FORMER RESIDENT DIES AT WINNSBORO

Word was received here of the death of Steven Smith, former resident of Munday, who passed away last Tuesday at Winnsboro.

(Continued on last Page)

## 4-H Members To Observe Week Of Achievement

Texas 4-H club members, more than 113,000 strong, will join with the nearly 2,000,000 members in the nation to observe National 4-H Achievement Week, November 4-12.

Working towards their 1950 theme, "Better Living for a Better World", 4-H youth have been a busy group during the past year. They have produced and conserved food, worked to make their homes more comfortable and attractive, helped to supply the extra labor needed to produce crops and livestock and furnished "know how" for making their farms more efficient and productive. During National 4-H Achievement Week,

TIME-SAVER

Solution to the difficult problem of cleaning motor generators of elevators is a new cotton drill cover that eliminates the inefficiencies of the old process. Formerly a five-hour clean-up job was necessary after the five-minute cleaning operation, and workmen were partially asphyxiated by carbon and copper dust. With the new cotton "Ho-Vac" cover devised by L. K. Herzog, the five-hour clean-up and the crew's discomfort are eliminated. In the new process, blowing and vacuuming simultaneously clean out dust from the interior of the motor generator and collect it in a vacuum tank.

they will report to the nation on just how they have done. The local volunteer 4-H leaders and the outstanding members will be recognized for the contributions they have made to the welfare of their state and nation.

The officers of the 4-H clubs in Texas, their leaders and extension agents have made plans for achievement banquets, tours, achievement days and other special events for the week. Exhibits will be placed in show windows and 4-H members will tell service clubs, farm organizations, school assemblies and other groups about their work. The winners of state awards will be honored in many counties by their fellow members.

A glance at the accomplishments of 4-H members throughout the nation reveals that 16,000,000 quarts of food were preserved during the year; 100,000 acres were planted to gardens; they produced 9,000,000 birds in their poultry demonstrations; they own one million head of livestock and the list could be extended to cover just about every job in the home and on the farm. They participated in many worthwhile activities such as farm safety, fire prevention, health work, soil conservation, wildlife conservation, tractor maintenance and a large group of others.

Their work is not limited however to producing and conserving the food and feed they produce for they devote much time to personal improvement programs. They participate in leadership training activities, citizenship work and group discussions that help them to better understand some of the important social and economic factors that are now at work in the world. They study and practice democratic procedures and are doing their part to develop the good-neighbor spirit at home and abroad.

Texas 4-H members are extending an invitation to the public to join them in their observance of National 4-H Achievement Week.

Mr. and Mrs. Tom Hoosier of Seymour and Mr. and Mrs. P. V. Williams attended the Texas-SMU football game in Austin last Saturday.

Power Commission in Texas and adjoining states since V-J Day, have brought natural gas into Texas in such greatly increased volume that many more thousands of homes and major industries now have the advantage of the low-cost fuel. Many large and small communities have been aided, including El Paso and Dallas, according to W. Paul Jones, president of Service, Inc., the nation's leading gas equipment and appliance manufacturer.

This new natural gas construction is part of a nationwide expansion program, in the course of which the gas utility industry has spent three billion dollars since August, 1945. There now are almost 300,000 miles of pipeline in service in the United States, delivering energy for manufacturing and household uses at an annual rate exceeding four thousand billion cubic feet.

Because supply still does not meet demand, the gas utilities plan still further expansion through 1954. Of the approximately \$3,140,000,000 to be spent in the coming five-year period, about \$2,750,000,000 will be used by the natural gas industry.

## Munday Invited For Special Day At Stock Show

Munday, which had a special "day" designated in its honor at the Southwestern Exposition and Fat Stock Show last winter, has been invited to have a day at the 1951 exposition.

W. R. Watt, president-manager of the Fort Worth show, in a letter to the Chamber of Commerce declared that this city helped to make the 1950 show one of the most successful in history. The letter continues: "Your city is invited to have a special day at the 1951 show (Jan. 26 through Feb. 4.) By coming in an organized group, your citizens have lots of fun and advertise your city, as do the high school band and the Cowgirl Sweetheart."

"Plans are being made—new buildings, new features—to make the show coming up the finest yet. We need your help and we're counting on you. So please let us know which day you wish designated as Munday Day."

A total of \$146,000 in cash awards is offered, the highest in the show's 55 years. A colorful Western parade on Friday afternoon, Jan. 26, through the Fort Worth business district will usher in the show, with the first performance of the rodeo that night, and afternoon and night performances thereafter.

Construction now under way includes the Poultry Building, doubling of space for carload-and-pen division of bulls and glass-in of the archways connecting the livestock buildings. The world's greatest indoor rodeo will be held in the magnificent Will Rogers Memorial Coliseum. The boys' show will be a

big feature of the livestock department, with the first Saturday Future Farmer's and Homemakers' Day and Monday, 4-H

## State Shows Big Increase Of Gas In Home Heating

The number of Texas homes equipped with gas heat increased by 75,389 during the past year, a report by the state's utility firms points out.

About 75,866 more homes will get gas heat in the next year if heating materials continue to be available by the end of 1951, the report continues. This increase of 16 per cent in homes with natural gas heating over the two-year period is the result of the rapid expansion of natural gas pipelines on which \$73,607,000 has been spent in the state since 1946.

Pipelines and storage facilities, authorized by the Federal

# CHEVROLET TRUCKS

## with Chevrolet's Hypoid Rear Axle

### Single-Unit Housing

Here's maximum strength... longer trouble-free service! Chevrolet rear axle housings are formed into tubular steel beams; no bolts or rivets to work loose.

### Full-Size Inspection Plates

Easy-to-remove, one-piece inspection plate saves time and labor... provides full view of rear axle gears when removed.

### Splined Axle-to-Hub Connection

Splines—not bolts—deliver the driving power evenly—without strain—on all heavy-duty models. Loose axle shaft bolts and costly grease leaks are eliminated.

### Straddle-Mounted Pinion

Gears last longer... pinion gear is supported at each end by ball bearings to keep it in mesh. Adjustable thrust pad prevents distortion of ring gear when starting heavy-duty trucks with heavy loads.

### 4-Pinion Differential

Load and shock of heavy loads are distributed over four pinions instead of two in all Chevrolet medium- and heavy-duty trucks—for longer axle life and greater strength.

Chevrolet trucks are engineered to "take it" on the roughest, the toughest jobs. The single-unit design housing and splined axle-to-hub connection of Chevrolet's hypoid heavy-duty rear axle mean strength and stamina found in no other truck rear axle in Chevrolet's class. Combine that with other outstanding Chevrolet features... powerful Valve-in-Head engines, Synchro-Mesh transmissions, channel-type frames with alligator-jaw cross members! Here is the truck that can handle tough jobs... America's most popular truck. Come in and see these great Chevrolet trucks today.

**Plus CHEVROLET ADVANCE-DESIGN TRUCK FEATURES** Two Great Valve-in-Head Engines • Power-Jet Carburetor • Diaphragm Spring Clutch • Synchro-Mesh Transmissions • Hypoid Rear Axles • Double-Articulated Brakes • Wide-Base Wheels • Ball-Type Steering • Unit-Design Bodies • Advance-Design Styling.

## GOROE PASTOR AND WIFE ATTEND CONVENTION

Rev. S. E. Stevenson, pastor of the Goree Baptist Church, and Mrs. Stevenson left Monday for Fort Worth, where they are attending the Baptist General Convention of Texas.

Some of the speakers on the 4-day program include Senator Tom Connally, who discussed "Communism and Christianity"; Rep. Brooks Hays, congressman from Little Rock, Ark., who is vice-president of the convention; Dr. H. G. Bennett, president of Oklahoma A. & M. College; Dr. R. G. Lee of Memphis, Tenn., president of the convention, and Dr. Samuel E. Maddox of Richmond, Va., secretary of the Foreign Mission Board.

Billy Graham, leading evangelist of today, and Frank Steedman, humorist, were speakers at the brotherhood meeting.

Mrs. W. F. McCauley returned home Saturday from a trip to Dallas and Oklahoma City, where she visited her sons.

Mr. and Mrs. John Williams of Rule visited his parents, Mr. and Mrs. Ben Williams, last Sunday.

Gypsy Lee Decker, who is attending school in Abilene, spent the week end with her parents, Mr. and Mrs. J. C. Decker.

Mr. and Mrs. Hoyt Davis and sons of Olney visited her parents, Mr. and Mrs. W. J. Tidwell, and other relatives here Sunday.

Leon Smith of Mt. Pleasant is visiting his brother, Douglas Smith, and family this week.

Mr. and Mrs. George Weber went to Wichita Falls last Tuesday, where Mr. Weber was treated for an infected ear.

Josephine Williams of Wichita Falls spent the week end with homefolks.

Mr. and Mrs. Ross Madole of Littlefield visited his mother here Sunday. They were enroute home from Austin.

Mr. and Mrs. R. L. Lambeth and grandsons, Billy Lee, Cortes Ray and Douglas, spent the week end in Anton. They attended the Anton-Hale Center football game Friday night.

Mr. and Mrs. Cherokee Hammons left Thursday for their home in Calhoun, Ga., after visiting his parents, Mr. and Mrs. J. M. Hammons, and other relatives.

Mrs. J. W. (Aunt Bill) Robinson of Arizona is visiting her son, Ernest Robinson, and family.

Reuben Bates was among

those who attended the football game at Austin last Saturday.

Mr. and Mrs. Clyde Warren were Joynton visitors last Saturday. Their daughter, Clydeen, has recently been transferred there.

Joe Bailey Lawson of Dallas spent Tuesday and Wednesday with his mother, Mrs. J. T. Lawson.

Mr. and Mrs. W. L. Stewart and Mr. and Mrs. Ira Stalcup were recent visitors in the home of Mr. and Mrs. Ernest Allen in Albany. They were met there by Mrs. B. A. Johnson of Refugio and Mrs. George Strauss of San Antonio.

Jay Harlan of Littlefield was here last week, visiting relatives and looking after business interests.

Mr. and Mrs. Leroy Brooks and daughters, Jerry and Nancy, recently returned from a trip to Rankin, where they visited Mrs. Brooks' brother, Roy Matthews, and family.

Mr. and Mrs. Gerald Tucker are suending a few days with his parents, Mr. and Mrs. T. M. Tucker, before Gerald re-enters the service.

Covering the bread board with a canvas cover and putting a ribbed stockinet over the rolling pin makes rolling out biscuits, pastry, and rolled cookies easy. These doughs will not pick up as much extra flour from the canvas as from a bare board or rolling pin. Rub just a little flour into both canvas and rolling pin cover to keep pastry or biscuit dough from sticking.

Cotton fabrics now are being manufactured without spinning and weaving. A carded web of cotton fibers is held together with light applications of invisible plastic, and the resulting product looks and feels like soft flannel. The unspun fabrics have dozens of uses, in such products as napkins, dust cloths, and permanent wave wraps.

The first cottonseed oil known to have been made in America was exhibited for the American Philosophical Society in 1768. At the time, it was regarded as a curiosity. Today it is a major ingredient in such foods as shortening, margarine, salads and cooking oils.

Although the farmhouse is the business center of the farm, its location should be considered from the standpoint of its relationship to the other buildings, roads, water supplies and the prevailing winds.

## Texas Venture

In Education • 1876-1951  
Our first state college—Texas A. and M. is now in its seventy-fifth year

EDGAR S. McFADDEN—Burbank of the Wheatfields

On a farm not far from the campus of the A. and M. College of Texas is a quiet little man whose genius has done much to feed a hungry world. He is Edgar S. McFadden, plant breeder for the U. S. Department of Agriculture and the Texas Agricultural Experiment Station, who has been working at A. and M. since 1935. Known as the "Burbank of the Wheatfields," Mr. McFadden developed the world's first rust-resistant wheat, parent stock for grains which now grow on millions of acres around the world where wheat once could not exist. Since 1935 his work has spread the Texas wheat belt to three times its former size. He has received the *Readers Digest* annual award for service to humanity, is one of the five Texans to be named as Fellows of the American Society of Agronomy and has received citations of merit from scientific societies throughout the world. The farmers of his native South Dakota have erected an imposing marble monument to him in his old home town of Webster. The work of this one man is said to be worth hundreds of millions of dollars a year to the farmers of America.

## England, France To Be Visited By 1951 Cotton Maid Next March

The 1951 Maid of Cotton will make a trans-Atlantic flight on March 8 for a two-week stay in England and France, the National Cotton Council has announced.

First on the European itinerary of the cotton industry's good will and fashion ambassador is London. There she will greet state and civic leaders in behalf of the American cotton industry.

She will be presented with a group of cotton created for her by top English designers. She will appear on radio programs, hold interviews with the British press and be spotlighted throughout her stay as the good will emissary of the 15 million members of the American cotton industry. In addition to her official duties, she will take time out for sightseeing trips to Buckingham Palace, the Tower of London, Westminster Abbey and other points of interest.

### Manchester Visit

A visit to Manchester, British textile center, is also on the Maid's schedule in England. She will meet British textile leaders and tour the famous cotton mills during her stay there.

After her visit in England, the Maid will go to Paris for five exciting days. She will meet a group of world-famous couturiers, who will design fashionable cotton costumes especially for her.

In past year, Pierre Balmain, Jacques Heim, Madame Schiaparelli, and Jacques Griffe have created cottons for the Maid. In Paris, also, the Maid will deliver the U. S. cotton industry's greetings to the French minister of agriculture. She will make sight-seeing trips to Versailles, the Eiffel Tower, the Louvre, and other colorful Parisian landmarks.

### Latin American Countries

In addition to England and France, the Maid of Cotton's six-month, 64,000 mile journey will carry her to more than 30 major U. S. cities and, next year for the first time, to six Latin American countries. Next June, she will board a Braniff International Airways "El Conquistador" at Houston, Texas, bound for Havana, Cuba. During the

following three weeks, she will visit Balboa, Canal Zone; Lima, Peru; Rio Janeiro, Brazil; Buenos Aires, Argentina; and Montevideo, Uruguay.

The Maid of Cotton Contest is open to any girl born in a cotton-producing state, between the ages of 19 and 25, who has never been married, and is at least 5 feet 5 inches tall. Entry blanks may be obtained from the National Cotton Council, Box 18, Memphis, Tenn. Completed applications must be mailed postmarked no later than midnight, Dec. 1.

Drive carefully—the life you save may be your own!

### Let's Talk LIVESTOCK

(By Ted Gouddy)

FORT WORTH, Nov. 6—While the turn for the worse in the war news resulted in a sharp stock market break Monday,

it further pointed up the importance of expanding livestock production and gave recent statements that livestock prices would be favorable in the coming year an even firmer foundation.

Livestock and meat are near the top in critical priorities as war supplies. Strong prices were the rule

### Roxy Theatre, Sunday and Monday

Marie Windsor bestows a loving reward on William Elliott in this scene from "The Showdown."

ket centers Monday in spite of the fact that some 10,000 fewer hogs were offered at the nation's 12 major markets. Plentiful pork supplies were reported in meat trade channels. Top at Fort Worth was \$19 and \$19.25, with hogs again not far behind the top hogs and selling from \$18.50 downward.

On a trip last weekend to the Panhandle section around Amarillo, we found the country needing rain. Wheat pastures are very uneven, some sections not yet up or barely so, while other sections are up to grazing stands but failure to get rain to pack the soil and bring the wheat along may make about two-thirds of the cattle have to be moved. Grazing animals are pulling lots of wheat out by the roots due to the loose soil.

On the other hand, there are many fields that have luxuriant growth and where cattle are doing exceptionally well and can be expected to continue to do so. Lots of bundle feed is being made and the maize crop is tremendous. Lots of cotton in the fields needs picking RIGHT NOW!

The hog market worked lower at Fort Worth and at other mar-

ket centers Monday in spite of the fact that some 10,000 fewer hogs were offered at the nation's 12 major markets. Plentiful pork supplies were reported in meat trade channels. Top at Fort Worth was \$19 and \$19.25, with hogs again not far behind the top hogs and selling from \$18.50 downward.

more or less dry and the fire hazard is very real and very dangerous. We'd like to take a moment here to ask all hunters and others who get out in the country to be careful of matches and smoking.

We'd like to urge all farmers and ranchers to delay not a minute longer the plowing of fire guards along your fences exposed to the roads.

Feed will be high and everyone expects feed prices to be higher as the winter progresses.

Save that pasture and wood land and your grass and trees will be money in the bank to you!

#### CHRISTMAS BUYING TIME APPROACHES

'Tis the month before Christmas—and once again time to remember the old adage, "Do your Christmas shopping early."

Doubtless, few will heed these sage words of advice, and Christmas Eve will find the usual crowds scurrying from store to store in last minute shopping expeditions.

Shopping for men is usually a major problem because it is so easy to fall into the old tie rou-

### LOCALS

Gailand Allred, who received a broken collar bone, while playing at school on Wednesday of last week, was taken to a Wichita Falls hospital for treatment. He is back in school this week and is getting along nicely.

Mr. and Mrs. G. B. Hammett spent Sunday in Abilene, visiting their daughter, Marguerite, who is a student in Hardin-Simmons University.

Reuben Bates of Goree and Bruce Barnett attended the SMU-Texas football game in Austin last Saturday.

Mr. and Mrs. F. O. Gurley were business visitors in Wichita Falls last Thursday.

time. This year, however, things are going to be different, the fashion authorities report. Cotton pajamas are destined to take over as the number one gift for men. New designs, smart colors, and trim tailoring in flannel, poplin, and broadcloth make the new pajamas welcome packages in masculine Christmas stockings.

#### Shoerack on Closet Door

WOMEN appreciate having an established place for the manfiks to place their shoes. A shoerack that fits inside the closet door or on a closet wall will keep shoes neat and accessible. One or two for each closet are easily constructed of ordinary materials and with simple hand tools.

The rack is built in the form of an inverted triangular trough. To fit most closet doors, the home craftsman should

use two pieces of Masonite tempered hardboard 26 inches long and 12 inches wide. He will form the end pieces of the trough with 1-inch lumber cut into triangles having two 12-inch sides and the other approximately 14 inches.

One panel of hardboard lies adjacent to the door, while the other forms a slanting platform which holds the shoes. The builder will fasten a strip of 1 by 1-inch wood about 3 1/2 inches from the door side of the platform. Against this strip the heels will rest. The rack is assembled and then attached to the door frame—or the studs if its location is the wall—with screws.

# The Choice of Champions—DODGE "Job-Rated" TRUCKS

49 out of 86 champion truck drivers choose Dodge!

Champion drivers know champion trucks! The nation's state champions . . . with proved reputations for safety records and driving skill . . . competed recently in New York at the National Truck Rodeo. Given the privilege of driving any make truck, these champions selected Dodge for national competition by more than 2 to 1 over all other makes combined!

In the events in which Dodge trucks participated, 6 out of 9 national winners drove Dodge "Job-Rated" trucks.

The champions selected Dodge for these tough tests because of "its extra visibility, its great maneuverability, good braking, and ease of handling." So, take a tip from the men who know: drive a Dodge "Job-Rated" Truck!

FIRST TROPHY in the Straight Truck Class was won by Richard Wold, Glendinning Motorways, Inc., St. Paul, Wold, Minnesota State Champion, drove a Dodge GA-152 1 1/2-ton "Job-Rated" Truck.

FIRST TROPHY in the Tractor, Tandem-Axle Semi-Trailer Class was won by O. E. Chapman, Pacific Intermountain Express, Oakland, Calif. Chapman, Colorado State Champion, drove a Dodge YA-142 4-ton "Job-Rated" Truck.

SECOND TROPHY in the Tractor, Tandem-Axle Semi-Trailer Class was won by Robert Rudesell, Glendinning Motorways, Inc., St. Paul, Rudesell, Minnesota State Champion, drove a Dodge YA-142 4-ton "Job-Rated" Truck.

THIRD TROPHY in the Tractor, Tandem-Axle Semi-Trailer Class was won by Harry W. Pollock, Johnson Motor Lines, Inc., Baltimore, Pollock, the Maryland State Champion, drove a Dodge YA-142 4-ton "Job-Rated" Truck.

THIRD TROPHY in the Straight Truck Class was won by R. D. Wallace, Johnson Motor Lines, Inc., Charlotte, Wallace, who is North Carolina State Champion, drove a Dodge GA-152 1 1/2-ton "Job-Rated" Truck.

THIRD TROPHY in the Tractor, Single-Axle Semi-Trailer Class was won by Frank Kirkpatrick, Columbia River Truck Co., Portland, Kirkpatrick, the Oregon State Champion, drove a Dodge JA-128 2 1/2-ton "Job-Rated" Truck.

For championship performance—drive

# FARM NEWS

From the County PMA Committee

## FARMER-COMMITTEES SHARE DEFENSE WORK

The full facilities of all branches of the PMA and all other Bureaus of the Department will be utilized to achieve farm preparedness objectives, said Secretary of Agriculture Charles F. Brannan recently.

Speaking of the two offices—Materials and Facilities, and Requirements and Allocations—set up under PMA to handle defense operations, the Secretary explained that these will act as clearing houses or coordinating agencies rather than to replace any existing action agencies or programs.

"Full use will be made," he said, "of our farmer-committee system for translating decisions at the administrative level into action in the field and on the farm—and for bringing to the government facts from the country that are essential in making national plans . . ."

"I believe it both fortunate and wise that we can take advantage of the already existing framework of the PMA for these essential new purposes, due to PMA's direct link with the farmer through its democratically-elected farmer committee system . . ."

"I am confident that with such support and guidance, agriculture can fully meet its immediate responsibility—making mighty sure we have enough food for all needs."

## CONSUMERS' STAKE IN ACP

Plenty of food! No need to hoard! Eleven percent more food per

person in 1950 than the average for 1935-39. Farm production up 40 percent from what it was before World War II.

Per acre yields up nearly 50 percent over per acre yields in the 20's.

Grocery shelves full. More people eating more and better. That's what the Agricultural Conservation Program means to the American Housewife, says B. P. Haman, Secretary of the Knox County PMA.

As the Secretary sees it, to the Housewife it's not the number of erosion control dams we've constructed, the acres of green manure plowed under, the contour farming, the lime or the phosphate that counts. Only when these are translated into bread, meat, eggs, milk, vegetables and fruits at the grocery store does it become real.

But the farmer knows and the housewife is beginning to realize that groceries cannot be produced in abundance by a bankrupt agriculture. And it is because of this understanding that we have the ACP.

Through this program the Nation cooperated with its farmers in carrying out conservation practices which project and build the productivity of the land. This share-the-cost program provides the incentive to get the terraces built, the dams constructed, the lime spread, the pastures seeded, the green manure plowed under.

These are the practices which make effective the work of scientists—improved strains, better machinery, and more effective insecticides and fungi-

## Abundance of the Rose

Cecile Aubry, petite French star of the forthcoming motion picture production, "The Black Rose," smiles wide Gallic approval of the table setting featuring flatware in Damask Rose pattern by Heirloom Sterling.

In a setting to delight the heart of Kubla Khan himself, Miss Stuppel, America's foremost table stylist, illustrates how the woman with imagination and a touch of artistry can create a table that captures the personality of a guest or highlights a special event.

The rose motif of the hand-painted china used for the table provides an inspired accompaniment to the Damask Rose pattern of the flatware in Heirloom Sterling.

## Insecticides May Be Scarce For Next Year

The outlook for increased supplies of the more widely used insecticides is not very favorable at this time. Cotton farmers should keep this fact in mind when they make plans for expanding their 1951 cotton plantings. But according to A. C. Gunter, associate extension entomologist of Texas A. & M. College, farmers can help the situation by purchasing now and storing the

insecticides on the farm. He urges farmers to purchase their minimum insecticide needs at this time or at least within the next few weeks. The insecticide manufacturers have limited storage space and when this space is completely filled they must cease operations. Farmers and distributors by taking delivery now can keep the insecticides moving and at the same time, help the storage and transportation situation.

Gunter says that insecticides will cost no more now than they will cost no more than they will cost in the future. He says dusts and sprays can be stored safely on the farm. The dusts must be stored in a dry building and the spray containers should be stored where they will not be damaged from breakage. Both types of material can be stored safely for at least 12 months.

He says sprays will not freeze because of the emulsion they contain and that no cases have been reported that show that dusts or sprays have broken down when kept in storage for as long as a year. Most of the metal containers, he adds, have a special lining and unless this lining is broken, no trouble from leaky containers should occur.

He says the recommendations covering the use of insecticides for cotton insect control have not yet been made for 1951 but he has been assured that the standard formulas will not be changed.

It must be remembered that the basic chemicals used in the insecticide manufacturing process are also needed in connection with our national defense program and any change or changes in the present situation could quickly affect the supply of insecticides. Gunter points

## LOCALS

Mrs. Ernest Spotanski and son of St. Louis, Ill., is visiting in the home of her parents, Mr. and Mrs. C. N. Smith, and other relatives here this week.

Mr. and Mrs. Lewis Warren of Abilene and Mrs. J. W. Medley of Haskell were visitors in the home of Mr. and Mrs. A. B. Warren over the week end.

Mr. and Mrs. Bill Ehlers visited in the home of his sister, Mr. and Mrs. H. E. Williams and family, in Stamford over the week end.

Mr. and Mrs. Joe Norton and son, Gary Wayne, of Wichita Falls visited with relatives and friends here last Friday.

Mr. and Mrs. E. E. King and son, John, visited Mr. King's father, W. L. King, in Archer City over the week end.

Mr. and Mrs. Clifton Mooney and children of Seymour, were visitors here over the week end.

Out that officials in the U. S. D. A. are making every possible effort to see that adequate supplies of the stand insecticides are made available but changing national and international conditions will probably be the determining factor on the 1951 supply.

He says cotton farmers should also get their spraying and dusting equipment repaired during the slack season and if new equipment is needed, now is a good time to buy.

Many problems are sure to arise in connection with the expanded cotton program and if they can be solved ahead of time or at least partially solved, production can be made more efficient and insect damage can be held to a minimum.

Cotton farmers are urged to purchase their minimum insecticide needs at this time or at least within the next few weeks. Farmers and distributors by taking delivery now can keep the insecticides and at the same time, help the storage and transportation situation.

Hauling and spreading barnyard fertilizer daily will prevent the nutrients from leaching out and being lost before it is hauled to the field or pasture for spreading.

## Knox Prairie Philosopher Says 12 Months Of School Won't Work; The Teachers' Minds Would Crack

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek is getting out of his territory this week, but it's his funeral, not ours.

Dear editor:

While I know about as much about education as you do about farmin or the experts know about what Russia has in mind or the Russians know about what Stalin has in mind, I was reading the other day in a newspaper I had saved to cut up and use for inner soles for my shoes where they're wearin through but decided to put knowledge ahead of comfore, cardboard works beter anyway, where there is some talk in some places of runnin the schools twelve months instead of a year of nine.

As I understand it, the nine-month school started in New England a couple of hundred

years ago, when school children was needed in the summer months to get in the hay, and the idea stayed with us, but some of these advanced educational experts are arguin the system is out of date, very few children bring in much hay now, no use lettin the school buildins stay idle a fourth of the time, keep the children in school the year-round.

As I say, I ain't no educational expert, which shouldn't be no secret by now, but I'm here to tell you it won't work. There ain't a school teacher alive who can put up with most children twelve months of the year. Break em down faster than a round-the-clock bomb attack.

After nine months of contendin with children, the average teacher is lucky if she can stagger off and recuperate in the three remaining months in time to start again. As for the average parents, they're able to put up with their children only three months out of the year, not to mention nine, and if they can afford it half of the three months they send them off to camp or to visit relatives. Parents and children are fine, but in lots of cases they sure do get in each other's way.

But this is out of my line. Maybe I'd better stick to Johnson grass. You can let it run wild, too, same as children, but you don't get talked about near as much. Some times though, both crops turn out to make pretty good hay.

Yours faithfully,  
J. A.

Buy and store insecticides now for use on the 1951 cotton crop. They'll cost no more and possibly less than next spring and summer when you need them.

## Weekly Health LETTER

Issued by Dr. Geo. W. Cox  
M. D., State Health Officer  
of Texas

AUSTIN—"The wide advertising of antihistamines for the prevention of colds should not persuade people to place too much confidence in these drugs as a treatment for colds," Dr. Geo. W. Cox, State Health Officer, warns the citizens of Texas. "Those who decide to take any of the antihistamine pills should realize it is highly important for them to follow the directions.

"Regardless of the effectiveness of these new products it remains most desirable to take the ordinary precautions against contracting a cold—a adequate sleep, clothing adapted to the weather, well balanced diet, moderate outdoor exercise and avoidance of unnecessary contacts with those already suffering with colds. Extra rest and the drinking of large amounts of fruit juice are still important aids to physical well being and cure if cold occurs.

"Unfavorable reactions such as dizziness, drowsiness, and temporary loss of muscle control sometimes occur after taking this drug. Everyone is strongly advised against driving

an automobile or working around machinery while taking the pills.

"Some readers of advertisements may get the idea that taking small doses of antihistamines every day will prevent colds. Such use of drugs should be discouraged. Antihistamines are still new and largely unproved drugs. Physicians have not yet determined what effect these products may have upon the human system if taken over a long period of time.

## Navy To Select 1,600 For College Training Corps

Annual competitive tests to select 1,600 applicants for the naval reserve officers' training corps college program will be held Dec. 9, Eighth Naval District headquarters has announced.

Application blanks are available at NAVY recruiting offices and at NROTC units at Rice Institute, the University of Oklahoma, Tulane University and the University of New Mexico. Male high school seniors and graduates between 17 and 21 may apply. Successful candidates

will get a four-year college education with tuition, books, normal fees and \$50 a month pay at one of the 52 major colleges and universities with NROTC units.

To qualify, applicants must meet physical and mental standards and pass an aptitude test. State boards will select outstanding candidates to meet quotas assigned to each state and territory, the Navy said.

They will enroll in the fall, 1951, term and will be deferred from draft until completion of their academic studies.

NROTC students participate in drills and summer cruises and must agree to serve two years on active duty after graduation and commissioning as ensigns in the naval reserve. At the end of the two-year period

they may apply for retention as commissioned officers in the regular Navy.

## Are Our Texas Highways Being Destroyed by 1% of Highway Users?

This question is presented squarely for the first time by the Texas Tax Journal in its booklet, "The Case of the One Per Centers."

Every Texan who wants good highways, adequate for 99 of every 100 users, should write for a free copy of this revealing booklet.

Approximately 99% of all Texas motor vehicles are registered for a gross weight of 20,000 pounds or less.\*\*

All Texas taxpayers, including your Texas Railroads, have reason to be concerned about the high cost of constructing and repairing our highways and the prospect of building more costly roads made necessary by the operation of highway "box cars."

No one has any desire to bar vehicles of reasonable size from our highways, so long

as each pays its fair share of construction and repair costs.

Other Texas taxpayers should not be required to shoulder the burden of a roadway system for highway "box cars", representing only 1% of highway users.

Every Texan interested in good highways without increasing the growing tax burden should fill out the coupon below and get a copy of this valuable booklet.
