed Motor Oil, each  
proved by authoritative tests. Your own test-through-use  
will be most convincing. Have your crankcase filled  
today with Conoco Germ-Processed Motor Oil at the  
nearest sign of the Conoco Red Triangle. All grades  
35¢ per quart.

## Facts About Hoover Dam

THE WORLD'S LARGEST IRRIGATION STRUCTURE

By Dr. Elwood Mead  
Commissioner, Bureau of Reclamation

The first impression of the Boulder Canyon project is size. About every dimension is a superlative. The dam will be 739 feet high, nearly twice the height of any dam yet built. It will be 650 feet thick at the base.

The All American Canal, which will carry stored water to irrigators in Imperial Valley will be 200 feet wide, 22 feet deep, and carry 15,000 cubic feet of water per second. This canal has to pass through a windswept ridge of shifting sand where the excavation will be more than 200 feet deep. The aqueduct that is to carry water to Los Angeles and surrounding cities, will be more than 200 miles long, and will carry 1,500 cubic feet of water per second, which will have to be lifted 1,280 feet in order to cross the Sierra Divide. The aqueduct will cost more than \$200,000,000.

The lake above the dam will be 115 miles long, 552 feet deep, and will hold 10,000,000 acre-feet of water, enough to cover the State of New York to the depth of one foot. It will be the largest artificial reservoir in the world more than 11 times the capacity of the Elephant Butte Reservoir in New Mexico and 12 times that of the Aswan reservoir in Egypt.

The picture is given above projections because the turbulent Colorado River has to be controlled and because the water needs of the Southwest are great and urgent. The reservoir must be large enough to hold the greatest flood. The flow below the dam must be regulated. No floods to break the levees and menace the homes, but always water enough to irrigate 2,000,000 acres of land and meet the requirements of many millions in cities.

into this reservoir there will be dumped each year 100,000 acre-feet of mud. It has been made large enough to hold the deposit for two centuries without interference with its capacity as a regulator.

The canyon walls at the water level of the river are only 300 feet apart. The velocity of the river's flow through this bottleneck is about 20 feet a second. The upper cofferdam which turns the river into the tunnel will be 80 feet high, and when the river is diverted 1,000,000 cubic yards of mud and gravel will have to be taken out of this space between the two coffers to uncover the rock on which the dam will rest.

Let me quote from the Engineering News Record: "It is the most advanced, the boldest and most thoroughly studied hydraulic enterprise in engineering history. With 5,000,000 cubic yards of concrete, 20,000 tons of structural steel, and over 70 miles of grouting holes, with rock tunnels ranging from 50 to 70 feet in diameter, and 2,000 tons of steel in valies, the structure that is to be set in the path of the turbulent Colorado in a sheer walled narrow gorge at the bottom of an inaccessible desert canyon in the remotest region of the United States constitutes a work ranking with the greatest ever attempted by human hands."

Power for construction is to be furnished by the Southern Sierras Power Company, which will carry 215 miles.

This project, like that of the Panama, has a climate. The summer wind sweeps over the gorge from the desert feels like a blast from a furnace. How to overcome this and provide for the health of workers has had much attention. At the rim of the gorge, where much of the work must be done, there is neither soil, grass, nor trees. The sun beats down on a

broke surface of lava rocks. At midday they can not be touched with the naked hand. It is bad enough as a place for men at work. It is no place for a boarding house or a sleeping porch. Comfortable living conditions had to be found elsewhere, and these are found on the summit of the Divide, 5 miles from the dam—Boulder City, Nevada, just across the Arizona line, laid out by S. R. DeBoer, a noted city planner. The Bureau of Reclamation will spend \$2,000,000 to make Boulder City a comfortable place for workers. A paved highway connects Boulder City with the dam. It is expected that another highway soon will be built on the east side of the river to connect the dam with Kingman, Arizona.

Let us now consider how the money that is to go into this enterprise is to be repaid. This had careful attention from Congress. The law requires the Secretary of the Interior to enter into contracts which in the secretary's opinion, will return all the money spent on the dam with 4 per cent interest within 50 years, and all the money spent on the All-American Canal in 40 years without interest. Contracts approved by the Attorney General, have been made for repayment of the money spent on the dam. It will come from the water supplied cities and towns, and from power already contracted.

The power plant will generate 500,000 horsepower with an uncertain but large amount of seasonal power to be sold during the period of high water in the river. The price of firm power is 1.63 mills a kilowatt-hour, and 0.65 of a mill for each 1000-hour of seasonal power. The power and water income from the contracts already signed will in 12 years bring an income of \$274,593,000. Of this, the United States will receive \$228,769,000 to repay money advanced, with Interest. Arizona and Nevada will receive \$11,223,000. Operation and maintenance will absorb \$16,129,000, and there will be a surplus of \$66,558,000 which will be the net profit of the Government for going into this enterprise, to be disposed of as Congress may hereafter direct.

In the Southwest water is gold. These great sums of money have caused the arid states to recognize the value of flowing water. It is giving rise to a political and economic struggle between the two sections of the country. The tunnels are to be finished in two years, the dam in six and one-half years. Considering its magnitude it has very few elements of uncertainty for the contractor. The Government is to buy and furnish cement and structural steel; the contractor therefor assumes no risk from fluctuations of prices. The four tunnels which will carry the river past the dam during its construction have been so thoroughly prospected by means of diamond

drill cores that contractors know to kind of material to be removed.

The cofferdam is the one hazardous feature of the project. It is to be built according to plans provided by the Reclamation Bureau, and when so built all subsequent hazards of its failure or being overtapped by floods are assumed by the Government. The power machinery is to be provided by the contractors for power. Owing to its size it will be something of a problem to install it, but some of the contractors have for a year been studying the situation and already have designed their equipment. It will have the highest towers of any work ever undertaken and the overhead cables will lift 30 to 40 tons.

The designing engineer of the Boulder Canyon project is known to his associates as Jack Salvage. He has in succession designed the four highest dams in the world: Hoover Dam is simply another step in his progress.

All I can say is it is a dam big dam.

Remembering the demand for fine boxed candies on Mother's Day last year, we have made special effort this year to surpass all previous efforts—by ordering the most tempting packages of sweetmeats for Mother's Day giving. We think we have succeeded. We ask you only to see our window and come in and judge for yourself. Mother's Day Candies in one, and two pound packages—our very best grades of candies.

## Attention! ... Mr. Cotton Farmer

Please read every word of this message it will mean money to you

We want to help you with your problems this season. We want to cooperate with you in your endeavor to raise a better and more profitable cotton crop this year than you have ever raised before.

There has been, as you know, a lot of newspaper editorials throughout the State during the past few years on diversification. They have told you that you can't make money in raising cotton and have urged upon you to plant your acreage in more profitable crops—well, have you done it and are you any better off? We don't think so. It is true that the average cotton farmer has not made

any money in the past few years, but it is also true that the corn and wheat farmer has suffered a like fate—all due to circumstances—all due to conditions. So why not try planting better cottonseed and raise quality cotton for the market. Please do not understand this that we are against diversification, for we are not—it is not our meaning or our desire to create the impression that we are not in accord with diversifying acreage on the farm. We do not urge you to plant more acreage in cotton than you have in the past, but BETTER COTTON.

IT IS A WELL KNOWN FACT THAT THERE HAS BEEN MORE MONEY MADE BY THE FARMER IN THE RAISING OF COTTON THAN ANY OTHER CROP ON THE FARM.

What are you going to do with your cotton acreage this year? A great deal depends on you. Mr. Farmer, as to whether you will reap a harvest of profitable dollars on this year's cotton crop or not, and that's the object of this message which we urge you to read and carefully digest. Here's our proposition.

## We Want to Make a Trade With You

You Getting the Best End of the Trade

THE QUESTION ARISES IN YOUR MIND AS YOU READ THE ABOVE HEADING "WHERE'S THE CATCH? WHAT HAS THIS GIN GOT TO SELL ME? WHAT INTEREST HAVE THEY IN MY WELFARE?"

Here are the answers to these queries. First, there is no catch to this only interest we have is yours and the good there will come out of your accepting our suggestions. We are not making this proposition with any thought in mind of making money off of you. The interest he have in your welfare is that of every citizen in the Southwest, and that is to help the cotton farmer. On this trade we want to make with you, we are honest in our belief that you are really getting the best end of it and we believe that you will agree with us after you have read our entire proposition. WHICH REQUIRES NO MONEY—Here it is:

ONE.

We will trade you one bushel of State Certified A. D. Mebane Estate Cottonseed for three bushels of your prime gin run cottonseed. There are no strings to the proposition. It is a straight trade. NO CASH.

TWO.

We have placed one car of A. D. Mebane seed here and another car is on the way. If you do not have gin run seed for trade you may purchase the A. D. Mebane seed from us at \$1.50 per bushel. DON'T HESITATE. ACT NOW.
