### GRASS ROOTS OPINION

**LAWNDALE, CALIF., TRIBUNE:** "Washington experts tell us that the only way to get the necessary military production is to cut production of civilian goods to the bare necessities. Before such a drastic step is taken, it might be well to review the situation and see what other things can be done. The first thing we can do is to end the appalling waste of manpower in the swollen bureaus of our government."

**SOMERSET, PA., DAILY AMERICAN:** "The President tells us that there is a great need for the expansion of electric power. That has been the story for fifty years. The expansion of electric power plants by private industry has been slowed down by governmental hobbles. Removal of the hobbles would probably result in provision of abundant power."

**OSKALOOSA, IOWA, DAILY HERALD:** "The lame duck congress passed a civilian bill and voted 3.1 billion dollars to protect American civilians against the atomic bomb. What an army of hangers-on will live on that fund!"

**SCHAGHTICOKE, N. Y., SUN:** "Taxes on business are an operating cost which must be reflected in the price of things the business sells. Unnecessarily high taxes mean unnecessarily high prices to all who buy."

**PALM BEACH, FLA., POST-TIMES:** "Federal government, through taxation, socialist forays, and political plundering, is rapidly becoming the principal bugaboo in the American closet."

**BEACH HAVEN, N. J., TIMES:** "Faced with higher and higher taxes, more and more citizens are demanding every possible curtailment of non-war expenditures and the highest possible value for every dollar spent by the government."

**REYNOLDSVILLE, PA., STAR:** "Those who are raising the cry today that the Federal government is rapidly entering every phase of this country's economy, can only ask themselves one question, 'How many times did I invite it to do this very thing?' The less we cry piteously in both our state and local affairs, the more this trend of benevolent control from the Capitol will diminish. It is time to choose our masters."

**TAYLORVILLE, ILL., DAILY-BREEZE COURIER:** "Tyranny, like hell, is not easily conquered." These stirring words were uttered during our Revolution by that undaunted fighter for liberty, Thomas Paine. They are worth remembering in dark days. Despite many discouragements tyranny was finally conquered then, and so it will be again."

"A government, like an individual, often over-extends and then discovers bankruptcy; there is no RFC to bail out the bankrupt government on the plea that it will not work. If the people object to more and higher taxes, they must oppose the welfare state. If they like the welfare state, they must agree to more and higher taxes every year until they work largely to pay taxes. It is as easy as that."—George E. Sokolsky.

### EDISON'S BIRTHDAY

On February 11th, the birthday of Thomas Alva Edison was observed once again. Few men have contributed so much to the happiness and welfare of the peoples of the earth.

A list of Edison's inventions would fill many pages. Many of them were of the highest importance. But one stands out above all the others—and that one is the electric light.

When Edison produced his first crude lamp, a revolution had begun, though most people thought it useless and dangerous, and the majority in those days regarded it as being little more than an amusing sort of toy. Yet, from that lamp came a force which changed the face of nations, and which revolutionized industry, agriculture and the life of the home.

The electric age brought living and working standards which had never been dreamed of before. It has directly and powerfully influenced every phase of civilized life. It has reached its fullest flower in this country. And we should never forget one fact of the utmost importance—it was the work of free men and of free enterprise. The great industry whose beginning was Edison's lamp was pioneered and developed by free individuals. In spite of the scoffers, men risked their time and energies and savings—and the splendid power industry of today is their monument.

We hear much of socialized power projects these days—developments which are run by politicians and bureaucrats and paid for with everybody's tax money. But free enterprise made possible electricity for all the people—and free enterprise made possible electricity for all the people—and free enterprise is still meeting the greatest part of our needs.

### THINGS ONE REMEMBERS

By R. M. Hofer

Did you ever crack your head, bark your shin or stub your toe in a barn or woodshed where a projecting obstruction blended into the general drab color scheme?

It has remained for the Country Gentleman to run an illuminating article, full of illustrations, showing how two cans of paint can prevent bruises and broken bones.

Black and yellow diagonal stripes pointed on obstructions, stair risers in a barn, motors, power saws, fans, and at dangerous points on machinery, can give constant warning against common hazards that cause injury and death to thousands each year.

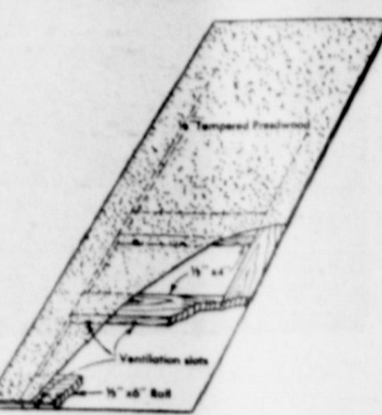

Diagonal stripes have been used on railroads and highways for many years as warning signals but apparently no one thought of applying the same accident prevention practice to farms until Country Gentleman dramatically pointed out its advantages with colored illustrations. The idea is so simple and inexpensive anyone can put it into practice.

### Cabinet Door Easily Built

KNOWING how to construct doors for the home-built storage or kitchen cabinet is a "must" for the amateur craftsman. By following the simple plan shown here, he can produce cabinet doors of the type made by leading manufacturers.

Standard cabinet door widths are 16, 20 and 24 inches. Lengths are 18, 24, 30, 36, 42, 48, 54, 60, 66 and 72 inches. To

start this project, the craftsman determines the inside dimensions of the cabinet and adds 3/16 of an inch all around to allow for the door overhang.

He will build the frame of 1/2" by 4" and 1/2" by 6" wood, which should be rabbeted as shown. Next he will cut cross-braces and saw ventilation slots 3/16" square in them and the top and bottom rails (see drawing). He then assembles the parts with waterproof glue and allows them to set.

He then saws the Masonite 1/4" Tempered Presswood panels to size and glues them into place. He will drive a brass nail into each corner of the Presswood to keep the panels from shifting when glued. The panels should be clamped or weighted down until the glue sets.

The craftsman will round the edges with a file or sandpaper and smooth all surfaces with sandpaper. He will finish the surfaces with a prime coat and enamel, or he may use varnish instead. To complete the job, he will mount the doors on the cabinet and fit them with spring catches and wood or metal knobs.

**Boyce House**  
Gives You Texas

There is adventure to writing a history.

Before your columnist sat down and began putting the book, "City of Flaming Adventure" on paper, I had read more than 100 books and numerous magazine articles and had blown the dust off unpublished memoirs of old-time San Antonio citizens.

books were filled with notes—thousands of words, hundreds of items. Then came the task of selecting what to use and what to omit, of deciding which was correct when there was a conflict as to facts, then of fitting the events and individuals into sequence and of trying to tell the story of San Antonio clearly and interestingly—and of course, accurately.

During the research, weeks were spent in San Antonio. As soon as the Public Library doors opened, I entered and, except for a quick lunch, remained until closing time.

When I emerged into the streets with neon signs and rumbling trucks, things seemed unreal for I was still living in the time I had just been studying about—perhaps 125 years before, when the Spaniards were executing rebels and displaying their heads on poles, as a warning, at the river crossing.

From studying so much about them, Travis, Bonham and the other heroes of the Alamo seemed very real and not just names and shadows. And I almost felt I was present in 1835 when a big Texan stepped out of the ranks of the force which was besieging Cos' army and shouted, "Who will go with old Ben Milam into San Antonio?"

## Gilliland Club Meets Recently In Club Rooms

The Gilliland home demonstration club met on February 7 in the club room with 16 members present. Mrs. Arnold Navratil, president, was in charge and Mrs. O. R. Miller, secretary, made the roll call and read minutes.

Several business items were discussed, and the club gave \$5 to the March of Dimes fund. The club also voted to buy Mrs. G. C. Cottingham a pot plant. She is a patient in the Baylor hospital and a former club member.

Refreshments were served by the hostess, Mrs. Elton Scott.

Mr. and Mrs. Marvin Warren and son, Jerry, of Plainview, spent the week end with Mr. Warren's parents, Mr. and Mrs. S. J. Warren.

Mr. and Mrs. Delbert Montgomery and Mrs. D. D. Clough were business visitors in Lubbock over the week end.

## Surprise Party Given Ben Tuggle On 60th Birthday

A group of old friends and neighbors, gathered at the home of Mr. and Mrs. Ben Tuggle on Tuesday evening, February 6, to surprise him with a birthday party on his 60th birthday.

The evening was spent in visiting and talking over old times and lots of good music was furnished by Mr. Jacobs, Charlie Sargent and son, Bobby, Otto Brazell and Tuck Whitworth.

Many gifts were received, after which coffee and cake were served to the following: Mr. and Mrs. Ivy Cypert, Mr. and Mrs. N. E. Hosea, Mr. and Mrs. Lloyd Jacob, and daughter, Mr. and Mrs. Charlie Sargent and Bobby, Mr. and Mrs. Alec Branch, Mr. and Mrs. Otto Brazell and daughters, Mrs. Mark Melton, Mr. Tuck Whitworth, Mr. Donohue, Mr. and Mrs. Coy Tuggle, and Billie Jean, Mrs. Evelyn Elliott and Jerrell Lee, Mrs. Jimmie Bell, Mr. Howeth and Bobby, Lorean Armstrong, Jerry Tuggle and the honoree and hostess, Mr. and Mrs. Ben Tuggle.

R. H. Smith of Cooper, and Mrs. Delia Hendrix of Sherman visited in the home of Mr. and Mrs. A. L. Smith over the week end.

F. A. Robinette of Seymour was a business visitor here Monday of this week.

## Tanks Move to the Rescue of Trapped G.I.'s

THE ROAD TO SAFETY for G.I.'s of the Second Division is blocked during the Korean withdrawal. Moving to the rescue are tanks and Tommies of the British Middlesex Regiment (pictured above). With air and artillery support, the Tommies broke the block and the G.I.'s streamed through, but their casualties were not slight. To their losses the Tommies had to add casualties of the previous day when they had unsuccessfully attempted to break the block without the aid of tanks, artillery and airplanes.

## Mrs. J. O. Bowden Honored Thursday At Birthday Party

The lovely home of Mrs. Sidney Winchester was opened for members of the A. D. Sunday school class of the First Baptist Church last Thursday evening for a party honoring the teacher, Mrs. J. O. Bowden, on her birthday.

The Valentine motif was carried out in the decorations and refreshments. The table was adorned with a linen cutwork cloth, red and white carnations formed a heart bouquet on the buffet. Two heart cakes locked together, red and white mints and punch were served to the following guests:

Mmes. Tom Price, Dennie Melton, Cecil Honeycutt, J. C. Gollehon, B. O. Norvill, E. L. Morgan, Veda Tankersley, Huron A. Polnac, Rose Jones, B. E. Smith, W. E. Reynolds, Alta Bowden, Lennie West, D. D. Cough, Lucille Stodghill, Robert Myers, S. B. Campsey, A. L. Smith, O. R. Mitchell, Marvin Reeves, E. L. Goolsby, H. E. Sharp, Mr. and Mrs. Leland Hannah, Mr. and Mrs. J. E. Reeves, Mr. and Mrs. J. O. Bowden; Messrs. A. J. Beaty, W. C. Cox, Sidney Winchester, and B. L. Blacklock.

Games of eighty-four were enjoyed during the evening.

A Times Want Ad Pays

## Mrs. Joe B. King Is Hostess For Guild Meeting

Mrs. Joe Bailey King was hostess to members of the Wesleyan Service Guild on Monday evening. The group sang "Sweet Hour of Prayer", which was followed by prayer by Mrs. Joe Massey.

Mrs. O. H. Spann led the group in a very interesting Bible study of the book of James, and Mrs. Bill Gaither read a story on prayer. The group was dismissed by prayer.

Frosted drinks and cookies were served to the following:

Mmes. O. H. Spann, Robert Green, I. V. Cook, Joe Massey, A. H. Mitchell, Lee Haymes, Erin McGraw, Levi Bowden, C. H. Baker, Weldon Smith, Bob Hicks, J. C. Harpham, Bill Gaither, J. B. Scott, L. L. Womble; Misses Merle Dings and Ruth Baker; one guest, Mrs. D. H. Looney, and the hostesses, Mrs. King and Miss Florence Gaines.

Dr. J. M. Croley as a business visitor in Abilene, Monday night of this week.

## Delbert Beauchamp, Miss Helen Denman Wed In Fort Worth

The marriage of Miss Helen Denman and Delbert K. Beauchamp, both of Fort Worth, took place at 7:30 p. m. Saturday at the First Presbyterian Church in Fort Worth. Elder Gilbert Dalton gave the prayer and Elder Len Dalton of Hamilton read the ceremony.

Brad Corrigan of Hamilton sang, accompanied by Mrs. Q. Zella Oliver, organist.

The bride is the daughter of Mr. and Mrs. Roy T. Denman of Fort Worth, and the bridegroom is the son of Mr. and Mrs. Wylie B. Johnson of Munday.

Mrs. Walter Fay Averitt was matron of honor. Mmes. Burton E. Ellis, Robert F. Henderson, and Harry F. Heflin, sisters of the bride, and Mmes. Gene Chandler of Munday and Braxton Chandler of El Cajon, Cal., sisters of the bridegroom, were bridesmaids. Miss Evelyn Dalton of Hamilton was bridesmaid.

Judy Henderson, niece of the bride, and Betty Sue Chandler, the bridegroom's niece, were flower girls. Bill Averitt car-

ried the rings.

Best man was Ray Roots. Ushers were Burton E. Ellis, Robert F. Henderson, Harry F. Heflin, Joe Dalton of Hamilton, Gene Chandler, and Braxton Chandler.

Given in marriage by her father, the bride was gowned in traditional white duchess satin. The illusion yoke was outlined with seed pearls and the long sleeves tapered to points over her hands. The skirt extended into a full-length train. Her illusion veil fell from an illusion tiara edged with seed pearls. She carried white orchids and stephanotis on a gold Bible.

At the reception at the Denman home with the silver-appointed table was laid with an ecru lace cloth, centered with the wedding cake. The house-

party included Mmes. Pearl Hall, Frank Railsback, H. D. Ingram of Temple, Ima Padgett of Valley Mills and Misses Betty Kilgore, Betty Barnett and Jean Pigg.

The couple will live at 5056 Penrose, Fort Worth, after a trip to South Texas.

Mrs. Cecil Cheek and Donovan and Mr. and Mrs. T. A. Walker of Fort Worth spent the week end in the home of their mother, Mrs. G. P. Burns.

Mr. and Mrs. H. M. Montgomery of Morton visited friends and relatives here over the week end.

Bobby Broach was a business visitor in Wichita Falls Monday of this week.

## Yes, There's Something You Can Do!

Food prices are headed higher and higher—but there's something you can do about it. Do like millions of other Americans and rent a frozen food locker in the Munday Locker Plant.

Why? Because you can save 27 cents of every meat dollar you spend—more if you raise your own beef, hogs or poultry. When we sell you meat for your locker, you can be assured it will be the best. We do not sell inferior meats, just ask any of our many customers.

Don't worry about curing pork at home when we have 70 degrees one day and 30 degrees the next, just bring it to the Munday Locker Plant where we have a constant 38-degree temperature.

In peacetime or during war, it is thrifty and patriotic to eliminate waste; especially in the matter of saving food.

A frozen food locker in the Munday Locker Plant is the cheapest and best refrigeration in the world.

## Munday Locker Plant

### Washington News Letter

By Congressman Ed Gossett

Washington, D. C., Feb. 9, 1951—The first legislative fight of this session of congress occurred in the House this week. It was over the extension of the Reciprocal Trade Agreements program. The Reciprocal Trade Agreements Act is the handwork of former Secretary of State, Cordell Hull. It was originally enacted into law in 1934. The program has been extended from time to time since that date, usually for 1 and 2 year periods. This week the House passed a bill extending this program for an additional 3 years. The Reciprocal Trade Agreements Act authorizes the Presi-

dent, largely through the Secretary of State, to negotiate trade agreements with foreign countries, raising or lowering tariffs and duties almost as he sees fit. Our big argument in the House was over 2 amendments to this Act. One is known as the peril-point amendment. The other is known as the escape-clause amendment. The peril-point amendment gives persons interested, a right to be heard before the Federal Tariff Commission on what they think duties should be prior to the negotiation of a trade treaty. The escape-clause amendment gives persons the right to be heard after agreements have been working for some time. Neither amendment precludes the Administration's making or carrying out agreements. A part of my speech during debate on peril-point amendment is as follows:

"Mr. Chairman, my good friend who has just spoken said that those who favor this amend-

### DISHWASHERS?—You'll hear of 'em!

If everyone in the South and Southwest hasn't yet heard that dishwashers have "arrived" as a popular home appliance, they won't long be in the dark. Here a pretty model helps launch a giant dishwasher promotion, sponsored by 12 wholesale distributors of Youngstown Kitchens automatic dishwashers in the Southern and Southwestern states. Nearly half a million dollars is being spent, some of it by cooperating grocery store chains, on the promotion. Kitchen dealers are competing for a plane trip to Cleveland for opening of the Big League baseball season, while their salesmen are trying for free vacation trips to Havana or Monterrey, Mexico. In on the ceremony are M. D. Durham, zone sales manager for Youngstown, and William Barnett, Texas sales manager.

ment are enemies of the reciprocal trade-agreements program. Such is not the case at all. I have always supported the reciprocal trade-agreements program. I am for it. I am going to vote for it today, whether or not this amendment is adopted. But I do say that this is a reasonable, a fair, a democratic amendment, and that we ought to adopt it.

I recall when the President last addressed this congress he said we should put the welfare of the country above partisan politics. We all agree to such a principal. The peril-point and the escape-clause amendments being offered to this bill are very much in the public interest. The peril-point amendment after all simply gives to industry and labor in this country a wailing wall, so to speak.

The Congress is being asked here to grant almost plenary power of life and death over American industry and American labor to the Secretary of State. I am not willing to entrust such power to any agency or department of Government. The American people are getting tired of this Congress fretting away its legislative duties and responsibilities. If you Members have been reading your

mail lately, you know that we are being castigated because we do not do our duty and because we turn over to the sprawling executive branches of the Government vast responsibilities and power over the lives and property of the people.

There are two amendments to this bill that are being offered. I want to go on record as being in favor of both of them. One is the peril point amendment and that is before the fact, if you please, to give industry and labor the right to go down to the Tariff Commission and say, "Here is a level below which we are going to be hurt." In the course of American jurisprudence and American justice has anybody ever denied such a right—the right of petition, if you please?

The other is the escape clause amendment which is going to be offered by my friend, the gentleman from West Virginia (Mr. Bailey) and I understand another by the gentleman from Nebraska (Mr. Curtis). This amendment gives the industries and labor organizations of the country the right to go in after the fact, when these agreements have been working for a while, and say, "Conditions have changed. Business has fallen off. The economic situation has changed, and we are entitled to some relief."

Who is there here who has the temerity to stand in the well

### 4,150 Texans To Answer Draft Call For April

AUSTIN—Call for induction of 4,150 draft-age Texans in April received today by Brig. Gen. Paul L. Wakefield, state director of Selective Service.

This compares with a call for 4,145 in March, 4,137 in February, and 4,142 in January. The state director said this brought total number called since start of the Korean conflict to 27,062. At the same time General Wakefield announced pre-induction physical examinations for 8,857 men have been scheduled for March. A total of 73,584 Texans have been ordered for pre-induction physical examination since August, 1950.

Reports from joint examining and induction stations indicate that the January induction call of 4,142 men will be filled, the state director said. He said reports affecting a few local boards are still out.

April quotas for each of the state's 137 local boards are not yet available at State Selective Service headquarters. These will not be figured before late February.

Following are monthly numbers of Texas men called for

of living of any labor in the entire world. We also know that American labor cannot compete with coolie labor in China and with the labor of many other parts of the world. So we simply say here through the peril-point provision that these people, our people who have contributed to the strength and security of this country, have the right to be heard."

Both amendments were adopted

of the House and say that American industry, American labor, and the American people are not entitled to both those rights? Have we come to the point in this country where we are willing to deliver to anybody, good, bad or indifferent, plenary power of life and death over American industry and labor? I still say we should take care of this country first. I do not think we can do it with high tariffs. Neither do I think we can do it by eliminating all protection and all restrictions which have been set up for the protection of the American standard of living. We all know, and we are proud of the fact that American labor has the highest standard

service since inductions were resumed in the fall of 1950: September, 2513; October, 2514; November, 3453; December, 2,008; January, 4,142; February 4,137; March, 4,145; April, 4,150.

Following are monthly numbers of Texas men called for pre-induction physical examination since examinations were resumed in the summer of 1950: August, 10,050; September, 10,050; October, 10,398; November 688; December, 4,741; January 14,847; February, 13,953; March 8,857.

Induction and pre-induction ex-

aminations are held at Abilene, Amarillo, Corpus Christi, Dallas, El Paso, San Antonio, Shreveport, Texarkana, and Houston.

Mr. and Mrs. Nealie Moore of McCamey visited in the home of his mother, Mrs. W. L. Moore, who is in the Knox County Hospital, and with other relatives here over the week end.

Misses Charlotte Hannah Betty and Ruthie Stodghill spent the week end with Miss Joyce West in Seymour.

## Have Your Planting Cottonseed Completely Delinted

(Kemgas Process)

SAVE---Approximately half of your planting seed.

SAVE---Time, fuel, wear and tear by planting 25 percent more per day.

SAVE---On chopping expense.

PROFIT---By faster germination with less moisture.

PROFIT---By being able to plow cotton earlier as Kemgas delinted and treated cottonseed grows off quicker.

PROFIT---By more lint yield per acre.

These are just a few reasons for planting delinted cottonseed. For further information, contact . . .

**MORE  
and  
BETTER  
COTTON**

SORE SHIN or "Damping-Off" of cotton can be controlled

"Sore shin" or "Damping-off" is a touchy subject with many a cotton grower. It is hard to understand why your small seedlings should partly or completely die soon after they have come up. And it seems strange that this should happen in what ought to be your better soils—the heavy soils and those rich in organic content.

Because it happens most often in cool, damp weather, you may blame the bad weather when sore shin attacks your seedlings. Actually this is caused by fungi or bacteria that live in your soil, or in or on your seed. Cold and moisture cause these fungi to thrive at your expense.

A change to warm, sunny weather sometimes stops an

attack of sore shin. It's much better, however, to prevent this disease before you plant your crop. Treatment of cotton seed with an organic mercury disinfectant has been proved to stop most losses from sore shin as well as losses from seed rot. This treatment kills the disease fungi on and in the seeds and protects both seeds and seedlings as they come up.

You can treat your seeds yourself, or have the job done for you. In either case the chemical costs less than 10¢ per acre, which is about one-fiftieth the cost of replanting. The County Agent can tell you more about the value of seed treatment and where you can get treated cotton or your own cotton treated for you.

**Knox Prairie Philosopher Agrees  
With Expert's Warning Against  
Wearing The Soil Out In Emergency**

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek has thawed out after the cold snap, his letter this week reveals. Dear editor:

I was out here yesterday still tryin to thaw out from the cold spell we had, as far as I'm concerned the kind of weather we had durin that spell can just skip me from here on out, most folks spent the time worryin about their livestock but after the temperature goes below 32 I stop worryin about my cows and start worryin about myself. At any rate, after the sun came out and I was convinced it was goin to stay out a while eased out of the house and wandered around and found a copy of a newspaper which had frozen stiff during the blizzard but was now as limp as the day it come off the press and picked out a sunny spot and started catchin up on the news.

After I caught up on the war news, found out which side had Seoul this week and what the United Nations was votin on they've got their votin down pretty good now but ain't had much luck gettin anybody to pay any attention to the results. I got on down to the home front news and read where an agricultural expert has been worryin about farmers doing too good a job this comin year in meetin the nation's production needs. This expert was warnin farmers in their all-out effort to produce not to harm their soil through over-enthusiasm to produce more.

This may be good advice for some farmers, but I wil appreciate you tellin the experts from Austin to Washington that with all the things they got to worry about they can ease their minds when it comes to worryin about me produc'n too much. I stopped wearin out my soil years ago, not so much on account of what it was doin to the soil as what it was doin to me. If there's anything I can do, it's hold the line when it cose to gettin over-enthusiastic about plowin. Me and the experts see eye to eye on that.

And if it don't rain around

**Legal Notice**

**NOTICE TO DEBTORS AND CREDITORS:**

THE STATE OF TEXAS  
COUNTY OF KNOX  
TO THOSE INDEBTED TO OR HOLDING CLAIMS AGAINST THE ESTATE OF MRS. A. E. HENDERSON, DECEASED.

**Farmers Plant  
Bluestem Grass;  
Do Terracing**

The following cooperators of the Wichita-Brazos Soil Conservation District have planted King Ranch bluestem during the last two weeks: Dwight Key, T. C. Walker, Coye Jenkins, and Floyd Patton, all east of Munday; Edward Lewis and E. J. Weaver, northwest of Rule; and the League-Davis Ranch near Benjamin. This land that is being retired to grass is to be used for grazing livestock and is a part of their conservation plan to use their land according to its best capacity.

A farm pond was staked on the farm of C. C. Browning Truscott. This pond is for the purpose of obtaining better distribution of livestock in grazing his pasture land. Terraces were checked on the Roy Lebus ranch east of Benjamin, to determine if they were of sufficient size.

Technicians of the Soil Conservation Service assisted the above cooperators in applying these conservation practices which are but a part of their conservation plan.

Mr. and Mrs. Kelton Tidwell of Lubbock visited Mr. and Mrs. Brooks Campsey and Mr. and Mrs. Buck Tidwell over the week end.

Mr. and Mrs. Worth Gafford visited in Cleburne over the week end.

Miss Bobbye Nell Whitworth, who is attending Hardin-Simmons University in Abilene, visited her parents, Mr. and Mrs. Tuck Whitworth, over the week end.

Word was received here that Don Reynolds, son of Mr. and Mrs. Bud Reynolds, who recently joined the navy, is now stationed in San Diego, California.

here, my neighbors may not produce any more this year than I do, and I'm frank to say there ain't no nation on earth can win a war on that sort of production.

Yours faithfully,  
J. A.

Frank Steels, former resident of Munday, is in the hospital at Phoenix, Ariz., with a serious heart ailment. Mrs. W. E. Sherrod of Munday and Rev. and Mrs. O. A. McBrayer of Wolf-forth left Wednesday of last week for Phoenix to be at his bedside.

Mrs. Charles Baker and sons, of San Antonio, are visiting in the home of her parents, Mr. and Mrs. Oates Golden, and other friends and relatives this week.

# FARM NEWS

From the County PMA Committee

## LARGE GRAIN STOCKS ON HAND

Total stocks of wheat and of the four feed grains were larger this January 1 than a year ago, according to the Department of Agriculture's Crop Reporting Board. Stocks of wheat and corn stored in all positions on that date have exceeded only in 2 other years. Wheat stocks totalley 998 million bushels, compared with 1,000 million bushels in 1942 and 1,152 million in 1943. Corn stocks totaled 2,664 million bushels, compared with 2,806 million in 1950 and 2,641 million in 1949.

Of these totals, 336 million bushels of wheat were stored on farms the first of this year, the smallest in 10 years except in 1950. Wheat stocks in off-farm storage totaled 662 million bushels, more than in any other year except 1943. Nearly 2,161 million bushels of all corn stocks remained on farms January 1, 1951. Off-farm stocks of nearly 504 million bushels are the largest of record, chiefly because of the 316 million bushels owned and stored by Commodity Credit Corporation.

Other grain stocks on hand the first of the year included 19 million bushels of rye, largest since 1945; 969 million bushels of oats, exceeded on January 1 only in 1949 and 1946; 243 million bushels of barley, largest in the 8 years of record; 209 million bushels of grain sorghums, the largest in history and larger than total production of the grain in any year except 1950.

## PLAN POOLING AGREEMENTS NOW

This is a good time to begin drawing up plans for "pooling agreement" projects to be carried out under the 1951 Agricultural Conservation Program, says J. C. McGee, chairman of the Knox County JMA Committee.

McGee advises that under the provisions of ACP, any group of farmers interested in a conservation project covered by the program may form a pooling

agreement and receive assistance under the program in carrying out the project.

However, he explains, such projects must be approved in advance by both the county and state PMA committees before they are eligible for assistance. This means that the details of such projects must be worked out by the farmers concerned and submitted for approval to the county committee.

Farmers who are not familiar with the requirements should see a member of the county PMA committee or someone designated by them to help with this type of work.

Under the pooling agreement available under ACP is the same as though the practice were carried out by an individual farmer on his own farm. The agreement is merely a means whereby a number of farmers may receive assistance for carrying out a project which affects all of their farms.

After the project is completed it must meet the essential specifications and program standards to be eligible for assistance. This emphasizes the need for making sure beforehand what is required.

Careful planning now, the chairman explains, will go a long way toward assuring that the project will meet specifications and qualify for assistance and last minute attempts to work out a pooling agreement many prove disappointing.

As the chairman expresses it, "the county committee has the responsibility of making sure that the funds used for conservation do accomplish the purpose for which they are intended. That is why specifications are set up and have to be met to qualify."

The present drought in Texas should be evidence enough that livestock producers seldom ever get too much feed on hand. Producers who have stored silage, hay or other roughages and feed grains are now cashing in on their stored crops.

## IT PAYS TO ADVERTISE

## People, Spots In The News

**WHERE BUFFALO ROAM**—Three buffalo, escaped from their corral, wade through snow just 12 miles from Minneapolis. They refused feed scattered in trap.

**LEG WORK** pays off for Duquesne's Allen Bailey as he scores two points in Madison Square Garden game with Long Island University. LIU won 84-52, to stay unbeaten.

**SPRING FEVER** breaks out in New York City. These girls wear summer play suits on street as mercury hits unseasonable 60°.

**GALS AGAINST THE STORM**—When gales in the East cut off electricity, gas refrigerator and range users helped neighbors keep food. These Westchester County, N. Y., homemakers organized "Gals Against The Storm." Members pledge sharing gas appliances with friends in future storms. Other chapters are in New York City, New Jersey and Long Island.

The extended drought has reduced the reserve food supply that pasture plants normally store in their crown and root systems. Since new spring growth is dependent upon this stored food, proper management of pastures in the spring is very important. Little or no grazing should be allowed until the plants have made good growth.

## Mrs. Jimmy Bell Honored At Shower On January 30th

Mrs. Jimmy Bell, the former Miss Gloria Elliott, was honored with a bridal shower on Tuesday, January 30, from 7 to 9 in the evening, in the home of Mrs. Joe Voss.

Mrs. Joe Voss met the guests at the door, and in the receiving line were the honoree, her mother, Mrs. Evelyn Elliott, Mr. Bell's mother, Mrs. Jim Bell, and Mrs. Ben Tuggle, grandmother of the bride.

Some thirty-five guests at-

**KITCHEN MEMO** BY JEAN CLARK

WHAT woman hasn't sighed "Food is so expensive and yet I've got to serve something hearty?" Here's your answer. A fancy name for a very inexpensive dish—Beef Stroganoff cooked on the top burner. Cut 1 1/2 lbs. boneless beef (chuck, bottom round, neck) in 1/4" cubes. Brown meat and 1 cup sliced onion in 1 tsp. lard. Add 1 sliced garlic, 1 tsp. Worcestershire sauce, dash Tabasco sauce, 1/4 tsp. salt, 1/4 tsp. pepper, 1 can mushrooms, 1 cup buttermilk, 1 can condensed tomato soup. Simmer for one hour over low flame. Before serving, thicken with 1 tbsp. cornstarch mixed with 2 tbsps. cold water. Serve in ring spaghetti. Yield: 6 servings.

Gas heating units are getting smaller and smaller. A 2' x 3 1/2' gas furnace adequately heats a 3-bedroom average size home.

Quick trick for sharpening scissors: Cut through sandpaper a few times.

If down or feather pillows aren't dirty but need freshening up, toss them into your automatic gas dryer, set at "Low," leave for 10 minutes and they'll turn out plump and sweet-smelling.

All jams and jellies should be stored in your gas refrigerator after the containers are opened to keep them cold and firm and to prevent spoilage.

The new gas incinerators are completely automatic. A dial control can be set for garbage to burn up to two hours, then the gas automatically turns off when the trash is burned.

Thermos bottle dirty? Put in a tsp. uncooked rice and 1 cup warm water. Shake well.

## Weekly Health LETTER

Issued by Dr. Geo. W. Cox M. D., State Health Officer of Texas

AUSTIN—Measles is reaching a mild epidemic stage at present, with outbreaks following closely the main lines of travel across the State, according to information made public today by Dr. Geo. W. Cox, State Health Officer.

"The peculiar pattern of this spread if measles re-emphasizes the fact that it is a contagious disease, passed on from one person to another," Dr. Cox said. "Guard against exposure by avoiding contact with measles."

Dr. Cox said that measles alone is not necessarily a dangerous disease, but dangerous complications, such as streptococcus, mastoiditis, and pneumonia which frequently follow make it a disease to be carefully nursed, with close attention from a doctor.

"Unskilled treatment of a plain case of measles can result in complications which often kill," Dr. Cox warned, "and it is not to be regarded lightly as simply another childhood disease."

Dr. Cox urged parents to carefully watch children exposed, and at the first sign of temperature, flushed face, sniffles, or watering eyes, advised that the child be put to bed immediately and placed under a doctor's care.

# Goree News Items

Rev. S. Y. Allgood went to Dallas last Friday where he boarded a plane for Marietta, Ga. on a business trip.

Mr. and Mrs. Neale Moore of McCamey visited his mother, Mrs. W. L. Moore, in the Knox City Hospital last week end.

Mr. and Mrs. George Hunt were Wichita Falls visitors Monday.

Miss Mozelle Vandiver of Olney spent the week end with himself here.

Mr. and Mrs. Dennis Ford and daughter of Midland and Mr. and Mrs. Clarence Moore and daughter of Fort Worth were recent visitors with Mr. and Mrs. Hue Moore and other relatives.

Miss Eura Mae Green of Kim, Colo., is visiting friends and relatives in Goree, Munday and Seymour.

Ruth Robinson, who is a telephone operator in Holliday, was painfully burned last week when her robe was ignited from an open fire. She was treated for second and third degree

burns at the Wichita Clinic Hospital and was able to be moved out to the home of her brother, Bill Robinson, in Wichita Falls during the week end.

Mrs. George Crouch spent the past week end in Fort Worth with her son, Jimmie Rae Crouch, and wife who are the parents of a baby boy.

Mrs. Mamie Fitzgerald visited her son, Norris Fitzgerald, and family in Lubbock during the week end.

Mrs. Ira Stalcup and Mrs. J. M. Edwards of Seymour, were Fort Worth visitors the past week.

Mrs. Ed Jones was a Wichita Falls visitor Friday.

Sam Hampton attended the funeral of an uncle in San Antonio last Saturday. He also visited relatives in Temple enroute home Monday.

Mr. and Mrs. Lynn Pace and children of Haskell visited Mr. and Mrs. C. T. West Sunday.

Mr. and Mrs. Wade Coursey and children of Petrolia visited relatives here Sunday.

Clint Graham of the Air Corps spent the week end with his grandparents, Mr. and Mrs. W. R. Caldwell, and brother, Bobby Graham.

Mr. and Mrs. Weldon James and son, Leon, of San Benito, attended the funeral of Calvin Bates. Mrs. Martha Manley also returned home after visiting in the James home for several weeks.

Mr. and Mrs. Jim Earl Hammons and baby of Wichita Falls spent the week end with Mr. and Mrs. Ruby Hammons.

Miss Gypsy Lee Decker, who just completed a course at the beauty academy in Abilene, went to Austin last week to take her state examination. Her mother, Mrs. J. C. Decker, made the trip with her. Gypsy Lee will begin work in the Goree Beauty Shop soon.

Mr. and Mrs. C. T. West took Mrs. Otis Waddell and Debra to Abilene last Thursday where she joined some friends to go to Big Spring to see Mr. Waddell, who is in a veterans' hospital there.

Coach Goodson and wife took the basketball team to Fort Worth Tuesday to see "The Globe Trotter," a colored ball team play. Those who went were Douglas Lambeth, Joe Hastey, Wayne Bingham, Earl Peterson, Jr., and John Lloyd Lambeth.

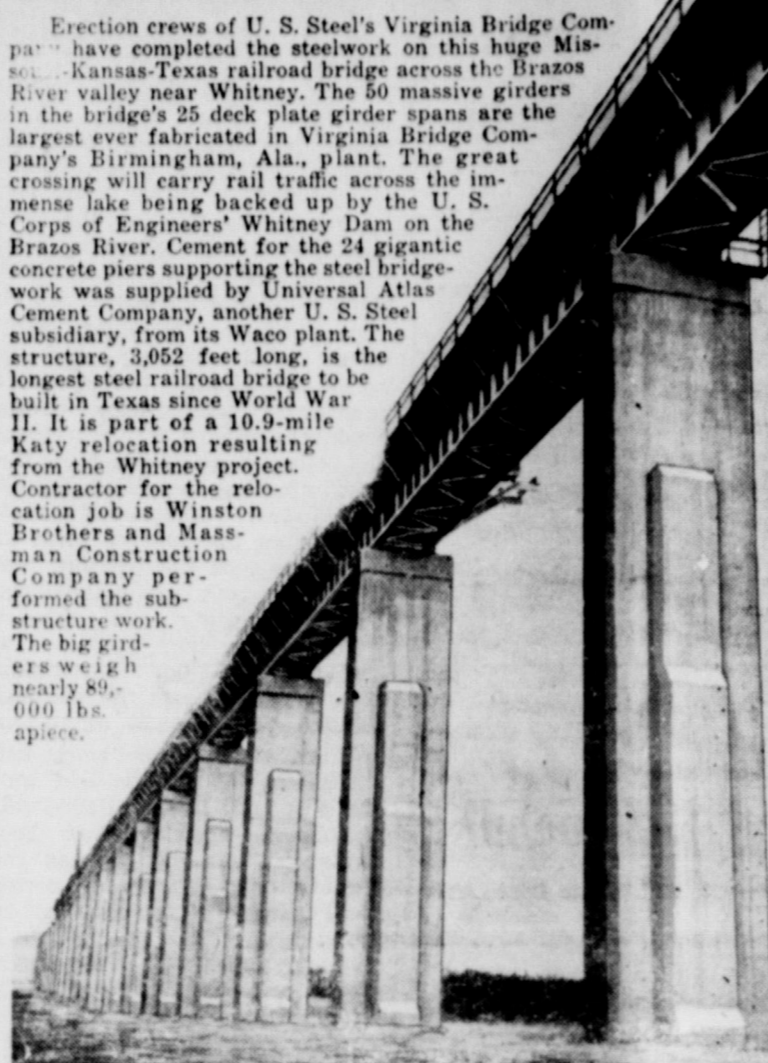

Rev. and Mrs. J. C. Parks of Rotan visited Mr. and Mrs. G. D. Jones in the Knox County Hospital Saturday and Sunday. Mr. and Mrs. Jones were brought home Monday.

Mr. and Mrs. Ralph Duke of Wichita Falls visited in the home of Mr. and Mrs. John Phillips and other friends and relatives here over the week end.

Mr. and Mrs. Red Leathers and daughter of Paducah visited friends here Wednesday of last week.

Mr. and Mrs. Thomas Brodgen of Wichita Falls visited friends and relatives here over the week end.

# GREAT NEW BRAZOS SPAN

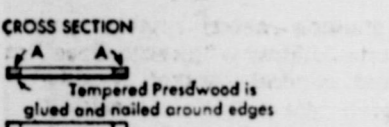

Erection crews of U. S. Steel's Virginia Bridge Company have completed the steelwork on this huge Missouri-Kansas-Texas railroad bridge across the Brazos River valley near Whitney. The 50 massive girders in the bridge's 25 deck plate girder spans are the largest ever fabricated in Virginia Bridge Company's Birmingham, Ala., plant. The great crossing will carry rail traffic across the immense lake being backed up by the U. S. Corps of Engineers' Whitney Dam on the Brazos River. Cement for the 24 gigantic concrete piers supporting the steel bridge-work was supplied by Universal Atlas Cement Company, another U. S. Steel subsidiary, from its Waco plant. The structure, 3,052 feet long, is the longest steel railroad bridge to be built in Texas since World War II. It is part of a 10.9-mile Katy relocation resulting from the Whitney project. Contractor for the relocation job is Winston Brothers and Massman Construction Company performed the sub-structure work. The big girders weigh nearly 89,000 lbs. apiece.

For Farm and Home

### Modernize with Shutters

The appearance of many houses is improved by the addition of decorative shutters. Those described here are easily and economically made, and they are architecturally correct.

Measure the windows as you would for screens, and use the height and half the width of this size for each shutter. Cut the stiles (A) to exact length and the rails (B) to proper size. Nail these

pieces of 1 by 2-inch lumber together and lay the frame on a panel of Masonite 3/16" Tempered Presdwood. Trace the outline on the Presdwood and cut it to size.

Then fasten the frame to the panel with nails and waterproof glue. Make a cardboard pattern of the cutout illustrated (or one of your choice). Trace the outlines on the Tempered Presdwood. Saw these out with a scroll saw and fasten them to the shutters with nails and waterproof glue.

Give both sides of the shutters two or three coats of a good quality outdoor type paint. Fasten the shutters to the house with screws.

To enlarge the drawings of the cutout, draw half-inch squares on paper or directly on the Tempered Presdwood. Then sketch the outline in the squares to correspond with the positions of lines in squares on the pattern.

# BENJAMIN NEWS

(Elda Purl Laird, Reporter)

Miss Sue Moorhouse and Miss Jean Galloway, students at Texas Tech, were home for the week end.

Miss Caroline Polster and sister, Mrs. David Penick, of Rule, were in Abilene Saturday shopping.

Mrs. W. A. Barnett, Mrs. Wynelle Porter, Mrs. P. W. Laird and Miss Elda Purl Laird were shoppers in Wichita Falls Saturday.

Bozo Melton, son of Mr. and Mrs. L. C. Melton, Sr., who is now stationed at San Antonio, was home for the week end.

Miss Julia Propps, of Wichita Falls, visited in the home of her parents, Mr. and Mrs. O. D. Propps, during the week end.

Mr. and Mrs. A. S. Barrett and Mrs. Elwin Larky and children, Gale and Rodger, of Stinnett, Texas, visited in the homes of Mr. and Mrs. Von R. Terry and Mr. and Mrs. Bert Marshall Thursday of last week.

Mr. and Mrs. T. P. Porter, Sr., of Seymour, visited in the home of Mrs. Wynelle Porter and girls Sunday.

Kenneth Lewis, County Agricultural Agent, was in Wichita Falls the first of the week attending a District Agricultural Agents meeting.

James Smith of Munday, was in Benjamin Tuesday of this week on business.

# Soil Conservation Practices

OKLAHOMA CITY, Feb. 16—More than 2,000 farmers and ranchers will converge on this city February 20 for a three-day conference devoted to the one interest common to all of them—conservation of the nation's soil and water resources.

Jack Idol from Benjamin, Chairman of the Wichita-Brazos Soil Conservation District and Clay Grove from Munday plan to attend the convention, representing the local Wichita-Brazos Soil Conservation District.

The occasion is the annual convention of the National Association of Soil Conservation Districts, expected to attract the elected leaders of soil conservation districts in all parts of the nation and from its territories.

Oklahoma City's central location, increasing interest in soil conservation, and the key spot occupied by agriculture in the nation's defense picture are factors which make Waters S. Davis, Jr., association president, confident that attendance at this year's meeting will top 1949's Atlanta convention figure of 1,500 by at least 500 persons.

Davis, South Texas cattle rancher, and other association officers have arranged a varied and comprehensive program which includes speeches by Secretary of Agriculture Charles F. Brannan on the convention's opening day, and Dr. H. H. Bennett, chief of U. S. Soil Conservation Service, on February 22.

The program also includes meetings devoted to regional soil and water problems, panel discussions led by nationally recognized conservationists, presentation of achievement awards, election of new officers and directors, and a full round of entertainment for delegates and their wives.

Slated at a time when the American citizen is openly concerned about the prospect of world conflict and what it could mean, the convention promises to be a brass tacks, "do something" affair.

The work of soil conservation districts in developing a more dependable wartime agriculture, the speeding up of the job of protecting and improving the nation's productive land, and water conservation and river basin development—these are among the problems to be discussed by the convention delegates.

Commented President Davis, "I am counting on every delegate to roll up his sleeves and help Agents meeting."

James Smith of Munday, was in Benjamin Tuesday of this week on business.

# Walter Rice of Fort Worth

former Knox County agent, was among those who attended the 4-H calf show at Knox City last Saturday.

Mr. and Mrs. B. L. Blacklock and Mr. and Mrs. J. C. Campbell attended the Icelandia show in Wichita Falls on Monday of this week.

Mr. and Mrs. C. T. Cunningham and son, Tommy, were visitors in Wichita Falls last Saturday.

Mrs. T. B. Bengel left Sunday to visit relatives in Honey Grove this week.

Mr. and Mrs. Bill Morris spent the week end with relatives in Denton.

Mr. and Mrs. Roy Renner of Fort Worth visited friends here over the week end.

Clay Hutchinson was a business visitor in Fort Worth last Saturday.

Wallace Reid and Albert Loran were business visitors in Amarillo the first of this week.

# Soil Conservation Practices

Visitors interested in agricultural flood control may see an outstanding example of this work on the Washita River watershed in Oklahoma. Many thousands of acres of Washita River bottomland that were unprofitable are now turning in a profit as a result of the protection they are getting. And in the other aspects of soil and water conservation, Oklahoma offers the visitors a splendid chance to see the effectiveness of many coordinated practices, which keep soil in place and provide for continuing soil improvement.

Soil Conservation district leaders in Kentucky and North Dakota already have announced their state will be represented by chartered bus delegations. And Nebraska, which topped other delegations at last year's meeting, is expected to bid again for the honor.

And the reservations continue to flow in, Oklahoma City hotel and tourist court operators are taking another count of guest facilities and wondering just how large the February invasion will actually be.

The local leaders of the nation's program to use soil and water scientifically will have headquarters at the Skirvin Hotel and hold convention sessions at Municipal Auditorium.

Mrs. W. G. Hefler returned home Sunday from Waco after a visit with her sister, Mrs. R. C. Kendrick.

## Treating Cotton Planting Seed Is Paying Policy

High cotton yields are usually produced from fields where good, early stands have been obtained. Replanting is an expensive job and it often times can be avoided by treating the seed before they are planted, says Fred C. Elliott, extension cotton work specialist of Texas A. & M.

He points out that the scarcity of good planting seed in many areas and the present emergency that faces cotton producers makes the problem of getting a good stand on the first planting mighty important in 1951. Cottonseed treatment is an inexpensive form of crop insurance for treating materials cost only a few cents per bushel. Treating kills disease germs on the seed, protects the seed and seedlings from diseases which may be in the soil and gives a better stand of cotton.

Elliott says the two worst cotton killers are angular leaf spot and shreshin. In the Blacklands of Texas, angular leaf spot ranks next to root rot as the number one hazard in cotton production. It first shows up on the leaves of the young seedling and appears as a small, green, water-soaked spot that resembles a bruise. If damp weather sets in after the seedlings come up, the disease spreads over the entire plant and unless the planting seed was chemically treated before planting, may of the plants may be killed. The disease affects the fruiting habits of the cotton plant and carries through to the older plants where it appears as angular spots on the leaves and as bacterial rot on the bolls.

Sreshin is detected as a brown diseased area on the stem of the cotton seedling either above or below the ground line and it causes a shriveling of the plant tissues which kills the plant.

At the Temple Agricultural Experiment Station, Elliott says that cottonseed treated with either two or five percent cerasan gave from 25 to 30 percent better stands than untreated.

**FOR RENT**—Small house, close in. All modern. Mrs. W. M. Mayo. 27-tfc

**Munday Truck And Tractor Co.**  
Chrysler Plymouth Phone 61

ed seed. The plants showed less angular leaf spot and the final production per acre averaged more than 50 pounds of lint cotton per acre. Seedlings from treated seed often are twice as large as the seedlings grown from untreated seed during the early stages of growth.

Elliott suggests to cotton growers not familiar with the process of treating cotton seed that they visit their local county agricultural agent and ask for details on what chemicals to use and the proper methods of doing the treating job. He also points out that producers who have large quantities of seed to treat might find it economical to have the job done by a commercial operator.

He says regardless of who does the job, be sure that the seeds are covered with the chemical and that the right material has been used for the treating process. America and her world allies need every bale of cotton that can be produced in 1951 and Elliott urges cotton farmers to follow the best known production practices so they can get the maximum yields from the acres they plant.

**ROPER**  
"AMERICA'S FINEST GAS RANGE"

**The Rexall STORE**

Motorists should avoid throwing lighted matches and cigarettes onto highway right-of-ways where grass can be set on fire. Serious grass fires have resulted from the practice and motorists should remember that grass is a mighty important item so far as the farmer and ranchman are concerned. The nation's meat supply in part depends upon the amount of grass available for livestock production.

New potatoes contain less starch than old potatoes. Good Housekeeping's editors explain that new potatoes contain more moisture, and hence supply less starch.

High yielding pastures are a cash crop and should be treated as such.

## Let's Talk LIVESTOCK

(By Ted Gouldy)

FORT WORTH, Feb. 8—The importance of wool in the preparedness program of the Nation can readily be realized when we consider the fact that it takes about 200 pounds of wool to completely outfit each soldier, sailor marine.

Thus it is easy for the livestock trader to understand the high prices of woolled lambs and sheep bring on the market at Fort Worth. If the government achieves its goal of 3,000,000

men in the armed forces by mid-1951, there will be a need for 600 million pounds of wool to outfit them.

Two new all-time record prices were set for woolled slaughter and woolled feeder lambs at Fort Worth this week when Joe Reeves of Floyd County sold 60 lambs at 90 pounds at \$37 that were fat; and H. E. Wood, of McCulloch County, sold 165 feeder lambs at 92 pounds at \$37 per hundred.

Now \$37 for feeders sounds mighty high but just for the sake of discussion, let's figure these lambs, shall we?

Let's estimate that they will shear seven pounds of wool and let's estimate the wool at \$1.30 per pound, both figures being around average.

A 92-pound lamb at \$37 costs \$34.04.

Seven pounds of wool at \$1.30 equals \$9.10 worth of wool.

Let's say the shearing and bagging cost 35 cents per head.

This makes a net saving in cost of the feeder lamb of \$8.75 each. Deduct this wool's value from the original cost of \$34.04 and your lamb costs \$25.29.

He now weighs 85 pounds and divide this weight into the \$25.29 and your feeder lamb cost you \$29.75 per hundred pounds. In the event the lamb is a heavy shearing kind that will yield eight or nine pounds of wool, the saving is more.

Incidentally, some fresh shorn feeders this week brought \$31 per hundred in Fort Worth.

Stocker and feeder buyers have taken hold again since the announcement of the freeze on prices, apparently interpreting the news from Washington as favorable for high priced livestock and meat.

Current statements from Washington indicate to the livestock trader that the price bosses are approaching the problem with a much better understanding than was the case under O. P. A.

Of particular interest is the hint from Washington that licenses for "new" slaughterers and meat processors may be tougher to get. The present around 3,600 slaughterers in the United States are certainly enough to handle the livestock which will be available during the emergency.

Any "newcomers" who want to get into the business should be screened very carefully to be sure he hasn't got an "angle" which may portend black mark

## Veterinarian For Extension Service Named Recently

Dr. C. M. Patterson on January 15 became veterinarian for the Texas Agricultural Extension Service. He succeeds Dr. W. C. Banks who reigned on December 31 to accept a teaching position in the School of Veterinary Medicine at Texas A & M. College.

In making the announcement, Director G. G. Gibson said that Patterson is a native of Sweetwater and a graduate of Texas A. & M. College. From 1947-50, he was a practicing veterinarian and from August 1950 to January 14, 1951, was employed by the Alaska Department of Public Health. He served in the U. S. Army Air Corps from September 1942 until January 1943. Dr. Patterson holds membership in the Texas and American

week boosted the hop top to the \$23 levels in the Cornbelt this week, the first time in several months, and good hops at Fort Worth topped \$22.75.

More hogs are expected to move in the early Fall this year according to all reports. Two reasons are given, first is that late Summer and early fall prices are always the highest, and secondly, the new anti-biotics added to the feed stimulates growth to market weights in weeks less time than the old fashioned feeding methods.

Cropfeeding of calves will be a bigger operation this Spring and Summer than ever before. The ready market for fat calves the year around in the Southwest is encouraging this practice, as well as the fact that creepfeeding the calves adds upwards to 100 pounds or more to their weight at sale time.

One hundred pounds additional weight to sell at today's prices is a very attractive matter and a calf eats very little until he gets considerable size, making it an economical gain, too.

## Beware Coughs From Common Colds That HANG ON

## Gulf Announces New Guide For Farm Tractor

A new Farm Tractor Guide, with a wealth of valuable ideas for making farm tractors last longer and perform better, has been published by the Gulf Oil Corporation and is ready for free distribution to all who request it.

The Guide is of convenient size and contains 76 pages. It is profusely illustrated and written in easily understandable language for more efficient and comprehensive use.

In addition to the photographs used for illustrative purposes, the Guide also carries complete, easy-to-read diagrams covering every phase of farm tractor lubrication.

Included in the Guide are sections on lubrication and maintenance of engines, crankcases, oil filters, carburetors, fuel pumps, valves, transmissions, air cleaners, etc.

Complete sections on the care of the cooling and ignition systems are also included, as well as well-illustrated sections on the care and maintenance of tires, tubes, and batteries.

Of particular interest to all owners of farm tractors right at present is a section containing tips on cold weather operations and storage for winter.

Also incorporated in the Guide is a very informative section entitled "The Trouble Shooting Guide," which gives valuable tips on where to look for trouble in any case of engine failure.

The Guide concludes with a pertinent section on rules for safe tractor operation and the nine general rules for giving temporary first aid in case of farm accidents.

It is sized just right, and the book is punched for hanging in readily accessible places in barns, garages and sheds.

The new Gulf Farm Tractor Guide may be obtained free of charge by contacting Mr. P. V. Williams, local distributor of Gulf Oil Products.

The average dairy cow will consume from 100 to 120 pounds of water daily and if this water is not supplied, milk production drops off rapidly for milk is approximately 87 percent water.

## Munday School To Take Part In Survey Program

The Munday public school system will use materials furnished by the Texas Education Agency to make a detailed survey of the Munday schools and community according to W. C. Cox, superintendent of school.

More than 800 schools over the state are expected to take part in the school-community survey program.

This material is now being used by high schools with fewer than 100 pupils. If the results of the program are satisfactory, all high schools in the state may eventually take part in the survey, according to J. W. Edgar, State Commissioner of Education.

Purpose of the survey is to gather information about the local community which will help school leaders in planning a better program of education for the school and community.

Because the good school is so closely tied to community life, many of the questions will be concerned with community resources, Edgar said.

After the material has been collected by the teachers and pupils of Munday High School, a group of local citizens will be asked to examine the results in the light of their knowledge of the community.

Edgar recently pointed out that facts and figures alone cannot tell a complete story. People who know local conditions must express judgments in order to give the facts their present meaning, he said.

Merick McGaughey of Benjamin, T. E. Holcomb of Knox City and S. E. Reed of Benjamin recently attended a meeting in Abilene at which members of the Texas Education Agency staff explained the use of the study guides for small school surveys.

It was pointed out that collecting the desired material should give pupils and teachers a new knowledge of their community and furnish the basis for a new understanding of such material studied in the school.

When all communities of this size have reported their findings the state education agency will have a body of information

**WELL DONE!**  
This pretty miss is taking advantage of Old Sol's rays to acquire a flattering tan. For her tanning hours, she wears a cotton costume that permits her to make the most of her opportunity. about education in Texas that could not be obtained from any other source.

Be careful. Observe state and local traffic laws.

### CARD OF THANKS

We want to thank this opportunity to thank all our neighbors and friends for their expressions of sympathy and consideration shown us during the illness and death of our loved one.

Especially do we thank the physicians, Dr. E. F. Heard and Dr. W. M. Taylor, Rev. Berry Baker, Rev. Allgood, Rev. Stevenson and Rev. J. M. Skiles. The Tanky's quartette and Mr. and Mrs. J. B. Justice. Those sending all the nice, good food, and the beautiful floral offering. May the good Lord administer rich blessing on each of you for your kindness and send good friends your way when your "dark hour" comes.

The Boyles Family.

## Chicken Of Tomorrow Program To Be In Two Divisions For This Year

Now is the time to make plans for the 1951 Chicken-of-Tomorrow Program in Texas, says F. Z. Beanblossom, extension poultry marketing specialist of Texas A. & M. College and chairman of the State Chicken-of-Tomorrow Committee.

Beanblossom says the rules and regulations covering the 1951 program have been released, and that he will be glad to send copies to anyone interested in the program. Information on the program can also be obtained from your local county agricultural agent.

Beanblossom says there will again be two divisions in the program, one for juniors—this is the one for 4-H and FFA members—and another for the adults or the senior group. He also points out that all of the senior entries are now in that will be eligible under the 1951 rules and regulations. The junior entries, however, may be sent to his office until February 26.

He points out that all chicks, to be eligible for entry, must be hatched between March 4 and 10, inclusive; and when you allow time for hatching, the deadline is not faraway.

More than 200 entries, including over 20,000 chickens, were involved in the 1950 program, and about 3,000 birds were taken to the State Exhibition at Gonzales. The State Exhibition for 1951 will be held at Nacogdoches during the week of May 14-18.

The chicks will be 10 weeks old when the 1951 program closes and each participant will send to the designated processing plant his entry or entries for final judging. The live birds will be classified and those receiving a blue ribbon classification will be processed for the final placing and from this group will come the champion entry. Beanblossom says suitable awards will be made in each division.

Beanblossom points out that

this not a new program for it has been operating in Texas for several years and he says that it has done much to improve the meat type of chickens in Texas. Emphasis has been placed on developing a broiler that has a high percentage of meat to bone and one that can utilize the feed it consumes by turning it into meat in the shortest possible time.

Be careful. Observe state and local traffic laws.

### Too Late to Classify

FOR SALE—1700 acres in Hall County, Texas, 700 acres in cultivation, one set of good to fair improvements. On pavement, school bus and mail route. ## Some Facts About the Time Payment Plan

For FINANCING FURNITURE and APPLIANCES

Although this plan is controlled by Regulation W, is still the easy way to finance your needs.

We have principally three plans, two of which have recently been made available. They are:

- MONTHLY PAYMENT PLAN**  
Down payment on furniture, 15 pct.; on appliances, 25 pct. Balance monthly in 15 payments.
- ONE PAYMENT PLAN**  
Down payment, 50 pct.; balance due in 6 months, or 9 months, or 12 months.
- ONE PAYMENT PLAN**  
Down payment, 50 pct.; balance due in 6 months; remainder due in 12 months.

Plans Two and Three are ideal for farmers with yearly incomes or salaried people who depend on bonuses to buy home conveniences. On appliance paper only, insurance policies are carried against fire, explosion and windstorm for the duration of the contract.

We invite you to further investigate our convenient payment plans.
