

BAIRD PUBLIC SCHOOL OPENED MONDAY WITH 416 STUDENTS

The Baird Public School opened for the term last Monday morning. The opening exercises were held in the High School Auditorium where a large crowd had assembled. The program was opened with the song America sang by the assembly, directed by Miss Rives, with Mrs. W. O. Wylie at the piano.

Scripture Reading and Prayer, Rev. Thos. McDonel.
Piano Solo, Miss Rives.
Reading, Mrs. Robert Walker
Piano Solo, Mrs. W. O. Wylie.
Supt. Boren made announcements

after which he requested the teachers to come forward to be introduced to the patrons and pupils. There is only one new teacher on the faculty this year, Miss Rives, of Brownwood, who will teach English in the High School. All the other teachers have been with the Baird school from one to twenty-two years and are so well and favorably known that an introduction is hardly necessary.

There was enrollment of 416 pupils Monday, 270 in Grammar School and 146 in High School. The enrollment Monday was short only 7 as compared with the first day enrollment last year when the total was 423 pupils. List of new pupils entering school this term will be given next week.

The Baird school is opening under most favorable conditions this year. It was found necessary from an economic standpoint to reduce the teachers salaries and to discontinue two departments, the business department in High School and Public School Music and Art in the Grammar school, which all regret, but which is much better than to keep up these departments when we could not well afford the expense at this time.

The Baird school is one of the very few schools in the state that is beginning the new term with no overhanging debts and has sufficient funds to meet the expenses of this term.

Coach Daniel, of the Baird High School Football Team: The Baird Bears is delighted with the outlook for a winning team this year. The line up is as follows: B. L. Vines, center; L. C. The men listed above have been outstanding so far in action; however there are some more boys who look like real live material. They are: Joe Hamilton, who can play anywhere on the club; Dean Strickland, who makes a handy man at a guard or half back position; Fred Estes, who is a good guard with one year of experience; John Virgil Boatwright, a fellow who loves the game and looks like a million dollar guard; Ferguson also looks good at the back job; "Jap" Jackson a back, looks good. These men are working hard and look like winners.

Percy King has very kindly consented to perform the duties as reporter of all foot ball games for The Star and the fans will look forward to the report of each game as Percy thoroughly understands the game of foot ball.

School Days

Another school year has begun. More children than ever went to school at one time before, will spend the next eight or nine months laying the foundations for their independent and individual lives. Some of them will learn a good deal. Some of them will not learn very much. The one thing that most children learn in school, and the most important thing that any of them learn is, after all, not what is in the books but how to live.

It has always seemed to us that the real life of the child is his or her school life. During these formative years the child's principal interest centers about school. It is the one terms with all of those around him, place where he can mingle on equal for several hours a day he works and plays in the company of those of his own age. He learns, through the necessary discipline of the schoolroom, to restrain such natural impulses as tend to disorder, but he learns from the contacts with other boys not only the wisdom of non-interference with the rights of others, but the importance of standing up for his own rights. In other words, the most valuable function of the school is to socialize its pupils, to help them to learn how to live in the crowd.

In the old days of big families the children learned those things from their own brother and sisters. Families of eight or ten or more youngsters are not so common in these days and the discipline of the crowd is best enforced and learned in the school atmosphere. And it is becoming more and more essential that our young folks should go out into the world with a better understanding of their place in it.

We think the best schools are the ones in which the pupils are required to do most for themselves and have the least done for them by their teachers and others. All that any system of education can do for any child is to stimulate him to use his own native intelligence. But outside of the curriculum, beyond and above the formal routine of the acquisition of knowledge, far more important is the socializing and civilizing influence of constant association with other young ones of his own age.

New Members Could Control Texas House

New members of the Texas House of Representatives will be able to control that body in the Forty-Third Legislature convening in Austin next January, if they are so minded, a survey of unofficial returns to the Texas Election Bureau showed Saturday.

A check of the Democratic nominees for the lower House showed eighty-five of the 150 members will replace members of the Forty-Second Legislature. Some of the newcomers will succeed Representatives not seeking re-election, but many defeated the incumbents.

In the Senate, nine of the sixteen senatorial places up for election this year were taken by new men. In fifteen districts, the Senators were holdovers. On the casualty list in the Senate were W. E. Thomason, Nacogdoches; C. S. Gainer, Bryan; J. W. Stevenson, Victoria; W. A. Williamson, San Antonio; B. F. Berkley, Alpine, most of them classed as veterans.

Senators and Representatives seeking other posts fared badly. Senator Pink Parrish of Lubbock was defeated for Congressman at Large, and his place in the Senate, Representative E. T. Murphy of Livingston lost out in his race for Railroad Commissioner and Representative Lee Satterwhite of Odessa went down in his contest for a place on the commission. Representative George B. Terrell of Alto was successful in his race for Congressman at Large, defeating Senator Parrish in the run-off. Representative Lawrence Westbrook of Waco was among the group of Congressmen at Large aspirants who went down in the first primary.

Familiar Faces Missing

Some of the familiar faces in the House which will be missing in January are R. M. Hubbard of New Boston, Phil Sanders of Nacogdoches, Sam Hefley of Cameron, A. P. C. Patsch of Fredericksburg, Mrs. Lee

J. Rountree of Bryan and Mrs. Helen M. Moore of Texas City, the Rev. B. J. Forbes of Weatherford, militant dry; Walter Beck of Fort Worth, Victor B. Gilbert of Cisco, Speaker Fred Minor of Denton, not a candidate for re-election, and many others.

Excessive Taxation

We have demanded a lot of service from our government, which we can no longer afford. We have allowed, and indeed encouraged the politician to reward political services to himself personally, and to the party generally, by a place on the public payroll and we have done this largely because we have been told, and believed, that somebody else, and not Don't let us "kid" ourselves any longer with this delusion—the only people who don't pay taxes are dead ones." Benjamin Rush, President, Insurance Company of North America.

And here's a tip for the students who are going away to college. The commercial world has little use for the student who spends so much on his college education that he feels obligated to start at the top when he finally graduates and seeks a place in business. The business world is pretty well overloaded with vice-presidents and executives. It has not been many months ago since the Chase National Bank of New York cut the number of vice-presidents from seventy-five to six and the bank is functioning just the same.

Can You Afford to Do Without Electric Range Superiorities?

The amazing superiorities of modern Electric Cookery are many and varied! . . . And they are so important, to your health and to efficient home-management, that Electric Cookery deserves your serious consideration . . . AT ONCE!

Modern Electric Cookery means more healthful meals—for all the vitamins and food elements are cooked in . . . not boiled away as in old-fashioned methods. Food flavors are sealed in, too—making meals far more tasty and appetizing.

With an Electric Range, food-shrinkage is reduced by more than 20 per cent! . . . And less expensive cuts of meat can be used, with remarkable results, due to the superior cooking method! These advantages mean large cash savings each month!

—And Electric Cookery brings happy leisure hours. The automatic controls do all the cooking . . . you merely prepare your meals and entrust their finished perfection to the scientific accuracy of this remarkable *Electrical Servant!*

You'll also appreciate the coolness and cleanliness of modern Electric Cookery. The heat is confined to its job of cooking, so there's no surplus to make your kitchen unbearably hot . . . and with clean electric heat there are no blackened pots and pans to scour or sooty walls and curtains to clean.

From the standpoints of Health, Convenience, Leisure, Economy, Coolness and Cleanliness—can you afford to do without Electric Range Superiorities? . . .

... The Answer Is "NO"!!

Call us for an individual investigation of your use of electric service, to determine the cost of cooking by electricity in your home. You may be surprised to know there are many cases where electric cookery actually decreases the total of electrical and gas bills.

With Baird Baptist

Sunday was a good day at the Baptist Church. We had two extra good services. Several visitors; one good sister from California; another from Mineral Wells, a niece of Mrs. H. C. McGowen, Mrs. Montgomery. She favored us with a very beautiful solo. Another visitor in the night service a brother, Willis besides a number of our local people who were in the services with us.

We were so pleased to have the teachers back and the new one, Miss Rieves; a very splendid young woman of rare accomplishments, worshiped with us in both services Sunday.

Let me urge all of our teachers to help out in the church work all they can, for they have training that the average one does not have and this increases the need for their help in this part of community life. We count on you Young Men and Women and surely you will not disappoint us.

Next Sunday we want 150 in Sunday School. Won't you help to make up that number?

Some of the attractions we offer in our services next Sunday are: extraordinary good singing, will have special numbers at each service. We invite you to come.

Our Association convenes on Wednesday 21st of next week. Our brethren and sisters from over the county and out, will be here for two days and
