

CHANGE NAME AND EMPHASIS OF 4-H PROGRAM FOR 1950

Announcement has been made of a change in emphasis in the 4-H Electric program, which will be known as the 4-H Farm and Home Electric program, according to the National 4-H Committee.

With the change of name, the program will encourage more boys and girls to study and plan how to use electricity, and to demonstrate what electrical equipment they have made, ad-

justed, repaired and installed. There will be no changes in awards, or donor, which is the Westinghouse Educational Foundation. Awards comprise gold-filled medals, all-expense trips to the National 4-H Club Congress, Chicago, and six \$300 college scholarships to county, state and national winners, respectively.

A merit plaque also will be awarded to the county reporting the most outstanding 4-H Farm program in the state this year.

Be careful. Obey state and local traffic rules.

FOOD... through the ages...

IN EARLY MEDIEVAL TIMES, CHRISTMAS WAS A FAST DAY. NEW YEAR'S WAS THE DAY OF FEASTING AND PRESENT GIVING.

ENGLAND'S FIRST CHRISTMAS TREE, INTRODUCED IN 1840 BY QUEEN VICTORIA AND PRINCE CONSORT ALBERT, WAS TRIMMED WITH EDIBLE SPUN-SUGAR ORNAMENTS AND GINGER-BREAD MEN.

MOST FAMOUS ENGLISH CHRISTMAS TREAT SINCE CHAUCER'S TIME (1340-1400) ARE YORKSHIRE CAKES SERVED WITH ALE.

SOME SCANDINAVIANS LEAVE FOOD FROM THEIR CHRISTMAS FEAST FOR JULANISSEN, A TINY, MYTHICAL HOUSEHOLD GNOME, WHO EATS WHILE THE FAMILY SLEEPS.

Courses In First Aid Given Many Americans

Robert Lafferty of Brownwood, Texas, is a little different from his neighbors. He has saved two lives. On July 25, 1949, he answered a cry for help at a local swimming pool when a woman screamed that her husband and baby boy had disappeared from sight. Diving in, Lafferty pulled out first the boy and then the father and gave artificial respiration to the latter who regained consciousness after about four minutes. For this act of mercy Lafferty became the 42nd Texan to receive the coveted American Red Cross Certificate of Merit, an award only to persons trained in Red Cross First Aid or Water Safety who use their skills in "saving or attempting to save the life of another in an act judged meritorious."

Stories like that of Robert Lafferty make the headlines. But, while less spectacular, the 100s of unpublicized rescues from death which take place every day thanks to first aid or water safety training are more important. The things we take for granted—life savers at swimming pools, first aid kits in buses, free community classes in which our kids learn to swim—are tangible results of the contributions made by the American people to their Red Cross.

At the turn of the century swimming was not a very popular sport, probably because of the fact that it was an exceedingly hazardous one. Nearly 14,000 Americans drowned every year. Today, when millions rush to the beaches and pools every summer, the national drowning rate is down to about 7,000 per year. Red Cross Swimming and Life Saving Instruction has made the difference.

At the turn of the century a man injured on his job almost inevitably had to wait for dozens

of precious minutes—hours even—till a doctor could be summoned to care for him. In the interval he frequently died. It

Drainage Ditch To Reclaim 280 Acres Of Land

By GLENN SHELTON, Farm Editor, Wichita Daily Times

Three miles southeast of Munday a lake is being moved because a small group of Knox County farmers decided they were "tired of raising ducks and geese."

The operation, which is virtually complete, will drain the water from Scott Lake and release for cultivation 280 acres of highly fertile sandy loam soil. At the same time it will lower the water table which in recent years has been getting perilously close to the surface.

The water is being moved through a ditch measuring 4,700 feet in length, 10 feet in width, and a maximum of 18 feet deep. Connecting the lake with Lake Creek, nearly a mile to the eastward, the ditch is legally recorded at Benjamin as the "Scott Lake Drainage Project" and is actually a memorial to the spirit of co-operation of the men of the soil conservation district, the Production-Marketing Administration and the enterprising farmers who conceived the idea and gambled their money on to successful fruition.

Co-operation Pays Off

Though the entire project cost about \$10,000, the farmers took advantage of aid offered by the Production-Marketing Administration's agriculture's conservation program and through a pooling agreement were allowed \$3,750 on the over-all costs.

And the farmers are unanimous that their investments will be returned many-fold in good crop yields. If the land had been in cultivation in 1949, they say, the project could have been paid for from proceeds of the single year's crops.

The farmers who organized the Scott Lake Drainage Project are W. E. McNeill, president; C. R. Elliott, chairman; J. C. Elliott, secretary-treasurer, and Members J. A. and W. A. Reid and F. A. Warren.

C. R. Elliott, who with his son owns the right-of-way for the project, has 1,132 acres tied up in the big ditch operation. He says that 53,000 yards of soil were moved out in order to create the outlet for the surplus water.

J. A. Reid, one of the area's more prominent pioneers, says the idea of draining the lake had been "suggested and speculated upon the past 30 years."

He said the lake once furnished a "great place for stockmen to herd cattle to cut and brand when the water level was low and the turf was in good condition." Legend around these parts also holds that the lake was once a favorite watering place for buffalo.

Project Old Dream

And though a project similar to the one now being completed was long a favorite dream of owners of the lake land, the idea of carrying it out was never too seriously regarded.

The expense involved in building a mile-long ditch back in the days when power was confined to the horses made it prohibitive. It is practical now, the men who have completed the job agree, only because of modern machinery, the excellent help of the U.

S. Soil Conservation Service and the financial aid rendered by the government through the Production-Marketing Administration.

Charley Cape, work unit conservationist with the soil conservation district, helped lay the groundwork for the project back in September and early October. It was also the boys of the SCS who suggested that a gate be constructed at the bridge on the lake end of the ditch for use during drouths. An SCS engineer pointed out that the water could be dammed during periods of drouth and could also be controlled for flushing the ditch of accumulated debris. This idea is still back in their minds but the farmers have not yet decided to build the gate.

PMA Secretary Helps

Bennett Haymon, secretary of the Knox County PMA, suggested the pooling arrangement whereby the farmers could make full use of their agricultural conservation funds.

Within a day or so water will start flowing from Scott Lake into Lake Creek via the new canal. Ultimately the Brazos River will get the liquid which heretofore prevented the rich Knox County soil from producing crops of food and fibre.

The only casualties will be

THE BIG DITCH—Machinery belonging to Contractor Van Earl Sams of Childress puts the proper grade on the sides of the big ditch of the Scott Drainage Project. Water shown in the ditch is that which has seeped in after a large portion of the dirt was moved out. In the lower photo, Bennett Haymon, left, secretary of the Knox County PMA, points out over the lake, while C. R. Elliott watches. Far across the water was a large flock of ducks, and C. R. stated that he "saw the very duck" that Haymon pointed out.

Mr. and Mrs. Earl Hughes, Jr. of Abilene were guests in the home of Mr. and Mrs. A. H. Mitchell last Sunday.

and are partly responsible for the necessity of raising new taxes. One proposed method of securing the needed revenue is to increase the tax on cigarettes by a penny a package. Texas now collects three cents per package. All of our neighboring states now have at least a four cent tax on cigarettes and some have eight. In addition, there has been proposed a 10% increase in the present rate of taxation upon oil, gas, sulphur, carbon black, automobile transfers, etc. to provide operating expenses for the eleemosynary institutions. These are substantially the Governor's recommendations.

I personally would appreciate an expression from you concerning the best course for the Legislature to take in solving this serious problem.

Highlights from Austin

(By Senator George Moffett)

AUSTIN, TEXAS, February 6—Members of the Legislature have done some serious thinking in these early days of the thirty-day special session. Most of us are convinced that the people of Texas want suitable steps taken to care for the more than twenty-two thousand inmates of the state's eleemosynary institutions, which include state orphanages (both white and colored), state tubercular sanitariums, epileptic institutions, schools for the blind, deaf and feeble minded, as well as the large institutions for the adult mentally ill.

There are more than twenty of these institutions in Texas. Some of the buildings are more than seventy years old. Very little construction was done during the depression and almost none during the war period because of the scarcity of labor and materials. It is the state's plain duty to start a suitable build-

ing program to relieve crowded conditions in the above named institutions.

thousands of homeless ducks which the farmers consider "a poor crop from the standpoint of cash income."

The Board for State Hospitals and Special Schools which supervises the above named institutions estimates that at least forty million dollars is needed for buildings and equipment. However, most members of the Legislature believe that this building program should be carried out over a period of years so that the cost will be spread out over a reasonable time.

The state's present financial shortage has been brought about partly because of a decrease in the demand for crude oil. In the fiscal year of 1946, the tax on crude oil alone brought thirty-seven million dollars into the state treasury. In 1949 it brought eighty-seven million dollars, a fifty million dollar difference. In 1950, the revenue from the crude oil tax will be much less than in 1949 because of smaller demand for Texas crude oil. Foreign oil is being imported into our country in great quantities and nationwide conditions are such that not as much crude oil is being consumed as was the case one year ago. These two factors (imports of crude oil and decreased consumption) will bring about a decrease in the state's revenue

FARM NEWS

From the County PMA Committee

PMA CHAIRMAN LISTS ACP PRACTICES FOR 1950

Assistance under the 1950 Agricultural Conservation Program will be available to the farmers of Knox County on the following practices:

- Construction of terraces for which necessary outlets and waterways are provided.
- Construction of diversion terraces to control excess water.
- Establishing a vegetative waterway to dispose of excess water causing erosion.
- Field strip cropping.
- Subsoiling to permit better penetration of water.
- Bringing clod-forming subsoil to the surface of sandy cropland to prevent wind erosion.
- Leaving on the land as a protection against wind erosion the stalks of stubble of sorghums or millet.

- Control of blindweed.
- Construction or enlarging drainage ditches.
- Drilling or digging wells for livestock water.
- Installing pipe lines for livestock water.
- Development of springs and seeps for livestock water.
- Construction of earthen dams or reservoirs for livestock water or erosion control.
- Lining farther reservoirs for livestock water.
- Application of potash and phosphate.
- Growing a green manure or cover crop of summer legumes.
- Increasing the total farm acreage of biennial and perennial legumes and grasses.
- Establishing a satisfactory cover of winter legumes and ryegrass seeded in the fall of 1949.
- Turning under or leaving on

the land a satisfactory stand on growth of rye seeded in the fall of 1949.

- Elimination of destructive plants on non-crop pasture and range land.
- Control of competitive brush.
- Controlling competing weeds in pastures for mowing.
- Reseeding range or pasture land by deferred grazing.
- Constructing fireguards on non-crop pasture and range land.
- Plowing or chiseling non-crop land.

- Establishing or improving permanent pastures by seeding adapted pasture grasses, pasture legumes, or mixtures of grasses and legumes.
- Planting forest trees (including shrubs in protective plantings).

This assistance, averaging about 50 percent of the total cost of the practices represents the interest of the people of this county have in protecting and building up the soil and water resources upon which all people depend, says J. C. McGee, chairman of the County PMA Committee.

He urges that each farmer in the county take an inventory of the conservation needs of his farm—what is needed to check erosion, to keep the top-soil from blowing or washing away, what is needed to build up reserves of organic matter and humus in the soil so that the land will soak up more water and not wash away so easily? What is needed to bring about a better balance in the use of the land so that production can continue indefinitely?

The chairman suggests that farmers also consider the priority of conservation practices, with those most urgently needed at the head of the list. With the help of the local PMA committee, these needs should be checked with the practices which have been approved for Knox County and those practices selected which will do the most to meet the most urgent needs. In this way a conservation program can be worked out for the individual farm which will result in the greatest benefit.

Mr. and Mrs. E. D. David of Gorman and Billy David, student in S. M. U., Dallas, were recent guests in the home of Mrs. David's parents, Mr. and Mrs. E. E. Akers.

Miss Maxine Hill of N. T. S. T. C., Denton, spent last week end here with her parents, Mr. and Mrs. Claude Hill, and with friends.

Mr. and Mrs. W. C. Cox spent the week end at Mulshoe, visiting with friends and attending to business matters.

We Need--

(This is the fourth of a series of articles by the American Heart Association for the "Save A Heart" campaign, which is February 12 to 25.)

Lack of knowledge is the greatest obstacle in the fight against heart disease.

The primary need is for scientific research to discover the unknown causes of rheumatic fever, high blood pressure, and hardening of the arteries.

Authorities in the field are agreed that if any really significant steps are to be taken in conquering or controlling the heart diseases, such progress must be achieved through wide, intensive and prolonged research by competent investigators who can devote all their time and energies to the task.

It is the responsibility of every citizen to see that these research needs are adequately fulfilled. This calls for public education to develop a broad understanding of the seriousness of heart disease and the need for public support of the fight against this leading cause of death.

One of the major unsolved problems in the field of heart disease is the maintenance of those suffering from cardiovascular disorders as useful, productive members of society.

To meet this special problem, it is necessary to institute cardiac placement and vocational training programs in the community, to conduct studies on the performance of cardiacs in industry, and to educate employer groups on the economic soundness of employing capable workers with heart disease.

There is urgent need for community cardiac programs in many major areas of the nation. It is imperative that such programs be established if latest knowledge relating to the prevention, care and treatment of heart disease is to be brought directly to all citizens.

Community cardiac programs will assure that facilities for the overall care of the patient are available, and that these facilities conform to the standards set by the American Heart Association. Such programs are needed to foster and develop local rehabilitation, vocational guidance and employment services.

Read next week: "Plan to Combat Heart Disease."

Mr. and Mrs. Carl Jungman and children, Ida Jo and Mike, of Vernon visited in the home of Mr. and Mrs. H. M. Michels last Sunday.

Mr. and Mrs. W. C. Hertel and daughter, Henrietta, were visitors in Fort Worth over the week end. William Hertel, who is attending St. Edward's University in Austin, met them in Fort Worth for a visit.

Mr. and Mrs. J. C. Elliott and children attended the stock show in Fort Worth last Saturday.

Be careful. Observe state and local traffic laws.

Mr. and Mrs. Ardelle Speice Kenneth Speice and W. W. Naylor visited with relatives in Fort Worth and Dallas over the week end.

Mr. and Mrs. Roy Cutbirth and Miss Dolores Campbell of Abilene spent the past week end here visiting Mrs. T. C. Lowrey and Mr. and Mrs. J. C. Campbell.

BOYCE HOUSE

To the flutter of a flag and the notes of a bugle, Fort Worth was founded 100 years ago by Major Ripley A. Arnold and 42 men of the Second Dragoons. Arnold named the post in honor of Gen. William J. Worth, under whom he had served in the capture of Monterey.

Fort Worth was a fort in name only, the chief buildings being the barracks. Three times a year, Major Albert Sidney Johnston, the paymaster, was a visit-

or. According to tradition, Col. Robt. E. Lee, on a visit, gazed into the wilderness and declared, "I hear the incoming march of thousands of feet."

The first woman to come to Fort Worth was Mrs. Arnold. And on the frontier with its crudities and perils, with no woman to console her, the commander's wife saw one of her children die and later a second one passed away.

Arnold, founder of Fort Worth, was born in Mississippi, graduated from West Point and served in the Florida Indian War as well as the Mexican War. He and his cavalrymen patrolled the frontier and, one writer says, there was a battle in which 52 Indians were killed. The fleeing redskins made a stand and another fight took place in the vicinity of Lovers Retreat in Palo Pinto County. The only battle at the fort was

At Roxy Sunday and Monday

Knox Prairie Philosopher Favors An Annual Income Of \$12,000 In 1999, But Wants An Advance On His Now

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek no doubt has misinterpreted the newspapers again, an habitual accomplishment for him, but here's what he has to say this week.

Dear editor: I was out here yesterday doin' nothin', not even pretendin' to be doin' anything, a man ought to have some time every day when he hasn't got a blamed thing to do and he can sit down and let his mind come to a halt, when I noticed a newspaper flutterin' down out of a tree, must have been picked up by the wind earlier in the day and since it wasn't any trouble to watch it and remember where it landed and when I got through loafin' later in the afternoon I got up and went over and picked it up and took it home and after supper read where some Washington government experts estimate it's possible for every man to be earning \$12,000 a year by the end

like a scene from a comic opera. The savages, enraged by the two defeats, assembled in great force on a bluff. Arnold ordered the fort's "artillery", a howitzer, wheeled into position and gave the command, "Fire!" The flash and roar of the little gun so terrified the Indians that they ran.

The fort was evacuated after four years, on Sept. 17, 1853. Major Arnold is buried in Pioneers Rest beside his children. If he could return to the scene which he knew as a wilderness and where he put up a few log buildings, wouldn't he be astounded at the city he would see!

of the 20th century. There ain't no argument against such an offer, I think it's reasonable and attractive enough and certainly ain't no more than a man could use if he set his mind to it, but I never did like to go hog-wild over money, there are other things in life, and in view of the fact I ain't sure I'll even be here for the end of the 20th century. I was wonderin' if I could maybe draw part of mine in advance?

I want to be entirely fair about this and will be willin' to settle for half, say \$6,000 a year, now, and let somebody more deservin' get his 12 thousand and my extra 6 around the end of the century. Or, if the government is already over-burdened with too much bookkeeping, I'd be willin' to handle this privately, and would like to know if any of your readers would be interested in buyin' my \$12,000 a year income for 1999 for fifty cents on the dollar now? Seems like a awfully good

Four Dams Are Proposed For Area Rivers

ABILENE—Tentative proposals for the building of four dams on the Colorado and Brazos rivers and tributaries to impound adequate domestic and industrial water for all towns in central West Texas were outlined to the Executive Board and committees of the West Texas Chamber of Commerce and the West Texas Domestic Water Association at a meeting held in Abilene on January 26.

Harry P. Burleigh, state planning engineer for the Bureau of Reclamation, told the group that most of the preliminary engineering work is out of the way for the four reservoirs and that on March 1 the Bureau will make a complete report on the projects including costs.

Cost of these studies was estimated at more than \$200,000.

One dam site is proposed on the Colorado river in the southwest corner of Scurry County and another near Robert Lee. On the Brazos river watershed, the location of a reservoir on California Creek near Haskell was recommended, and an alternate on Clear Fork, part to be in Throckmorton and part in Shackelford counties. The fourth recommended project is on Colony Creek, near Eastland.

Size of the lakes will be determined by estimated water requirements for all participating communities, based on needs for the next 50 years.

The WTCC-WTDWA board authorized the organizations' Water

rate of interest for somebody. Will appreciate you sendin' any replies you get to me out here on Miller Creek and I'm going down to the mail box now to prop it up and get it ready. Yours faithfully, J. A.

Beware Coughs From Common Colds That HANG ON

Mr. and Mrs. S. J. Warren Observe 50th Wedding Anniversary Sunday

On February 1, 1900 at Monroe, Tennessee, vows were recited that united Miss Hattie Davis and Sam J. Warren in the holy bonds of matrimony.

On Sunday, February 5, 1950, this beloved couple who have made their home in this area for many years, observed their golden wedding anniversary with an open house at their home near Munday. Open house hours were from three to six o'clock.

Many friends called during these hours to pay respect to this couple. In all approximately 100 friends called to make this occasion a memorable one for Mr. and Mrs. Warren.

Another reason for happiness was the fact that their three sons and their families were present to help in this celebration.

Children present were Mr. and Mrs. Marvin Warren and Jerry Warren and Mr. and Mrs. Weldon Warren and children, Dickie, Linda and Johnny, all of Plainview, Texas, and Mr. and Mrs. Troy Warren of Wink, Texas.

Bob Ballinger of N. T. S. T. C. in Denton spent the past week end here visiting in the home of Mr. and Mrs. A. A. Smith and other relatives and friends.

New Oil Well Being Drilled Near Truscott

KNOX CITY—Ard Drilling Company No. 1 Big Four Ranch is a location for a 5,000 foot rotary test to be drilled 2970 feet from west and 2310 feet from the south line of section 11, block 1, H&GNRR survey, and is drilling in dry sand at 3,000 feet. The venture, a Stanolind Oil & Gas farmout, is about 4200 feet northwest of the Stanolind Oil & Gas Company No. 1 Big Four Ranch completed about one month ago at a total depth of 5,610 feet as a dry hole. The test is also in wildcat territory about 10 miles northwest of Truscott.

Six miles northwest of Munday Hewitt & Daugherty No. 1 J. W. Quessell in D. G. Burnett survey, block 25, A-17, a wildcat, is drilling below 4,500 feet.

R. J. Watson No. 1 Ross Bates in the north one-half of section 4, block 2, D & W survey, three miles northwest of Goree, ran drill stem test to a sand at 1,627-31 feet. Tool open one hour, the recovery revealed gas in 20 minutes, 380 feet of free oil and 30 feet heavy oil cut mud. Casing was run to the top of the pay at 1,627 feet.

bany Lions by a single point each as both teams battled it out at the Albany gym.

The first string Moguls won 27-26 and the second stringers took an 8-7 score. Albany held a 7-point lead in the closing quarter, scored 11 field goals to ten for Munday, but the local were better in the free pitch department.

Scoring for Albany were Clovis Riley 10, Ronnie Macon 4, Red Martin 5, and Frank Tucker 6. Munday's counters came from Ford 4, Myers 6, Ponder 4, and McGraw 9.

Mr. and Mrs. D. E. Holder, Sr. and Mr. and Mrs. D. E. Holder, Jr. and daughter, Dianna Dee, visited Mrs. A. K. Tart and Mrs. Hattie Williams in Abilene last Sunday.

Mr. and Mrs. Doyle Jones and son have moved from Lubbock to Amarillo, where Doyle has accepted a position as engineer with the Southwestern Electric Public Service Co. He is the son of Mr. and Mrs. C. C. Jones of Munday.

Mr. and Mrs. A. H. Mitchell were visitors in Wichita Falls last Wednesday.

Kracker Krumbs—

(Continued from Page One) going through that all week. Downtown after the show, we ran into other Munday people. First were the W. C. Hertels and Henrietta, who were waiting for William to get in from Austin, then they were taking in the show on Sunday.

Then the C. P. Bakers and R. L. Ratliffs walked out of the dining room, visited with us briefly, and headed for the Saturday night performance.

Munday was pretty well represented on Monday day. And, of course, a good many people from these diggings were there at other times during the week.

As we said in the beginning, it was our first trip in 18 years—and we expect to go again before 1968, which will be another 18 years.

You ought to go sometime, too!

Don't get stuck this winter

Get GOODYEAR STUDDERED SURE-GRIP TIRES Now!

Studded Sure-Grip tires are real "go-anywhere" tires for travel on all kinds of soft roads — with sensational traction. Specially designed by Goodyear for operation in soft going, these tires will pull you through soft snow, mud and slush that spins and stalls conventional tires.
