READY FOR TROUBLE

WHEREVER you are, whatever you're doing, you wear your tin hat and respirator for a certain part of a certain day each week at one of the RCAF's Pacific coast stations. Telephone operators suddenly sound as if they'd developed cleft palates. Stenographers catch up on typing practice as dictation is suspended until voices get out in the open once more. The airman who whips up a smart salute can accompany it with a rude face—no one is the wiser—and cooks can peel onions without a quail. How the precaution program works is illustrated here.

Even off duty, the girls don't let the drill interfere with their routine. Left to right above (and their own families wouldn't know them) the crokinole players are Leading Airwoman Evelyn Dingman, Edmonton; Cpl. Jessie Cassidy, Bethany, Man.; AWI Barbara Wilson, Saskatoon, and Cpl. Bernice Martin, St. Vital, Man. Leading Airwoman Bertie Johnson of Winnipeg, right, finds that keeping her eyes on the notebook has complications, but types bravely on.

In oval — Detroit is "home" to Leading Airwoman Catherine Mullin, now overseas, with the RCAF Women's Division, even though the flash "Canada" shows at her shoulder. She was born in Canada, and so is not entitled to wear the "U.S.A." badge usually used by Americans in the Canadian Forces.

She is the daughter of Mr. and Mrs. Patrick Mullin, 8716 Orangelawn Drive, Detroit, and has a brother, Sergeant Hugh Mullin, in the United States Army. She attended MacKenzie High School, Wayne University, for a year; was trained as a meteorological observer in the RCAF, and was an officer clerk in an insurance company in civilian life.

Weekly Health LETTER

Issued by Dr. Geo. W. Cox
M. D., State Health Officer
of Texas

AUSTIN—In giving support to the celebration of June as Dairy Month, Dr. Geo. W. Cox, state health officer, said today that in the midst of war food problems, including shortages of manpower, equipment, and feed for some dairy herds, the State of Texas joins the nation in a special salute to the dairy industries for carrying on in the face of difficulty and actual hardships to produce one of our essential foods.

"Milk has been called the most nearly perfect food because it contains in easily digested form many elements required for body nourish-

ment," Dr. Cox said. "The milk proteins promote body development and growth and generate energy. The minerals, especially calcium, assist in the growth and maintenance of bones and teeth. The vitamins, which are essential to growth and health, give protection against the attack of many infections."

The state health officer specifically warned that if milk is not clean and properly handled, it is an excellent medium for growing germs. Cleanliness in the milking process and in the milk container is very essential. All milk handlers should be healthy, and all equipment should be properly washed and sterilized and protected from flies and dirt.

The State Health Department has long urged that the consuming public insist upon either pasteurized milk or raw milk produced under approved conditions.

Here on the home front, too, just cheering the attack on isn't enough.

WASPs Invade Atkeison Home Here This Week

It was a "grand invasion" this week at the R. D. Atkeison home when their daughter, Ann, trainee in the Women's Airforce Service Pilots and stationed at Avenger Field, Sweetwater, came in and brought with her all members of her class.

Accompanying Miss Atkeison home for their furlough were the following WASPs:

Nadine Cranfield, Chapman, Kansas; Margaret Chamberlain, Charleston, Ill.; Virginia Eather-ton, Tulsa, Okla.; Norma Boston, Carthage, Ill.; Marilyn Hughes, Fresno, Calif.; Elaine Harmon, Baltimore, Md.; Evelyn Jenny, Highland, Ill.; Jane Hohl, Los Angeles, Calif.; Clara Dreyer, Detroit, Mich.; and Anita Bronken, Eau Claire, Wisconsin.

Still unaccustomed to the drastic change from civilian to military life, the girls thoroughly enjoyed the warm hospitality of the Atkeison home. Real beds, bath tubs, green grass, fresh fruits, steak fries, watermelons, and more than all, a visit with Mr. and Mrs. Atkeison helped make up to them for their own families, who are so far away.

This group of girls have just completed the primary phase of their training at Avenger Field on the PT-17. They will return to Avenger to start the intermediate phase on Friday and will be flying the AT-6, a plane that has been extensively used for combat in China and other areas. They are from Class 44-W-9, which is to be graduated sometime in October or November of this year.

Miss Maurine Johnson of Orange, Texas, returned home last Friday after spending a week with her parents, Mr. and Mrs. E. Y. Johnson. Miss Johnson is employed in the finance department of Consolidated Steel Corp. at Orange. She is just recovering from an appendectomy.

Mr. and Mrs. Joe Bailey King were visitors in Stamford last Sunday.

Bond Buying Is Not Sacrifice, Says Winchell

The following is credited to Walter Winchell and is taken from his newspaper column and was also heard on one of his regular radio broadcasts:

The Private Papers of a Cub Reporter

Many telegrams, letters and telephone calls followed the broadcast in which this editorial on war bonds was heard. . . Managers of defense plants requested a copy to reprint for 10,000 employees, etc. . . A shipyard wanted a copy of the recording to echo it to its thousands of workers. . . Radio stations here and there wired for the text. . . And so here it is. . . Anyone may reprint it without permission. Just credit it to the column and the N. Y. Mirror.

I have always spoken bluntly about the subject of war bonds, and I see no reason to pull any punches now. . . I do not think purchase of a war bond is a patriotic sacrifice. I think quite the opposite. I believe failure to do so is almost treason. In American history this should be called the War of the Armed Forces—because nobody else is fighting it.

It sounds silly, but the U. S. Government pays interest for the bullets it gives to its soldiers. . . And if the soldier is lucky enough

The Strongest of Bonds—Your Dad and Your Country, Is the Slogan of Father's Day, June 18—Buy Bonds

WASHINGTON, D. C.—June 29—Father's Day which falls on June 18th, 1944, will be a different kind of celebration of this event than in days before the war. This year finds

Pictured here is Ted R. Gamble, National Director of the Treasury's War Finance Division, and his son, Ted R. Jr. The youngster is pinning a Father's Day rosette in his dad's coat lapel. The rosettes are made up of War Stamps. Girl Scouts and others will sell the rosettes on Father's Day, June 18.

American fathers away from home and family and by hundreds of thousands in uniforms of the Armed Services of our country. Many fathers are overseas.
 So this year's Father's Day is America's "Salute to our Fighting Dads". The National Father's Day Committee, in conjunction with the United States Treasury is conducting a gigantic Father Bond Drive. There is an earnest and all-abiding awareness to push on to victory in the observance of this year's Father's Day. And every move being planned for the event is keyed to

USES Releases Knox County On Labor Program

Employers in Knox county will be permitted to hire male workers without referral by the United States Employment Service under the authority of the Area Director of the War Manpower Commission and the Fort Worth Labor-Management Committee, S. H. Southall, local office manager of the USES at Vernon, Texas said today.

This constitutes a special arrangement under the terms of the Priorities Referral Program of the WMC which goes into effect throughout the United States at midnight, June 30. Mr. Southall said, and is subject to change if operational experience or the national manpower needs dictates.

No local office of the USES is located in Knox county, he said, and undue hardship would be imposed upon workers if they were required to make a trip to Vernon to secure a job.

It was emphatically pointed out, however, that while these arrangements permitted a worker to seek employment within the county having to be channelled through the Employment Service, that the Employment Stabilization regulations were still in effect and that any worker now employed or employed during the preceding 60 day period in an essential industry could not be hired except upon referral by the United States Employment Service or upon the presentation of a statement of availability.

Southall also said that while workers would not be required to go through the USES when seeking a job inside the county that they should understand that no such arrangement exists in counties in which an office of the USES was located and that in those counties no employer could hire a male worker except upon referral of the USES.

One of the objectives of the priority referral program is to keep essential workers on their present jobs, he continued, and he urged requested less-essential employers to refrain from hiring essential workers pointing out that such practices was in violation of the Stabilization Plan and could, if allowed to reach proportions detrimental to the war effort be a reason for remanding the arrangement on the priority referral program in Knox county. No restriction whatever has been placed on agricultural workers, so long as they remain in agricultural work, he said.

U.S.-Canada Inland Water Route Busiest in World

DURING the seven months that they are open to navigation the Great Lakes are alive with ships. This inland water route, stretching over 2000 miles, links the heart of industrial Canada and U. S. with the war effort of the United Nations.

Coal carriers lug black fuel from Erie or Buffalo to Toronto and the Soo; bulk carriers bring grain from the world's breadbasket to Midland and Collingwood or rust-red ore from the Mesabi and Vermilion Ranges to Hamilton and Conneaut; oil tankers take liquid dynamite from Sarnia to Kingston, and little package freighters deliver paints, steel pipe and breakfast food from Montreal to Cornwall. This traffic has made the canals at Sault Ste. Marie, connecting Lakes Superior and Huron, and the Welland Canal, between Lakes Erie and Ontario, the busiest in the world.

Below is shown a railway bridge spanning the Welland Canal being lifted to allow the passage of a freighter. At right, a crewman on the C. S. Robinson, bound up Lake Superior, watches the SS Cornell, headed down the lake with a rich cargo of ore for the blast furnaces of Hamilton.

The services of a vocational agriculture teacher are paid for by the state and Federal governments and are free to the public the same as that of the county agents.

"The Dog House" is the name of an establishment in the Alamo City. You can buy food for your dog there.

Do you remember that a while back there was a great hue and cry for a special session of the legislature to "do something" about the deficit in the State's general fund and that this writer opposed a special session on the subject because, partly, it would cost several hundred thousand dollars of the taxpayers' money and, mainly, because the deficit would wipe itself out in a short time?

Well, did you read in the papers the other day where the deficit has been cut \$21,000,000 during the past year and is now only \$831,000 and would be wiped out entirely in a few months?

The hill country was radiant with wild flowers after the rains when this observer made a bus trip through that region recently. Between Marble Falls and Burnet, there were yellow flowers with a black center; others with pink petals that faded until the tips were lemon-colored; then there were slim stalks with yucca-like blooms; tiny white flowers, and others that were blue, and there were tall stems that were tipped with crimson blossoms, and even the cactus had yellow blooms. What with the hills and trees and winding highway and rivers and valleys and the browsing flocks of goats and sheep, that really is a delightful section.

Safety Hog House

AN IMPORTANT part of the food-for-freedom program is the provision of adequate shelters for animals. If farmers are going to increase production, care must be taken to see that every animal on the place is protected from the weather. The asbestos board farrowing house illustrated below will prove a great help in doing this job.

The house is built on three skids or runners. Its low height and small size mean conservation of heat and protection against the snow moving around too much and raking and piling the bedding. Daytime ventilation and sunshine may be had through the ingenious lift-top. When both top and door are open the herdsman can walk in erect. If attacked by a vicious sow, escape is easy. Cleaning and washing are simple and quick.

Complete plans for building the safety hog house will be sent free upon request by the Asbestos Farm Service Bureau, 221 North LaSalle St., Chicago 1, Ill.
