MUNDAY, KNOX COUNTY, TEXAS, SEPTEMBER 1, 1927.

Number 22.

Road Work Is Main Topic At Meeting

Judges and Commissioners Praise Munday and Treatment Given Their Association

About thirty members of the Judges and Commissioners association of the Thirteenth Congressional District met here on Saturday morning and spent a greater portion of the day discussing matters of interest to them. The principal topic of discussion throughout the session was that of road building and the maintenance of roads, and much of the talk was concerning the relations existing between the State Highway Commission and the various Commissioners and Judges.

One of the principal talks of the afternoon session was that made by Judge Parsley of Young county, who expressed the opinion that within a very few years the work of maintenance of highways would come under the direction of the Commissioner's Court of the various counties, and that, in his opinion, such a plan would prove much more economical and satisfactory than is the present plan. He was of the opinion that all work on highways should be under the direct supervision of the highway Commission and all work should be done upon their specifications, but his contention is that the work can be done more economically by being placed with the various Commissioners through whose precincts the highway may happen to pass.

Speaking on maintenance of lateral roads and highways Judge Oliver W. Lee of Knox county pointed out the necessity of light equipment in maintaining roads after they have been built by the heavier machines, and expressed the belief that the time would come in the not distant future when these small maintenance machines would be located in each neighborhood in the county and could be placed into operation by the citizens of the communities on short notice, and especially a few hours following a rain, at which time any road in this section can be placed in excellent condition if reached before it is too dry to drag well.

Many of the matters that were on the program for discussion were not reached and several who were to appear on the program were absent, and practically the entire discussion revolved around the problems incident to road building and maintenance and the relationship that exists between the Highway Commission and the Commissioner's Court.

At noon the association was guests of the Munday Chamber of Commerce, where a bountiful dinner had been prepared for them under the direction of the Parent-Teachers Association, and the many words of praise that came from the guests reflected their appreciation for the courtesies that were shown them while in the city, and a resolution thanking the Chamber of Commerce and good ladies was presented and adopted at the afternoon session.

Gainsville was chosen as the next meeting place of the association, which meets semi-annually, and officers were elected to serve for the ensuing six months as follows: Judge St. Clair of Baylor county, president; Judge Oliver W. Lee of Knox county, vice-president; Judge Pearson of Archer county, secretary.

Those in attendance at the meeting were Judge W. E. Parsley of Young county, president of the association, Commissioner L. W. Scott of Jack county, Judge J. T. St. Clair of Baylor county, G. Earl Hutchings, auditor of Young county, Commissioner H. R. Dearing of Stephens county, Judge W. J. Arrington of Stephens county, Commissioner W. H. Sims of Young county, Commissioner Sam Bird of Young county, Commissioner E. A. McDonald of Archer county, K. B. Lee of Fort Worth, Commissioner J. W. Horton of Stephens county, Commissioner J. S. Abernath of Haskell county, Judge C. E. Brannan of Stone-wall county, Commissioner H. W. Anderson of Stone-wall county, Judge H. V. Pearson of Archer county, Commissioner Joe J. Cross of Archer county, W. C. Smith of Archer City, W. C. Thomas of Archer City, Com-

"Oil Mill Gin" to Be Operated By H. A. Pendleton

For some time it has appeared that Munday would have only three gins in operation this season, but arrangements have been made by H. A. Pendleton with the Anderson-Clayton Company, who purchased two of the local gin plants with the oil mill properties, to operate that plant generally known as the "Oil Mill Gin," located near the oil mill, and G. W. Russell has been employed as manager of the plant, and at this time is busily engaged in making the necessary repairs, and the plant will be ready for operation within the next ten days.

This plant is operated electrically and was completely rebuilt last season, and its equipment is said to be of the very best, with all shafting working on roller bearings and the equipment represents the latest approved ideas of gin machinery, and the plant will be in position to give the same efficient service this season that it has in the past.

Lee Morrison Died On Friday Following Two Years Illness

Lee Morrison, 27 years of age, died at his home southeast of Munday on Friday afternoon of last week following an illness extending over a period of more than two years, and the remains were laid to rest in the Bomarton cemetery on Saturday afternoon at three o'clock, the services being conducted by Elder I. E. L. Harrison.

In addition to a number of brothers deceased is survived by his wife and two small children, to whom we extend our heartfelt sympathy in their great bereavement.

PARENT-TEACHER ASS'N. GRATEFUL FOR HELP

Officers and members of the Parent-Teacher Association have requested that we convey their sincere appreciation and thanks to the various concerns and individuals who contributed toward the luncheon Saturday, at which time the association cleared more than one hundred dollars, all of which will be used toward the improvement of the school grounds. We are informed that this is just the beginning of a campaign that will be conducted by this association with a view of making many needed improvements around the school buildings, and such a worthy cause should have the unstinted support of every citizen who is interested in the welfare of our school and the improvement and beautification of the premises. The ladies in charge of this luncheon state that the business concerns of Munday gladly contributed the small items for which they were solicited, and for which they are truly grateful.

They also wish to publicly thank Mr. W. C. Beavers for the work done. Now, that the work of this organization has started by the faithful ladies, let everyone who is interested in the betterment of the schools get in behind them and help them in all their undertakings, and we are sure that within a short time they will have many really worth while accomplishments to their credit.

Mrs. T. C. Willett of Rotas was a guest the latter part of last week of friends in this city.

Mrs. Bonds of Wichita Falls is the guest of her daughter, Mrs. M. F. Billingsley, this week.

H. S. Dobbs of Parker county was here last week visiting in the home of his brother, R. C. Dobbs, on route two. Mr. Dobbs is looking over the cotton crops in this section states that he is of the opinion that the crop will be much shorter than many believe, due to the dry weather.

Commissioner Boss Hood of Stephens county, Frank B. Sloan of Breckenridge, Commissioner G. B. Buck of Baylor county, Commissioner C. W. Siddens of Baylor county, M. M. Hannah of Breckenridge, Commissioners M. G. Nix and D. C. Osborn of Knox county and Judge Oliver W. Lee of Knox county.

Victor L. Walters Dies at Parents' Home In Missouri

Victor L. Walters died at the home of his parents at Lamar, Missouri, on Saturday evening at 8:15 o'clock. His death followed an operation which he underwent about four months ago, and from which he never recovered.

Mr. and Mrs. J. M. Terry left on Wednesday evening of last week for Lamar in response to a message advising them of the critical condition of Mr. Walters, and they remained there until the early part of this week to attend the funeral services, returning home on Wednesday morning, accompanied by Mrs. Walters.

While deceased was not generally known over this section, he was quite well known in Munday, having resided here for some months just prior to going to Missouri some months ago, and during his brief stay here had made many friends. The local Masonic lodge conferred the Masonic degrees upon him as a courtesy to the lodge at Medicine Lodge, Kansas, where he made his home for a time, and the intense interest which he manifested in the ideals enunciated in this order endeared him to those with whom he came in contact.

It was a little more than a year ago when Victor Walters first came to Munday, at which time he was associated with Manville Brothers show as comedian—and as excellent one he was. During his two weeks stay here he met and became acquainted with one of Munday's fairest and most popular young ladies—Miss Olga Terry, and they were happily married a few weeks later.

Full of hope and ambition, the happy young couple departed only a few short weeks ago to take up their work, Mr. Walters having for years been engaged in theatrical work, while his companion was an accomplished musician, and they had assumed their work for only a brief time when he was stricken critically ill at Springfield, Mo., and an operation was deemed necessary by attending physicians, which was performed, from which he never recovered.

Death under all circumstances is a cruel master, but in this instance, where it has placed its calm hands upon one so full of ambition—one whose greatest desire was to make people smile and forget their cares—one imbued with every virtue that stands for good citizenship—one can find no earthly consolation for their irreparable loss, but must look to a higher source for consolation.

And to the bereaved young wife we extend heartfelt sympathy, and we know that the entire community will deeply sympathize with her as she walks through the shadow and drinks the bitter cup of grief which mankind has been called upon to partake all down through the ages, and which would seem almost impossible to bear were it not for the glorious promises that loved ones may be reunited in that one rest made with hands eternal in the hereafter.

Capt. W. H. Shedy was in town (another day with several bolls of a new kind of cotton—that is it was new to us—but Mr. Shedy states that it is a fine grade of cotton and is known as "Craw Foot" cotton, the seed of which were brought here from Fannin county by him and he has a few of the stalks growing around his premises. The cotton, according to Mr. Shedy, is extra long line and if produced on a large scale would bring a premium over the ordinary variety produced in this section of the state.

P. R. Priddy, who gets his mail on route 2 out of Goree, came in on Wednesday and planked down a dollar and a half in perfectly good legal tender and requested that we send him this moral guide for the coming twelve months, and if he and Mrs. Priddy will give the aid the once-over each week during the year they will save many times the price of the subscription.

S. N. Fox and family and his sister, Mrs. Lex Reese, of Carbon, Texas, were guests over the week-end of Mr. and Mrs. C. R. Parker.

Knob Knockers At Weinert Get Haul of About \$1,400

Yeggmen invaded Weinert on Friday night of last week and carried away approximately \$1,400 in merchandise and cash, and while officers have been working on the case, no arrests have yet been made.

The work was evidently that of professionals, as an electric drill was used in opening the safe of the Eiland Drug Company, and the manner in which the hole was drilled and its location indicated that the work was done by experts at the business. The safe of the Baker-Campbell Co. and that of W. A. Holt were also entered, the knob being knocked off of the latter two.

The loss of the Eiland Drug Company was placed at \$800 by Manager Marshal Whitsett, who stated that their loss included cash, jewelry and narcotics. Baker-Campbell Company placed their loss at approximately \$300, which represented cash and merchandise taken, while Mr. Holt placed his loss at approximately \$200 in cash and merchandise.

There being no nightwatchman on duty, the yeggmen evidently worked at leisure throughout the night, and after taking all that they cared for in one establishment they made their way to another until they had evidently visited all of the stores in the town that would justify a visit from them.

Disarmament was about as popular in Geneva as it is in Chicago.

U. S. Department of Labor Will Assist In Securing Pickers

The United States Department of Labor, farm labor division, with offices at Fort Worth, has asked for permission to assist in relieving the anticipated shortage of cotton pickers in the Munday section, and has announced that they can furnish most any number of pickers that may be desired after September 5th.

The Department of Labor is striving to relieve hundreds of families who have suffered from the great floods in various sections, and where cotton crops have been destroyed by flood waters and boll weevil, and have asked that the farmers of West Texas assist them in every way possible in relieving the situation.

Mr. C. W. Woodman, assistant director of the Fort Worth bureau, has made arrangements with Mr. C. A. Eiland of the First National Bank of this city to assist him in placing families, and advises that he can furnish white, negro or Mexican labor in any desired numbers, and those desiring pickers should make their requirements known to Mr. Eiland, who will take the matter up with the Department of Labor and have the desired number of pickers within a very short time.

Disarmament was about as popular in Geneva as it is in Chicago.

Chevrolet Salesmen Making Tour Around World For Prizes

G. L. Blake, W. F. Evens and G. W. Tillinghast, salesmen for the Bell-Moore Chevrolet Company, are making a tour around the world via the "air route," by which we mean to say that it's imaginary, but they're getting a "kick" out of it just the same, and at this time Mr. Tillinghast is sojourning in Gay Paree.

But this voyage the salesmen are taking is merely a method adopted by the sales forces of the Chevrolet Motor Company to inject a little "spizeringtum" into their salesmen. They have an imaginary trip around the globe laid out in the form of a wall map, with all important stops that would likely be made by an aviator in circling the globe, and with the sale of each car they are given a mark toward one of the points, and excellent prizes are awarded to all who reach the various points and the value of the prizes increase as they progress around the globe, and the Munday bunch is going some.

THOUSAND PERSONS AT OLD SETTLERS' PICNIC BARBECUE

Haskell, Aug. 27.—It is estimated that 1,000 persons were present at the old settlers' picnic Thursday. The requirement to attend the picnic is that members of one's family should have been living in Haskell 30 years ago.

H. Weinert barbecued the beef, and there was every kind of good things to eat.

Some of the out-of-town visitors were Mr. and Mrs. K. L. Fink of Stamford, Mr. and Mrs. H. Wanert and their son, Herman, and daughter, Miss Beatrice Weinert of Weinert, Mr. and Mrs. Tom Corney of O'Brien, Mr. and Mrs. Charlie Mays of Munday, Mr. and Mrs. H. V. McElreath of Stamford, Mrs. M. Pierson and her daughter, Miss Mary Pierson of Abilene, Judge Ben Reynolds of Throckmorton, Mrs. Stanley Jones and her five sons and their families, B. H. Owens and his daughter, Miss Doris Owsley and Mrs. P. B. Broach, Mr. and Mrs. Jim Davis, Mr. and Mrs. Ed Davis and Mr. and Mrs. Tom Denison of Rule, Judge Fisher of Munday, Nathan Gilgore of Benham, three Stephens brothers from Dickens county.

Mr. and Mrs. W. H. Chapman and Mr. J. A. McKinzie left on Wednesday afternoon for Dallas in response to a message advising them of the death of Mr. four-year-old daughter of Mr. and Mrs. Royal H. Porter. Mrs. Porter is a daughter of Mr. McKenzie and a sister to Mrs. Chapman. Mr. and Mrs. Porter have recently moved from Dallas to Kansas City, and were back to Dallas on a business trip and were stopping at the Adolphus Hotel when the child was stricken with meningitis and died.

West Texas Utilities Conducting Lighting School This Week

The West Texas Utilities Co. will on Thursday and Friday of this week conduct a lighting school for the benefit of their employees, and the public is extended a cordial invitation to attend and get the benefit of the information that will be given by a corps of lighting experts from the Edison Lamp Works. All commercial men of this district will be here for the meeting and an elaborate program is being arranged for each of the two days.

An ad on another page of this paper will tell more of the school and those who are interested in illumination problems will get much benefit from attending this school.

Mr. Franklin Riggins and Miss Bertha Bryan, who have been visiting in the home of Mr. and Mrs. B. L. Lair, returned to their home at Anna, Texas, Saturday and were accompanied by Mrs. Lair and daughter, Lillian, who will visit relatives there for a few days.

Mr. and Mrs. C. M. Hendrix and daughter, Miss Delphine, returned Sunday from Dallas, where they went to purchase merchandise for The Leader.

Public Schools Open Sept. 12

Improvements Being Made in the Buildings, and Faculty Is Completed

The program of improvement inaugurated by the school board to better the condition of the Public Schools for the next session is just about completed, the building and grounds are being cleared up and everything put in readiness for the opening of school on Monday, September 12th.

During the summer the Board of Education has expended several thousand dollars in the installation of sanitary connections for both buildings. These improvements, being modern and convenient, meet a badly felt need of the past few years. Other minor improvements are being made to accommodate changes in some of the grade rooms, which will make for a more efficient administration of the school system.

There have also been several changes made in the faculty for the ensuing year. Of the teachers from last year's faculty that will remain are: Miss Mills, in the High School; Mrs. Mann, Miss Kennedy, Miss Lane, in the Grammar School, and Miss Atkinson, Miss Langford and Miss Briggs in the Primary Department.

New teachers in the High School are Mr. H. V. Standley, Principal, Mrs. J. E. Rhodes and M. Loree Compton. Mr. Standley comes to us from Abilene, where he has been attending Abilene Christian College for the past three years, and from which institution he received his A. B. Degree last June. Mr. Standley is an experienced and capable school man and will be valuable addition to our faculty. Mrs. Rhodes is a graduate of the College of Industrial Arts at Denton, hold a B. S. degree and has had two years of very successful teaching experience. Miss Compton, whose home is at Lipan, Texas, was associated with the High School Department at Megargel, Texas, last year. In addition, she has had several other years of valuable experience, and comes highly recommended for the work she will assume.

The Grammar School will have as Principal Mr. L. M. Palmer, whose home is in Grand Saline, Texas. Mr. Palmer is well qualified and experienced as a school official. He will also have charge of Mogul athletic activities. Other new teachers in this department are Mrs. H. V. Standley, Miss Naomi Bowden and Mr. J. C. Elliott. Mrs. Standley, like her husband, took her degree from Abilene Christian College this summer, and is both efficient, and capable in school work. We feel very fortunate in having Miss Bowden back with us this year. Her home is in Munday and she needs no introduction, but is, nevertheless, a most accomplished and well qualified teacher. Mr. Elliott is another local teacher, who has proven his ability, both at home and abroad as a school man. He will also assist in the athletic work.

In the Primary Department only one new teacher has been added thus far. This is Miss Juliet Rhodes, who is also from Grand Saline and a sister to Superintendent Rhodes. Miss Rhodes has had special and thorough training as a teacher and is well able to handle the work that will be assigned her.

With improved working conditions, a fine corps of teachers, and the enthusiastic attitude that is being manifested by the patrons, it is expected that we will enjoy a most successful school year.

Brief announcements concerning the opening programs of schools will be made next week.

Mr. R. E. King of the King & Lawson automobile agency, selling the Hudson-Exxon line of automobiles in Haskell and this section of Knox County, was here on Wednesday and stated that arrangements would be made at an early date for the opening of a salesroom here. This concern has recently opened a salesroom at Haskell and make regular trips to Munday until they secure a salesroom where they display their line of automobiles.

CHURCHES

EVANGELISTIC SERVICE IN METHODIST CHURCH SUNDAY NIGHT

The interest, and probability of an audience that could not be seated in the Presbyterian church made a demand for more room for the Christian church revival now in progress. The Methodist brethren have kindly offered the use of their building and the services will be held in the Methodist church building on Sunday night. The booster band at 7:45 and the evangelistic service at 8:15 p. m.

Evangelist Lewis P. Kopp.

AT METHODIST CHURCH SUNDAY, SEPTEMBER 4

Next Sunday is the first Sunday in September. Let everyone be in his place for Sunday school and start the fall right—9:45. Your superintendent is anxious to welcome you back. Preaching by the pastor 11:00 a. m. Subject, "The Meaning and Value of the Lord's Supper."

Evangelist message at 8:00 p. m. You are always welcome with us.

R. E. FREEMAN Pastor.

SENIOR B. Y. P. U. PROGRAM

Business—President, Piano solo—Lucile Collins. Bible drill—Joe Burton. Quartette—W. F. Henderson, J. C. Ewing, Lois and Bena Bowden.

Prayer—Joe Burton. Subject—Forming Friendships that Bless.

Leader—Walter Counts. Scripture reading—Gladys Williams.

Introduction—Leona Keel. I. Three Elements of True Friendship—Emis Morgan.

II. Practical Friendship—part 1. Frankie Curry; part 2. Wallace Reid.

III. True Friends are Unselfish—Onita Blanton.

IV. Practical Proof of Friendship—Marvin Warren.

V. Our Best Friend—Lois Bowden.

Benediction—Leader. We are going to Smith Chapel next Sunday afternoon to put on our program. Come to the church at three o'clock and go with us. —Reporter.

Carber, California, recently staged a "saxophone field day" without a single murder, which shows the tolerance of folks in the Golden state.

Folks are peculiar. They want clean sport, but demand dirty shows.

BAPTIST CHURCH ANNOUNCEMENTS

P. D. O'Brien Since we have been away so much during the summer in meetings, and so many of our people have been away vacationing, we have decided to launch our fall campaign of church work with a ten days revival. Splendid preachers have been secured for supply work during the summer, but the work never does as well as when we carry on our regular program, so we feel that a special effort is needed at this time. Only a time or two has the Sunday school attendance fallen as low as the two hundred mark, and the B. Y. P. U.'s have held up remarkably well throughout the summer. As pastor, we desire to record our appreciation for such faithful leaders in the different departments of the church life, who have held up their departments so well during the summer months.

Pastor C. E. Ball, of Rule has been secured to do the preaching in the meeting. The matter of selecting the preacher was left to a committee, and we feel that no better man could be secured anywhere than brother Ball for the type of meeting we feel that we need now. Brother Ball is not the sensational kind, but rather spiritual and very tender in his appeals. We feel sure that the entire church along with the community will appreciate him when we come to know and hear him.

We extend the heartiest and sincerest invitation to all Christians of the community, and surrounding communities to worship and work with us in the meeting. We trust that the service will prove a general spiritual blessing to the churches of the town, and start us on our respective fall programs with renewed vision and courage. We plan to begin the meeting on Friday night, September 9th, announcements will be made next week.

The Bible meeting, which has been in progress well over a week now, is attracting very large crowds. Often the house is full to overflowing, and many cannot get in. I have never heard such singing as the congregation is doing under the leadership of pastor Claud Stovall. Several have been saved, and many added to the church. From a hundred to one hundred and fifty are attending the prayer meetings each evening. The meeting will continue this week.

Mr. and Mrs. C. M. Hendrix and daughter, Miss Delphine, returned Sunday from Dallas, where they went to purchase merchandise for The Leader.

Your House In Order
 By Hubert M. Harrison
 President Texas Commercial Executives Assn.

The modern idea in Community Building is not so much to
 advertise your community as a commercial rival of Chicago or to
 attempt to prove that its climate is the most wonderful in the
 known world, but rather to do quietly and effectively day by day
 the little task that is next to you. Many a Chamber of Com-
 merce in the past has spent a great deal of time on the outer walls
 of the city, blowing the community horn, while it overlooked en-
 tirely the mud hole in front of the door, the unsanitary, stag-
 nant, mosquito-breeding pool in the back yard, the open garbage
 can, the unpainted fences and unkept front yards.

Let's not be so ambitious to do great things that we will
 overlook the little useful services that will mean so much to life in
 our community.

One of the biggest needs in the modern American city is
 more neighborliness. In the quest for gold we have allowed our
 cities to become collections of service stations, formerly called
 homes. American cities are in danger of disintegrating by sheer
 weight of great numbers who are not closely knit together.

The smaller towns in America have a big advantage over
 the larger ones in this. Here one finds a COMMUNITY, in all
 that beautiful word signifies, a group of citizens with common
 interests.

Don't dream of making your city merely bigger. Be concern-
 ed about making it better.

This is not only good sense, but it is good business, for a
 family that is happy and contented is permanent, and people who
 love to live in their town will tell others, in the most effective
 publicity ever devised on earth—the word of mouth recommenda-
 tion of the trusted friend.

Put "your house in order."

Work with your local Chamber of Commerce or other organ-
 izations to make your home town bigger and better.

REDUCING 1928 INSECT DAMAGE BY 1927 CLEAN-UP MEASURES

During the past several seasons, so far as weather conditions have allowed, the farmers of many parts of the Coastal area of Texas have applied themselves to fall clean-up measures, advises R. R. Reppert, Entomologist, Extension Service, Texas A. & M. College. The main object of this has been to reduce damage to cotton the following season by various insect pests, especially the boll weevil.

The practice is based upon certain facts connected with the insect. Infestation in the spring arises from the numbers of the weevil that successfully pass the winter hidden away in various protected places. The weevils seek these places about the time of the first killing frost and because they are dormant during the winter months do not require food.

Previous to the first killing frost, however, being active, they must feed continuously. Green cotton furnishes their only food and where this is not available up to the time of frost the insect either starves or is forced into its winter quarters in such a weakened condition as to be unable to survive until spring in any considerable number.

Farmers in the section mentioned have learned to apply this principle and as soon as cotton is gathered in the fall their concern is to destroy the growth so as to leave no food for the pest. It has been fairly well demonstrated in that section that where this clean-up can be applied generally over a wide area that the community suffers a minimum of damage by the weevils the following season.

It will be well for the farmers throughout the weevil infested area of Texas to consider the same means of control and as soon as the cotton is gathered to destroy the cotton growth. Agricultural advisors do not wish to be understood as advising the burning of cotton stalks on the field, although from certain standpoints this may appear the only solution of the grower's problems. From the standpoint alone also it would perhaps be the best to plow under the green cotton stalks deeply.

However, throughout a great part of our cotton growing area another difficulty arises; namely, the attacks of the disease, cotton root rot. Green cotton stalks plowed under retain life for a considerable period and hence furnish a medium upon which the root rot fungus may survive the winter to attack the succeeding crop. Where cotton root rot is a factor in production, therefore, it will be advisable for the farmers to up-root the stalks, thus exposing them to complete drying. After they have become completely dried and life is extinct they may be plowed under.

While the foregoing paragraphs apply to the control of the boll weevil by clean-up measures the same method can be effectively applied against some other cotton pests as well as many insects affecting other crops. In general, and where no disadvantages attach from other considerations, its always a good practice from the standpoint of insect control to dispose of crop residues in some manner, preferably by turning under as soon as the crop has been gathered.

In many sections the cotton crop has been almost gathered and in some sections picking is complete. Communities can follow no better farming practice at this time than to organize and systematically carry out clean-up measures so as to leave no growing cotton at the time frosts are to be expected.

ALL WEST TEXAS WILL GREET LINDBERGH

Abilene, Texas, Aug. 23.—All West Texas will have a part in entertaining Col. Chas. A. Lindbergh, the World's most famous aviator, when he stops in this city on September 26th.

Every West Texas town will be asked to send as representatives, its mayor, newspaper editors and one young lady. These will be included in the reception committee that will greet "Lindy" when he lands at Kin-solving field, Abilene's municipal airport.

• Dr. E. M. Roberts, Jr.

• DENTIST

• Office

• Over Elks and Drug Store

Each of the feminine members of the reception committee will be asked to dress in red, white and blue, the national colors and incidentally the colors of the Air Mail Service, of which Lindbergh is a graduate. West Texas will not only get to see the young colonel and his ship, "The Spirit of St. Louis," but in addition, the distinguished visitor will be introduced to a number of West Texas celebrities and to the "Spirits" of the different towns of this section. Each of the young lady sponsors will represent the "Spirit" of her home town and as such will participate in a spectacular pageant that will be given during the day of "Lindy's" visit here at the West Texas Fair grandstand.

Mayor Thos. E. Hayden, Jr., will head the honorary arrangements committee on which will be Mrs. Dan Moody, wife of the governor of Texas and the daughter of Mr. and Mrs. George L. Paxton of this city; Hon. R. W. Haynie, Abilene, President of the West Texas Chamber of Commerce, and Mrs. J. U. Fields, Haskell, President of the Texas Federation of Woman's Clubs.

The program for the affair is in charge of the aeronautics department of the Chamber of Commerce. T. N. Carswell, secretary of the chamber is active chairman of the arrangement committee. Other members are J. McAllister Stevenson, W. G. Kingsolving and R. S. Stephens.

Needed Practice

Lord Babbington was instructing the colored servant in his duties, adding: "Now, Zebe, when I ring for you, you must answer me by saying, 'My lord, what will you have?'"

A few hours afterwards, having occasion to summon the servant, his lordship was astonished with the following: "My Gawd, what does you want now?"

Just As Easy

Professor A.—Do you know, I find it difficult to remember the ages of my children?

Professor B.—I have no such trouble. I was born twenty-three hundred years after Socrates, my wife eighteen hundred years after the death of Tiberius Caesar, our son, John, two thousand years after the entrance into Rome of Tiberius Sempronius Gracchus for the reenactment of the ledges of Liciae, and our Amanda fifteen hundred years after the beginning of the Folk-wandering—that is perfectly simple, you see.

Tactful

"Ah wins."
"What yuh got?"
"Three aces."

"No yuh don't. Ah wins."
"What yuh got?"
"Two nines an' a razor."
"Yuh shoh do. How come you so lucky?"

O Gee Wiz

He had fallen for her. They were in classes together but she didn't speak to him. By desperate means he finally met her. They were alone. His dream had come true.
"How's your Math?" she asked.
"Good," he replied. "How's your Anatomy?"
"I think you're horrid!" she exclaimed.

Then the Fun Began

She—"If you remember I stop crying send him down and

wasn't so anxious to marry you, I refused you six times."
He—"Yes, and then my luck had to give out."

Kind of a Mamma

"I'd face hell itself to marry that girl, Archibaldus."
"You will, Nicodemus, wait till you meet her mother."

Well, He Asked for It

"Darling, you would be a marvelous dancer but for two things."
"What are they, sweetheart?"
"Your feet!"

Poor Kid

Auntie—"If Richard won't

I'll sing to him."
Mother—"No, that won't work. I've threatened him with that already."

The diner had not enjoyed his meal at all. And in accordance with the instructions on the menu "kindly report any dissatisfaction to the management," he called the head waiter to his table.

"I have a serious complaint—"began the diner, but was interrupted.

"Then why don't you try a

hospital, gir?"

Look Natural, Please

Big Bloke—"Are you the great animal painter?"
Artist—"Yes, do you want to sit for a portrait?"

Any Way You Want It

"But dad, Billy has got character. You can read it in his eyes."
"Then, Muriel, I've just blackened his character."

Breaking the News

"Uncle, you promised me a speedster, if I didn't get married until I graduated."
"Yes, Gladys."
"Well, uncle, you've saved some money!"

Many have a fondness for rare old coins, but new ones are rare enough for most of us.

Henry Ford recently made his first airplane flight, but he had been up in the air before.

BOYS' AND GIRLS' CLUBS

No movement having for its object the betterment of rural life is worthy of more encouragement and support than that of forming and maintaining boys' and girls' clubs. It is gratifying to observe that the movement is spreading rapidly, and that more than half a million young people on the farms of the country are enrolled in clubs sponsored by the Federal government alone.

In a recent review by the Department of Agriculture it was shown that civic bodies, fair committees, bankers and individual business men in many states are taking notice of the club movement, and are fostering it through the offering of prizes, scholarships, trips and other rewards for efficiency shown by farm boys and girls in carrying out the various projects included in the club program.

Club activities not only serve to prepare young people for their life work, if they choose to stay on the farm, but the conducting of their own meetings develops qualities of leadership and confidence in themselves. Even those who enter other pursuits are better fitted for their future careers by the discipline and training which are inseparable from club membership.

Every rural community should cooperate with home demonstration agents and other extension workers in promoting boys' and girls' clubs. It is a splendid enterprise, which will have a most beneficial effect upon farm life in the future.

ROUGH RIDER CHIEF DIES

Major General Leonard Wood, governor general of the Philippine Islands, who first rose to fame as colonel of the "Rough Riders" regiment in the Spanish-American War, died a few days ago in Boston at the age of 67, after a distinguished though stormy career.

General Wood was educated for the medical profession and entered the army as an assistant surgeon in 1886, serving in Indian campaigns in the Southwest. His aptitude for military duties manifested itself early, and he frequently did duty as a line officer in addition to looking after the health of the troops. When the Spanish-American War began in 1898, he was a captain in the Medical Department, stationed in Washington, where he had become closely associated with Theodore Roosevelt, then assistant secretary of the Navy.

Wood and Roosevelt secured permission to organize the Rough Riders, Wood becoming colonel and Roosevelt lieutenant colonel, and saw service with the regiment in the Santiago campaign, in which, contrary to popular impression, the regiment served on foot, the horses being left behind in Tampa. Wood was made a brigadier general of volunteers at Santiago, and Roosevelt became colonel of the Rough Riders.

General Wood served as military governor of Cuba prior to the establishment of the Cuban Republic, after which he spent several years in the Philippines. The refusal of President Wilson to send Wood to France during the World War, although he was the ranking general of the Army, aroused considerable controversy, and the alleged use of large sums of money to secure Wood's nomination for the presidency in 1920 involved him in another unpleasant incident. In 1921 President Harding appointed him governor-general of the Philippines, which post he held until his death.

His administration was marked by many clashes with native Filipino politicians, who unsuccessfully put forward demands for complete independence, but on the whole his work in the island was highly creditable. His long and distinguished career in the service of his country is deserving of grateful remembrance.

PEROVICH'S ODD CASE

In 1909 the case of Vuco Perovich, convicted of a murder committed in 1905 in Alaska and sentenced to death, attracted wide attention. President Taft commuted his sentence to life imprisonment, whereupon he protested on the constitutional ground that life imprisonment was worse than death and that the President had no right to increase the severity of his punishment.

But Perovich was kept in prison until 1905, when a Federal court in Kansas upheld his appeal and he was released on a writ of habeas corpus. Since then he has been working as a barber at Rochester, N. Y., but in June last the Supreme Court of the United States reversed the Kansas judge and declared the commutation of sentence legal. Again faced with a life term, Perovich appealed to President Coolidge, who granted him a pardon a few days ago.

Thus ends one of the strangest criminal cases on record, leaving Mr. Perovich free to continue his barbering, or, as he hopes, to go into the movies.

If a woman has so all-fired much intuition why does she ask so many questions?

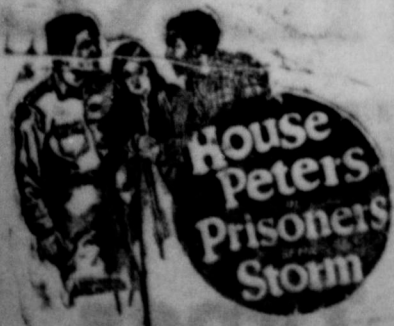

An Arkansas barber's home was burned, probably by some fellow he had worried about having a singe.

A 100-FOOT SKELETON

After being buried for ages in the fossil beds of northeastern Utah, the largest skeleton ever discovered on land now stands in the Carnegie Museum at Pittsburgh, a striking example of the monsters which roamed the earth during the Age of Reptiles, many millions of years ago.

This skeleton is that of a Brontosaurus, of the dinosaur order of reptiles, 100 feet long and 20 feet high. In life the animal weighed perhaps 20 tons. Alongside of it an elephant would seem as small relatively as a dog beside a horse.

The fossil bed from which it was taken is the most extensive deposit of dinosauran and other reptilian remains ever discovered. It was found in 1919, and the site is under the protection of the National Park Service. More than 200 tons of bones and other material of scientific value have been removed for study and exhibition, with very little duplication of specimens.

According to a recent statement by the Park Service, it is the belief of scientists that these prehistoric animals were originally imbedded in a sand bar in some ancient river. This sand turned to sandstone and was covered by thousands of feet of other strata of rocks, the whole later having been forced into an upright position by a great volcanic upheaval, which left the fossil bed exposed on a mountain top.

Through the patient labors of scientists who are continually exploring among such records preserved in the rocks, as well as among the ruins of ancient civilization, salient facts in the world's history which were totally unknown a few years ago are being brought to light.

MAKE TAXABLE WEALTH

The significant thought regarding property and taxation, which applies to all agricultural states and communities, was voiced by Dr. James S. Thomas of the University of Alabama in a recent address, before a meeting of Alabama Power Company surgeons, when he said:

"Hope for economic independence lies in the creation of increased volumes of taxable property to provide funds with which to educate youth, build good roads and support other state institutions and public works."

Explaining his statement, he stressed the development of industry as the key to the creation of new taxable wealth, declaring that no state or county which depends upon agriculture alone can be highly prosperous.

It can not be denied that by introducing industrial enterprises into agricultural states markets are created at home for products of the farm, besides providing industrial property to bear a large share of the tax burden which otherwise falls upon the farmer alone.

States and communities which encourage the establishment of factories through reasonable regulatory laws, equitable methods of taxation and a spirit of cooperation will inevitably prosper to a much greater degree than those in which opposite policies are adopted. Agriculture and industry must go hand in hand in order to insure maintenance of the best American standards of living.

PLUCKY BOY REWARD

About eighteen years ago John Livak was born on a Vermont farm of Hungarian parents who had little education and a very imperfect command of the English language. The family was poor, and as soon as he was big enough John took his share of the daily tasks on the farm, outside of school hours. But John was ambitious. His handicap of humble birth and foreign descent did not dismay him.

After finishing the course in the little district school nearby, he walked four miles and back each day to attend the high school in Rutland, often in the severest weather, with the temperature far below zero. This year he graduated, standing second in a class of 128.

But that is not all. He has won the national essay prize offered by the American Chemical Society, in competition with 6,000 other high school pupils. This gives him a full four year scholarship at Yale, with \$500 a year for living expenses besides.

This is but another illustration of what a young person with ambition, energy and grit can accomplish, even under adverse circumstances, in this land of opportunity.

The example of John Livak, the Hungarian farmer boy, is a stern rebuke to those who belittle our American institutions and sow seeds of discontent, as well as to those shiftless individuals who whine because they "never had a chance."

RENO IS BOOMING

This is not intended as free advertising for Reno, Nev., but the unique character of that thriving town's attraction is such as to make it a legitimate subject of comment.

Reno has long been famous for its industry in "divorces while you wait," and you don't have to wait so very long, either. It used to take six months, but the last legislature accommodately shortened the period to three. Some folks who thought three months was a scandalously brief time in which to secure a divorce tested the constitutionality of the new law, but the Supreme Court recently stamped it with its O. K. So, Reno's divorce industry has not only been saved, but it has been given a substantial boost.

While the divorce colony formerly averaged about 800, it has rapidly jumped to 1,500 and 150 lawyers are busy arranging details of the "putting asunder" process.

It will take several Grenta Greens, "marrying parsons" and the like to furnish the raw material for Reno's expanding divorce mill.

STAMPS 80 YEARS OLD

It is perhaps not generally known that United States postage stamps have been in use only 80 years, but such is the case. Many persons now living can remember when postage stamps were unknown. The first issue of United States stamps consisted of only two denominations, the 5-cent, used on half-ounce letters going 300 miles or less, and the 10-cent for letters going a distance exceeding 300 miles.

The 5-cent stamp bore the portrait of Benjamin Franklin, our first postmaster; the 10-cent stamp bore the portrait of Washington, and were first issued in 1837, although a few postmasters had issued some stamps at their own expense for about two years previously. The very first adhesive postage stamps to be issued by any government were introduced in England in 1840, the example being quickly followed by other nations.

In addition to the regular issues of stamps, the United States has at various times provided special stamps commemorative of important historical events, the last of which is the Lindbergh 10-cent air mail stamp. Three memorial stamps have been issued, in memory of Lincoln, Harding and Ericsson.

The first issue of postage stamps in 1847 would seem very insignificant in volume compared with the tremendous output of the present year, which is estimated to be not less than 18 billion, requiring 1,000 tons of paper, 575 tons of gum and 500 tons of ink. Placed end to end this one year's supply would reach around the earth at the equator ten times.

But no one has figured out how much energy and moisture it will take to stick them where they they will perform their duty.

Dr. and Mrs. A. A. Smith and daughters, Misses Madge and Maurice, and son, Arthur, Jr., returned Friday from Colorado and New Mexico, where they spent some ten days on a vacation. One of the most interesting places visited by them was the Carlsbad cave, which is rapidly becoming known over the nation as one of the most beautiful and wonderful caves in the world, and many who have visited the Carlsbad cave declare it is far more wonderful than the famous Mammoth cave of Kentucky.

Mr. and Mrs. J. W. Wiley and children were here Saturday from Benjamin, where Mr. Wiley has recently been transferred from Bronte, Texas, by the Western Union Telegraph company.

Low flying is prohibited in many cities, but the high flyers go on unmolested.

HOWE ABOUT—

By ED HOWE

Copyright by The Holt Rinehart, Inc.

I know a woman who is a lady in everything save a card game. . . . It is foolish to spoil a nice woman for a foolish game of cards, so I shall play no more with her, and make up . . .

It is easy to be good to babies a year or two old, they are so innocent. . . . But babies seventy or eighty years old are a great trial, they are so sophisticated and insulting.

Men no more than half believe in the big ideas; and half the time the big ideas are stolen.

Everyone of fair intelligence knows the importance of modesty. Braggart will not do, if one hopes to get along; people themselves are braggarts, and quietly condemn the habit in others.

I have often observed the studied attempts of people to be modest, and that it comes hard with them; they want to brag, but know it is not advisable to do so, and so refrain as much as they can.

Modesty is a civilized, a cultivated habit; a man's natural instinct is to advertise impudently, and claim more than he is entitled to.

But he has somehow learned the value of modesty, and tamely tries to practice it.

It is an old saying that if you remain quiet, and permit a man to talk freely, he will give himself away; tell his secrets, lay bare his motives, display his weaknesses. . . . Some way with a writer; you can tell what sort of man he is by looking over his complaints and notions. . . . I can always tell—or think I can—whether I would like to personally know a writer. I was reading a woman lately, and decided she is the sort of woman everyone runs from.

More New Furnishings

We are receiving new merchandise almost every day, and we now have a nice line of Men's Pants, Shirts, Underwear, Stetson Hats in all the new shapes and colors, Collars, Ties, Caps, everything for the man who uses discretion in buying his wearing apparel. See our line of caps for school wear.

Spann & Huskinson

Baker-Campbell Co., Munday, Texas

Lighting School

On Thursday and Friday of this week we are conducting a lighting school for our employees and the public in general, and we wish to extend a cordial invitation to the citizens of Munday to attend the sessions on Thursday and Friday afternoons at the Community Auditorium.

Home Lighting

THURSDAY AFTERNOON 3:00 to 5:30

Every phase of home lighting will be discussed and demonstrated, and most everyone should be interested in this important matter.

Interior Decoration

FRIDAY AFTERNOON 3:00 to 5:00

You'll be interested in these matters and you will get some very valuable ideas by attending this session.

Representatives from the Edison Lamp Work will be in charge of this school, and representatives of the West Texas Utilities Company will assist.

A cordial invitation is extended to the public to attend these sessions.

West Texas Utilities
 Company

Saturday Specials

We have more of them than usual for Saturday, but for good reasons we're not listing them in this space this week, but ask that you visit our Grocery Department and see for yourself, and when you do you'll know that we are leaders in high-grade groceries at low prices.

Baker-Campbell Co.

We Deliver

Quality and Service

VALUE OF A BALE OF COTTON

By Phebe K. Warner

A few weeks ago I attended a meeting of newspaper men. Until that day my personal opinion of a newspaper man was that he was the broadest-minded professional man on the roll. That his profession had actually taught him to look for and see all sides of any question. But I was a little disappointed that day.

As usual the subject of "Farm Relief" came up for discussion. There is more said and less done on this subject than any movement before the American people at this time.

To demonstrate one reason our cities are outgrowing the country, the story of a 15-cent handkerchief was told. This is the story: One day a cotton grower in a Southern State bought a little cotton handkerchief for 15 cents. Going down the street he saw a pair of scales on exhibit with a pound bale of cotton hanging on them. He decided to see just what that pound of cotton would be worth made into 15-cent handkerchiefs. He went back to the store and borrowed enough handkerchiefs to equal a pound of cotton. It took 112 handkerchiefs. Therefore the pound of cotton which was marked 16 cents would bring 16.80 made into 15-cent handkerchiefs. And a bale of cotton converted into the same kind of handkerchiefs would bring \$8,400.00.

Then the question was asked, was the difference between 16 cents for a pound of cotton and \$16.80 for a pound of handkerchiefs too great for justice to the farmer. Was the spread from \$80 for a bale of cotton to \$8,400 for a bale of handkerchiefs in any way responsible for the vast difference between the development of our cities and our country?

And what do you think? Two of those country editors, who claim to be publishing their paper for the edification of the country people and who depend for a part of their patronage on the country people seemed to think it was all right. That the farmer got his full share of the profits. It was then pointed out that last year the farmer received around \$50 for his cotton and some of them as low as \$25 a bale. Still that bale would make just as many handkerchiefs as if the farmer had received \$150 for it.

But that wasn't all. Those fine fellows accused us of trying to build a WALL of PREJUDICE between the country people and the city people by telling such misleading stories.

No one has to believe that story unless they want to. Any third reader pupil can work it out for himself.

Just yesterday we picked up a two-year-old Texas paper in which we found a whole page advertisement of the C. R. Miller Manufacturing Co., of Dallas, Waco and McKinney, and this is the lesson we learned from it.

A bale of cotton, by U. S. Government standards, weighs 476 pounds net. As raw material selling for an average of 23 cents a pound, it is worth \$109.48. (No doubt the spinner pays that for it but how often does the farmer get that price for it?)

That bale made into 1944 yards of bleached muslin at 20 cents a yard sells for \$389.80. Made into 1904 yards of bleached sheeting at 60 cents a yard brings \$1,142.40. Made into 4,760 yards of lawn at 39 cents a yard it will bring \$1,856.40.

The jump from \$109.48 per bale for raw materials to \$389.80 and \$1,856.40 for finished goods represents an increase of from 300 to 1,800 per cent. True this is not all profit to the mills, but it does represent increased returns for Texas products—money that is distributed between all Texas business, professional and laboring people.

That is just what Mr. Miller, the manufacturer, says himself about his own business. Was he trying to build a wall of prejudice between the country and the city? Not he. He was trying to show Texas she ought to build more cotton mills in Texas and keep her profits at home a little better which is absolutely right.

So far no one has said anybody received more in those cotton mills than they earned. No one has complained about price of calico or lawn. Let's go a step farther.

I saw today by some paper that the 1927 Texas cotton crop had been estimated at 4,500,000 bales. Suppose we lop off a half million bales for boll weevils and frost and drought and count on an even 4,000,000 bales. At \$109 per bale this would put \$436,000,000 in the farmer's pocket. The same

amount if converted into muslin at 20 cents a yard would amount to \$1,520,000,000 for Texas. If the entire 4,000,000 bales were converted into lawn at 39 cents a yard, in Texas, it would mean \$7,424,000,000 to be distributed among the Texas business, professional and laboring people of our cities.

What's Wrong With This Picture?

We are not trying to build any wall between the country and the city. It's already built. Who built it? What did they build it with? All we are trying to do is to jar a few thoughts loose in the head of both the city speculator, the manufacturer and merchant, and the farmer himself. We're not finding fault of what the city gets out of the Texas cotton crop. The thing we would like the people and the government to answer is this: Is it fair, is it human to keep our Texas children out of school to produce a crop that builds such cities as we have in Texas and the United States and such school houses as we have for the children who make the city profits possible? It this is prejudice, God pity our patriotism.

Students who desire work done out of residence will have the service of a new department of Correspondence and Extension at Simmons this year. This department will be regulated and all work done in it will be recognized everywhere.

Largest Enrollment In History Expected At Simmons This Year

Ablene, Aug. 30.—Room reservations and advance inquiries for information that have been pouring into the Simmons University have already justified the preparations which the school has been putting forward to meet the demands of the largest enrollment in its history this fall. These advance indications point toward a fall registration of over 1,000 and a total for the year exceeding 1,500.

Simmons authorities foresaw this increase before the close of last spring's session, and began their plans which would broaden the curriculum, improve the facilities and take care of the largest and most varied demands for university work.

Two new buildings are now nearing completion which will help to relieve the heretofore crowded conditions, a new auditorium which will seat 1,600 people and a new cafeteria, which will accommodate the whole university. The auditorium is a temporary structure to take care of the situation until the new \$300,000 chapel and administration building is erected. In the future, in the center of the campus. The present

chapel hall is a good, practical fireproof, brick structure, however, which adequately meets the situation.

The cafeteria is also a fireproof structure. An experienced New Orleans cafeteria man has been secured to run the eating house.

Other construction which is going on and will be ready for the fall opening is the remodeling of the old auditorium in Ablene Hall into six class rooms and the remodeling of the dining hall and kitchens in the women's dormitories into living quarters.

The teaching staff at Simmons has been increased to take care of new and larger demands. Professional courses have especially been strengthened and expanded. The university plans to meet the growing demands for such work. Business Administration has been reorganized, the department of Home Economics has been expanded to cover every possible phase of that work. A department of Journalism has been added to cover every phase of newspaper work, both reportorial and editorial.

Simmons plans to keep up her record in extra-curricula activity. The athletic situation is bright with a new, recognized coaching staff in charge. Frank Bridges, famous all over the South is head coach and director. His assistants, Leslie "Fats" Cranfill and Charlie "Potts" Anderson, two of Texas most promising young mentors will have charge of football this fall while Bridges stays out a contract in California. Bridges will report in January, maintaining in the meantime a direction over the university athletics.

In all other activities, the famous Coolidge Band, the debating teams, the university publications, Simmons offers the best of opportunities to her students. But these are not all that Simmons offers. In all her growth, the pioneer school of West Texas has not abandoned its old democratic spirit of fellowship. Simmons is still a school where the instructors and the students are close together, where personal contacts are counted as dear and valuable as the hours in the classroom.

Simmons seeks to build on the foundation of religious faith and endeavor, upon which it was established and to turn out the all-round man and woman—mental, physical and spiritual.

TEXAS PROGRESS NOTES

San Angelo—Natural gas will be available in San Angelo from the Coleman County gas fields by September 15, according to officials of the Western Gas Service Company.

San Angelo—Plans for the new Tom Green County court house will soon be completed. A bond issue of \$294,000 has been voted.

Falfurrias—The Central Power and Light Company, San Antonio, has acquired the Falfurrias Light and Power Company's water works, electric light machinery and ice factory and plans to improve service in Falfurrias.

Athens—Henderson County is planning a 40 mile hard surfaced highway from Mabank to Frankston to cost about \$1,400,000.

Brownsville—Cameron county plans a concrete highway from Barreda to Point Isabel to cost about \$700,000.

Larado—M. Little and L. I. Stephenson are planning a 12 story, 242 room addition to the Hamilton hotel here.

KNOW TEXAS

The Lone Star flag of Texas was adopted at the third congress of the Republic at Houston, January 25, 1839.

The highest town of consequence in Texas is Fort Davis, seat of Jeff Davis County, known as the "city a mile high." It is in the Davis mountains.

Fort Davis may soon have its first modern electric light and power plant. A 50 year franchise to supply the town with light and power has been granted to the Central Power and Light Company of San Antonio.

The Texas flower is the Bluebonnet by legislative enactment of 1901. The state tree is the Pecan.

The annual value of the commercial well waters of Texas is

estimated at \$20,000,000, which puts the "mined" waters of the state among its leading minerals.

Judge Clowery of Chicago told Mrs. Ella Vance that she ought to be spanked for taking her husband's wages.

During a flight of a passenger plane from Cairo to Bagdad, a pigeon sat on top of the machine.

Toy pistols are not permitted to be shipped to British India. Well, they wouldn't be of much use in quelling a mutiny.

Are you using the right oil?

YOUR car's life can be prolonged by using the right kind of oil. On the other hand, it will be materially shortened if you use the wrong kind.

Conoco Motor Oil is made to meet specific requirements. For instance, there's one grade of Conoco Motor Oil made especially for your car. You'll find it listed on Conoco chart. Use the proper grade of Conoco and forget your lubrication worries.

THE FARMER'S BEST WAY OUT

Dean Russell of Wisconsin College of Agriculture says: "Two things have hit the farmer hard but the same things have hit business. They are increase in cost of production and decline in prices which latter has been more drastic in farm products than manufactured products. The farmer's political friends say salvation can be found through legislation. Our legislative doctors propose price control. The difficulty with this is price control always means price elevation which always produces expansion in production and if this occurs without expansion in consumption you have inevitable decline in prices. The remedy works to produce the very opposite result from that intended.

"Another legislative panacea would make it easier to borrow, as if run into debt was the solution of the difficulty. There are farmers who wish it had not been quite so easy to borrow because the inevitable day comes when they have to pay principal and interest. The third legislative remedy would make easier the pathway for cooperative endeavor. All you have to do is to wait the magic word 'Cooperation' and all the farmer's difficulties will immediately disappear. I wonder if there is any government that can make people cooperate. The success of cooperative effort will lie in organization from the bottom up rather than from the top down and it will take a decade or two for the results to be felt.

"The farmers have at hand a remedy that can be utilized immediately with the definite knowledge that it will secure far better results if they will take a leaf out of present day business methods they will have relief in agriculture they will not have to wait for business as suffered the same as the farmer, yet business came through in a way that is far ahead of the farmer. This has been brought about through industrial efficiency, through improvement of methods. They have increased labor output per unit to the degree the cost of production have actually been reduced by better methods of carrying on work. Industrial enterprises on a large scale are spending millions on research. In ten years automobile output per worker has increased 172 per cent, shoes 211 per cent, oil 82 per cent, cement 61 per cent.

"Compare that with others. The packers have increased only 25 per cent, sugar reducing 28 per cent, boots and shoes only 8 per cent. There has been an increase in agriculture since 1912 of 26 per cent. It is doubtful that business has any such opportunity as exists in agriculture to reduce cost of production through improved methods. Take corn— Iowa shows a variation in cost of production from fifteen cents to seventy-five cents a bushel. In Illinois the cost of producing corn on 80 acre farms was reduced from fifty-two cents to twenty cents a bushel. The manufacturer who had it within his power to reduce production costs from fifty-two to thirty cents per unit would be tickled to death with the opportunity of meeting competition under these conditions.

"The way out for the farmer is (1) to become a business man, (2) to adopt business methods, to adapt himself to the same kind of conditions and be as efficiently mobile as is our manufacturer or our business man in the ordinary conduct of his trade, (3) to rely less upon political promises and more upon individual initiative. (4) to work toward cooperative endeavor, but in the mean time not to wait for cooperative endeavor to solve all of these problems because technically it can be solved right at the present time.

The Livestock Situation

During the past several months a great deal of comment has resulted from packers purchasing hogs direct from the country rather than through central markets. This fact has been paraded as a forerunner of the breaking down of the principle of centralized livestock marketing.

However, to the close observer who has studied the movement of livestock of all classes this situation has not indicated anything alarming or prophetic of a change in the system of livestock marketing through central markets which has given itself so good an economical standing. Unquestionably this situation has been brought about by the smaller number of hogs available to meet requirements.

The number of hogs in the country has decreased from 74 1/2 million in 1917 to 61 million in 1926. It is interesting to note that in the face of this sharp curtailment of hog production the per capita consumption of pork increased from 68 pounds in 1919 to 77 pounds in 1926 and the consumption totalled 9 billion pounds in 1926 as compared with a slightly over 7 billion pounds in 1919.

This increased production and increased consumption, as accounted for by the marketing of breeding herds in many cases, is reflected by high price levels. These figures indicate an extraordinary situation, with decreasing supplies and increasing consumption and in this we find the answer to country buying.

Experience in the past has proven that when hog supplies become scarce buyers generally have gotten closer to the source of production, thus making more sure a supply. In these periods the tendency has always been to go to the smaller marketing centers and concentration points. The opposite to this is true when sufficient hog supplies are available and I believe this is aptly summed up by one of the large national packers:

"When sufficient hog supplies are available it is not necessary for the packer to carry the added expense of direct buying and he, therefore, increases his purchases at the central markets. However, during the short supplies there is a direct effect on institutions at central markets,

shipping associations, etc., and we find the question is brought up as to whether there is a movement adverse to buying through the central markets.

"Unquestionably the increase in direct purchases has nothing to do with the support or non-support of central markets as the necessity and economical value of central markets is recognized, where receipts and values can be recorded, a diversity of the supply made available to the purchaser at the least possible purchasing expense (reverting to the benefit of the producer) and added to this is the highly trained selling service made available to the producer."

Briefly, country hog buying is the direct result of under supplies and is a natural temporary condition due to this, and as soon as production reaches the point where the movement may return to its normal function, the volume will again be handled through the central markets simply repeating what has happened many times before when production became subnormal, forcing the buyers as near as

possible to the points of production in securing their supplies with economies both for producer and buyers temporarily thrust aside to meet temporary conditions.

WHAT'S NEW?

Glassmaking secrets known to ancient Egyptians and Chinese, but lost for centuries, have been rediscovered by Englishmen.

A new life-belt for bathers, which may be inflated by blowing through a small rubber tube, has been devised.

Progress is being made toward perfecting a process for sending colored pictures by wire.

Scientists declare that music judiciously selected has remarkable powers for renewing the vitality of tired workers.

Electrical pianos are used in London University for the instruction of music students in certain portions of their course.

A new machine for testing the resiliency of golf balls has been invented with a view to adopting a universal standard.

We wonder if the new Ford will retain the old Model T rating.

Our 1927 Girls

Phebe K. Warner

A few days ago I stepped into an elevator in one of our Texas cities. There were six or seven others in it. The operator was a young girl about fifteen years of age. She was neatly dressed, courteous and attended strictly to her own business. After slipping down a floor or two she stopped the elevator and opened the door to take on another passenger. The passenger made some remark to the little girl and stepped back. The little girl answered back with a snappy "What's it to you?" Gave the door a slam and down we went to the next floor where some of the passengers got off. By the time we reached the third floor all had left the elevator but the little operator and myself.

Turning to me as if seeking some one's interest and sympathy, she said: "I hate that man who stopped the elevator up there. He does that nearly every day. And if there are only one or two on he will ride up and down till everybody gets off and then he tries to get us girls."

That child's look and tone will stick in my memory a long, long time. And a lot of thoughts have chased through my mind since that day. A young girl in her early "teens" running an elevator, hour after hour, in a big business house, facing every kind of men and women trying to help make a few dollars to get her own clothes, or help her mother support the family or something. There was a reason for her being there. Perhaps she had nothing to do at home and wanted to be busy. Maybe she did not have a home. No matter what the reason for her doing that work. She was doing it well. Behaving herself and treating everybody courteously.

But a big, full-grown man, two or three times her age who should have considered it his duty to protect a child like that in any public place seemed to delight in tormenting her and forcing her to be rude and discourteous.

Never before in the history of American girlhood have our girls received so much criticism as they do today. Everywhere you go some one is deploring the awful standard of our 1927 girls. "They are so rude and pert and flapperish. They are so bold and brassy and immodest. What is to become of this world?" I heard a great big prominent and intelligent man say not so long ago that he actually believed the "world" would come to an end in another ten years if something wasn't done with our girls.

All right! Granted! Just

where do you think we better begin? With the girls of today, their mothers, or with a certain class of men who seem to delight in breaking down the morale of our working girls and then set up a howl about the low standards of our present generation of girls and blame the girls for all the human tragedies of life?

Personally, I believe the girls of today are the most self sufficient, the most independent, the most ambitious, the most useful and the biggest hearted girls the world has ever known. The chief thing they need is employment for their spare time that modern living conditions have set free and wise guidance in finding their place in this new world of today and practical training to fit them for the new places and the new day into which their lives have been cast.

There is hardly a shop, factory, office or business of any kind at this time that is not depending on somebody's daughter to help carry on that business. Is it just or fair or sane to expect our girls to not only carry their share of the moral responsibility of the business world but actually reform a generation before them? Where does man's responsibility begin in this new business world in which we all find ourselves in this new century?

It is so much easier to criticize a girl than it is to reform a man. It takes so little brains to gossip and find fault. Do you suppose the day will ever come when men will consider it their duty to make the business world a fit, safe place for girls? Every girl has a father or has had at some time in her life. What are fathers for if not to protect their children, girls as well as boys?

Our girls did not make the day in which they must live and struggle. But millions of them are trying to face it bravely and honestly. More girls are working to educate themselves and prepare themselves for the duties of life than ever before. More girls are studying home-making and child rearing than ever before. More girls are actually "Thinking" than ever before.

There is no other group in our American life that is trying harder to find themselves and adjust themselves to the changing conditions than our own girls. What are we, their parents and the older generation, doing to help them? Not much. Just criticizing to prove what fine standards we hold up for girls just so our standards for men are not disturbed.

A critic declares an English movie actress to be without a peer. But she is probably doing her best to land one.

MEETING OF THE KNOX COUNTY BAR

At a meeting of the Knox County Bar, held at the court house in the town of Benjamin, Texas, on the 16th day of August A. D. 1927, the following proceedings were held, to-wit:

The bar was called to order, and the purpose of the meeting stated, whereupon, Hon. D. J. Broekers was nominated and elected as chairman, and upon motion, the chairman appointed Messrs. M. F. Billingsley, J. S. Kendall and Jas. A. Stephens, as a committee to draft and present to the court suitable resolutions on the death of the Hon. J. H. Milam, late presiding judge of this district, and said committee presented the following report and resolution, to-wit:

WHEREAS, on the 3rd day of July, A. D. 1927, at 12:30 P. M., at his home in the town of Seymour, Texas, the Honorable J. H. Milam, for many years the presiding judge of the 50th Judicial District of Texas, departed this life; and,

WHEREAS, by his untiring, honorable, unselfish devotion to duty, firmness of principles, and legal ability, he endeared himself to the members of the Bar of Knox County, Texas, as well as Knox County's citizenship generally; and,

WHEREAS, in his death, Knox County, and the 50th Judicial District has lost a great jurist, an honorable man, and a fearless and righteous judge;

NOW, THEREFORE, BE IT RESOLVED, that we, members of the Knox County Bar, as an expression of the esteem in which Judge Milam was held, hereby declared that in the death of him, the Bar of Knox County has lost a friend, the citizenship of the district a just and upright judge; his family, a loving father and counselor; that we extend to the family of Judge J. H. Milam, our sincere condolence and sympathy in their bereavement; that a copy of these resolutions be presented to the court, with the request for approval, and that a page upon the minutes of this court be dedicated to the memory of the deceased, Judge J. H. Milam.

Respectfully submitted,
M. F. BILLINGSLEY
J. S. KENDALL
JAS. A. STEPHENS,
Committee.

ORDER OF THE COURT

On this the 16th day of August, A. D. 1927, came on to be heard and considered the request and resolutions of the Knox County Bar Association, upon the death of the late Hon. J. H. Milam, who for years was the presiding judge of this court, and it appearing to the court that said request should be granted in honor of his

memory; IT IS, THEREFORE, considered and ordered by the court that a page of the minutes of this court be set aside for the recording of these resolutions, and it is further ordered that the clerk of this court record such resolutions, as well as this order, upon the minutes of this court, and that a copy thereof, be forwarded to widow and family of the late Judge J. H. Milam.

ISAAC O. NEWTON,
Judge, 50th Judicial District, THE STATE OF TEXAS, COUNTY OF KNOX.

L. J. C. PATTERSON, District Clerk in and for said County and State, do hereby certify that the above and foregoing is a true and correct copy of the minutes of the District Court of Knox County, Texas, as the same appears on record in Volume 7, page 210.

Given under my hand and seal of said court this 16th day of August A. D. 1927.

J. C. PATTERSON,
District Clerk in and for Knox County, Texas.

TEXAS TECH. WILL TEACH AVIATION SCHOOL

Lubbock, Texas, August 23.—Answering the demands for the latest in technical education, a modern school of aeronautics will be included as one of the courses in the Texas Technological College, if tentative plans discussed and approved at a meeting of the board of directors of the college in Dallas, Monday, are perfected and become operative.

Through negotiations with the Lubbock chamber of commerce, a landing field is to be installed on the campus soon which will be used by both the school and the municipal fliers. Dr. Paul W. Horn is in San Antonio where he is conferring with authorities at Kelly Field regarding the course of study and competent instructors. The tentative plans call for the ground work of flying and when that has been completed the school is to be equipped to offer actual flying work.

Colonel Charles A. Lindbergh will be invited to visit the school when he is in Texas.

INTERESTING NOTES

Eiland's Drug Store
If its from Eiland's it's right"

Town Talk

J. C. Elliott came in the latter part of last week from Canyon, where he has been attending the State Teachers College during the summer.

A. B. Greer of Clarendon, Texas has arrived in Munday and accepted a position with the Loveless Drug Company as pharmacist. Mr. Greer's family will follow him here within a few weeks.

E. J. Ellison has returned to Munday for the fall season, and will again buy cotton from the farmers of this section during the season that is just opening.

Mrs. J. M. Macon and children have returned to their home at Gorman after a visit with her parents, Mr. and Mrs. E. E. Akers.

John Lane made a trip to Portales, New Mexico last week and was accompanied home by Mrs. Lane and her mother, Mrs. S. O. Parks, who has moved to Munday and will make her home here in the future.

Miss Annabel Howell of Elmer, Oklahoma, has been a guest of Mrs. Fred Warren this week.

W. W. McCarty went to Abilene on Monday and was accompanied home by his daughter, who has been visiting there for several days.

Hollie Atkinson of Haskell was looking after business matters and shaking hands with Munday friends on Wednesday.

Mrs. Lavoy Burton of Abilene will come up Thursday for a visit with her parents, Mr. and Mrs. U. S. Rogers.

Mr. and Mrs. Bernard Stodell have this week moved into their new home, which they recently purchased, and which is located across the street from the residence of Fred Broach.

Mrs. White Smith and baby of Wichita Falls and Miss Winnie Langford of Dallas are guests this week of their parents, Mr. and Mrs. H. H. Langford.

Mr. and Mrs. W. H. Chapman Entertain.

One of the most enjoyable social events of the summer was that of Friday evening of last week when Mr. and Mrs. W. H. Chapman entertained a large number of friends with an "eighty-four" party on the beautiful lawn of their home. The spacious lawn had been artistically arranged for the occasion. Japanese lanterns, providing illumination and the lawn bordered with arches of foliage, in the center of which were arranged nine tables, the setting was a most attractive and artistic one.

As the guests arrived they were greeted at the front of the lawn by Mr. and Mrs. Chapman and were escorted to the punch bowl presided over by little Misses Lucille Neff and Geraldine Campbell, where delicious punch was served.

After all had arrived the place cards were passed and the guests found their places, and the evening was delightfully spent at this fascinating game.

At a late hour refreshments consisting of ice cream and angel food cake were served to the following: Mr. and Mrs. H. V. Standley, Mr. and Mrs. W. G. Welby, Mr. and Mrs. L. E. Lovins, Mr. and Mrs. G. R. Elford, Dr. and Mrs. W. P. Farrington, Mr. and Mrs. E. Duval, Mr. and Mrs. F. N. Warren, Dr. and Mrs. E. M. Anson, Mr. and Mrs. Tom Haney, Mr. and Mrs. D. R. Wells, Mr. and Mrs. V. S. Branch, Mr. and Mrs. T. G. Brown, Mr. and Mrs. G. R. Elliott, Dr. and Mrs. Joe Davis, Mr. and Mrs. W. H. Moore, Mr. and Mrs. J. D. Keithley, Mr. and Mrs. D. T. Mauldin, Mr. and Mrs. John Spann, Mr. and Mrs. W. A. Wyke, Mr. and Mrs. M. F. Billingsley, Mr. and Mrs. D. E. Holder, Mr. and Mrs. John Love, Mr. and Mrs. F. O. Campbell, Mr. and Mrs. Oscar Spann, Mr. and Mrs. S. E. McStay, Mr. and Mrs. J. A. Kennedy, Mr. and Mrs. M. H. Reeves, Mr. and Mrs. Chester Bowden, Mr. and Mrs. Howell Burton, Mr. and Mrs. W. E. Reynolds, Mr. and Mrs. H. F. Barnes, Misses Mamie Maxwell, Lorena Wilson, Thelma Atkinson, Roberta P'Pool, Annabel Howell, Shelby Lee, Kimmie Lee, Messrs S. A. Bowden, Chas. Farrington, Palmer Barton, Marvin Haskinson, Harvey Lee, Madames R. B. Freeman, T. C. Willett, R. E. Alexander and R. H. Neff.

was information concerning "The Texas Number" of the "Missionary Voice," which will soon be issued.

Bowden Families Honor Visitors.

On Tuesday afternoon at six o'clock the relatives of Mrs. M. E. Medlin of Kentucky, W. L. Souls of Durant, Oklahoma, and Mr. and Mrs. R. A. Howard of Ardmore, Oklahoma, entertained with a picnic supper at the golf links.

Those present were Mr. and Mrs. J. O. Bowden and family, Mr. and Mrs. E. B. Bowden and E. B., and Mr. and Mrs. B. L. Bowden, Mr. and Mrs. John Bowden and daughter, Mr. and Mrs. S. A. Bowden and Levi, Mr. and Mrs. John Spann and daughter, Mr. and Mrs. Clarence McKinney and family, Mr. and Mrs. H. P. Hill and daughter, Mr. and Mrs. W. C. Hill, Sherman and Stanley, Jr., Mrs. J. T. Lee and daughter, Mrs. P'Pool and daughter of Benjamin, Mr. and Mrs. Homer Lee and sons of Wichita Falls, W. L. Souls of Durant, Mr. and Mrs. R. A. Howard of Ardmore, and Mrs. M. E. Medlin of Kentucky. Mrs. Medlin is a sister, Mr. Souls a brother and Mrs. Howard a niece of Madames Hill and Lee. Mr. Souls and the Howards returned to their homes the following Wednesday but Mrs. Medlin will be a guest in the home of her sisters for some time.

Camp Fire Girls Hold Meeting.

The local Camp Fire Girls met on Monday in the Junior department of the Methodist church. During the business session permanent officers were elected, and after a hike and food sale were planned we adjourned.

Our next meeting will be held on Wednesday, August 31st, at which time Indian names will be selected and further plans made for the hike and food sale. All members who have not paid their dues or those who wish to join should come and bring your dues Wednesday.

S. A. Bowden went to Fort Worth on Saturday and returned on Monday with Mrs. Bowden and son, Levi, who have been visiting in the home of their daughter, Mrs. C. J. Reese.

Mr. Lex B. Morris of Denton, Texas, is here this week and states that he will likely move his family to Munday within the next few weeks. Mr. Morris is engaged in the insurance business.

J. T. Voss and family returned recently from a visit to Erath county, where they went to enjoy a family reunion, at which more than thirty-five members of their family were present. Mr. Voss states that crop conditions in that section are very poor, but that the people are fairly prosperous due to their methods of diversifying.

Rev. and Mrs. S. E. Stevenson of Fort Worth are here this week visiting in the home of his parents, Mr. and Mrs. R. M. Stevenson, and other relatives.

Abilene, Texas, August 22.—Presentation of a sacred grand opera, "The Prodigal Son" with the principal roles being sung by noted operatic stars, assisted by a highly trained chorus and interpretative ballet on Sunday, September 25 in the magnificent new auditorium at the West Texas Fair Park, this city, will mark the opening here

of a week's engagement for the famous Thaviv Band and Grand Opera Pageant.

This famous organization, winner of grand prize at the Panama-Pacific exposition at San Francisco and also at the Sesqui-centennial International exposition at Philadelphia is being brought to West Texas this year for the first time and will be presented twice daily during the West Texas Fair.

During fair week Thaviv will give regular 1500 concerts and in addition will give whole scenes from grand opera, mounted and produced with elaborate stage settings and beautiful costumes. A snappy musical revue and a wonderful male quartet are other adjuncts of this organization.

Acknowledged as having the outstanding organization of its kind in the country, Thaviv will bring to Abilene and West Texas people the greatest musical entertainment ever made available in this section.

In engaging Thaviv and his organization for the Fair directors of that institution feel they have been signally successful in their efforts to give West Texas people an entertainment feature different and better than anything ever offered before.

Programs given by this producer are so arranged as to appeal to everyone, matters not what the individual preference in music and drama may be. Grand opera, jazz, present day popular numbers, ballets and male quartets will be mingled for each performance.

Politicians, however, sow the wind and expect to reap votes.

Culling of Dairy Herds Shoul Begin With the Sires, Says Expert

By W. O. Logan.

In many of our dairy herds today culling should begin with the elimination of sires, says Dr. J. C. Campbell, U. S. Department of Agriculture. Breeding to inferior bulls pulls production down faster than culling out low-producing cows. One herd in which a scrub cow produced 146.8 lbs. of butter fat in one year, her daughter, sired by an inferior bull, produced only 126.3 lbs. butterfat and her grand daughter sired by the same bull produced 99.7 pounds butterfat before the owner woke up and got a high production bull. The world record post beat the last figures. Knox county is full of inferior Jersey and part Jersey bulls, their progeny is lower in standard and yet we tolerate such inferior stuff. We know better and wish for better cows, but if we had them it would take better bulls to build them up. Bull circles will do the little trick, talk them, think them, and do away with every inferior bull, or make a steer out of him.

Robert Churchyard, a London laborer, was rescued after having been carried 400 yards through a sewer under Fleet street.

Miss Ingrid Eckstrom is serving as municipal judge of Clisquot, Minn., during the absence for the summer of Judge M. F. Cox.

F-A-L-L

All the ingenuity of the most famous stylist are manifested in our new Fall hats. Every model is characterized by those details of finishing and trimming that mark it as distinguished—utterly new and unsurprisingly smart. Fashioned of fine felts and soft velours, in a host of lovely colors and styles.

The larger felts have softly rippling brims, and the smaller models have brims that are flatteringly crisp. A few have double brims, in two-toned colors. All are smartly tailored, after the manner of the mode, with simple trimmings of grosgrain ribbon, buckles, and rhinestone pins.
