

## Plan To Combat Heart Disease

(This is the fifth of a series of articles by the American Heart Association for the "Save A Heart" campaign, February 12 to 25.)

The American Heart Association was formed in 1922 by a group of America's foremost cardiologists to fight heart disease with planned scientific and educational work. Its membership is composed of laymen, physicians and scientists interested in reducing disease, disability and death resulting from disorders of the heart and blood vessels.

The scientific council has been formed within the American Heart Association to maintain its scientific objectives.

The association carries forward

a broad and comprehensive program of research, education and community service in the field of cardiovascular disease, and is the only national voluntary agency to exclusively devoted to this task.

The first objective of the American Heart Association is to sponsor and finance research in the heart diseases. At least half the funds allotted to the national office will be used for this purpose.

Educational facilities are being developed for the training of nurses, medical social workers and other professional groups in their responsibilities relating to the care, treatment and follow-up of heart patients.

The general public is being informed about the causes of heart disease and the significance of such factors as high blood pressure, infections, obesity, and rheumatic fever. Through the continual educational program of the

## People, Spots In The News

**YOUNG UNS** at San Francisco's Shrine hospital gave Harold Lloyd a true horn-rimmed welcome when ex-comedian, now lodge potentate, visited them.

**COLLEEN** Townsend, 21-year-old movie beauty, tells of plans to quit films and devote her life to Christianity, entering theological school to study for service among orphans.

**FIRST** New Jersey governor to be re-elected in a century, Alfred E. Driscoll joined national demand for "effective action to prevent destruction of highways by trucks of excessive weight and size" in inaugural address.

**FISHING'S** fine at Forest Lake, Minn., as 2,500 vie in annual Veterans of Foreign Wars through-the-ice angling tournament with lake marked in maltese cross insignia of vets. A 3 1/2-pound black bass was good for \$200 first prize.

greatly expanding the use of corn hybrids in Texas.

He says the 4,226 demonstrators showed an average increase per acre of 7.5 bushels and most of it was due to the use of corn hybrids. Last year, according to the Office of Crop Estimates, USDA, 1,297,000 acres of hybrids were planted in Texas and this time the average increase made by the demonstrators means that an extra 9,727,500 bushels of corn were produced in the state.

Miller says the acreage planted to corn hybrids in Texas is still too small. It amounts to 52 percent of the total corn acreage planted and he adds that farmers could profit from planting hybrids instead of the lower yielding open-pollinated varieties.

The newer hybrids, including Texas yellow hybrids 20, 24, 26 and 28 have demonstrated their ability to outyield the older hybrids and should be substituted for them, he says.

In the Blackland Prairie and the areas south and west of there, Texas 26 and 28 are well adapted. Texas 20 and 24 have also made good records, he reports.

In the timbered section of east Texas, Texas 20 and 28 have made the best yields. Texas 24 and 26 have done well and are not far behind in yields.

In the Gulf Coast Prairie, except the river bottoms, Texas 11W and 9W white hybrids have produced better yields than the yellow hybrids. These two white hybrids have a wide range of adaptability and will yield well wherever white corn is desired in the state. Texas 11W has the best production record of the two, Miller says.

He says the demand for seed is especially heavy for the newer developed hybrids and suggests that planting seed be purchased at an early date. If seed of the newer varieties are not available, he says, you can substitute some of the older hybrids such as Texas 8, 12 and 18 for them. These hybrids will do well and will outyield the open-pollinated varieties.

New hybrid seed should be planted each year, he says, for after the first year hybrid seed "run out" and this results in lower yields. Planting good, adapted hybrids is one way farmers can increase yields and profits, says Miller and right now is an important consideration for most every farmer in the State.

Mr. and Mrs. Joe D. Williams of Ozona spent the week end with Mrs. Williams' parents, Mr. and Mrs. J. E. Reeves and with other relatives and friends.

Miss Patsy Miller, Miss Ruth White and Miss Mike Sloan of N. T. S. T. C., Denton, spent the week end here visiting Miss Mitchell's parents, Mr. and Mrs. A. H. Mitchell.

Mr. and Mrs. G. B. Hammett visited with relatives and friends in Goldthwaite over the week end. Be careful. Obey state and local traffic rules.

association, in cooperation with its local affiliates, the public is encouraged to seek early diagnosis and adequate therapy, and to lead its full support to the development of necessary community cardiac programs.

To provide the necessary services for the individual suffering from heart disease, there are local heart associations in major areas throughout the United States, affiliated with the American Heart Association. The effectiveness and success of the national heart disease program is measured in terms of what is accomplished in local communities.

The associations are engaged in furthering community programs for the prevention, care and treatment of heart diseases; in educating physicians and other professional groups and the lay

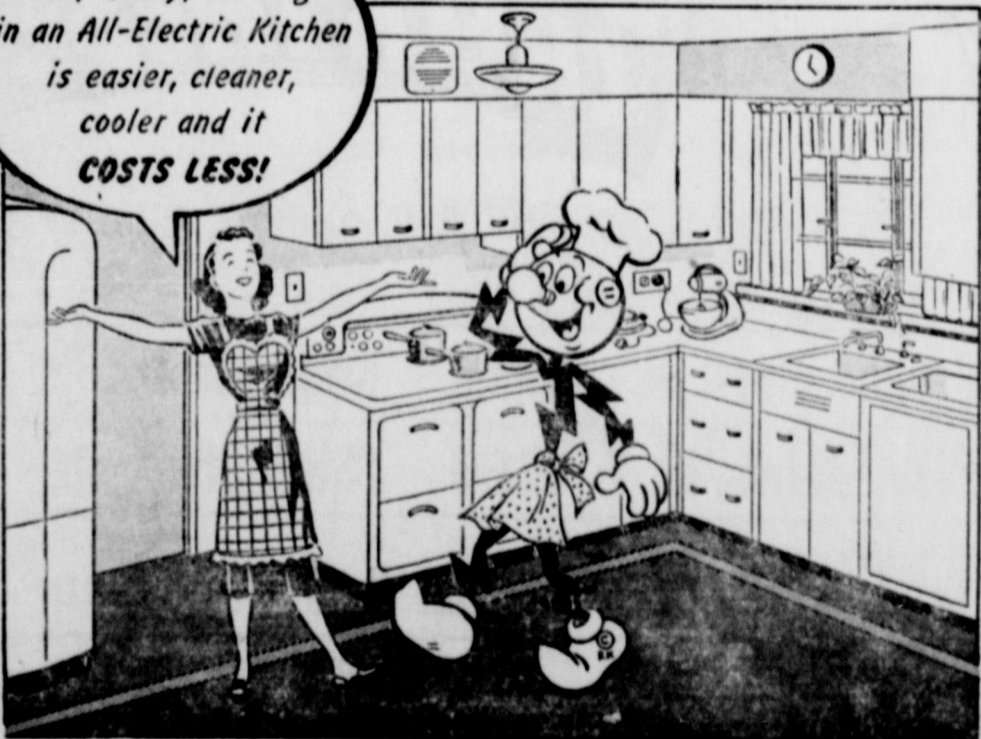

## Plant Corn Hybrids For Big Yields

Results of tests conducted by the Texas Agricultural Experiment Station and 4,226 4-H and adult demonstrators show that corn yields can be increased from 20 to 30 percent and in some cases as much as 50 percent by planting adapted corn hybrids. E. A. Miller, extension agronomist of Texas A. & M. College, says this should be proof enough for

public; and in establishing and maintaining high standards of medical and other services. (Read next week, "Save A Heart.")

## An All Electric Kitchen saves you time, money and work

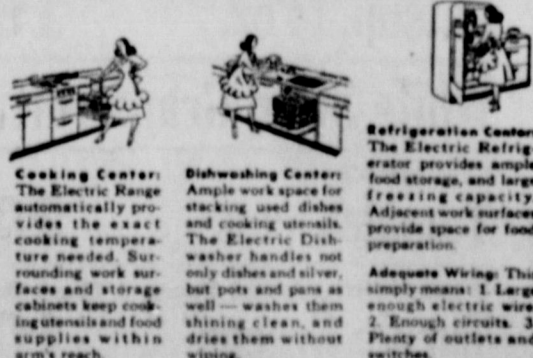

Yes, Reddy, cooking in an All-Electric Kitchen is easier, cleaner, cooler and it COSTS LESS!

When a Kitchen is Practical and Pretty of Course, It's Electric!

When all of your appliances are electric it costs less to use them than when you have a combination of services. That's because each time you take another step towards an all-electric kitchen you also step down the cost of each unit of electric service. The more you use the lower the rate. Yes, an all-electric kitchen is easier, cleaner, cooler, and costs less!

AN ALL ELECTRIC KITCHEN INCLUDES:

**Cooking Center:** The Electric Range automatically provides the exact cooking temperature needed. Surrounding work surfaces and storage cabinets keep cooking utensils and food supplies within arm's reach.

**Dishwashing Center:** Ample work space for stacking used dishes and cooking utensils. The Electric Dishwasher handles not only dishes and silver, but pots and pans as well — washes them shining clean, and dries them without wiping.

**Refrigeration Center:** The Electric Refrigerator provides ample food storage, and large freezing capacity. Adjacent work surfaces provide space for food preparation.

**Adequate Wiring:** This simply means: 1. Large enough electric wire. 2. Enough circuits. 3. Plenty of outlets and switches.

### New Legislation, Taxes May Boost Telephone Rates

The new Minimum Wage Legislation, which was passed by Congress and signed by President Truman during October 1949, became effective on January 25, 1950. The new law increases minimum wages from forty cents to seventy-five cents.

Mr. Robinette, District Manager for the Telephone Company,

pointed out that the telephone companies are going to be hit hard by the extra operating costs resulting from the changes in the minimum wage law. Telephone service is a round-the-clock business, with three shifts every twenty-four hours, seven days a week. This means the new law will hit the telephone companies harder than the average business covered by the act.

In addition Social Security Taxes were advanced on January 1, 1950, from one percent to 1½ percent. As in the past, the employer matches the amount deducted from each employee's pay check and deposits these funds with the Social Security Administration. During 1949, the tax paid on an annual income of \$2,500 amounted to \$25.00. During 1950, the same income will require a Social Security Tax of \$37.50.

Telephone companies only have one source of revenue from which to pay their costs of operation—that is from the rates paid by subscribers to the service. Mr. Robinette stated that he could see now why the Company could avoid increasing rates in months ahead to offset these and other rising costs of providing telephone service.

At present the Baylor-Knox and Throckmorton Counties Unit of the Farmers Home Administration are represented by Mr. W. C. Miller, Route 1, Vera, Texas; Mr. James A. Blankenship, Route 1, Seymour, Texas; Mr. Chester B. Cox, Star Route, Seymour, Texas; Mr. John E. Hunter, Route 1, Knox City, Texas; Mr. Kyle B. Ritchie, Vera, Texas; and Mr. Tommie M. Spruiell, Route 1, Munday, Texas; on the Unit Cotton Production and Insect Control Committee. Other borrowers will be added to the group within a short time.

### DATES FOR STATE 4-H ROUND UP AND AGENTS CONFERENCE SET

Dates for the 1950 Texas 4-H Club Round Up and the annual conference for all Texas Extension Service personnel have been set, according to an announcement made by Extension Director G. G. Gibson.

Both meetings will be held at Texas A. & M. College during the week of June 12-16. The district winning 4-H judging contests on June 12 and the 4-H Round Up will follow on June 13 and 14.

The annual Agricultural Extension Service Conference will be on June 15 and 16. Details covering the programs for the week have not yet been completed, however Gibson says that all committees working on the programs are expected to have much of their work done by early March and announcements will be made at that time.

Rev. and Mrs. Willard Reeves of Dallas spent the week end here with their parents, Mr and Mrs. J. E. Reeves and Mr. and Mrs. S. G. Smith.

### Carolyn Hannah, H-SU Beauty, Takes Part In Presentation On Campus

ABILENE—Carolyn Hannah, daughter of Mr. and Mrs. Leland Hannah, Munday, has been chosen the "most beautiful" on the Hardin-Simmons University campus in the annual Beauty and Beast election held last week at the university. It is the equivalent to her being named the most popular girl.

The presentation of the Beauty and Beast was in the form of a playlet in which the setting resembled the fairy tale of "Beauty and the Beast". Narrator was Bob Todd and Dick Collins, beast of last year, served as master of ceremonies. Miss Hannah, a junior at the

university, received the honor of being chosen Beauty when she won out over a field of eleven school beauties. In the preliminary election Carolyn was placed on the nomination blanks by receiving the required number of 75 names requesting that she be placed on the ballots. In the run-off Carolyn defeated Shirley Price, San Angelo, and Wanda Baker, Wilson. Other candidates for the most beautiful were Pat Baxter, Anson; Pat Beasley, Anson; Barbara Davis, Austin; Virginia Dunagan, Midland; Julia Edwards, Abilene; Elnita Faubian, Ballinger; Helen Engle, Coahoma; Doris Reid, Abilene; and Claire Waller, Breckenridge.

Carolyn is a member of the Cowgirls girls cheering unit, the H-SU Chorus, Young Woman's Auxiliary, the student council, and was freshman class favorite.

The Beast, Manual "Greek", Orfanos, is a sophomore from McAllen and was chosen from a

group consisting of Hug Higgins, Cleburne; J. Forest Posey, Abilene; Travis Kelly, Texarkana; Bob Meates, Abilene; and Charlie Williams, Refugio. Runners-up were Higgins and Posey. Orfanos is a member of the Cowboy football team.

The Beauty received an armful of deep red roses and a box of candy. The Beast was presented with a corsage of carrots and onions and a box of candy.

### Cotton Production And Insect Control

Wilburn A. Satterwhite, of Seymour, County Supervisor of the Farmers Home Administration, attended sessions this week of a state Farmers Home Administration cotton production and insect control committee in Dallas. "Early insect control was the most effective practice, and farmers who planted early enough and poisoned properly and early got excellent results—bale to the acre or more in many instances," Mr. Satterwhite said.

"Insect control alone won't get the job done," declared Mr. Satterwhite. "There are other things that need to be done—cover crop on land to be planted, fertilizer at planting, planting best seed early, pre-square poisoning, and having good land that has been properly prepared."

At the Dallas meeting three things were pointed out—cover crops, early planting, and pre-square poisoning—as being the most important in increasing production.

Placing stress on the improvement of farm and home management practices of farmers associated with Farmers Home Administration, the cotton production and insect control committee was organized by State Director L. J. Cappelman of the agency. Mr. Satterwhite was named on

## CHECK WINTER COVER CROPS

Are winter cover crops effective in controlling erosion? Do they provide the necessary cover to keep the top-soil from washing away? Do they pay? According to J. C. McGee, chairman of the Knox County PMA Committee from now on through the next few weeks is the best time to find the answers to these questions.

The chairman suggests that one way to check is to compare fields protected by winter crops with those not so protected. After a rain, check the silt deposit at the bottom of the field. Check the later running off the unprotected land against that from the land protected by a cover crop.

He reminds Knox County farmers that the soil carried away in the run-off is the top-soil which minerals and humus.

While making this inspection, the chairman suggests that farmers also check on the value of cover crops as a means of building up the organic matter and humus content of the soil when the cover crop is plowed under as green manure. "This is a good time of the year to do a little checking of this kind," the chairman suggests, "on your own farm and on the way to and from town. Compare the fields left bare with those where the cover crop has been seeded. And compare the various crops used as winter cover."

Austrian Winter Peas and Vetch are the main cover crops planted in Knox County.

## CHECKING EROSION LOSSES

A straight furrow is the most expensive distance between two points—that is when the furrow is up and down the slope.

With this statement, J. C. McGee, chairman of the Knox County PMA Committee, calls attention to the comparative losses of soil and soil fertility when sloping land is farmed on the contour and when the furrows run up and down the slope.

His observations are backed

up by measurements of soil losses taken at Zanesville, Ohio.

Covering a period of 75 days during the corn growing season, the test showed the following per acre losses on down slope, straight furrow plowed land:

More than 90 pounds of nitrogen.  
Approximately 130 pounds of phosphoric acid.  
Nearly 1600 pounds of potash.

Where the furrows were on the contour the losses were:  
Nitrogen about 34 pounds.  
Phosphoric acid, 31 pounds.  
Potash, 604 pounds.

Contouring reduced the loss in plant food about two-thirds. Based on a 5-10-5 fertilizer, the savings per acre were: about 56 pounds of nitrogen, the amount in 10.6 bags; about 99 pounds of phosphoric acid, the amount in 10 bags; and about 1000 pounds of potash, the amount in 200 bags.

When comparing the cost of contouring farming with that of straight furrows, these losses should be taken into consideration, says the county chairman.

## COTTON SHADE HALTS SPREAD OF FLAME

A new window shade has developed which is said to repel fire, the National Cotton Council reports.

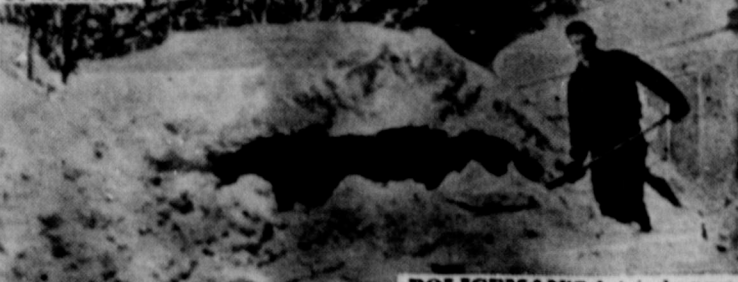

The shade is made of unfilled cotton cloth sealed with vinyl plastic. The material is said to retain its fresh, new appearance despite rain, sunlight and frequent scrubbing with soap solutions.

Fire authorities point out that draperies and window shades are responsible for the rapid spread of fire, carrying flames from floor to ceiling to envelop a room. The new cotton shade smudges or chars slightly when a steady flame is applied, but does not flare up or burn, it was said.

Don't throw away stale doughnuts. They regain their flavor when cut in half, placed under the broiler for a few minutes and spread while warm with melted margarine, sugar and cinnamon.

## People, Spots In The News

**PROBABLY** smallest object ever mass-produced is 1-mm. steel ball, here being examined for perfect roundness by SKF Industries craftsmen. They're used in ball-point pens and delicate measuring instruments.

**MASTERMINDS** of college grid—Frank Leahy of Notre Dame and Earl Blaik of Army—chat amicably at N.C.A.A. and observers wonder if it means a resumption of classic rivalry.

## Rhoden Named Sales Manager In Feed Dept.

**ABILENE** — Appointment of Clifford Rhoden, of San Angelo, as sales manager of the feed department of the Western Cotton Oil Co., Southwest division, was announced here by W. A. Williams, vice-president of the Western Cotton Oil Co. in charge of the feed department.

Appointment of Rhoden further broadens the distribution, sales and sales promotion program of Paymaster Formula Feeds which are produced by Western Cotton Oil Co.

Mr. Rhoden brings a wide background in the feed business to his new position. He has been in the mill field for 25 years in Winters, Abilene and San Angelo. Since 1946, he has managed Western Cotton Oil Co. mill in San Angelo.

In his new position, Mr. Rhoden will expand and direct the sales force for Paymaster Formula Feeds to market the new line of feeds throughout the Southwest.

In making the announcement, Mr. Williams said Saturday: "We are fortunate to be able to have Clifford Rhoden in this important job. His experience and ability are exactly what we need to push our enlarged sales plans of Paymaster Feeds."

Mr. Rhoden is a native of Houston County. He has been active in many civic organizations in San Angelo and is a member of the Public Relations Committee of the Texas Cottonseed Crushers' Association. Mr. and Mrs. Rhoden, and their two children will move their residence to Abilene, his headquarters for the new position.

## BOARD DOES MANY JOBS

An outstanding characteristic of insulating board is that it combines insulation with other properties, including structural strength, decorating, and sound quieting.

## STRONG SHEATHING

Tests show that insulating board sheathing, in addition to being three times more resistant to heat passage than is ordinary sheathing, has superior structural strength.

## Weekly Health LETTER

Issued by Dr. Geo. W. Cox  
M. D., State Health Officer  
of Texas

**AUSTIN**—If public health is to contribute to health and happiness in 1950, the people of the State need to gain a new knowledge of its significance and to convince their leaders of the importance of the support of the people, said Dr. Geo. W. Cox, State Health Officer.

The State Department of Health is the state agency responsible by the law for the health of all the people in Texas. The working out of this responsibility, however, must be a joint affair shared by all the people.

The State Health Officer is the administrative and executive head of the Department. The field activities are organized in 18 different divisions. A division director with specific training and experience in one of the specialized fields of public health as well as in general public health measures directs the activities of each division.

The many problems faced today by every American com-

munity and by every school, farm, business and industry are: how to prevent and control illness, malnutrition, and epidemics; how to make the community in which one lives as free as possible from hazards to death.

The world of disease is not divided; it is a common world. Tuberculosis in the United States is not different from tuberculosis in any other country. In terms of human needs, the world is truly one world. Public health and medicine have a tremendous part to play. They possess one of the important keys that unlock the door to future world progress.

No public health program anywhere can be completely successful, however, unless it has the confidence and support of the people who benefit by it. Full support cannot be expected unless the people understand the purpose and the objectives of the program. Your health department is interested in preventing disease and it never interferes with your relations with the doctor of your choice. Dr. Cox pledges the personell of his department in keeping you well. When you are ill he advises you to consult your family physician.

Be careful. Observe state and local traffic laws.

## COTTON SHIRTS SURPASS NYLON

None of five different brands of nylon shirts tested recently compared favorably with a first-quality cotton broadcloth shirt in details of construction, cut, workmanship and appearance.

Consumer's Research organization reports.

"A nylon shirt does not have the crisp, neat appearance of a fresh, well-ironed cotton shirt," the researchers observed.

Most frequent complaints during the testing of the nylon shirts were poor workmanship and cut of the shirts, loose threads, puckered seams, poor buttonholes, and, in some instances, bad join-

ing of the seams. All men participating in the test agreed that they would not care to wear nylon regularly. Nylon shirts can be worn unironed only if they are to be worn under conditions where the wearer would not object to puckered collars and seams, the study showed.

The Consumers' Research investigation also found that most men complained of a clammy and unpleasant feeling in hot, sticky weather in nylon shirts. It was noted that men who perspire freely more than likely would find nylon shirts uncomfortable and unpleasant to wear in any kind of weather.

## Stanley Wardlaw Appliance Co.

One of the hottest, and most famous gun duels in the annals of the West was fought in the frontier town of Fort Griffin in the 'Seventies,' and though dozens of shots were fired on each side, both of the participants—a rough-and-tumble gentleman named Hurricane Bill, and a saloon keeper named Mike O'Brien—came off unscathed!

Hurricane Bill had a knack for getting into trouble and was always in the thick of it when anything broke loose at the saloon owned by O'Brien and another Irishman. As a result, there was bad blood between "Hurricane" and the Irish—and it all came to a head one afternoon when Mike O'Brien returned to his likker parlor and found Hurricane Bill threatening his porter! One word led to another and, finally, Bill was thrown into the street!

Both men were armed at the moment but both sensed that the

affair called for a showdown, and as Bill streaked for his picket shanty up the street to get his Winchester, Mike hurried to the back of the saloon, armed himself with a heavy bore buffalo rifle and a pocketful of cartridges. Thus "loaded for bear"—as the saying goes, the bold O'Brien walked out of the saloon, sauntered up the street, deliberately seated himself in the dust opposite Bill's shanty, and began pumping lead into the flimsy structure.

Bill opened up about the same time with his Winchester, but he soon realized the superior penetrating power of the big buffalo gun was going to make things mightily unhealthy for him. He was afraid to expose himself to Mike's rapid fire, and so, to keep up his side of the duel, Bill tried to wing Mike by listening to the report of the saloon man's rifle, then raising his own Winchester at arm's length above his head just on the chance of getting in a lucky shot!

The shooting went on. O'Brien didn't budge from his sitting position in the middle of the road, except to shift around a bit to take more cartridges from his pocket. The excited citizens of Fort Griffin's Flat were holed up in various houses, watching the battle with amazement—that is, all save one. He was a wild Irishman—and at the hottest

### At Roxy Sunday and Monday

Joel McCrea finds Virginia Mayo very distracting in this scene from "Colorado Territory."

### Knox Prairie Philosopher Favors Government Potato Deal But Wants The Same Potatoes Used Each Year

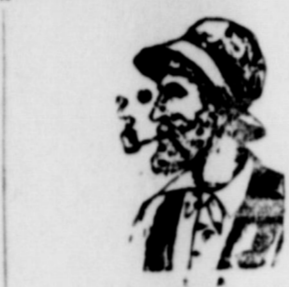

Editors note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek, has a strange idea about the government's potato deal, his letter this week reveals.

I have seen a lot of comment in the newspapers about the government's potato deal, been read in how the commentators and editorial writers are outraged over the government's payin farmers a big price for potatoes and then sellin em back to the same farmers for one cent a hundred pounds, to get them off the mar-

part of the battle, this individual, staggering under a heavy load of likker, shuffled out into the road with a bottle in one hand and a glass in the other. He squatted down beside Mike, poured a long drink into the glass, and handed it to the duellist with this invitation: "Here, me boy, take something to stiddy yer nerve, and be after holdin onto the job until the rascal shakes out a white rag."

So, while Hurricane Bill continued to fire from the window—still in his aimless fashion—Mike put down the buffalo rifle and partook of the refreshment. Having likkered, he took his gun and resumed the battle while his friend reeled back to safety.

Finally, after shooting away all his cartridges, O'Brien nonchalantly got to his feet, shouted to Hurricane Bill that he was not after all, worth the ammunition it would take to kill him, and strolled back to his saloon.

ket, but it seems to me all the editors is missin the main point.

What burns me up about this deal ain't that it looks like a pretty good thing for the potato growin farmer or that it may cost a little money, government's gonna spend money, whatever it does.

What burns me up is the fact that the government is gonna dye the potatoes so the farmer can't sell them again.

As I understand it, the farmer grows the potatoes, the government buys them at a fair price which happens to be considerably above the market, and then sells em back to the same farmer at a fraction of what it just got through payin.

So far, such a deal sounds reasonable enough to me. But some smart aleck slips in the provision that the potatoes has to be dyed so they can't be sold again.

What I want to know is what in thunder difference does it make to the government whether it's buying a new potato or a

### Refugio County Wins Plaque For Safety Program

Refugio County has been selected by the State Club office for the second consecutive year as reporting the most outstanding 4-H safety program in Texas—in 1949. The County Extension office at Refugio receives a second plaque of merit from General Motors, similar to the one awarded for 1948.

In his report, County Extension Agent L. A. Weiss, Jr., stated that among major safety activities emphasized on a county-wide basis were the showings of sound motion pictures on accident and fire hazards to school service clubs, farm men and women and 4-H'ers.

"The addition of a course in safe driving instructions with the use of a dual control automobile

used potato so long as it ain't gonna go nowhere except from the farmer to the government and back to the farmer. What in blazes difference does it make to some Washington bureaucrat whether the potato the government's buyin and losin money on is new or second hand, soft or hard, sproutin or not, so long as it ain't gonna be eaten anyway? Why make a farmer go to all the trouble of growin a new crop, wearin himself and his equipment out and wastin time and energy and money, when his old potatoes would depress the market just as much if they was turned loose? Let him store his equipment and sit by the fire and sell the same potatoes back and forth till they wear out.

There's always some bureaucrat thinkin up some scheme to make the farmer work harder for no reason at all. I dont grow potatoes myself but I got sense enough to see they could use the same potatoes over and over with a lot less trouble? Any chance of gettin that program started in this county on cotton

Yours faithfully,  
J. A.

### How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

**CREOMULSION** for Coughs, Chest Colds, Bronchitis

in the Woodsboro Public School," Weiss cited, "is probably the most outstanding phase of the 4-H safety program that has been and is being carried on in Refugio county.

"Farms, ranches and farm homes is most cases are a safer place in which to live, work and play as a result of the safety program that brought about the marking and removal of hazards throughout the county."

The report showed that a total of 108 members enrolled in the 4-H safety activity, 90 made safety surveys.

### School, Home—

(Continued from Page One)

the next speaker. This is the department of the State government which deals with Texas correctional schools, and through statistics and case histories, can the problems the School and give any citizen an insight into Home Behavior Clinic proposes to discuss. The subject of this speaker will be "Channels of Early Training To Prevent Delinquency."

Closing speaker of the evening will be one of the foremost authorities of Texas on juvenile problems, Judge David McGee, of the Criminal District Courts of Fort Worth, Tarrant County. Judge McGee has had a quarter century of experience in the important trial courts of a very large city, and has encountered and applied solutions to difficult problems in modern life. His lecture will have as its title "The Responsibilities of Freedom and Citizenship."

Judge Lewis Williams, of the district court of which Benjamin and Knox County is a part, will preside at the Clinic, and introduce the speakers. J. R. Steed-

man, superintendent of the public schools of Benjamin, will be general supervisor of the program. "We invite every school patron, teacher, or interested citizen—in our county and surrounding counties—to be with us on the evening of Feb. 22," he said, in announcing the State and Home Behavior Clinic.

### Calf Show—

(Continued from Page One)

Following order:

Junior Class: First, Nickie Leaverton; second, Gary Cure, third, Peggy Cure; fourth, Bobby Miller; fifth, Larry Mayberry; sixth, Lewis McGuire; seventh, Billy Mayberry; eighth, Ernest McGaughey; and ninth, Dean Myers.

Senior Class: First, Gary Cure; second, Bobby Miller; third, Nickie Leaverton; and fourth, George Ray Baty.

Record prices for calves sold in this area this year were paid by merchants of Munday and Knox City at the auction conducted by C. R. Elliott. A total of \$1,601.50 was paid to the boys for their calves. Feeder, weight of calf, purchase price

and purchaser are as follows: George R. Baty, 920, 28 cents, Zachery Grocery, Knox City; Ernest McGaughey, 820, 27 cents, Western Cottonoil Co., Munday; Lewis McGuire, 750, 28½ cents, Atkeison's Food Store; Billy Mayberry, 780, 24 cents, Western Cottonoil Co.; Dean Myers, 570, 27½ cents, Munday Locker Plant; Nickie Leaverton, 940, 33½ cents, Munday C. D. A.; Bobby Miller, 800, 32 cents, Johnny's Drive Inn, Knox City.

### School Library—

(Continued from Page One)

placing of the books on open shelves, only two have been lost so far.

Approximately eighty books are in circulation at all times. Which means that out of one hundred and fifty enrollment, over fifty percent of the children are checking out a book each week. We are urging the children to read for pleasure and not for "points".

Many hours of work has been done on the library to bring about the changes. No time is allotted for this during the regular school hours, so the major

part has been done after four and on holidays, and strictly on a voluntary basis. Nancy de Bush and Evelyn Ford deserve much credit for the many hours they have spent after school and on Saturdays working in the library. Nancy still contributes much of her time for she is the very efficient head librarian. The following children are librarians: Nancy DeBusk, Paul Wayne DeBusk, Jo Ann Burgess, Evelyn Ford, Billy Joe Brown, Joy Jones, Harold Fox, Glenn Henson, Margie Lou Campsey, Perry Reeves, Royce McGraw, Jo Mac Hill, and Betty Blacklock.

### Kracker Krumbs—

(Continued from Page One)

boys, though.

Take Walter Rice, for instance. He's the "boy" who started calf feeding in Knox County and supervised the first show.

Walter has missed very few of our shows, and someone said a few years ago that no Knox County show was complete without Walter Rice. We missed him.

And "Old Dunk", too, with his boisterous laugh, big hearty smile and slap on the back.

"Dunk," as you know, is R. G. Dunkle, another former Knox County agent.

It must have been raining in Graham. And when it rains in Graham, Dunk knows it can be doing most anything in Knox County. Guess he was afraid to venture out. We missed him.

Anyway, it was a nice show, and we enjoyed it. Bet you did, too.

### Miss Coffman On Program For College Dad's Day Dinner

Miss Mildred Coffman will be hostess to her father, Mr. Orb Coffman of Goree, at the annual Dad's Day and Dinner at Hockaday Junior College in Dallas, on Friday, February 17. Miss Coffman is a member of a trio which will furnish a part of the entertainment at the afternoon program at 4:00 o'clock in the Great Hall. She has been elected to Tau Gamma Epsilon, academic honor society of the Hockaday Junior College. She is treasurer of the Student Council and President of the Glee Club. Miss Coffman, who is majoring in music, will give her graduation piano recital Monday evening, April 1.

Features of the elaborate program which has been planned by the students in honor of their fathers, are a coffee and open house Friday afternoon from 2:30 o'clock until 5:00 o'clock. The formal banquet at 7:00 o'clock in the Main Building will have as its theme "Dad, Our Sweetheart and King" and the climax of the evening will be the moment, at which each daughter crowns her father with a red and silver crown trimmed with hearts to show that he is King of the Evening.

Silage or "canned pastures" ranks next to improved pastures as the best source of low cost feed nutrients.

More than four thousand 4H and adult demonstrators last year showed that corn yields can be increased by as much as 20 to 30 percent by planting adapted corn hybrids.

Be careful. Obey state and local traffic rules.

### Jess Gardley Home Destroyed By Fire

A two-room house "in the flats" which was occupied by Jess Gardley, well known local colored man was destroyed by fire around 9 o'clock last Monday night.

The fire is said to have started when an oil stove exploded and the house burned within a few minutes. It was a mass of flames when members of the local fire department arrived on the scene.
