NUMBER 36

Kracker Krumb Odd Bits Salvaged At Random

It's a dark hour in the life of an editor!

We refer to that hour when the deadline comes and he must revise his mailing list.

There's been only one period in our 22 years of newspaper experience that an editor didn't want all the subscribers—the readers -he could get.

That period was during the recent war, when newsprint became so scarce that publishers could barely get enough for their minimum needs. Many of them

It was during that period that this publication had to quit taking new subscriptions for a time. And it was a happy day when they could again start taking on these new friends.

Newsprint still isn't plentiful, and higher than a cat's backlike everything else. But the shoe doesn't pinch quite as painfully as it did back yonder.

Subscribers are classed as the editor's friends—those loyal boys and girls who read his weekly effort, his good news items and his "trash" that he uses to fill up the empty columns when live news is not readily available.

Some read the paper then say, or write, words of praise which warms the editor's heart with appreciation. He feels that he's not exactly a misfit in society when these words come.

Some read, then let out a "yelp" that rings throughout the four corners of the editor's sanctum. But they're still his friends because they're in his "family" of subscribers and read-

And a real friend is one who'll tell you about your bad points Sunset Seniors as well as your good ones.

The editor's friends are everywhere, because he sends his paper to many states and several foreign countries.

Some are warm personal friends whose friendships have grown through the years. Others are friends whom he's never the amateur show, Easter fashseen, perhaps, but whose names are familiar, due to the fact that each week he sends them the

And once each year comes the check or money order, or the pure-dee cash, for another year of reading.

The editor feels that when he looses a subscriber he's lost contact with a friend. Perhaps that contact will never be made again.

So the hour comes when he needs to revise his mailing list, and he finds that some of his friends apparently do not want their friendships renewed.

Notices have been mailed out, as is our case at this time, and he feels that all who want to continue receiving his publication wholsesome activities. The boys of an office in Lubbock to serve have received a card to the effect have been asking that a team be the oil mills of that area. that the subscription needs to organized for this summer. be paid again.

the list arrives. He thumbs through the cards, his aphabet- ion hall to plan baseball activiical list of friends through the ties. Everyone interested is ur-He isn't happy in his gently requested to attend. years. work.

There's old Bill, as good a guy as a feller ever knew. Bill's record shows that he's been taking the paper ever since the records have been kept.

And his card here also shows that he's been prompt in paying his subscription. But it shows 11-1-48, too, which is November first of last year. Surely Bill wants to keep getting the paper. Think we'll just leave him on a while longer.

Munday Gets Three New Aldermen In **Election Tuesday**

The City Council of Munday will have three new members next year, coming as a result of the election held here last Tuesday. They are: J. Weldon Smith, Winston Blacklock and E. W. Harrell.

They take the places of P. V. Williams, Travis Lee and Wade T. Mahan, all of whom did not seek re-election.

Interest in the election was light, principally because there was no opposition to the three who were elected. Only 22 votes were recorded.

> LOCAL NEEDS FOR 1949 We're pulling for these needs in 1949. What

will the year bring? 1. A modern street sweeper. Our paving cost us money, let's protect it!

2. Paving of road through Rhineland, and definite progress on Throckmorton road. 3. Completion of our drainage system. It's

gonna rain one of these days. 4. An adequate waterworks system. This is

a must for the continued growth of Munday. continues to be a housing shortage.

6. Recreational facilities for our youth of today-our citizens of tomorrow.

YOU MUST HELP

There is an organization whose business is to fats, hair, hides, etc. see to it that accidents don't happen. It is called the Underwriters' Laboratories, and you've seen its seal of approval innumerable times on electrical and other apparatus. As Gordon Schendel wrote in a Collier's article, "A nonprofit organization sponsored by the National Board of Fire Underwriters, the Underwriters' Laboratories have saved untold thousands of lives by their tests of just about every mechanical and electrical device you use. The engineers of the labs have eliminated hundreds of potential danger spots in your life. Since the organization was founded in 1894, successive generations of engineers have never lost sight of the original objective: to prevent accidents before they happen."

Other fine organizations are working in various fields to make your life and your property safe. But there is a point where this work must stop, and the individual must take up the task on his own hook—and for his own self-protection. As an example, we can buy safe UL approved ap ment. Liberty has always come from the sub merce. Mr. Rivers, of South Carpliances anywhere. But UL, the manufacturer, nor anyone else can cake us keep them in good repair and use them properly. A frayed cord imitations of governmental power, not in in- fication. After two days of decan turn the best appliance ever made into a men-crease of it.-Woodrow Wilson. ace. And people who do such things as handle radios while in bathtubs, are asking for an abrupt transition to the next world.

The terrible waste caused by fire and kind red hazards can be prevented. The experts are doing a superb job. But you have to help.

regardless of party policies, publishing news fairly, impartially. The Munday Times is Democratic, yet supporting only what it

A STEER ISN'T ALL STEAK!

The American Meat Institute has published a chart called "The Saga of the Steer" which is designed to help consumers understand why there is such a wide spread between what packers pay for beef on the hoof, and what is charged for such luscious cuts as steaks at the butcher's on the corner.

If steers are selling at 26 cents per pound, 5. Building of more housing projects. There the packer pays \$260 for a thousand pound animal. It dresses out to 600 pounds of beef and, curiously enough, he sell the meat to the retailer for \$252. That is not accomplished by financial legerdemain-the difference between what he paid for the animal and what he got for the beef is made up by the value of by-products, such as

> The butcher sells his \$252 beef to consumers for \$309. That may look like a big profit, but it isn't. The \$58 he grosses has to cover rent, labor, depreciation, shrinkage in weight of the carcass when converted into retail cuts, and son on. So the retailer, like the packer, earns a very modest profit for the service rendered.

Finally, nobody has been able to produce a steer which is all steak. The porterhouse section bill, H. R. 3, repealing all taxes schedule. But they stay in bloom spent last week end visiting her of the animal which weighed 1000 pounds on the and other restrictions on margar for less than a week; hence the hoof amounts to only 40 pounds-and obviously must bring a high price. Other cuts, due to con- However, my bill required all sumer preference and other such factors, must yellow margarine sold in public the planners called in the scienbe sold for a low price.

The force which determines the price of meat on both wholesale and retail levels is supply and demand-as the very sharp price drops which have recently taken place prove.

Liberty has never come from the governjects of it. The history of liberty is a history of olina, offered a bill to remove resistance. The history of liberty is a history of the tax and requiring no identi-

The NEW COTTON PLANTING SEED

The NEW Paymaster "54" is now available for the 1949 planting season - ready for farmers who want more profit from Cotton. This quick-maturing, high-yielding, better-staple-producing planting seed answers the demand for a variety that is tested and proved for West Texas growers. It is the result of scientific selection and painstaking experiments to develop a seed that will produce more money per acre planted.

Here's why the NEW Paymaster "54" Is a money-making Cotton . . .

· EARLY MATURITY

Of 25 varieties tested recently . . . "54" was first in percentage of crop harvested in a four-month period.

In this same test, "54" was third among all varieties in yield per acre

BETTER STAPLE "54" ran 15/16" to 1 inch throughout West Texas,

assuring a better price.

. TESTED FOR DRY LAND "54" has been proved successful for dry land farming as well as for irrigated Plains areas.

Be among those profit-minded farmers who demand a money-making Cotton planting seed—the NEW "54"; order your supply of the improved, state-registered "54" NOW. IT PAYS TO PLANT PAYMASTER "54"

Sold through your ginner, your seed dealer, all branches of the Western Cottonoil Co., and at Lockview Farm, Plainview, Texas.

WESTERN COTTONOIL CO. producers of Paymaster FORMULA SEE

If you go to Mexico City, should you attend a bull fight? Whichever you decide to do, you will probably be sorry. If you attend, the suffering inflicted on the bulls will make you regret being there; but if you do not go, you will miss one of the sights of Mexico.

I have seen "death in the aft-ernoon", as Ernest Hemingway calls the national sport of Latin America and Spain. The arena del toros in Mexico City is the largest in the world, even larger than the arenas in Madrid and Toledo. The wooden bowl has no top and it seated 12,000-(it may have since been enlarged). Seats are "sombra" (shade) and "sol" (sun). Those in the hot glaring sunlight are cheaper. The fights

INTEGRITY & CONTRACTS

By GEORGE S. BENSON President of Harding College Searcy, Arkansas

ONE OF the qualities in human beings that our civilization today needs so desperately is integrity.
What is integrity? The word comes from a Latin term which meant "untouched" or "whole."
That's about the way it is today.
A man who has integrity is so morally sound that he is not to be touched in a way that will affect touched-in a way that will affect his honesty and uprightness.

his honesty and uprightness.

Many labor-management disagreements would disappear, if we honestly would undertake to solve them with each side of the conference table keeping its integrity. If each party to an agreement keeps his word—that is integrity. It used to be said of a neighbor I had: "His word is his bond." That's the kind of neighbor this world needs. It will require integrity from each one of us, if this world is to become a better place.

A Real LET ME illustrate— Example with a labor-management example. Less ment example. Less
than a year ago, the General
Motors "cost of living" wage
agreement with United Automobile Workers was acclaimed as a
solution to the frequent wage
battles that upset our industrial
communities

Under terms of the contract GM can raise or lower wages according to government statistics. As living costs rise or fall in reports of the Bureau of Labor Statistics, the company can adjust wages accordingly. While the formula did not rule out wage increases for other reasons. It was an honest attempt to solve the cost-of-living problem.
Last year under the contract
GM employees got a flat 6-cent

hourly raise, plus a "cost of liv-ing" increase of 5 cents. What are the prospects this year? Employees are in line for an increase not related to living costs, but under the formula will get a pay cut of 2 cents because the Bureau of Labor Statistics index of living costs has gone down. THE EFFECT would

Moral Issues be to hold wages at about the same levels as last year. Employees still would have the advantage of the decline of living costs. However, according to a recent Associated according to a recent Associated Press dispatch, a GM local in Cleveland wants to reopen the contract, which has more than a year to run. This local of 2,500 workers wants UAW headquarters to block the carrying out of the contract. According to the the contract. According to the AP story the local's president said that workers' living conditions "ought to be of greater meaning than the sacredness of a contract."

Moral issues are involved when you talk about breaking contracts. As against a pay increase of two or three cents, a contract should have plenty of sacredness. What have plenty of sacredness. What is involved is integrity. The contract was made in good faith. It has more than a year to run. If it does not meet the needs of the UAW, the parties will have determined this by the time for expiration. There are few human relationships that have greater relationships that have greater meaning than do contracts. The courts of the land expect contracts to be kept. Good neighbors are made by men who keep their word. This applies to groups as well. Good citizenship requires

was on the unprotected side of the horse and gored the poor creature who reared and then dropped to the sand. Peons rushed in with their capes to distract the bull while the picador could extricate himself and the dead horse was then dragged out.

And then entered the banderillos, each armed with a dart in either hand. As the bull would charge, the banderillo would wait until the last split second, spring to one side and at the same time would implant one of the arrows in each shoulder. It was cruel by American standards but it was superb timing and highly dangerous.

Several times, the bull wheeled and re-charged, forcing the banderillo to run for the shelter of one of the wooden shields built at intervals near the wall. Once, no shield being close, the banderillo climbed the wall, inches ahead of the vicious horns.

And then came the matador, 'armed" only with a cape and he played the animal while the crowd cheered. There is a certain ritualism to follow. The matador spins and sidesteps; sometime he does not move from his tracks but merely twists his body a fraction of an inch out of the path of the horns.

By now, the bull's side is stained from the wounds of the spears and from the ornamented arrows that still cling to his shoulders and he is tiring from his exertions and from the loss of blood. As the animal stands motionless in pain and puzzlement, the matador drops tauntingly in front of him on one knee and the crowd cheers.

At last, the matador is given and better at room temperature. a sword and he keeps it concealed behind the waving red cape until he induces the bull to lunge. The cloak is dropped and the naked blade gleams for

tates to cook fish. Yet it can be cooked so many different ways and is a welcome change for a main course. Fish Casserole uses either fresh or frozen fillets. Wash 2 lbs. fillets. Wipe with cloth. Break into large chunks and place in greased casserole. Cover with 1 pt. sour cream, 1/4 lb. grated cheddar cheese, small minced onion, 1/2 cup white tine (or 1/4 cup lemon juice), I tap. salt, 1/4 tsp. pepper. Bake in moderate gas oven (375°F.) for about 30 mins. Serve on hot noodles-2 cups noodles boiled in salted water for about 8 mins. Serves 4.

A new aluminum foil that saves cleaning time can be put on the bottom of your broiler to catch grease from cooking foods. Use once and throw away.

There are only three uses for cold water in the average home but there are 140 different uses for hot water. An automatic gas water heater ensures a reliable supply of hot water whenever it is needed.

Take eggs out of the refrigerator ahead of time when you plan to beat them. They whip up faster

Simmering is an excellent cookng method used by good cooks to retain food values. Turn the gas low to simmer position to keep soups, stews, vegetables and fruits gently

Evaporated milk can be soured y stirring in well 2 tbsp. lemon uice to one cup milk.

MUNDAY, TEXAS

Gurley has announced.

The awards are cash sums suf ficient to defray all traveling and other expenses for the winners to attend the National 4-H Club Congress held in Chicago. Certificates of merit from the Santa Fe President are presented to the

Winners are certified by the state 4-H Club leaders to the National Committee on Boys and Girls Club Work headquarters in Chicago, and the railroad takes no part in the selection of winoriginal basis for the awards.

In announcing the 1949 awards. President Gurley stated that their purpose is to help 4-H Club members to help themselves and the fine records its past winners Mrs. Raymond Ratliff, served a have made in their home communities.

Sunset 4-H Club **Meets Recently**

The Sunset 4-H Club held its fourth meeting with Miss Eugenia Butler, Home Demonstration Agent, in charge.

Plans for making aprons were individauls as a keep-sake record discussed. The club adjourned of their achievement and partici- with its fifth meeting on April

BIRTH ANNOUNCEMENT Mr. and Mrs. Charles Reese of Knox City are the parents of a daughter born last Sunday at the Knox County hospital. The little ners except in establishing the girl weighed five pounds and four ounces and has been given the name of Susan Kaye. Both mother and little daughter are doing nicely.

Maternal grand parents are that the Santa Fe takes pride in Mr. and Mrs. Wayne Mitchell of Munday and paternal grand parents are Mr. and Mrs. C. J. Reese, Sr., of Knox City.

THE PANHANDLE MUTUAL HAIL ASSOCIATION Amarillo, Texas

Why You Should Insure Your Wheat Maize And Cotton Against Hail:

- 1. Loss of crops by hail means the loss of the season's profit as well as the loss of the season's outlay of money and labor invested.
- 2. Hail is purely a physical hazard and unlike the fire hazard, no precaution can be taken nor care exercised to minimize the risk.
- 3. As a business proposition it is FORE MORE foolish for a farmer to be without hail insurance than it is for a merchant in town to be without fire protection, for statistics show that the hail loss to growing crops is several times greater than the fire hazard to buildings.

PROOF

That COLONIAL CHICKS Are BETTER

READ WHAT YOUR NEIGHBORS SAY!

Bought February Chicks, Raised 100%

My chicks were hatched the 10th of February. I bought 220 New Hampshires and up to date still have 220. I weighed one and it weighed 1 3/4 lbs.

Yours truly, H. L. BUTLER

Leghorns Averaged 1 Lb. Each At 5 Weeks Goree, Texas April 1, 1949

Out of the 225 chicks I ordered and payed for, I have 227 strong, healthy chicks averaging 1 lb. each at the age of 5 weeks, which was last Wednesday. These chicks were the strongest, lived better and caused less trou-ble than any chicks I ever bought. Cordially yours, D. C. HASKIN

Well Satisfied With White Rock Chicks

Dear Sirs: On March 2nd I got 250 White Rock chicks from you all and lost only 2. Have 248 left and doing fine! Weighed some this morning at 3/4 lb. apiece. I am very much satisfied

Yours truly, GEORGE STEINBACK

Better Luck This Year Than Ever Before Munday, Texas April 1, 1949

Dear Sirs: I ordered 200 White Leghorn Pullets which are 11 days old and have lost only 1 chick. They are feathering out perfect and are uni-form in size. I have had better luck with my chickens this year than I have ever had

HERMAN FLOYD

1 Lb. White Leghorns In Five Weeks March 31, 1949 Munday, Texas Out of 104 chicks, we have 99. They are five weeks old, weigh about a pound and a quarter each, are all well feathered and about the same size. They have grown off nicely and, if nothing happens, will be fryers in two

JOEL MORROW

Already Put Them on The Roosts Goree, Texas April 1, 1949

My chicks are doing fine. I have lost 1 from natural causes out of the 200 White Leghorns and still have 197. They weigh about 1½ lbs. each at 6 weeks. I have already put them on the roost and there are no droopy ones in the flock.

Jester Signs Cancer Control Month Declaration

Urging all Texans to support "the mighty effort now being made by the American Cancer Society" to defeat cancer, Governor Beauford Jester has declared April as Cancer Control Month in Texas. "A beachhead has been established against this formidable enemy of all humans," Jester said. "However, the tide of cancer continues to mount relentlessly throughout this state and nation. All Texans must become aware of the cancer menace, and all Texans must be reached by the cancer control methods being sponsored by the American Cancer Society." With the Governor are, left to right, Dr. William Gambrell, Col. Ike Ashbura, Mr. Fagen Dickson, Dr. W. S. Bohls, all leaders of the Texas division, American Cancer Society.

plants, do you see what is really there? Whenever I go inside factory gates, the wonder of it all amazes me. Where did all the equipment come from? By what magic was all of it assembled into such a gigantic unit for production? Somebody had to pay for all of it. Do you suppose it was a capitalist?

Yes, capitalists did the deed. It is interesting that they keep doing that type of thing, all along. They keep building steel mills and putting up new oil re-fineries. New assembly lines are continually set up, and old ones Plant expansions are undertaken. Modern tools are installed to replace worn ones. And one of the most amazing things about it is that nobody has to tell

Nobody's NO DICTATOR commands that all this money be spent. No government bureau has to send out a directive. It's all just part of the system that is the main-spring of America. This system of free and individual enterprise has made possible the building of Whenever the incentive of profit or reward is there, both men and money will be put to work. Capital comes to the job in hope of a reward, just as a man expects a paycheck as the result of his labor. Money and men work side by side, then.

These things are so common under the enterprize system as we know it in America, that most of us take them for granted. Yet, these capitalists (sometimes attacked so bitterly by unthinking | greatest resource.

WHEN YOU enter the gates of persons) constantly supply the our huge factories and industrial essential ingredient that makes essential ingredient that makes

jobs and produces goods. Incentives ACTUALLY, the six for Each or seven cents profit out of each sales dol-

lar, which is typical of industry as a whole, does a tremendous job for you and for me. It pays for all the machines that, in turn, do most of the work. This makes it possible for 60 cents or more of this same sales dollar to be given to those who supply the human energy, the workmen. Some three cents, or only about half of this small profit, is used on the aver-age to pay investors for the use of capital that brought these industries into being.

The other three cents or so of the profit goes back into the busi-This portion of profit is used to pay for worn-out equipment and other replacements, and to keep up with rising costs and increased taxes. Today, that part of the sales dollar called profit is hardly ever enough to meet industry's real and urgent needs. In late years our industry has had to borrow more and more to meet rising inventory and equipment costs.

The nation's industrial enterprises cannot exist now, and never could have been developed, without the use of capital. Capital very effectively teams-up with labor and management to bring great benefits to every citizen. Each of the partners - investor, worker, manager - has his own incentive. This system, free and unhampered, brings forth the best effort from each. This enterprise system is our country's

Have you heard Dr. Benson and the radio droma, "Land of the Free"? Check your local station for tim

loss of soil structure. He explained that by proper measures many souls are being today as they were a few years them as far as Dallas. ago, but no figures are available facing no catastrophe because of O. Pierce, Jr. declining soil productivity . . . one of the important reasons for this is the extent to which, in my judgement, farmers have learned better practices through the ACP

"Important as they are, I am nuch concerned with the direct effects on the soil, as I am with the effects it has had in teaching farm managers better husbandry. After all, in a democracy our aim should be to help farmers develop their own ability to make better decisions."

A. H. Jungman left last Friday for Rockford, Ill. to attend a mechanics school there. He is the son-in-law of Mr. and Mrs. Joe Pierce of this city.

Reid's Hardware

Munday, Texas

We are definitely in the midst of the greatest farm mechanization era of all times, says W. L. Ulich, extension agricultural engineer of Texas A&M College. Here is some proof so far as Texas is concerned.

At the beginning of this year, some 211,799 tractors are in use on Texas farms. Today approximately 82 percent of the cultivated land in the state is plowed with tractor power. In the case of wheat, oats, and other small grains, 86 percent of the harvesting is done with power equip-

The use of highly specialized machinery requires the farmer to make large investments, adds Ulich. The depreciation of this costly machinery eats deeply into the profits of the farm operator, but he can do something about it. The life of tractors or other expensive farm machinery can be increased by proper care and maintenance.

The 4-H boys are learning through their "Live Power Program" just what proper tractor maintenance can mean to their home farm. Boys enrolled in this program keep an accurate record of the operating costs of their farm tractor. They have found that regular servicing, using thecorrect oils and lubricants, keeping the cooling and ignition systems in good shape and cleaning the air filters daily will keep the tractor on the job longer and at a lower operating cost. Ulich says repair bills can be cut to a minimum if the boys put into cases than declining fertility, ex- and little daughter accompanied practice the things they are gram. This fact is proved by the records submitted by former

Weekly Health LETTER

Issued by Dr. Geo. W. Cox M. D., State Health Officer of Texas

AUSTIN-Almost four thousand Texas children from more than 225 counties have received beneficial services and aid to happy, normal living under the Crippled Children's Division administered by the State Health Department, during the calendar year 1948. This information is shown by the annual report issued by Dr. Geo. W. Cox, State Health Officer.

According to Dr. Cox, the most commonly treated conditions are late effects of acute poliomyelitis, cerebral palsy, osteomyelitis, tuberculosis of joints, cleft palate, harelip, and clubfeet. Although the services are provided for children from birth of 21 years, the largest group treated were from the age bracket of 5 to 14 years.

The help given these crippled children represents 3,747 clinic visits, 43,433 days of hospital care, 2,897 days of convalescent home care, and 4,986 doctor's vis-

"As long as sufficient State funds are available, any crippled Texas child of normal mentality. under twenty-one years of age, whose parents or guardians are unable to pay for proper care, is entitled to the help of the Crippled Children's Division," Dr. Cox said, "if his doctor believes that it is reasonable to expect that the child can be improved through hospitalization, medical or surgical care, artificial appliances, or through a combination of these services."

People, Spots In The News

users now get eight vials for what one cost in 1945, according to Schen-ley Laboratories, a leading producer of wonder drug. Marie Lynch's Foreign Correspondents group voted, was Jane Wyman, shown being honored for her work in "Johnny Belinda." scales dramatize progress made.

Parents of crippled children Cotton Styles should make application for this assistance by completing application forms, which should be signed by the physician and approved by the County Judge. The application is then mailed sion, Texas State Department of Health, Austin, Texas.

Ready For Shows In 1949 Season

Two new fashion shows featur to the Crippled Children's Divi- ing costumes made entirely of cotton feed and flour bags will be presented before women's

in 1949, the National Cotton Co. Box 76, Memphis, Tenn. uncil announced today.

Twenty-four complete wardrobes have been styled from cotton sack fabric to show how cotton bag material is being put to use by women who sew to make smart clothing at little cost. The shows will be presented at women's clubs, home demonstration meetings, schools, and

The bag wardrobes represent the season's new fashion trends and include styles for both wornen and children.

One of the shows, titled, "The Fashionable Family," includes 15 fashions for both women and children, with garments ranging from children's school clothes to glamorous evening gowns. Several of the outfits are made of plain white cotton flour sacks which have been dyed attractely. The other show, "Cinderella Sacks," presents 20 cotton bag fashions varying from juniors' and misses' dresses to mature

Thousands of women in every section of the country have seen the amazing results of cotton bag sewing at Cotton Council fashions shows during the past three years. All the colorful costumes in the shows have been designed from printed and solid cotton material that originally was used to make feed and flour con-

HESE are the people who own your electric light and power company. Chances are you are one of this group, too.

They represent a cross-section of Americahousewives, doctors, teachers-industrial workers, craftsmen, farmers-mechanics and milkmen. Yes, people from all walks of life have put their savings into companies like ours. They're direct owners.

But there are countless indirect owners, toomany who don't know they have a stake in the electric industry. They're people with life insurance policies and savings accounts. When banks and insurance companies accept your money, they must invest it wisely and productively. And because business-managed electric companies have a long record of successful service, much of that money is invested in utility securities.

So, you see, the electric industry is owned by the people it serves.

West Texas Utilities
Company

Compare the others with "The Car Designed with YOU in Mind"

You cannot compare the new cars merely by looking at pictures . . . or by watching them on the highway. You've got to get behind the wheel yourself.

That's why we urge you to come and see this new De Soto before you decide on any other car.

You notice the difference right away. De Soto's doors are wide. You walk in . . . and keep your hat on. The steering wheel doesn't hit your knees. You're on chair-high seats, so that you get all the benefit of the larger windows and windshield.

You've got full stretch-out leg room, front and back. And you've got more luggage space in that

flush-floor trunk than you ever dreamed of before.

Yes, De Soto is lower. It's got a longer wheelbase (all passengers ride between the axles). But there's no penalty for these advantages. Overall length and breadth are not increased. You needn't rebuild your garage. You can still change a tire. And a dented fender doesn't mean an expensive body repair job.

Let us show you all the new features of the car that lets you drive without shifting. Compare it for beauty, comfort, safety and value. Then decide,

Tune in "HIT THE JACKPOT" every Tuesday night, all CBS stations
