FARMERS UNION TO MEET HERE TUESDAY

Revival Meeting to Begin at Baptist Church Next Sunday; to Hold Services Out in Open

Former Pastor To Do Preaching in Two Weeks Revival

Rev. W. H. Albertson, pastor of the First Baptist Church of Munday, has announced the summer revival meeting to begin at the local church next Sunday. The meeting will continue through Sunday, July 30th, with services being held twice daily, at ten o'clock each morning and at 8:15 each evening. Rev. Dick O'Brien, a former pastor of the Munday church, will do the preaching for this revival. Rev. O'Brien is serving as pastor of the Baptist Church at Stamford and is recognized as one of the leading pastors and evangelists in this section. His messages will be of interest to all who attend the

services, and a great revival is expected under his leadership. Song services will be under the leadership of Mr. Avery Lee of Abilene, who is an able evangelistic singer, and these services are expected to add much to the success of the meeting. Rev. Albertson will open the revival next Sunday morning, preaching at both services Sunday. Rev. O'Brien will arrive here on Monday and will be here for the other services of the meeting. "Services will be held out in the open," Rev. Albertson said, "a place being prepared on the church grounds. A cordial invitation is extended to everyone, both Christian and sinner, to attend the services, and we invite all Christian people to work and pray with us for a stirring revival in Munday during these two weeks."

Dr. Reneau To Give Undulant Fever Tests

Time For Second Test Of Infected Herds Reneau Says

Dr. J. B. Reneau, veterinarian of Paducah, is ready to come to Knox county to make the second undulant fever test of cattle, it was announced Saturday by his father, John Reneau. Dr. Reneau stated it was time to make the second test of herds which were found infected in the first test some three months ago. "Although owners have gotten rid of their infected cattle," Dr. Reneau said, "others in the herd could have contracted undulant fever, or Bang's disease, from infected pens, and it is advisable to make the second test."

Girls Choose Favorites Cream of the Feminine Crop

Beauty and popularity raised these two girls to the height of campus fame at Texas State College for Women recently. Miss Juanita Tallaferro, a Denton senior, was elected the most beautiful student this summer and Miss Evalie Rushing of Lott won the title of most popular. Winners in the annual contest sponsored by the Lass-O, campus weekly, they were presented at a formal prom a few nights after their election. Both girls are active in numerous social and class organizations, and Miss Rushing is president of the senior class.

Back Home— A.C. Brock and Family Return to Munday; Maybe for Good

Feeling very much at home in Munday this week are A. C. Brock and family, who moved back here from Throckmorton last week. "Guess we're back in Munday to stay," Mrs. Brock stated last Monday morning. The Brock family moved to Throckmorton the first of this year, where Mr. Brock was manager of the Chevrolet company there. But they still thought of Munday and of the twelve years Brock put in as salesman for the Moore Chevrolet. So they just ups and moves back! Mr. Brock has his job back with Moore Chevrolet again, and Bill Moore seems plumb tickled to have him back. In fact, everyone gave them pretty much of a welcome "back home." The Brock home in Munday burned shortly before they moved to Throckmorton, and they stated there's a possibility that they'll build back on the same site. So it does look like they plan to be "at home" in Munday for some time to come.

Munday Host To 36th Annual Convention

Forty Delegates And Wives Expected To Attend

The thirty-sixth annual convention of Farmers Union of Texas will be held in Munday next week, with local members being hosts to the visiting delegates. The meeting will be held next Tuesday at the Munday school auditorium. Munday is state headquarters for the Farmers Union, with both the president and secretary residing in Knox county. Peter Loran of Rhineland is president of the organization, and J. E. Edwards of Munday is serving as secretary. Plans are under way for entertaining some 70 or 75 people, including delegates and their wives. It is expected that about 40 out-of-town delegates will attend the convention. Plans for entertainment are being made by J. E. Edwards, secretary, and a committee from the Munday Chamber of Commerce is cooperating. C. of C. committee members are W. E. Braly and Leland Hannah. To Name Officers Mr. Edwards stated the business session would be held, the convention being opened with music by the Rhineland band. Tentative features on the program will be the welcome address of W. R. Moore, response by President Peter Loran, and these will be followed by the election of officers and discussion of other matters pertaining to the organization. Luncheon for visiting delegates will be given at noon in the building formerly occupied by The Hub Store.

Farmers Union Creamery Opens Next Saturday

A new cream buying station will open in Munday next Saturday, according to an announcement made this week by A. T. Voyles, manager. This new station will be known as the Farmers Union Creamery, and is located in the J. B. Williams building which has just recently been remodeled. Both Mr. and Mrs. Voyles will be on duty at the station, and Mr. Voyles states that they will pay top prices for cream and guarantee correct weights and tests. Mr. Voyles is an experienced man in this business, and he solicits the patronage of those having cream to sell. "We want to buy your cream, so your checks will be larger," he said.

Five Births Are Recorded Here in July

Five births were recorded in the Munday precinct during the past month, according to the records of Judge G. M. Bryan, justice of the peace. Judge Bryan stated that these were births which occurred only in this precinct and the law requires that births be registered in the precinct where they occur. The records showed the following births during the past month: Antonio Navaretta, son of Nick Navaretta and wife, Mexicans, born April 11; Paul Halquin, son of Paul and Isabell Halquin, Mexicans, born June 13; son of Mr. and Mrs. Franklin Arthur Ray, born July 6; daughter of Mr. and Mrs. Roy Wallace, born June 5; daughter of Mr. and Mrs. Leo Parker, born June 15.

In Revival—

Rev. Dick O'Brien, above, of Stamford will do the preaching in the revival which begins Sunday at the Baptist church, arriving here Monday to be in charge of the two weeks services. Rev. O'Brien is a former Munday pastor and is well known in this section.

Weather Report

Weather report for week ending July 12th, 1939, as recorded and compiled by H. P. Hill, Munday, U. S. Co-Operative Weather Observer.

	LOW	HIGH
1939 1938		
July 6	75	104
July 7	74	105
July 8	69	108
July 9	79	99
July 10	69	98
July 11	66	97
July 12	68	94

Rainfall to date this year, 10.14 inches. Rainfall to this date last year, 18.71 inches.

Got Grandpa—

Anglers Land "Daddy Of All Drum" At Lake Kemp

A certain Democratic postmaster and a certain Munday barber boosted their record as fishermen last Monday night as they motored to Lake Kemp and met with success! They are Lee Haymes and W. G. "Shorty" Gaffard. The big one didn't get away—this one being the "daddy of all drum." The fish was estimated to be in the neighborhood of two and one-half feet long—and his weight in proportion—if this makes sense. Anyway, Lee and Shorty brought the fish back home, and there's folks here in Munday who will testify to the fact that they caught "Grandpa Drum." We didn't see the fish ourselves!

Runs S. F. Fair

Dr. Charles H. Strub, former co-owner of the San Francisco Seals baseball team and a highly successful sports promoter, is the new Managing Director of the California World's Fair. He has been instrumental in bringing many sparkling new shows to Treasure Island as the Fair speeded up in every department for the big summer rush of visitors.

Eleven Knox County Youths CCC Enrollees

Among 173 of Area to Be Selected For CCC Service. Eleven Knox county boys were among the 173 youths of the Wichita area for supplementary enrollment in the CCC on Friday of last week. Of the total, 150 boys were to be assigned to Colorado camps and the remaining 23 to camps at Lamona and Perryton, Texas. Points of assignment for Knox county youths was not announced. The youths were scheduled to leave by train for the camps on last Saturday. Included in Knox county's quota of enrollees were Thelton Durwood Brown, Carl Maxwell Flowers, William Fred Hendrick, Hamilton Verdel Henson, Hubert Luther Hobbs, Robert Lee Humphreys, Earl Jackson Jones, Boyd Denzil Moore, Houston Hoyte Murry, George Edward Turner and Charles Donley Sipes.

Relatives Here To Visit Munday Man in Hospital

Mr. and Mrs. Walter Gatlin and two sons, Edward and Harold, and Mr. and Mrs. Lloyd Legon, all of Eldorado, Okla., were the Sunday guests of Mr. and Mrs. G. A. Hudleston of Munday. Mrs. Gatlin is his daughter and Mr. Legon is Mrs. Hudleston's brother. While here they spent the day at the Knox City hospital with Mr. Hudleston, who has been suffering from a broken leg and also a serious operation. Mr. Hudleston has been seriously ill for the past week, and his many friends wish him a speedy recovery.

Local C. of C. Meets Thursday At Breakfast

Members of the Munday Chamber of Commerce held its regular monthly meeting Thursday morning with a breakfast at the Terry Hotel. Only ten of the 44 members were present. Mrs. Louise Ingram, secretary, read the minutes of the last meeting and gave a financial report of the organization, accounting for all money spent during the past two months. Plans were discussed for cooperating with the Farmers Union in entertaining the visiting delegates to the state convention here next Tuesday. The Chamber of Commerce will cooperate with the local organization members in giving visitors a dinner Tuesday at noon. Business men were urged to attend the dinner and make visitors feel welcome.

Lions Discuss Plans For New Year's Work

Discussion of plans for the new year's work held the attention of the Munday Lions Club at their regular meeting Wednesday at the Terry Hotel, with Lion President Haymes in charge. Various members of the club spoke briefly on their desires to have the club affiliated with some worthy project throughout the year. At present there is no project under way, and the only one pointed to as a permanent one is that of furnishing glasses to worthy children whose sight is impaired and who need them and are unable to buy them. This is a work that is sponsored as a major one of Lions International. It was suggested that each committee chairman call his committeemen together and discuss their various activities during the year. Entertaining and varied programs are being planned for each luncheon day. Lion Don Ferris was recognized as a new member of the Munday Club.

Livestock Sale Hits Stride Here Last Tuesday

400 Head of Cattle Go Through Ring For Good Prices

Showing a marked increase in the number of cattle sold, the weekly livestock auction sale hit a rapid stride here last Tuesday after having observed Tuesday of last week as a holiday. Fifty consignors sold 400 head of cattle which brought good prices from the 30-odd buyers. Price ranges in Tuesday's sale were: common cows and calves, from \$35 to \$50; good whiteface cows and calves, from \$57 to \$65; common calves, \$15 to \$26; good calves, 30 to \$45; good Hereford bulls, \$65 to \$87.50; common Jersey bulls, \$35 to \$56. Sellers of livestock included Claude Vance, Ferris Mobley, Clarence Jones, Clyde Hendricks and J. A. Hendricks of Goree; R. E. Hutchinson, S. E. Youngblood, and G. W. Montandon, Knox City; Joe Bellinghausen, Bob Adams, George Steinbach, Tom Voss, Edgar Jones, John Albus, C. H. Giddings, J. A. Caughran and C. R. Elliott, Munday; Barney Welch, O. M. Olsen, O. A. Hising, Frank Navratil, Vera; Earl L. Burgess, E. A. Burgess and J. O. Cure, Truscott; Velve Bowman and G. A. Newton, Weinert; Luther Kennamer, Clyde Burnett, League Ranch and Grady Hudson, Benjamin; Jim Cook, Crowell; Ira Grinstead and V. L. Adkins, Rochester; Luther Hightnote and Jack Ratliff, Haskell. Buyers included G. S. Snappa, J. R. King, C. L. Mayes, H. A. Pendleton, Joe Voss and C. R. Elliott, Munday; Giles Kemp, Haskell; J. M. Bradbury and C. A. Hull, Knox City; Harry Portwood and Perry Woods, Seymour; Jim Cook and Roy Steel, Crowell; Lewis McAlpine and Charles Ready, Granite, Okla.; W. M. Trimmer and John Trimmer, Rochester; Clyde Patton, Goree and John Mayfield, Weinert. Jim Reeves of Haskell was a business visitor here Wednesday.

Clover Farm Store Observes Anniversary

Sebern Jones, owner of the local Clover Farm Store, announces today his second anniversary sale. The Clover Farm Store opened the Lounsbury Division two years ago. "We know of no better way to express our appreciation to our many customers and friends for their loyalty in the past than to invite them to join us in celebrating our anniversary," Jones said. "We have made our store ready for this event by restocking our shelves with merchandise bought especially for this sale, and these many savings will be passed on to you. We cordially invite you to visit us and help us in this anniversary celebration."

Dublin Man In Charge of Local Blacksmith Shop

F. E. Dendy, formerly of Dublin, announced this week that he has taken over the blacksmith shop located in the old Stodghill building. Mr. Dendy had been employed there for over a month before assuming management of the shop. Mr. Dendy announced that Kiley D. Bell, well known Munday blacksmith is employed at the shop. Mr. Bell has many friends in this section whom he has served in the blacksmithing business for some time. The shop is equipped to do blacksmithing, acetylene and electric welding and to build trailers, stork cutters and other farm equipment. Mr. Dendy solicits the patronage of Knox county farmers.

George Spann Given Award For Sales Record

George C. Spann, of Abilene, a former employee of the West Texas Utilities Company, has been awarded a leather traveling bag in recognition of his work for the Frigidaire Corporation. Mr. Spann received the bag at a recent meeting of the company representatives at Dayton, Ohio. His sales percentage was 110 per cent of the April and May quotas set, and was the highest percentage of any employee of the Frigidaire Corporation. Mr. Spann was reared in Munday and is well known here. He still makes occasional visits with relatives here, and also meets many of his old-time friends when in Munday. Paul Pendleton was business visitor in Abilene last Wednesday.

M. Boggs Family Has An Enoyable Vacation Trip

A vacation trip of over 2,000 miles without a flat tire or car trouble of any kind—that's the enjoyable vacation which Mr. Boggs and family had, returning home recently. The trip carried them to the Rio Grande Valley and on into Old Mexico and along the coast. They were accompanied by Mrs. Boggs' mother, Mrs. J. B. Nellums, and son, Bill Nellums, both of Haskell.

Attend Funeral Of Buckman Baby

Misses Delores Campbell and Lorene Newsum left Wednesday for Clarksville, Texas, where they will attend funeral services for the two-year-old son of Mr. and Mrs. A. L. Buckman of that city. The child died early Wednesday morning. Mr. and Mrs. Buckman are well known in this area. Mr. Buckman having been employed for some time as pharmacist at the Rexall Store here, and prior to that time had served in the same capacity in the Rexall Store at Weinert. They left this city for East Texas about two years ago.

Kingsley Davis And Wife On Visit Here Wednesday

Kingsley Davis, son of Dr. Joe Davis, and Mrs. Davis were here Wednesday on a brief visit with old friends. Mr. and Mrs. Davis live at State College, Penn., where Mr. Davis is a professor of sociology in Pennsylvania State College. They were enroute to Kendall County to visit Dr. and Mrs. Davis.

HERE FROM CALIFORNIA

Mr. and Mrs. Homer Parker and little son of Taft, Calif., and Mrs. Parker's sister, Miss Doris Labourde of Bakersfield, Calif., came in the first of this week for a visit with Mr. Parker's parents, Mr. and Mrs. C. R. Parker.

"What a Man Does For Himself Dies With Him—
What He Does For His Community Lives On and On"—

MEN RIDE THE CLOUDS (From the New York Times)

Now that an airplane has flown non-stop from Moscow across the North Pole to California, and another has flown non-stop from Berlin to New York and back, it might be in order to point out the nature of the machine with which man has performed these splendid feats.

Berlin is one of the capitals of fascism, and Moscow is the world capital of communism, but the airplane was invented by free men living in the ways of democracy. We might even put it more boldly, not to say brashly. Communism and fascism differ only to degree in their contempt for capitalism, but the airplane was invented by men living in a capitalist society.

And this dazzling triumph was attained under a capitalistic competitive democratic system.

These things will bear recalling in a time when even in the democracies we hear so much of the failures of democracy. We hear so much of laissez-faire, competition, selfishness, poverty, general breakdown, that too often we seem to be confessing unrelieved failure and pleading only for clemency. But this is the social system under which men have come to ride the clouds.

CONFESSION NOT ENOUGH

Having been caught sucking eggs, the National Labor Relations Board quite condescendingly announces (with reservations) that it will go and sin no more.

It proclaims modification of certain rules it arrogated to itself as long as it could get away with them, and to which it suttornly clung until pushed by public sentiment and congressional investigation.

The whole NLRB performance has been a striking example of a bureaucracy failing to understand that ours is a government of laws, not of men. It has performed like the constable who thinks a search warrant is a lot of silly circumlocution.

That it should at this late date deign to yield in an effort to prevent amendment to the law under which it operates amounts to nothing less than an insult to a Congress that it set up.

Congress should immediately write into that law the concession the NLRB has proffered under fire, and not leave up to the NLRB the privilege of changing its mind; and to write also such other changes as are indicated by the inquiries which brought this begrudging concession from the board.

The Wagner Act should be made to function as its author intended. With it should be dovetailed a mediation system which will assure continuity instead of chaos in industry. That is a definite and obvious duty of Congress before it adjourns.

And the NLRB should be taught, by amendments to the law it administers, that Congress, the creator, and not the board, the creature, is the policy-making bodies of this nation; that statutes rule, not bureaucrats and whims and prejudices and predilections.

AMERICAN NEUTRALITY

Happily, within the last few weeks, the shadow of war has lessened. The visit of the King and Queen of Great Britain to the United States and Canada, commanded front page space and shifted attention from rumors of impending conflicts.

Why should we become involved in another European strife?

Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalry, interest, humor or caprice?

That is the sum and substance of the question propounded by George Washington, "The Father of our Country." Such was the view of Thomas Jefferson, when, addressing the Congress in 1803, he declared:

"We should be most unwise, indeed, were we to cast away the singular blessings of the position in which nature has placed us, the opportunity she has endowed us with of pursuing, at a distance from foreign contentions, the paths of industry, peace and happiness, of cultivating general friendship and of bringing collisions of interest to the amprage of reason rather than of force."

Three things are necessary to keep us out of war. A sound foreign policy, an impregnable defense, and a policy of strict neutrality.

"None of us can forget that our heroic effort 20 years ago to aid the cause of world democracy ended in the greed and avarice, that, like ghouls, sat at the council table at Versailles. And we know that one of these so called democracies has since yielded itself to a virtual dictatorship.

Our neutrality legislation should declare an absolute embargo on exportation of arms, munitions and implements of war to belligerents or to states involved in civil strife; should prohibit American vessels carrying goods and passengers to belligerent powers and should provide that a State of War exists when so declared by any foreign belligerent or when the President or the Congress finds an undeclared state of war between two or more foreign states.

In the language of the late President Theodore Roosevelt, "Speak Softly and Carry a Big Stick."

not of.—Goethe.

A PROMPT REPLY NEEDED

Testimony before the Senate Committee considering proposed amendments to the Wagner Labor Relations Act has raised several points on which light should be thrown in the public interest.

Here are the points as presented in the testimony:

The Board claims it is not infringing the right of free speech. If this is true, the Board should not object to a clear provision in the Act preserving that right against possibility of abuse by future boards.

"The Board says it has no prejudice against independent unions, unaffiliated with the CIO or the AF of L. If this is true, it should not object to the amendment by Senator Ellender, which, under those circumstances, is merely declaratory.

If the Board does not in any way discriminate against men because they have exercised their right to remain unaffiliated with unions, there should be no objection to stating the right to join or not to join, as does the Norris-La Guardia Act.

If the Board is complying with fair rules of procedure, fairly applied in conducting investigations and hearings, and holding elections, it should not object to having those rules laid down for the guidance of all concerned, including future boards.

If the Board accepts fully the decisions of the Supreme Court in the *Fansteel* and *Columbian* cases, it should, in the interest of labor, prefer to see the rule of those decisions written into the Act, so that future boards may not give them unwarranted interpretations.

What will the Board answer to these valid questions?

TIME TO WAKE UP

Recently the American Institute of Public Opinion, noted for its fact-finding accuracy, started asking Americans the question: "Do you happen to pay any taxes?"

It is an established fact that nearly everyone who receives money from any source or buys even the barest necessities of life pays out a substantial part of his or her income in the form of hidden taxes. Yet 25 per cent of those answering the above question seemed sincerely to believe that they were not helping to pay the mounting cost of government.

Sadly enough, most of those who were not conscious of paying taxes were numbered in the group on which proportionately the burden falls most heavily—those earning less than \$20 a week. The man or woman earning that amount pays, on the average, slightly over a hundred dollars a year in taxes.

The common delusion brought into the spotlight by this survey is undoubtedly one of the chief reasons why heavy government spending, waste, and inefficiency so seldom encounter concerted opposition from those most affected. And one thing at least is sure: there can be no "aroused taxpayer" so long as the individual supposed to play that role is not even conscious of being taken for a spending sleigh-ride.

The first du Pont manufacturing enterprise in America was a small powder plant established largely because of encouragement given its founder by Thomas Jefferson in 1802. The first run of black powder was made in 1904.

Mrs. Eveline Lowe, who is the first woman chairman of the London county council, wishes to be addressed as "Mister Chairman" and "Sir," instead of by feminine designations. And being the "chairman" she probably will have her way.

The tomato originated in America and was long regarded as a poisonous plant in Europe. Today there are more than a hundred recognized improved varieties.

The Department of Agriculture reports that 4-H club enrollment reached a new high in 1938, with 1,286,029 boys and girls listed as members in 74,594 local 4-H clubs.

Ralph Price, field man at large, estimated approximately 85 per cent of all Texas farm and ranch families will receive benefit payments for the conservation of agricultural resources in 1939.

ENOUGH TO MAKE ANYBODY DIZZY

Gems Of Thought

Fidelity finds its reward and its strength in exalted purpose.—Mary Baker Eddy.

Think not of rest; though dreams be sweet, Start up, and ply your heavenward feet.—John Noble.

Who digs hills because they do aspire, throws down one mountain to cast up another.—Shakespeare.

Act well at the moment, and you have performed a good action to all eternity.—Lavater.

Faith, mighty faith, the promise sees, And looks at that alone; Laughs at impossibilities, And cries it shall be done.—Charles Wesley.

MORE USES FOR COTTON

It is estimated that 99 per cent of the world's population uses cotton in one form or another, and still the search for more uses for cotton goes on.

This time F. E. Lichte, cotton gin specialist of the Texas A. & M. College Extension Service, comes up with the idea that increased consumption in already established lines is needed.

"Insist on cotton materials instead of cotton substitutes," he says. "We know of a silk producing nation whose laws prohibit its people from wearing clothes containing cotton. Of course, we want nothing like that, but we can use more cotton."

Cotton cloth is an excellent binder for roads where concrete is costly. Around 20,000 miles of macadam roads are built each year and another 45,000 miles repaired annually. Use of cotton cloths accounts for seven bales per mile.

Cotton fabricated houses are being tried out now, Lichte says. A five-room cotton house, with steel construction, complete, without central heating plant runs to around \$2,200.

Cement in returnable cotton bags is cheaper than cement in paper sacks, asphalt treated cotton is being used as ditch and canal linings; cotton mats for curing concrete roads have been made to replace the usual method of curing by ponding. And so it goes.

STUDY LISTS POINTS HAMPERING INDUSTRY

Cleveland.—The average American industrial company has plans for spending close to \$100,000 for plant improvements, but is going to spend only \$16,542 of that amount because of unfavorable conditions, according to a survey by Steel.

The magazine queried companies representing a typical cross-section of America industry, and more than two-thirds of the respondents said they had plans for improvement or expansion. Total expenditures would come to \$7,411,000. Of this \$1,217,500 or 16.4 per cent, is to be spent without delay.

The remaining amount was held up, the companies said, because of various unfavorable factors, of which the more important were: unfavorable government policies, an unfair labor law, an unsound tax system, high taxes, uncertainty over the immediate outlook for business, and inability to borrow money.

Of the 43,000,000 motor vehicles in use in the world today, 82 per cent are of American manufacture.

THEY SAY!

"The present costs of government has become a cancerous growth in the economic body. In the fiscal year 1936 the total expenditures of all governments were 17 billion dollars. That was \$139 for every person in the country, \$650 for every family of five. It was a fourth of the national income for that year. You get some idea of the meaning of these statistics when you realize that the whole country works three months in every twelve for the government and lives off what it can make in the other nine."—Neil Carothers, educator, writer and economist.

"Free enterprise, representative democracy and religious freedom together are the tripod on which human freedom depends for support."—H. W. Prentiss, Jr., President of the Armstrong Cork Co., Lancaster, Pa.

"Not since the depression began is cooperation between business and government more vital than it is today."—Lewis H. Brown, president of Johns-Mansville Co., New York.

"The man who has no other goal than his own happiness is a bad man. He whose goal is the good opinion of others is a weak man. He whose goal is the happiness of others is a virtuous man. He whose goal is God is a great man."—Count Leo Tolstol.

SAYS BUSINESS AIDS PROGRESS AND PEACE

Endicott, N.Y.—Business was hailed as a great civilizing force and an ally of peace by Dr. Vergil Reed, assistant director of the United States Census, in a speech here recently.

"I have always believed in business as the basis of international friendship," Dr. Reed declared.

"I still think that in spite of all the involvement of political forces and ideology that business itself is the greatest single civilizing force, and that, therefore, business men have a rightful claim to be known and numbered among the civilizers of the world.

"I cannot see where the need

for peace from a business man's standpoint can ever be questioned. Always any great war robs him of much more than he gains in the way of business. Besides, it robs him of values of another character, which do not fall within the field of business, but are even more costly."

COTTON IN THE HOUSEHOLD

When one realizes that a fifth of all the cotton consumed in this country is consumed in what we might call household uses, it is apparent that the use of cotton in the homes is an important item. This means that 1-4 million bales of the 8 million bales consumed annually goes into household articles. On the basis of average production it would take 200,000 farms to produce this amount of cotton and 12,500 average size freight cars to haul it.

Most housewives speak of white goods as linens and at one time sheets and towels were made of pure linen. In Brittany at one time a well-filled linen chest was recognized as a leading item of family wealth. In its early periods of development, the cotton industry was subject to much adverse criticism for the displacement of linen. It was considered as a substitute for linen as well as wool.

In the manufacture of sheets and pillow cases approximately one quarter million bales are required each year. Nearly 200,000 bales are required for the piles of towels and bath mats we have in our linen closets. A considerable amount of cotton is used in mattresses, tickings and mattress covers. In our draperies, curtains and tapes-tries we find many pounds of cotton used.

There is hardly a room in the house that does not use some cotton. In the kitchen we find cotton in the dish rags, pot holders, oil cloth, mops of all kinds. The clothes closets with their cotton slipper racks, the shades of floor lamps and reading lamps, not to mention the slip covers in the living room, take a tremendous amount of cotton each year.

For the families in the income group of less than \$500 to \$5,000 per year the value of cotton consumed ranges from \$1.65 for the less than \$500 group to nearly \$29.00 for the \$5,000 families. On the basis of one-fifth for household uses about 5 pounds would be consumed per capita each year.

Despite the displacement of much cotton by rayon and silk, rayon only accounts for about 6 per cent and silk only about 1-2 of 1 per cent of the materials used in the manufacture of household articles. Wool is used in blankets, rugs and some draperies, and many of the heavier items.

American housekeepers do contribute most bountifully to the welfare of cotton growers and of all persons who are engaged in manufacturing or handling cotton products.

HOSPITALS SIG BUSINESS

Hospitals rank fifth among big business in the U.S. They are estimated to have \$4,000,000,000 invested in plants; an annual payroll of \$400,000,000 and a yearly operating cost of \$850,000,000.

IT PAYS TO ADVERTISE

D. C. EILAND, M.D.

PHYSICIAN & SURGEON
Office Hours 8 to 12 and 3 to 6
MUNDAY, TEXAS

A salesman once managed to talk Mrs. Coolidge into buying a large medical volume for family use. She did not tell her husband anything about it, because she came to feel that she had paid too much for the book.

Sometime later, she thought she would pick up the tome and glance through it. Upon opening it she read the following on the fly leaf: "Don't see any recipes for curing suckers—Calvin Coolidge."

CORRECTING THE BEE

Traveler: "See here, if you're the owner of these bees, I want you to know one of them stung me."
Owner: "Well, that's too bad. Just point out the bee that did it, and I'll see she is severely punished."

LONE STAR GAS SYSTEM FACILITIES SERVE THE HOMES AND INDUSTRIES OF 299 TOWNS AND CITIES IN TEXAS AND OKLAHOMA

L. B. DENNING, President
LONE STAR GAS SYSTEM

Lone Star Gas System's dependable facilities for transporting natural gas through the company's main lines include giant compressor engines totaling more than 35,000 H.P. capacity.

Today, through its modern facilities, including 4,700 miles of interconnected pipeline transportation system paralleling old trails blazed by early settlers, Lone Star Gas System brings to more than 300,000 homes and industries a modern, dependable fuel service that stands among the foremost in the world.

The 4,700 miles of interconnected main pipeline system, stretching across 116,000 square miles of territory, is supplied from more than 1,000 gas wells located in 46 separate fields.

MCCAMEY

LONE STAR GAS SYSTEM

- ★ 4,700 MILES OF TRANSPORTATION PIPELINES
- ★ 1,000 GAS WELLS IN 46 SEPARATE GAS FIELDS
- ★ 3,000 TRAINED AND EXPERIENCED EMPLOYEES

As we reach our thirtieth birthday, we are mindful of the responsibility that goes with our job. We renew our pledge to the policy that has guided us through the years—"First, find out what is the right thing to do . . . then, what is the right way to do it."

We know that homes must have heat and that many depend entirely upon our service. If we should fall down on the job, there would be inconvenience, discomfort, suffering in many

homes. We realize that, even though our customers seldom think about it, they have confidence in our ability to render dependable service and rely on it being available instantly and without interruption day or night, throughout the years, regardless of the weather. We know it is the responsibility of each of us of Lone Star never to fail that trust.

**30
YEARS
AGO**

In 1909 Lone Star Gas Company pioneered the development of natural gas in Texas. The first natural gas pipeline, 126 miles long, from Petrolia, Texas, to Fort Worth and Dallas, was an epochal event in Southwestern progress and indicative of a greater growth and development to come.

Society

Afternoon Party Given Thursday For Waco Visitor

An afternoon party of eighty-four was given by Mrs. Chester Bowden on Thursday, July 6, at 3:30 o'clock honoring her sister, Mrs. O. B. Paulstel of Waco.

The entertaining rooms were tastefully decorated with flowers. After an enjoyable afternoon, the hostess served a refreshing ice course to the following guests:

Mesdames R. B. Bowden, Deaton Green, Oscar Spann, E. W. Harrell, R. B. Bowden, Ima Reese, L. M. Palmer, Aaron Edgar, Leland Hannah, Riley B. Harrell, M. L. Harwood, W. G. Gafford, Erin McGraw, Wallace Reid, S. A. Bowden, E. W. Brown and T. A. Brown of Knox City, and the honoree, Mrs. O. B. Paulstel.

Mr. and Mrs. Grover Pool visited in the home of her parents, Mr. and Mrs. C. W. Armstrong, recently. Mr. and Mrs. Armstrong and son, Billie Frank, accompanied them to Hobbs, New Mexico, where they visited with Raymond Armstrong. From there they went to Weatherford to visit other relatives.

Arthur Smith, Jr., and Eern Lowe made a trip to the Pecos country the first of this week to buy cattle.

Sunshine Circle Meets July 3rd For Outlook Program

The Sunshine Circle of Methodist Missionary Society met in its regular business and social meeting on the evening of July 3, with a very interesting program from the World Outlook magazine being given.

After the program a short business session followed, with the following members answering roll call: Miss Merle Dingus, Mrs. Bess Porter, Mrs. Levi Bowden, Mrs. Aaron Edgar, Mrs. Cecil Cooper, Mrs. Joe Bailey King, Mrs. Evelyn Clayborn and the hostess, Mrs. Red Leathers.

Due to the hot weather, it was decided to adjourn until September 1, excepting for a business and social meeting the first Monday in August.

Kitty Redwine Is Hostess To Pioneer Circle

Kitty Redwine entertained the Pioneer Circle on July 6th. Circle members enjoyed an hour of friendly chatter and also admired several beautiful quilts. The guests were then called to order and the report was given.

Present were Nancy Edwards, Dora Wardlow, Edith Russell, Nan Dingus, Allie Campbell, Hettie Roberts, Lou Simpson, Emily Carden, Annie Russell, Verna Nelson, Mary Zeisell, Nancy Nicholson, Nancy Sweatt, Bertha Sweatt, Maud Harrell, Lizzie Brownfield, the hostess and one visitor.

The circle will meet in the home of Maud Harrell on Thursday, July 20.

Representative Courtney Hunt of Haskell was a visitor in Munday one day last week.

Mr. and Mrs. Lee Snailum of Benjamin were visitors in the city last Saturday afternoon.

Mrs. Bob Purifoy and children returned home Monday night from a ten-day visit with relatives in Anson and Stamford.

Mrs. Don Phillips and Mrs. Lonnie Offutt are among the Knox county ladies who are attending the A. & M. Short Course at College Station this week.

Casa Manana Beauties Welcome Car

When the 27,000,000th Ford passed through Texas a few days ago, the historic car was given an enthusiastic welcome in Fort Worth by a group of Casa Manana beauties who will appear in the musical

Appreciation of Grady Roberts' Service in Legislature Expressed By Tom Beauchamp, Sec'y of State

Recalling his devotion to duty and his untiring efforts on behalf of the State of Texas and his constituents, Tom L. Beauchamp, secretary of state, recently wrote to Representative Grady Roberts expressing his appreciation for the type of service rendered during the Forty-Sixth Legislature.

Mr. Roberts, who is serving his first term as representative of the 114th district, was the only one of the 150 house members who answered every roll call and who voted on every bill coming before the house. It was this type of service that attracted attention of the secretary of state and prompted his letter of commendation. Mr. Beauchamp's letter follows:

Honorable Grady Roberts, Munday, Texas:
Dear Mr. Roberts:
I am glad I had the privilege of telling you personally how much I appreciated your service to the State of Texas as a member of the Forty-Sixth Legislature, but I cannot refrain from again expressing it in this manner. Your devotion to duty; your unselfish and untiring efforts on behalf of the State of Texas as a whole and your constituents in particular is characterized by a very few men of this busy age and I wish you to know my appreciation for that kind of a Representative.

PLEASANT VIEW

Messrs. Loyd and Sammie Griffith were called to Abilene Thursday to be at the bedside of their father who was seriously ill, and who died late that afternoon. We extend to them our sympathy.

Mr. and Mrs. C. C. Cunningham and sons, Jim, Melvin and Len, attended the funeral of Mr. Griffith at Abilene Friday. He was a brother to Mrs. Cunningham.

Mr. and Mrs. Bob Gaines and Miss Florence were guests of Mr. and Mrs. G. C. Conwell Sunday.

James and Robert Boynton of Springtown, Texas, visited Harry Lynn Cowan last week. They are former residents of this community.

Mr. and Mrs. C. H. Suggs of Burk Burnett spent the past week end with relatives in this community. Arledge Suggs returned home with them for a week's visit.

Mrs. E. B. White and children returned to their home at Haskell Monday night after a few days visit with her brothers, C. F. and R. F. Suggs.

Cecil Suggs visited H. L. Chamberlain at Ferris Ranch Sunday.

A niece of Mrs. Elmer Melton was drowned Friday and was buried at Haskell Saturday. We did not learn the details.

Messrs. Elmer Melton and Ray Matthews returned home Sunday from Hereford, Texas, where they had been cutting wheat.

Bertie White of Haskell spent last week with Arledge Suggs. Mr. and Mrs. C. F. Suggs visited Mr. and Mrs. C. H. Suggs in Burk Burnett Friday and Saturday. Mr. Mart Booe is quiet ill at this writing.

RIGHT OUT OF THE AIR

By EARLE FERRIS

ELEANOR PHELPS, star of the CBS serial, "The Life and Love of Dr. Susan," has one unfulfilled ambition—she wants to see an operation. All her doctor friends have refused to arrange it, fearing that the experience might be too much for her.

Bob Burns is experimenting with a new musical instrument he calls the "whatzit." It consists of a wire, a zinc tub, and a long handle which changes the tone. As soon as the Sage of Van Buren becomes proficient in manipulating it, he'll try the device out on the Music Hall audience.

Raymond Paige and his 99 men are heard regularly on CBS on Friday nights now, but the girl is a different one each week. Outstanding

When it comes to legal questions, Joe DuMont, radio's "Josh Higgins of Finchville," has the answers. His education includes a law course, taken to acquaint him with the rights and limitations rather than with an eye toward future practice.

Katherine Stevens is the new Cinderella girl of radio. Discovered by a writer on Radio Guide magazine, who told Director Ed Wolfe

among the guests Paige presents with his unusual orchestral arrangements is Mary Eastman, opera star, pictured above.

Peter Van Steeden, maestro of "For Men Only," receives more applications for employment than perhaps any other orchestra leader in radio. Peter explains this on the grounds that on "For Men Only" the musicians get a chance to meet outstanding celebrities, and on his other show, Fred Allen's, work becomes fun.

Supervision of production on the Kate Smith Hour is sharply divided between Ted Collins and Kate Smith. When the music is being shaped up, Collins seldom has anything to say. In preparation of the dramatic spots, Kate leaves everything to her partner, Ted.

Jane Froman, shown below, has returned to the air as star of that Sunday night program heard at 7:30 p. m. E. D. S. T. over CBS. She has just come back from a long vacation

With kindest personal regards and trusting I may have the pleasure of seeing you when you are in the Capitol, I am
Yours very sincerely,
TOM L. BEAUCHAMP
Secretary of State.

O'Daniel Slashes Appropriations...

Appropriation bills received Governor O'Daniel's "cutting ax" this week, as Texas' governor slashed them to the tune of 5 million dollars and state government departments and other institutions suffered the severe blows.

Governor O'Daniel, in winding up work of the recent legislative session, Tuesday slashed \$5,383,616 from appropriation bills totalling \$77,455,500 to finance the government for the year beginning September last.

State departments saw their appropriations of \$25,088,066 reduced by \$2,750,000. A fifty per cent

cut in the highway department was made, and other departments suffering blows from the governor's ax were the comptroller, agriculture, public safety, labor and game, fish and oyster commission.

Approximately 1,000 state employees feared loss of their jobs as a result of the slash.

Appropriations for approximately \$14,360,000 for eleemosynary institutions were trimmed \$1,825,000 and those for colleges totalling \$17,320,000 were reduced \$475,000.

In addition to the appropriations for eleemosynary institutions, colleges and departments lopped off in

part, the governor also vetoed the entire appropriation for miscellaneous claims, a hodgepodge of acknowledged state obligations of wide variety.

The other major appropriation, \$4,844,000 for the judiciary, \$13,650,000 for rural school aid and \$1,954,000 for vocational school aid, escaped the governor's blue pencil.

In a statement, Governor O'Daniel declared budget recommendations of the state board had been reduced \$13,104,206 as a result of efforts of house and senate appropriations committees and himself.

The budget appropriations for

the new biennium, he said, would total \$56,148,062, compared with \$61,547,773 for the current two-year period, a reduction of \$5,399,711.

The governor said he had approached the bills with the realization the state's general operating fund had a deficit of approximately \$20,000,000 and because of the condition he had eliminated some items from the educational and eleemosynary measures which he would have allowed to stand if more money had been available.

FIRST BAPTIST CHURCH

Will it be just a meeting? Or shall it be a REVIVAL? It will begin next Sunday morning, Bro. Dick O'Brien of Stamford will be here and preach his first sermon in the service Monday evening. He needs no introduction to Munday. We are happy that he is coming. Bro. Avery Lee, the song leader, is coming well recommended. You will rejoice in their fellowship, and cooperate with them in their leadership.

It is a serious time for a church to enter into a Revival campaign. No church, no individual in the church, is ever the same any more after the services are over. Either we rise on spiritual tides of grace and power to higher planes of service and deeper feelings of consecration and zeal, or else we sink to lower levels of inactivity, coldness and lukewarmness. A revival is an epoch marking experience. We urge the attendance of every member of the church, and heartily welcome those of other faiths, and those of no faith. We will do our best to make you physically comfortable, and spiritually uncomfortable until we have all moved up to higher ground in the Lord's service.

"Lord, lift me up and let me stand. By faith, on Heaven's table-land, A higher plane than I have found; Lord, plant my feet on higher ground." The services will be at 10:00 a. m., and 8:15 p. m. The services Sunday night and each night thereafter will be out in the open with plenty of room for all.

W. H. Albertson

THE CHURCH OF CHRIST

J. CLEO SCOTT, Minister
Regular Sunday morning Bible class at 10:00 o'clock. Let's increase our number. Won't you come and study with us? Preaching and communion at 11:00. Subject for the morning shall be "Giving."

The evening service will begin at 8:30. Subject, "Pay What Thou Vowest."

The meeting at Weibert is progressing nicely. The preaching is being done by Brother Malphers and me. The subjects for the rest of this week are as follows: Thursday, "Conversion according to the Bible"; Friday, "Salvation by Faith"; Saturday, "Repentance"; Sunday, "The New Birth." The meeting will continue during all of the week ending July 23rd. The midweek singing will be eliminated in order for everyone to attend the meeting in progress. The Monday Bible study will meet at 3:00 o'clock. Come and study Paul's letter to the Romans with us.

Lions International Convention To Be Held At Pittsburgh, Pa.

Chicago, Illinois.—Climaxing its greatest year of expansion, from July 1, 1938 to June 30, 1939, Lions International will hold its 23rd annual convention in Pittsburgh, Pennsylvania, July 18-21 with a four-day program of business and entertainment. Advance registrations are the largest in Lions convention history, and attendance is conservatively estimated to pass the 12,000 mark.

In the past twelve months, under the presidency of Walter F. Dexter, state superintendent of education for California, the International association of Lions Clubs chartered 557 new clubs and registered a net increase in membership of nearly 20,000, making it the largest service club in the United States and Canada, with nearly 3,500 clubs and 125,000 members.

The annual convention to be held in Pittsburgh will celebrate this year of expansion. The only comparable year in the past 23 years was 1937-38.

Delegations to the convention will arrive on special trains, by motorcade, and quite a number of airplanes. The president of the Lions Club of Ponce, Puerto Rico, will fly his own plane to Pittsburgh for the four-day convlave.

Special trains are scheduled from Texas, California, New York, New England, Florida and Illinois, and most of the specials will carry high school bands with them to participate in the annual juvenile band contests to be conducted as part of

the four-day program. An unusual feature of the convention program is to be a "lion beauty parade"—of real, live four-legged lions. The entries will be youthful, not more than eight months of age, and there will be eight of them, coming from as many sections of the country.

"The beauty parade" is being conducted in conjunction with Metro-Goldwyn-Mayer pictures, and will climax a two-month nationwide hunt by Lions Clubs for a lion cub to serve as understudy and eventually replace M-G-M's famous Leo. The winning cub will be signed up immediately by M-G-M, given star rating, and take to New York for Lions Day at the World's Fair, July 22. From there he will be flown direct to Hollywood to begin his movie career.

Miss Marian Sanders of Tucson, Ariz., spent the week end here with her sister, Miss Frankie Sanders. She was accompanied here by her brother-in-law and sister, Mr. and Mrs. Vernon Abbott.

Miss Frankie Sanders and Boyd Carley visited in Crowell and Quitaque the first of this week.

Miss Quintina Wiggins of Pecos, Texas, is here this week visiting her brother, Moulton Wiggins.

Mrs. E. W. Brown and Mrs. T. A. Brown of Knox City visited in the home of Mr. and Mrs. Chester Bowden on Thursday of last week.

Italian Masterpiece At Fair

This work of Andre del Sarto, one of the Italian Old Masters who display in the Palace of Fine Arts at the California World's Fair, is the "Virgin and Child and Infant St. John." Thousands upon thousands will view the famous paintings and sculptures on Treasure Island, where they will remain until the Exposition closes.

Seymour to Hold Cowboy Reunion. Rodeo July 21-22

Seymour, Tex.—Spectator comfort and interest will be stressed at the third annual Seymour Cowboy Reunion & Rodeo, to be held here Friday and Saturday, July 21-22, under the sponsorship of the Seymour Chamber of Commerce.

The rodeo performances will be held at 2:00 and 8:00 p. m. each day at Fair Park arena. This field is located atop a hill one mile east of town, which catches all the breeze that may be blowing; and the field is covered with heavy turf, so that absolutely no dust is raised in the arena.

An ingenious arrangement of pens, being completed this week, will enable events to be run off quickly, with no delay between riders and ropers. Grandstand and bleacher seats are being rebuilt and added to in preparation for the biggest attendance ever had here.

The opening feature will be a 35-mile horseback ride into Seymour over five different highways, starting points being located near Throckmorton, Benjamin, Munday, Olney and Mankins. Some 30 riders are expected to compete for the hand-tooled saddle, hand-made boots and Stetson hat offered as prizes.

Substantial cash awards will be offered in the four amateur rodeo events, bronc riding, calf roping, steer riding, and bell roping, with special prizes in all events. A cutting horse contest will be held Saturday morning. A number of unusual added attractions are being arranged for the rodeo performances.

Color will be added to the rodeo performances by 100 young lady sponsors, from Seymour and other West Texas towns. A number of beautiful prizes are being offered in three divisions. Big street parades will be held each day.

New low admission prices have been announced for the rodeo performances: 40c for adults, 25c for children, 25c for grandstand.

Pioneer settlers of West Texas will again be honored, with a program scheduled for them at 9:30 o'clock Saturday morning, at Seymour Municipal Park. At least 500 old timers are expected to be on hand. A permanent Old Set-

ler's organization will likely be formed this year. Three dances will be held each night, two in halls, the other a big open-air square dance near the rodeo grounds.

"Man is not alone in his capacity for great good and great evil. Consider the bee, it makes honey at one end and poison at the other."

MADE IN THE REFRIGERATOR

Here is a grand summertime dessert made with fresh raspberries. There's whipped cream and crushed vanilla wafers and sugar and frothy egg whites, too. All are delightfully combined into one of those refreshing delicious desserts you can make hours ahead of time and leave in the refrigerator until the triumphant moment when you bear it in state to the table. Some call it Raspberry Refrigerator Pie—but I like the name "Raspberry Luscious" much better—don't you?

Raspberry Luscious
First of all, you take about 18 vanilla wafers and crush them. There should be 1 1/2 cups of the vanilla wafer crumbs. Blend these crumbs with 3 tbs. of confectioners' sugar. This must be very thoroughly blended together. Now press this "crust" firmly into the bottom and around the sides of a deep 9-inch pie pan—just as you would regular pastry—only there will be no fluted edge this time. Place the pan with this foundation crust in the refrigerator to chill thoroughly. Now beat up 3 egg whites until they stand upright in peaks and remain that way when the beater is pulled out. Gradually beat 9 level tablespoons of granulated sugar into these egg whites and continue beating this meringue until it holds a stiff point. Now you spread this meringue over the chill crumb pie shell—smoothing it with a spatula. Take one quart of raspberries and save out a few for decorating the top of the dessert. Spread the rest of the quart of berries over the meringue. Next measure out 1 cup of whipping cream into a bowl and whip it until it is stiff. Spread this whipped cream over the berries, and decorate the top with those you saved out of the quart. Now return the entire dessert to the refrigerator and let it chill for several hours. You'll find it will give you 6 good servings.

It's a truly beautiful dessert—as well as unusual, interesting and very good to eat. The raspberry flavor is refreshing and you'll find the berries will have become sufficiently sweetened by the meringue into which they will sink during the chilling process.

It's a dessert to serve for your bridge club or church society gatherings—as well as for the happy climax of a summer company dinner.

Here is the list of the ingredients you'll need to have on hand when you make it:

- 18 vanilla wafers (18 or 20)
- 3 level tbs. confectioners' sugar
- 1/2 cup butter (melted)
- 3 egg whites
- 9 level tbs. granulated sugar
- 1 qt. raspberries
- 1/2 pt. (1 cup) whipping cream

Cisco District Of Utilities Co. Receives Award

Cisco, Tex.—A summary of the annual spring merchandise campaign conducted by the West Texas Utilities Company throughout the 45,000 square mile territory it serves today revealed that the Cisco district had exceeded its sales quota by 251 per cent, thus placing it foremost among the company's nine districts.

H. H. Monk, district manager, said he had been advised that other districts ranked in the following order:

Quannah, Stamford, Abilene, Childress, McCombs, San Angelo, Ballinger, and Dalhart. Quannah and Stamford were tied for second place.

Results of the campaign, he added, indicate that business conditions are exceptionally good in West Texas compared with other parts of the country. Highlight of the campaign was the sale of a total of 1,684 electric refrigerators during a 90-day period.

Special awards for outstanding accomplishments in the campaign go to Monk, C. C. Rosamond, district sales manager, O. J. Russell, local manager, and R. S. Cope, salesman, all of Cisco; Earl Morley, district manager, T. W. McKay, salesman, and R. M. Parks, all of Quannah; K. K. Francis, district manager, and L. B. Tiltonson, sales manager, both of Stamford; R. T. Gray, local manager at Merkel; Jarrell Hale and B. Sheffield, salesmen, and Mac Bowers, clerk, all of Abilene; W. J. Hembree, salesman of Paducah; J. M. Pennington, local manager at Eldorado; and A. J. McDaniels, local manager at Winters.

Wade Mahan was a business visitor in Abilene last Tuesday afternoon.

Conde R. Hoskins, doorkeeper of the House of Representatives, was a visitor in Munday a while last Saturday. While here he was a caller at The Times office.

Mrs. Nancy Nicholson, sister of Mrs. Ida Morrow of Munday, has returned from a three weeks trip Santa Anna and Temple, where she visited her brothers, M. C. Cummings of Santa Anna and W. Y. Cummings of Temple.

While at Temple she had the pleasure of seeing W. Lee O'Daniel at the First Christian Church on Sunday, June 25, and had the honor of taking the Lord's Supper with him.

Judge E. L. Covey of Benjamin was a visitor in the city Wednesday.

Editor W. L. Garner of Knox City was a business visitor here Wednesday morning.

Mr. and Mrs. Don Ferns have returned home from a week's visit with relatives in Sweetwater, Kilgore, Emis and other points in that section of the State.

Jerry Kane spent last Sunday at Weibert visiting his parents, Mr. and Mrs. J. K. Kane.

DON'T SUBMIT TO HI-JACKING

By T. C. RICHARDSON, Associate Editor
Farm & Ranch Breeder-Feeder Ass'n.

Most of the work of making a cotton crop has already been done, but cotton generally is from two weeks to a month later than normal in the Southwest. The insect hi-jackers may yet rob us of the fruits of our labor, if we are not on the alert to meet them more than half way with dust-guns and the proper ammunition. The "gun" may be a shoulder model or a power outfit capable of treating five to seven rows at a time; the ammunition for boll weevil, leaf worm and boll worm is calcium arsenate. If the insects get the jump on us and a heavy infestation occurs at this season, it sometimes pays to add a little Paris green to the calcium arsenate.

In the northern cotton territory of the Southwest the flea hopper may still be the most serious pest at this season of the year, for this tiny insect migrates for considerable distances from weeds to the cotton fields, and multiplies rapidly from early spring when the first eggs hatch until late in the season. It destroys the small fruit buds before they are large enough for the boll weevil to deposit eggs, and in severe infestations, also causes the plant itself to assume distorted forms. The treatment for the flea hopper is dusting sulphur—not just any sulphur, but sulphur prepared especially for the purpose—and applied to the plants with a machine which gives thorough coverage of the plants and foliage.

When flea hoppers and boll weevils are present at the same time, as they are likely to be at

this season, the dusting machine is loaded with a mixture of one-third calcium arsenate and two-thirds dusting sulphur, and one application of the mixture is made about every five days until both insects are under control. Two or three applications may be required; occasionally more if the dust is "trained off" the same day it is applied.

The amount per acre for each dusting is governed by the size of the cotton. Enough must be applied to give a complete coverage each time, and in rank cotton this may run into fifteen pounds of the mixture—five pounds of calcium arsenate and ten pounds of sulphur. Records show that the cost of a season's dusting may be anywhere from \$2 to \$4 per acre, but the extra cotton saved in a three-year test was worth about \$10 per acre. Last season many farmers did no dusting until leaf worms threatened to destroy the crop, and flea hoppers had already destroyed the "bottom crop." Some Erath county (Texas) growers doubled their yield by thorough dusting and some of those who did not dust turned the cows in to harvest the stalks—the cotton wasn't worth picking.

"Better late than never" is a good slogan to use in the fight against insect hi-jackers which threaten the cotton crop, but "do it right or not at all" should be the other part of the slogan. It is always a mistake to "try" something "to see if it will work," and experimenting with all sorts of machines and insecticides is too expensive for the average farmer to risk.

The methods and machinery for the control of the flea hopper, boll weevil, leaf worm and boll worm have been thoroughly tested and worked out by the state and Federal agencies supported by your taxes for that purpose. The best available information on how and when to fight insects can be had by any cotton grower, on request to his county agent or state experiment station. Whenever new and better methods are discovered the experiment stations will test them and report on them, and until they do, the best the grower can do is to leave the experimenting to them.

Those who buy a good dusting machine to start this year's late pests will be prepared to start the battle at the right time next year—when the insects first attack the crop.

Why be a Ham in Carving One? Expert Shows Easy, Modern Way

If they snicker when you start to carve, you'll be comforted by these kind words from Max O. Cullen, carving authority. "It's easy to learn the right way, and the right way is the easy way," says Cullen, who is shown at the right explaining to Pete Smith, producer of motion picture shorts bearing his name, and Ann Morris, M.G.M. player, the fundamentals of carving a ham, during the recent filming of "Culinary Carving," an educational short in which Cullen was featured.

Proper tools and a sharp knife are of first importance, says the expert. Then you can proceed with confidence, if you will follow his simple directions as shown by the diagrams and instructions below.

1. Place ham with fat side up, shank end to carver's right. Cut two or three slices parallel to the length of the ham from the smaller meaty section.
2. Turn the ham so that it rests on the cut surface. Holding firmly with the fork, cut a small wedge-shaped piece from the shank end. Then proceed to cut thin slices down to the leg bone until the aitch bone is reached.
3. With the fork still in place, release the slices by running the knife along the bone and at right angles to the slices. For additional servings, turn and carve other side of ham.
4. If more servings are required, the ham is turned back in its original position on the platter with the fat side up and the slices are carved at right angles to the bone. These slices are not so large as those from the cushion section, but they make attractive servings for second helpings.

farmer and vice-chairman of the Texas Agricultural Conservation Committee, said county AAA committees are busy calculating insurable yields and premium rates for all wheat farms in the major wheat counties.

"Every wheat farmer will be able to acquaint himself with the yield and premium rate that applies to his farm, before the 'sign-up period,'" Watson reported.

He said applications for 1940 insurance will be taken in the next two months.

The new program has these advantages, he pointed out:

1. It will be easier for growers to obtain credit or funds to pay premiums, as they can get advances for premiums against future payments to be earned under the regular AAA program.
2. The insurance is written in one operation: When the application is filed. After the grower has applied and paid his premium, nothing further remains for him to do except report actual acreage seeded and notify his local committee in case of crop damage.
3. Procedure has been simplified by placing more responsibility on county committees in establishing yields and premium rates and computing cash equivalent payments.
4. The base period for determining premium rates for individual farms is 1930-39, with which is blended data on a 13-year county base period. This is intended to smooth out the effects of unusual loss.

Almost 1,500 bushels of wheat have been deposited with the Federal Crop Insurance Corporation already by Texas growers, to cover premiums collected for 1940 insurance. These deposits were made as indemnities were collected on 1938-39 insurance, according to a report from the state crop insurance office at Amarillo.

KITCHEN COMFORT

College Station.—Hot weather is the most logical time for increasing kitchen comfort, according to Mrs. Bernice Claytor, specialist in home improvement for the A. & M. College Extension Service.

While reducing the number of hot foods and eliminating as nearly as possible the use of the oven are two factors in making the average kitchen more habitable, reducing the number of necessary steps in the kitchen can not be overlooked by the efficient housewife, Mrs. Claytor suggests.

"A good housekeeper moves in orderly sequence from the refrigerator to the work table and sink, to the range, and to the dining table without the crisscrossing of paths," Mrs. Claytor pointed out.

In an effort to aid each housewife in analyzing her own kitchen efficiency, the Extension specialist cited these pertinent questions: Does the homemaker have to cross the room continually to secure her food materials or are they close at hand? Is the refrigerator as near as possible to the food preparation table? Once prepared, is the food near the stove? Are the implements for cleaning pots and pans convenient to the sink? Are the dishes for setting the table near the dining room?

Since the kitchen is frequently the hottest room in the home, Mrs. Claytor also has suggested that the housewife form the habit of serving meals in the dining room. "But be sure," she cautioned, "that the setup is so arranged that the housewife will make no unnecessary steps."

With the four kitchen work centers efficiently arranged, the next step in summer work saving is to eliminate articles infrequently used

Thirty-Eight Are Enrolled in Traffic Course

Lubbock, Tex.—Thirty-eight persons are enrolled in the traffic safety education course now in progress for the third consecutive summer session at Texas Technological College. Such instruction in a Texas college was offered for the first time at Texas Tech. Nine other institutions are offering such work this summer in Texas.

Capt. G. E. Schauer of the Texas department of public safety, on a recent visit to the college, praised the work being done here and commended highly Prof. F. L. McRee, member of the engineering faculty who has taught the course each summer. Those who are taking the course are mainly public school teachers who will give instruction in traffic safety in the public schools.

Some of the observations made by Professor McRee explaining the purposes of the course are: More people were killed in traffic accidents in the last 18 months than the total number of American soldiers killed in the World War.

The causes of traffic accidents may be divided into four groups; those caused by highway defects, those caused by vehicle defects, those caused by the driver, and those caused by the pedestrian. Five per cent of traffic accidents only may be traced to the fault of the highways. Vehicle defects cause from 10 to 15 per cent of the accidents, principally due to faulty brakes, worn tires, poor headlights, and faulty steering mechanism. This leaves responsibility for the greater portion of traffic accidents on the driver and pedestrian.

Ignorance on the part of the driver of the traffic laws or of the consequences of their violation is responsible for most of the traffic accidents. Obviously the remedy is traffic safety education.

Editor and Mrs. Earl Williams and family of Eastland spent the week end here with Mrs. Williams' father, W. T. Burton, her sisters, Mrs. H. P. Hill and Miss Christine Burton.

Lauds Patent Sales As Aid To World Trade

New York.—Export trade of the United States is vitally dependent upon a strong patent system which will stimulate research and lead to the perfection of products that can compete in world markets, according to Lawrence Langner, executive secretary of the National Advisory Council of the Committee on Patents of the House of Representatives.

"The American patent system is the best in the world," said Mr. Langner. "It has greatly stimulated foreign trade. Our products have been ahead of those of any other country in the world.

"Today we are entering an era of tremendous international competition and we can maintain our supremacy only by a policy of increased research stimulated by our present strong patent system."

Mr. Langner explained that other countries are using means of subsidizing research which cannot be applied without sacrifice of principles basic to a system of free enterprise. To compete with these countries in the world market, he said, the United States must offer the greatest incentives through the patent system to individuals to develop and produce a new and better product.

Mr. Langner called attention to numerous inventors like Steinmetz, Pupin and Backlund, who came to America from other countries and found opportunities to develop inventions which have made them famous throughout the world. He said that the patent system has made available to the average American family goods and services which are available only to the wealthy in other countries.

"Patents have paid for the research on which America's industrial supremacy is based," he said. "The American patent system is complex, but so is the nervous system of a man compared to that of lower animals. To do the job it does, it must be complex."

Mr. Langner warned that compulsory licensing, which he said, was a major factor in preventing foreign patent systems from offering incentive equal to that of the American system.

lightly to the skin in places where chiggers usually gather—and that as everybody knows, means the ankles, wrists, and under the knees, for a starter. Follow with a hot bath and scrub well with a coarse wash cloth or brush. If you have time and can stand it, lather freely with a medicated soap and allow it to dry on the body for about 15 minutes before it is washed off.

The idea that chiggers actually burrow into the skin is incorrect, says Reppert. Also incorrect is the idea that they don't begin to hurt until they die.

Actually, they merely attach themselves to the skin and suck blood. The persistent itching that follows is due to a poisonous material the organism injects in the wound.

If you neglect precautions before exposure and treatment after until the chiggers begin their work, ammonia water, strong salt water, soda water, or cooling ointments will alleviate the pain somewhat.

Advantages of Insurance On Wheat Cited

College Station.—Field workers made ready this week to inaugurate a wheat crop insurance program for the 1939-40 season which is essentially the same as this year's program but streamlined with short cuts to simpler modes of operation.

Following approval by Secretary of Agriculture Henry Wallace of regulations governing the new program, Jess Watson, Newcastle

Opening Announcement

For the convenience of farmers and cream sellers, we are opening a cream buying station in Munday, Texas,

SATURDAY, JULY 15th

In J. B. Williams Bldg., second door east of Terry Hotel

We will pay top prices at all times and guarantee correct weights and tests.

• We want to buy your cream so your checks will be larger!

Farmer's Union Creamery

Mr. and Mrs. A. T. Voyles in Charge

GUESS AGAIN

Electric Cookery costs only 1/2 what you think!

MAYBE I GUESSED TOO LOW: ELECTRIC COOKING'S SO FAST AND CLEAN.

SAME IDEA AS ELECTRIC LIGHT. FLIP A SWITCH AND THERE'S YOUR HEAT

STEAK MELTS IN MY MOUTH. I KNOW I GUESSED TOO LOW!

FLAMELESS RADIANT HEAT IS PERFECT FOR COOKING. BRADIS EVENLY—SEALS JUICES IN

WHAT? ONLY HALF WHAT I GUESSED?

SURE LOW-COST IS THE WORD FOR ELECTRIC COOKING

Manchester Hotpoint

MODEL RC6. Hotpoint's new value Headliner! Three large utility drawers. Floor space, 59 x 25 in. Height, overall, 59 1/2 in. Oven, 16 in. wide, 15 in. high, 20 in. deep.

With Electric Cookery, you can say "Good-Bye," once and for all, to the creaky old notion that Electric Cookery is costly. Say "Hello!"—and "Welcome!"—to savings, coolness and cleanliness in the kitchen.

Stop at our office today and learn about terms to fit your budget and the trade-in allowance on your old range.

West Texas Utilities Company

READY TO GO....

When Serviced By COOPER'S

TEXAS OUT-DOORS

Austin, Texas.—Recommendations which, if adopted by the United States Bureau of Biological Survey, would give Texas duck hunters considerably better sport, were strongly urged upon Ira N. Gabrielson, Bureau Chief, by Will J. Tucker, Executive Secretary of the Texas Game, Fish and Oyster Commission at the recent annual meeting of the National Game and Fish Commissioners Association.

Tucker asked that Texas, which biological survey reports indicate had 100 per cent more ducks last season than the previous year, be allowed shooting to start at sunrise rather than at 7 a. m.; that earlier shooting be allowed in the northern half of the state and that the use of live decoys be permitted.

Those are the things Texas sportsmen have been urging ever since the biological survey set down stringent rules several years ago in an effort, which is proving successful, to save migratory waterfowl from extinction.

Final approval of the duck season and all restrictions will be made this year for the first time by Harold I. Leeks, secretary of the interior, to which the biological survey was recently transferred. At present there are no indications of the season, its length or the limitations, Tucker said upon his return to Austin from the national meeting.

Coyotes, known as the most canny animals in Texas, get along! One hungry old coyote must have found the foraging rather tough recently, but he coped with the situation by catching and eating fish, believe it or not!

State Game Warden P. D. Moseley of Canadian and J. H. Maggard, Amarillo, while patrolling near Tascosa, saw a coyote at the edge of the Canada River, but paid little attention at the same spot at approximately the same time the following morning and were able to sneak close enough to see the coyote scooping minnows five and six inches in length out of the river and devouring them.

Six more beaver have been trapped in southwest Texas and placed in the streams of Jasper and

Walker counties, making a total of a dozen of the busy dam builders which have been put to work in East Texas.

The drought in certain sections of South Texas and the Hill Country has hit game birds and animals hard and it has become necessary for the State Game Department to feed wild turkeys in a dozen Hill Country counties. Seven game wardens are engaged in feeding the birds, which is vitally necessary in order to save sufficient stock for breeding purposes next season. The turkey crop this year will be well below normal in the Hill Country, Earl Sanders, Game Department Regional Game Manager at Kerrville, reports.

Texas can and is raising elk. The big game animal is protected the year round in the Lone Star State. A herd of forty-four planted in Jeff Davis county in 1927 has increased until there are now nearly 300 animals in the herd.

Triplet deer are very unusual, does usually giving birth to a pair, but Texas has at least two does which are doing more than their share to keep the state stocked with deer. A doe on the W. H. Ramsey farm three miles from Kerrville recently had three deer for the fourth consecutive year. She is not yet five years old. The other deer which has proved very prolific is one on the Hyatt Brothers ranch near Johnson City. She recently had her third set of triplets. She has given birth to seventeen young, including four sets of twins, in the last seven years.

The Southwestern Sportsman's Show, held in Amarillo for one week and which was the first show of its kind ever staged in the Southwest, will be repeated next year, it was announced by Gene Howe, of Amarillo, sponsor of the show and a member of the Texas Game, Fish and Oyster Commission. Several other cities in Texas have expressed interest in sponsoring such a program.

LESS OFTEN, BUT HEAVIER

Watering flowers a little every night may be fun, says J. F. Rosborough, horticulturist of the Texas A. & M. College Extension Service, but the flowers will do better if they are watered thoroughly once a week and allowed to dry out somewhat in between times.

A summer mulch of peat moss or a similar mulch will prove more than worthwhile in holding back weeds, keeping the soil cooler, and reducing surface evaporation. A more robust plant and larger, brighter flowers will result.

Some plants will do better if they are pinched back when they are six to eight inches high. Such plants as the zinnia will develop into a much bushier plant if this method is used.

Another pointer listed by Rosborough is the removing of blooms. As blooms reach their prime they should be removed before they have a chance to go to seed. This will not only result in more blooms, but a longer blooming period.

Through College In 100 Years

Tech's Courses Would Require That Time For One Student

Lubbock, Texas.—If one student desired to study every course listed in the new fourteenth annual catalog just issued at Texas Technological College, it would take him 100 years to complete the 1195 courses listed.

The college is shown to be offering instruction through five different academic divisions, the graduate division, and the extension division. There are 46 different departments of instruction offering 43 different required courses of study leading to degrees.

There are 153 one-half year subjects in agriculture, 208 in engineering, 74 in home economics, 752 in arts and sciences, and 8 in military science and tactics, a total of 1195 courses. Other interesting announcements are:

Entrance examinations for the fifteenth session of the college will be held on September 15 and 16. The college dormitories will open September 16. The junior, senior, and graduate students will register September 17, sophomores will register that afternoon, and entering freshmen will register Tuesday, September 17. Classes will begin on the 20th. September 27 is the last day a student may register for the fall session.

The second semester offers a full half year in the college and will open with registration on January 31 and February 1. Commence-

FASHION PREVIEW

FOR summer-resort golf, Good Housekeeping for July features the plaid seersucker dress at the left and the flannel umbrella skirt with matching wool-jersey sweater.

ment for 1940 will be June 3 and the summer school for 1940 will begin on June 6.

Among the changes in college rules and regulations announced for the first time in this catalogue is one relating to entering freshmen who have ranked low in high school work. These students will be placed on what is termed "Special Observation" and will be required to carry a reduced load and pass at least two-thirds of their work.

The catalogue lists seven classes of scholarship awards for students, four loan funds administered by the college, and nine loan funds not administered by the college.

Medical services for students this year will be in charge of the West Texas hospital.

Where prepared tablets are not available, table salt may be used. Milk is a source of salt and will help to make up for the deficiency caused by sweating. Alcoholic drinks should be avoided.

Heat cramps are characterized by pains (cramps) in the abdominal region, headache, and in severe cases, by nausea and vomiting. The body temperature remains about normal, likewise the pulse rate. Body salt losses occur without the knowledge of the individual until there is a deficiency; then various muscles begin to cramp.

Three Factors Cited in Acute Youth Problem

Austin, Texas.—Three factors are operating in the field of 'youth' today to make the American Youth Problem as acute as the farm or labor problem, Dr. Homer P. Rainey, University of Texas president told summer session students here this week.

He listed as the three factors: (1) a shift on the population level placing the balance of power in the hands of the aged; (2) collapse of the theory that education means professional employment; (3) the changing nature of the working world.

Speaking outdoors to the University's student body for the first time as its president, Dr. Rainey's address launched a series of summer forums sponsored here to provide faculty-student discussion of vital American problems.

Charging that the American population had aged from an adult-youth ratio of about 9-10 in 1850 to 22-10 this year, he called for "the wisest statesmanship at our command to avert a conflict between youth and old age."

"Here in Texas the problem is acute," he declared.

Declaring that America has only three-quarters fulfilled its century-old commitment to educate everyone, he warned of an impending breakdown of the "educational ladder."

"We still have a little way to go in making good our commitment,"

Weekly Health Letter!

Issued by Dr. Geo. W. Cox, M.D., State Health Officer of Texas

Austin, Texas.—"The beating Texas sun these July days is beginning to take its toll in heat prostrations, from reports reaching the Texas State Department of Health. A simple precaution to help prevent heat cramps and prostration is to add a pinch of ordinary table salt to each drink of water you take."

Laborers, mechanics, farmers and white collar workers whose work causes them to sweat profusely, are in danger of having their body salt content become deficient with resulting heat cramps or heat prostration. Salt is a prominent constituent of sweat; and the body loses large quantities of salt during hot days.

In industry, a method of preventing heat cramps is to take a tablet of pure salt or a mixture of salt and dextrose with each drink of water. Workmen whose duties require muscular exertion should be especially careful to add more than the usual amount of salt to what they eat and drink.

Salt deficiency may be prevented by taking salt in various ways.

Announcing

This is to announce that F. E. Dendy is in charge of the Dendy Blacksmith Shop, located in the old Stodghill building.

This shop is equipped for expert blacksmithing, acetylene and electric welding. We are also equipped to build trailers, stalk cutters, and other equipment used on the farm. See us for estimates on your job.

Mr. Riley D. Bell, well known blacksmith in Munday, is a member of our force, and he joins us in soliciting a portion of your business. Let us help you with your blacksmithing needs.

DENDY'S Blacksmith Shop

F. E. DENDY In Old Stodghill Bldg.

Urges More Singing Of National Anthem

WILLIAM FREDERICK BIGELOW, editor of Good Housekeeping Magazine, in an editorial in the July issue of that publication, urges the American public to brush the dust off the "Star Spangled Banner" and to make it a national anthem in fact as well as theory.

"We are a conglomerate people," Bigelow points out, "gathered together from the ends of the earth, the newest comer as free to come and go as are the descendants of those who founded the nation. While those of alien birth sense our freedom, they do not always see or feel the tie that binds us in an inseparable whole. They are not accustomed to going months without hearing patriotic music. Whether rightly or wrongly, their homeland reaches out to them in sentiment or in seduction and it would not be too surprising if many of them should yield."

More demonstrations of love of country and loyalty to its institutions would be appropriate at this time, Bigelow says. If our liberty is to survive it must be made into

he explained. "And we're already faced with two terrific stumbling blocks. They are the difficulty of financing higher education, and our current inability to absorb our graduates into the professions."

"That means we're going to have to re-think completely our whole program for secondary and higher education," he declared.

Turning to the changing complexion of the working world, his third "vital factor," Dr. Rainey warned that 65 per cent of today's jobs require no vocational training of any kind; 20 to 25 per cent can be filled after technical training in short term courses.

"That means, briefly, that while we're requiring more and more education in preparation for jobs, the present working world is requiring finer and finer skills—but fewer and fewer people for anything except the routine, rapid work."

IN KNOX CITY HOSPITAL

Mrs. W. E. Donnell of Bryson, a former resident of Munday, was taken to the Knox City hospital last Saturday and underwent a major operation on Monday. Mrs. Donnell is a sister of John C. and Oscar Spann.

TOWN WITH A FOREST

Danville, a small community in New Hampshire, has a forest of its own and has had since 1700, when citizens of that hamlet in the wilderness set aside fifty acres of woodland as a source of income to pay the preacher. There has been a permanent committee to take care of this piece of woods, on behalf of the town. The first sale of lumber was in 1850 and brought \$1,500. Other sales have brought in from \$2,000 to \$5,000 a clip. In 1930 Danville had \$10,000 in the bank from this piece of woodland. In addition, out of the income they have built a new church, and better yet, at one time they loaned the town \$2,500 out of this forest money. A town with an income of its own and no taxes! How strange that sounds in these days of taxes and more taxes and still more taxes. What a blessing if this example could be followed throughout the country.

Ex-Sheriff Giles Kemp of Haskell was a business visitor here last Monday morning.

Miss Cloe Mayo visited with friends in Dallas over the week end.

Sons of Legion To Be Cared For At Convention

Waco.—One of the big jobs of putting on an American Legion convention these days is providing entertainment and care for an 7 and coming youth organization known as the Sons of Legion.

It has been conservatively estimated that 1000 members of the branch organization will come to Waco when Legion members hold their state convention here August 26-29. They will arrive on Saturday, opening day of the convention, and remain through Tuesday, the closing date.

During their stay here the youngsters will be camped, army fashion, on the Cotton Palace grounds. The tents for housing the various squadrons will be furnished by the national guard here.

Col. W. C. Torrence, Waco's city manager, will be charge of the encampment. The registration fee, to cover housing, care, meals and entertainment for the Sons of Legion corps will be \$2 for each member. Any further information may be obtained by writing C. Torrence at Waco's main city building.

An expert dietician to see after the feeding of the youths and a nurse to care for those who need medical attention or first aid will be on the grounds throughout the convention, it was announced by the convention city corporation here.

Prizes will be awarded to winners of athletic contests and other contests to be held for the Sons of Legion during their stay here. Various other forms of entertainment, including band concerts and participation in the Legion convention parade, are being planned, it was understood.

Clem Thole of Seymour visited friends here last Sunday. Mr. Thole is a former Munday resident, having operated the Home Bakery here before moving to Seymour where he is engaged in the bakery business.

Be a smart driver—not a wuss one.

BOTH GET IT ALL FROM

Says MRS. R. L. MILSTEAD, RT. 3, HAMLIN, TEXAS:

"Would not sell our Servel Electrolux for twice what we paid for it, if we could not get another. We milk several cows, and live 12 miles from town. We don't have to carry our cream off but once a week, and always get the top price. It costs us only 35 cents a week to operate; and gives us all the ice cubes a family of four can use. I make ice cream most every day. With it we can have fresh meat as often as we like; also fresh vegetables are better after being in the Servel Electrolux a day or so, than when purchased. It is the greatest blessing that ever came on to a farm or ranch."

The kerosene Servel Electrolux requires no water; no electricity. It is fully automatic, requires little attention; just fill the kerosene tank weekly. And it is the same in every important detail as the famous gas Servel Electrolux giving health and pleasure in one million city homes.

- NO MOVING PARTS
- CONTINUED LOW OPERATING COST
- PERMANENT SILENCE
- SAVINGS PAY FOR IT

Operates on Natural Gas, Butane, Bottled Gas, or Kerosene

The SERVEL ELECTROLUX

Gas and Kerosene Refrigerator

Says MRS. L. E. PYEATT, OLNEY, TEXAS:

"I have had my Servel Electrolux for 6 years. I have a large family, and company is always coming in; but I am never without plenty of ice for drinks, and plenty of fresh meats and vegetables, because they can be kept fresh and wholesome so much longer in the Servel Electrolux. I buy my groceries on week-end specials for the next week, and have certainly cut down my grocery bill. And all this for so little cost we can hardly notice the difference on our gas bill. It does not cost a bit more to run today than when new—in fact it is as good today as the day I bought it."

No moving parts in its freezing system means nothing to wear. Nothing to cause noise and costly repairs—and operating cost stays low. You're paying for Servel Electrolux—why not own one?

The REXALL Store

"The Most Complete Drug Store in Knox County"

Munday Texas

Golf Tourney—

(Continued from Page One)
 Bug was over Wednesday afternoon, the driving contest was held with Jimmy Goode of Munday winning with a three ball average of 217 1-3 yards. Kaul English of Haskell was runner up with an average of 199 1-3 yards. Few of the drivers were able to keep three balls in the fairway.
 Tourney play started Thursday morning, and will continue through Sunday.

Officers Named

W. H. Atkinson, president of the local club, is retiring president of the tri-county. Officers elected Wednesday night are Tom Craddock, Seymour, president; Lindley Carter, Seymour, secretary; and H. M. Rettig, Olney, Atkinson and John A. Couch, Haskell, directors. It was later voted to include only towns in Haskell, Knox and Baylor counties in the tri-county association next year, and the Olney man's name was withdrawn from list of directors.

Approximately 125 men were present for the business session and business pool Wednesday night.

The tourney matches are as follows:

Championship Flight
 Jack Wilson, Knox City, 70, vs. Raul English, Haskell, 83.
 Tom Houser, Seymour, 78, vs. Trav. Everett, Haskell, 82.
 Tom Craddock, Seymour, 77, vs. Boyde Carley, Munday, 89.
 Dr. E. M. Roberts, Munday, 79, vs. Roy Killingsworth, Haskell, 80.
 O. C. Harrison, Seymour, 80, vs. Vincent Lane, Munday, 78.
 E. Bards, Rule, 80, vs. Panny Farmer, Knox City, 77.
 E. Whitaker, Haskell, 82, vs. Lindley Carter, Seymour, 75.
 Buford Cox, Haskell, 83, vs. Jarrell Davis, Seymour, (defending champion.)

Second Flight

Horace Bass, Munday, 84, vs. Joe Wheat, Seymour, 92.
 Chad Wilson, Knox City, 88, vs.

Roy Cook, Haskell, 90.
 Rupert Williams, Munday, 88, vs. Jim McDonald, Munday, 90.
 Jim Goode, Munday, 89, vs. Tom Haney, Munday, 90.
 N. T. Underwood, Munday, 90, vs. W. R. Moore, Munday, 90.
 C. H. Smith, Munday, 90, vs. Charles Richmond, Seymour, 89.
 H. A. Pendleton, Munday, 90, vs. Rogers Gilstrap, Haskell, 88.
 Winston Blacklock, Munday, 91, vs. W. E. Braly, Munday, 87.

Third Flight
 John Couch, Haskell, 93, vs. Dr. Glenn Stone, Munday, 121.
 W. H. Atkinson, Munday, 94, vs. Willard Bauman, Munday 105.

Barton Carl, Munday, 95, vs. D. E. Holder, Munday, 104.
 John Willoughby, Haskell, 98, vs. Arthur Smith, Jr., Munday, 99.
 Henry Atkinson, Haskell, 99, vs. Sebern Jones, Munday, 98.
 Buel Bowden, Munday, 101, vs. H. D. Jones, Knox City, 96.
 Wade Mahan, Munday, 105, vs. J. G. Vaughter, Haskell, 95.
 Fred Broach, Jr., Munday, 108, vs. G. Campbell, Haskell, 94.

SANTA FE CARLOADINGS

The Santa Fe System carloadings for the week ending July 8, 1939, were 24,531 as compared with 25,961 for the same week in 1938. Received from connections were 4,855 as compared with 4,191 for the same week in 1938. Total cars moved were 29,386 as compared with 30,152 for the same week in 1938. Santa Fe handled a total of 32,053 cars during the preceding week of this year.

Doyle Purifoy, son of Mr. and Mrs. Roy Purifoy, underwent a tonsillectomy at the Stamford hospital the first of this week. He is reported doing nicely.

BIRTH ANNOUNCEMENT

An eight-pound boy was born to Mr. and Mrs. F. A. Ray, who reside 5 miles north of Rhineand, on Thursday night, July 6. Both mother and little son are reported doing nicely.

New Record For 4-H Club Short Course Is Set

College Station, Tex.—Texas 4-H club boys and girls closed their annual three-day meeting here after setting a new record for attendance.

The enrollment was slightly in excess of 2,500, and wiped from the board the previous high of 2,300, set in 1938.

The increase in enrollment, said H. H. Williamson, director of the Texas A. & M. College Extension Service, which sponsors the Short Course each year, was partly due to the division of the meeting into two groups, one for 4-H club members and the second, a week later, for adults and partly to an increase in 4-H club membership.

County agricultural and home demonstration agents assembled for their annual conference July 10 and 11. Meanwhile preparations went forward to handle the crowd expected for the Farmers' Short Course scheduled for July 12, 13 and 14.

A maple leaf 21 by 22 inches was exhibited in the 1937 Canadian contest for the "largest and prettiest" maple leaves.

Bernice Douglas is visiting with Lois Bryan in Seymour this week.

POSTAL RECEIPTS HIGHER
 Reports to the University Bureau of Business Research from chambers of commerce in 45 Texas cities show postal receipts for May to total \$1,379,934, an increase of 4.5 per cent over April and 7.5 per cent over May last year.

THE POCKETBOOK of KNOWLEDGE

"I GROW AN' MY SUIT AN' MY COVERS ME!"
 "THIS CURIOUS LOCOMOTIVE USED IN THIS WAS EQUIPPED WITH IRON LEGS—THE LEGS OPERATED BY STEAM." "WALKED" ALONG PUSHING THE LOCOMOTIVE AHEAD.
 "THE WIDEST STREET IN THE WORLD IS THE 'NINTH OF JULY AVENUE' IN BUENOS AIRES, ARGENTINA—IT IS 6-0 FEET WIDE!
 "IT TOOK THE AUTOMOBILE INDUSTRY UNTIL 1912 TO PRODUCE A MILLION CARS. IN ONE RECENT YEAR A SINGLE COMPANY ALONE BUILT TWICE THAT NUMBER."
 "THOUGH A LIQUID, MILK HAS MORE SOLID MATTER THAN TOMATOES, BEETS OR CARROTS."
 DURING THE LAST TEN YEARS, THIS COUNTRY'S NATIONAL DEBT INCREASED SO RAPIDLY THAT IT NOW EXCEEDS THE AMOUNT WE SPENT IN THE WORLD WAR.

Jones County Pioneers Meet

July 14, 15, 16

Anson, July 7.—Decorated with flags and welcome signs, seats as well as ice water fountains placed at vantage spots over the square and business section, Anson is ready for the Jones County Pioneer Festival on July 14, 15 and 16.

The program includes on the opening day, Friday, July 14, pioneer day dinner; old time organ music and songs; boxing matches; old fiddlers contest; parade; coronation of the Jones County Queen, Miss Martha Jane Bryant of Stamford. Harry Hines will be the main speaker for the pioneer day dinner and Judge James P. Stinson of Abilene will also be on the program.

There are 3,280,000 Federal, State, and local government employees, not counting 339,000 in the army and navy and more than 4,000,000 on various relief projects.

Don Ferris was a business visitor in Seymour last Tuesday.

"Hot Check Law" with Teeth In It

Now In Effect In State of Texas
 A copy of the "Hot Check Law" which went into effect recently upon the signature of Governor W. Lee O'Daniel, was received last week by M. J. Franklin, Munday chief of police. Officers are urged to see that this law is enforced.
 In order that readers of The Times may become acquainted with this law, we are printing a copy as sent to local officers: To Law Enforcement Officers in Texas:
 Your attention is called to the provisions of House Bill No. 190, which was passed by the Forty-Sixth Legislature and which becomes effective upon signature of the Governor on June 22, 1939. This is the new "Hot Check Law."
 H. B. No. 190, which repeals Section 4 of Article 1546 of the Penal Code of 1925, makes it unlawful for any person, with intent to defraud, to obtain any money, goods, service, labor, or any other thing of value, by giving or drawing any check, draft or order when such person does not have sufficient funds with the drawee to pay the instrument and all other outstanding instruments at the time it was given. Section 2 extends the above provisions to cover the payment for goods and services theretofore received. Section 3 makes it unlawful for a person to secure or retain possession of any personal property to which a lien is attached, by the giving or drawing of such an instrument. In all cases the nonpayment of the instrument upon presentation is prima facie evidence that the person gave or drew it with intent to defraud.
 Following are the penalties prescribed for the violation of any of the above provisions of H. B. No. 190, according to the amount for which the instrument was drawn and the number of times the offender has been convicted of the same offense.
 First conviction:
 Less than \$5.00—Confinement in county jail not exceeding two years, or fine not exceeding \$200; \$5.00 to \$50—confinement in county jail not exceeding two years, or fine not exceeding \$500; \$50 and over—Confinement in penitentiary not less than two nor more than ten years.
 Second conviction for same offense: Up to \$50, confinement in county jail not less than thirty days nor more than two years; \$50 and over, same as for first conviction.
 Third or subsequent conviction for same offense: Confinement in the penitentiary for not less than two nor more than ten years, regardless of the amount involved in the first two convictions.
 Section 6 of the Act provides that any person who has filed a complaint or furnished information resulting in the acceptance of a complaint by a district or county attorney shall be guilty of a misdemeanor if he suggests or requests that the case be dismissed, and upon conviction not less than \$100 nor more than \$500.
 In all prosecutions under the Act, the issuance and service of process, either in or out of the county where the prosecution is pending, is to have the same effect as though the offense were a felony. Likewise, officers and witnesses are to be compensated in like manner as though the offense were a felony.

Rhineand Gets Defeat At Hands Of Phillips 66

The Rhineand Boomers faced their second setback of the season by a severe trouncing at Vernon Friday night in a softball contest, which ended 10-4. Vernon's powerful Phillips 66 pounced on Decker for five runs in the second inning, a lead which was never overcome, causing the young southpaw his first defeat. They scored twice in the third and fifth and once in the fourth. The Boomers gained a lead of two runs in the first inning off Hap Rogers and scored once each in the third and fourth off General Lee.

People and Spots in the Late News

<p>LOU AINT BLUE . . . Flashing the dimpled smile that endeared him to millions of fans in the 15 years he was breaking all baseball records for durability, Lou Gehrig (left), assures Manager Joe McCarthy of the Yankees that he'll still be in uniform daily the rest of this season, though chronic infantile paralysis has written finis to his great diamond career.</p>	<p>A BEACH 'BALL' . . . It's Lucille Ball, of the films, recuperating from an appendicitis operation and managing, at the same time, to demonstrate latest modes in beachwear, a satin swim suit with all-over tiny flower pattern, and a sunproof hat.</p>
<p>FOR SHORT TRANSPORT . . . Here's new "four-door sedan" twin-engine transport plane designed for smaller passenger air lines of country which made its test flight at Burbank, Calif. Twin engines, side by side in nose of the plane and driving a single propeller, push the low-wing all-metal plane to top speed of 210 miles an hour.</p>	<p>URGES TAX REPEAL . . . Discriminatory taxes tend to depress realty values, Benjamin J. O'Reilly, president of Real Estate Association of State of New York, said at Niagara Falls as he signed petition of New York group asking National Association of Real Estate Boards to endorse campaign for repeal of all chain store taxes.</p>
<p>ABLUTIONS A LA MODERNE . . . Saturday nights hold no terrors for youngsters in this age of splash-proof shower bath rooms. Striking evidence of the progress since the washtub-next-to-the-kitchen-stove days is this ultramodern shower enclosed with fluted glass and equipped with chromium fixtures, featured at the Golden Gate exposition.</p>	<p>ROOM FOR ONE MORE? . . . Parisians and Parisiennes are "ordering" their bomb shelters now. Here are two victors to the National Security Exposition in Paris trying out one of the portable "two-passenger" bomb-proof huts.</p>

County Treasurer R. V. Burton Benjamin was a visitor here last Tuesday.
