### MIRACLES ARE NORMAL

Early in October a major oil company dedicated a new refinery at Mandan, North Dakota. There is nothing particularly remarkable about such an event. Steady industrial development is something we take for granted. However, it is worth pausing occasionally to think of what has happened in an amazingly brief period of time.

Less than 80 years ago Colonel George A. Custer and his Seventh Cavalry rode out from a frontier fort near Mandan to round up some hostile Indians. The vast reserves of petroleum lying deep in the Williston Basin of North Dakota would have no meaning to Custer and his men. They would have been stunned as the Indians they were fighting at the sight of a modern automobile. In less than 80 years, thanks to research, invention and industrial development, we have come to accept miracles as normal progress.

The fact that the management and stockholders of a single company have ventured to spend millions of dollars building a 30,000 barrel a day refinery and linking it to distant markets with hundreds of miles of pipeline without causing the raising of an eyebrow in a region where a handful of white settlers were fighting Indians a matter of decades ago, is something for the political detractors of the American system to think about. It should also make us all realize that payrolls, employment opportunities, and the prosperity of the smallest community are linked inextricably to freedom of opportunity in basic enterprises such as the oil industry.

### PROGRESS REPORT

Various factors determine just how good the standards of medical care are in any nation. One is the number of doctors in practice, and the quality and extent of the facilities for educating physicians. In this, the United States is exceedingly fortunate.

A report made by the American Medical Association tells the story. The record graduation of 6,861 doctors during 1953-54 brought the nation's physician population to approximately 220,100. This means there is a doctor for every 730 persons in the country—and that, too, is a high record.

Moreover, the situation is destined to become still better. Present enrollment in the medical schools is 28,227—the greatest in history.

As for the schools themselves, more than \$76,000,000 was spent in the 53-54 year for new facilities, and for remodeling or completion of buildings for medical instruction. Their budgets total

over \$143,000,000 for 1954-55. And 10 new four-year schools are scheduled to go into operation within the next five or six years.

An interesting and important commentary on medical education is found in the fact that 21,328 physicians taught without pay during the last school year, in addition to the regular full-time faculty members. The doctors, obviously, are vitally interested in giving us both more medical care and better medical care.

### INVESTIGATE FIRST

Here's one of the best pieces of advice anyone can be given: Investigate before you invest. No one can truthfully guarantee that the market value of any stock will rise. Stock values sometimes go up and sometimes go down—just as do the values of real estate and most other kinds of property. But you can protect yourself against "sucker bait" securities.

This is especially important now. High pressure salesmen, skilled in the arts of separating the fool from his money, have been pushing Canadian mineral stocks which are totally worthless in virtually every case. Fantastic profits are promised. These gyp artists think nothing of telling you that your investment will soon multiply 100 or 1,000 times. A similar situation exists this side of the border with uranium shares.

Luckily, there are honest and authoritative agencies, both private and governmental, which will advise you as to contemplated investment, without charge. These include the established stock exchanges, the Securities and Exchange Commission, state securities supervisors, and better business bureaus.

Investigate before you invest.

### ARE WE SPOILED BRATS

The thing that is essential today in this country when we get right down to it is an effort on our part to keep a sense of values. We don't want to be like the pampered infant who has so much he doesn't appreciate any of it.

In recent years the private enterprise system has showered the American people with every convenience. And yet, during this period of tremendous progress and prosperity, "gifts" from government have been demanded with a resulting drift toward socialism and away from freedom.

In this age of wonders are we overly pampered? How far do we have to go before we become a nation of spoiled brats crying for more and more from Santa Claus?

### PREACHING CHRIST (Continued)

In our study last week we found where Philip went down to Samaria and preached Christ unto the people of Samaria. When the Samaritans heard Christ preached they came to the conclusion that they should be baptized. "When they believed Philip preaching they were baptized, both men and women." (Acts 8:12.) Verse twelve says, "Then Simon himself believed also. (Believed Philip preaching Christ.) and when he was baptized, he continued with Philip." Again we find a man who, when he heard Christ preached, came to the conclusion that he should be baptized.

"Then the angel of the Lord spake unto Philip, saying, arise, and go toward the south unto the way which goeth down from Jerusalem unto Gaza, which is desert. And he arose and went." On his way he met the Ethiopian eunuch, who was reading from Isaiah, the prophet. Philip asked him if he understood what he was reading, he answered and said, "How can I except some man guide me? . . . Then Philip opened his mouth and began at the same scripture, and preached unto him Jesus." (Acts 8:26-35.) Again Philip is preaching Jesus. What did he preach when he preached Jesus. What

conclusion did the eunuch come to? "And as they went on their way, they came unto a certain water; and the eunuch said see, here is water, what doth hinder me to be baptized? And Philip said, if thou believest with all thine heart, thou mayest, and he answered and said, I believe that Jesus Christ is the Son of God. And he commanded the chariot to stand still; and they went down both into the water, both Philip and the eunuch, and he baptized him." (Acts 8:36-38.)

In Acts the second chapter, we have Peter preaching the death, burial, and resurrection of Christ to the multitude. "When they heard this, they were pricked in their heart, and said unto Peter and the rest of the apostles, men and brethren, what shall we do? Then Peter said unto them, repent and be baptized every one of you in the name of Jesus Christ for the remission of sins." (Acts 2:37-38.)

We find from these scriptures, when the inspired men preached Christ, they preached faith, repentance, and baptism. Any man today, who claims to preach Christ, and tells you there is nothing in baptism, has preached Christ in a different way than that which the inspired men preached Christ.

PAYNE HATTON, Evangelist

The town of Spanish Fort in Montague County was established on Village Creek, now silted up but then a pretty stream. Just across Red River was, of course, Indian Territory, which was infested by numerous outlaws, who frequently came to Spanish Fort. Three outlaws were lynched not far from the town but in Indian Territory.

Spanish Fort itself witnessed many exciting events. A woman whose husband had been killed moved from the farm into town. Three men were suspected of having killed the farmer. Perhaps the slayers thought that the widow might know too much. One night, her house was fired into; she ran out and was killed. The outrage led to the immediate forming of a posse and three men were tracked to a thicket. The thicket was surrounded, then two brave men, George Howard and Dave Price, crawled into the underbrush, got the drop on the trio and took them prisoner. They were tried; two were hanged, and the other received a long prison term.

One of the busiest spots in Spanish Fort was the Cowboy Saloon. On Christmas Eve, about 1882, cowboys shot the front out of the saloon. Hundreds of shells were picked up next morning. Almost in front of the Cowboy Saloon, a pitched battle took place. Six men (three on each

side, met face to face and bullets began flying. When the shooting ended, one group had been wiped out.

But life had its lighter side, too. Broke and thirsty, one cowboy said to another, "Tell you what we'll do. I'll go in the saloon and after a while you come in and I'll offer to bet the bartender you're wearing socks and, if he won't take me up, then I'll offer to bet that you're not wearing socks."

The other said, "You could lose." "No," said his buddy, "take off your left sock right now. Then if he bets you're wearing socks, take off your left boot and you'll be barefooted. If he bets the other way, take off your right boot and there the sock will be."

And their plan worked. Spanish Fort was missed when the railroad was built into the county in 1887 and so the town dwindled until the once turbulent place has only a handful of inhabitants now.

Guests of Mrs. J. C. Campbell over the week end were Mr. and Mrs. Charles Hardin and son of Denton and Mr. and Mrs. Mart Hardin of Fort Worth.

Mr. and Mrs. Lee Patterson and sons visited Mr. and Mrs. John Nixon and daughter, Gail, in Austin over the Thanksgiving holidays and attended the Texas-A&M football game.

### A "Live" Christmas Urged By Executive

"I would like to invite every citizen in Texas to join the nation in a LIVE Christmas celebration."

This Christmas invitation was tendered by Mr. R. B. Roaper of Houston, President of the Texas Safety Association, and Chief Safety Engineer, Humble Oil & Refining Company, today as he gave support to the Holiday Hazards program now being conducted by The Texas Safety Association and the National Safety Council.

Mr. Roaper reminded local citizens that "the mixture of last minute shopping, home celebrations, office parties, distracting holiday sights and sounds, can lead to the sometimes-tragic state of 'holl-daze'."

Mr. Roaper said 'holl-daze' is an intangible thing, but is still a very real hazard during this holi-

day season. "To make matters worse," he said, "we're in this state of 'holl-daze' just at the time when winter walking and driving hazards are at their height."

He said the National Safety Council's figures showed that the traffic death toll was usually higher in December than in any other month of the year.

"Motor vehicle deaths rise steadily from a low point in February, until they reach an all-year high in December," he pointed out.

"For this reason, he urged all motorists and pedestrians . . . to be extra alert, and to be certain to continue to observe all common sense safety rules for staying alive in traffic."

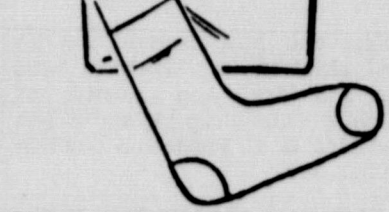

Mr. and Mrs. Orman Moore and daughters of Wichita Falls visited with her mother, Mrs. Erin McGraw, and grandmother, Mrs. S. A. Bowden, over the week end.

#### Splinter-Free Stretcher

A SPLINTER-FREE, very smooth material makes an ideal stretcher for sweaters and socks. Such a material, known as Masonite Duolux, a hardboard that's smooth on both sides, may be

obtained at lumber yards. Get the 1/4" thickness.

Before washing a sweater, lay it on a piece of the Duolux, marking its outline with a piece of chalk. Then cut around the outline with a jig saw or coping saw. Now lightly bevel the edges with a sandblock or file.

Before putting the stretcher into service, prime and paint it. Stretchers of this material will last for years.

### Former Munday Man Named President Of National Group

R. R. (Rip) Davenport, CLU, vice-president and agency director of Southwestern Life Insurance Company at Dallas, was elected president of the Life Insurance Management Association at the closing session of the 37th annual meeting of the organization in Chicago last week.

A former superintendent of Sunset Independent School District from 1931 to 1933, and an agent for Southwestern Life at Munday from 1933 to 1938, Davenport is the first Texan to head the Life Insurance Agency Management Association. With offices at Hartford, Connecticut, the LIAMA provides advisory, research and other services chiefly in the agency field to approximately 250 leading companies in the United States, Canada and eight foreign countries which maintain memberships in it.

During the five years he was an agent at Munday, he was a "Continuous Weekly Producer" and became a charter member of the Top Club, an organization

for Southwestern Life's leading producers. He was made assistant manager of the Houston territory in 1938 and served in this capacity until October, 1939, when when he came to the home office in Dallas as Assistant Director of Sales. In February of 1942, he was appointed Assistant Director; in February, 1944, he became Director of Sales; and in March, 1950, was made Second Vice President. In 1951, he was elected Vice President and Agency Director and on October 19, 1954, he was elected to membership on Southwestern Life's board of directors.

Guests in the home of Mr. and Mrs. Jim Gaines over the week end were Mr. and Mrs. Robert Gaines of Denton and Mr. and Mrs. Gordon Gaines and son of New Home.

The first mechanical cotton picker was invented in 1850. The first patent on a mechanical cotton picker was granted to S. S. Rembert and J. Prescott of Memphis, Tenn., in that year.

Tightly constructed cotton fabrics, when used over softer undergarments, have been shown to provide more warmth and comfort than much heavier clothing of more loose weave.

James Amerson of NTSC in Denton was a guest of his parents, Mr. and Mrs. J. H. Amerson, over the holidays.

Miss Charlotte Hannah of Hardin-Simmons University in Abilene spent Thanksgiving holidays with her parents, Mr. and Mrs. Leland Hannah. They took her back Saturday and attended the HSU and Tech football game that afternoon.

### From where I sit ... by Joe Marsh

#### Going—Going— But Not Gone!

Saturday they got set to auction off "Sis" Brown's house for non-payment of taxes. Buck Stone was the auctioneer. Everybody who came to the auction knew that "Sis" is a war widow.

When Buck began the bidding he said, "Anybody can bid. Just remember 'Sis' and three nice kids live here. Now *who's* going to start the bidding?"

There was silence. "Sis," standing in back, got the point. She reached into her purse for just about all the money she had in the world. "I'll bid \$75," she said.

"Sold," bellowed Buck and "Sis" had her home back.

From where I sit, Buck Stone used a helping hand instead of a gavel. It was real neighborliness. You know, even in something as small as respecting another's choice of beverage, a person can be neighborly. You might like buttermilk. I'm "sold" on a temperate glass of beer. And I can't "buy" anyone's telling me I'm wrong.

## NEWS FROM VERA

(Mrs. Thelma Lee Coulston)

### UNCLE IKE SHIPMAN OBSERVES BIRTHDAY

A surprise birthday celebration, honoring Uncle Ike Shipman on his 80th birthday was given at his home Sunday afternoon, November 21st, from 2:00 until 6:00 P. M. Guests were greeted at the door by Uncle Ike and his niece, Mrs. Lola Scott, and Charlotte Boone presided over the registration and Mrs. Sam Shipman and Mrs. Elton Scott served refreshments.

The dining table, laid with a beautiful cloth, was a pretty background for the huge birthday cake, adorned with lovely pink roses, sparkling with silver. Eighty tiny, blue candles surrounded the tiered cake. On each end of the table flickering candles were burning.

Uncle Ike was born near Pelemia, Texas in Coryell County on November 22, 1874. He moved from there to Erath County and then to Dublin, Texas. In 1900 he moved with his folks to the Shipman place, two miles east and three miles north of Vera, and has resided there ever since.

The following relatives and friends called during the afternoon: Mrs. H. A. Smith and Armon of Red Springs, Mrs. D. A. Chapman, Jr., and Kirby and Mr. and Mrs. Claude Boone and

children, Robert and Charlotte of Seymour, Mr. and Mrs. Elton Scott and children, Vivian and Alice of Gilliland, Mr. and Mrs. Ross Shipman, Wayland and Opal of Seymour, Mr. and Mrs. Wade Barker of Gilliland, Mr. R. C. Spinks of Goree, Mr. and Mrs. Roy McGuire of Seymour and Mr. and Mrs. Gaylan Scott and little daughter, La Gayle, Mr. and Mrs. Sam Shipman, Miss Jossie Myers, Rev. and Mrs. Robert Lacewell and son, Mike, Mr. and Mrs. W. **PROPOSED COTTON REDUCTIONS**

Cotton farmers will decide December 14 whether they want to accept the acreage controls proposed for the 1955 crop.

In previous years, when farmers were asked to choose between lowered parity and unrestricted production or a high parity level and crop quotas, they have voted to accept the controls. They seem to feel that less cotton and a reasonable assurance of a fair price is the better deal. If they follow the same pattern this December, then next year's crop quota is scheduled for a drastic reduction.

The Secretary of Agriculture has ruled that the cotton acreage will be cut back 15 percent in 1955. This means only 18,113,208 acres can be planted as compared with the 21.4 million acres allowed this season. The new quota is the very bottom figure allowed by farm law.

A minimum quota next year may work a great hardship in areas where cotton is the main cash crop. In some sections of Texas, cotton is the primary agricultural commodity. No other crop offers comparable income. As a result, the gross profits

from cotton can drop 15 percent in those areas.

Some government planners will work hard to make the 15 percent reductions "stick" in cotton planting despite any opposition which may arise to the program. Economists claim that the 1954 crop was far larger than expected when the first production estimate was released in late summer. Any more cotton will be a drag on the market, they claim.

It is true that original 1954 estimates were very low. Subsequent increases in estimates proved this—and incidentally made it extremely difficult to plan any sort of orderly marketing system. Critics point out, and with some justification, that if estimates are to be made at all, they should be reasonably accurate if the industry is to benefit from them.

At this point, acreage controls appear to be the most logical choice in the December election. With the recent shift in power in Washington, then it is fairly certain that cotton acreages will be somewhat increased. Many areas of Texas will welcome such an increase.

we require each licensed nursing home in Texas to be approved for fire safety."

Dodd added: "In addition to carrying out all suggestions made by the local fire department, each nursing home administrator should have a definite plan that has been practiced and perfected to meet all emergencies caused by fire."

"Such a plan should be worked out in cooperation with the fire department and all members of the nursing staff should know their duties and assignments and be ready to act at any time."

**LET'S TALK LIVESTOCK BY TED GOULDY**

**ARE MORE CATTLE ON FEED IN SOUTHWEST**

FORT WORTH—The suspicion is growing stronger among observers at the livestock market at Fort Worth that beef cattle on feed in the Southwest are well in excess of the numbers indicated by earlier estimates.

In recent weeks word here is that many mills processing cottonseed are refusing to contract cottonseed hulls for future delivery because of the current strong demand. They fear to contract for future delivery since they have been unable to pile up any reserves and are selling

them as fast as they are made. It is reported that at many mills trucks stand in line for half a day waiting to get a load. Experienced buyers and salesmen at Fort Worth say, "Those hulls are going into livestock somewhere. Every time we have had this situation of fast disappearing cottonseed hulls it has developed that more cattle were being fattened than anyone suspected."

It is pointed out that no doubt a good many mother cows are being wintered with some hulls as roughage—but this does not dispel the theory of the old timers. They expect more fat cattle in the first quarter of next year than earlier guesses indicated.

Popular opinion is that many of the cattle on feed are heifers. Reason is that heifers most of the late summer and fall sold around \$4 or more under comparable steers. This "spread" made feeding heifers look like a good bet to many even though when marketed the heifers would not sell as well as fat steers. The additional margin between costs of heifers against steers made them look like a

safer bet to make money.

**POST-THANKSGIVING CATTLE TRADE STARTS OFF WELL**

There was the usual difference of opinion between salesmen and buyers at Fort Worth Monday, but when it was all over most cattle and calves sold at fully steady to stronger prices. Mature fat steers, cows and high grade calves were measurably higher. Few high grade stockers were on hand and order buyers indicated the supply of high quality stockers were far short of their needs.

Numerous loads of mature steers sold from \$21 to \$24, a few better cattle to \$24.50. Fat cows drew \$8.50 to \$11, some young cows of high yielding potential to \$12. Cannons and cutters drew \$5 to \$8.50, bulls cashed at \$8 to \$12.

Good and choice fat calves of all weights \$15 to \$18.50 with fancy baby beef types to \$19 to \$20 and above. Choice stocker steer calves and light yearlings sold from \$17 to \$20. Replacement cows \$7 to \$12.

**SHEEP RUN SEASONALLY LARGE; LAMB TOP \$19.00**

Both woolled and shorn lambs topped at \$18 to \$19 at Fort Worth Monday. Shorn lambs at the higher figure carried Fall shorn (about inch-and-a-half to two-inch wool) and some had No. 1 pelts (about five-eighths to one inch of wool). Stocker and feeder lambs drew \$12 to \$17, some mixed feeder and fat lambs at \$17. Shorn lambs in stocker flesh are hard to move.

Slaughter ewes drew \$5 to \$6, and old bucks sold around \$4. Drew \$7 to \$12, the latter for full woolled wethers.

**HOGS MOVE TO MARKET IN FAR LARGER NUMBERS**

In the past three weeks the movement of hogs to market at Fort Worth and all around the major market circle has been the 12 major markets reported some 137,000 swine.

At Fort Worth the top was \$18.25 to \$18.75, the lowest hog top since December of 1952. This was weak to 25 cents lower than last week's close. Sows sold weak to 50 cents lower at \$14 to \$17.

## Knox Prairie Philosopher Wants "Going To Washington For Help" To Be Reserved Mostly For Americans

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek must be planning on asking Washington for help, his letter this week indicates.

J. A.

Dear editor: In nearly every paper I've run across out here lately there's been an article about the leader of some country paying a visit to Washington, and I started keeping a count of em.

In the last thirty days the Premier of France, the Chancellor of Germany, the ex-Queen of England, the Premier of Japan, the Prime Minister of Austria, the Prime Minister of Denmark, the Prime Minister of Ceylon, the King of Greece, the Emperor of Ethiopia, the President of Turkey, and the Governor General of Canada, all have paid visits to Washington.

This is a pretty impressive list and lends considerable authority to the idea that Washington is now the center of the world, and while it's not my job to be advising Washington, I would like to suggest that the people up there not let this thing go to their head.

While the purpose of so much visiting no doubt is laid to cementing good relations and seeking advice, I would like to caution Washington to go a little easy. When a man goes in to see his banker for advice, it generally ain't advice he's seeking, but

a loan. He already knows what he wants to do, he's in there just to see if he can swing the money to do it with.

If all these countries want advice, they got telephones and could call up Washington and get it, but I have a feelin' advice ain't it at all.

Of course it's only natural that they should go to Washington for money, but that's the trouble with spreading our form of government too far. As I understand it, goin' to Washington for money is an American heritage, perfected by years of painstaking effort by every American who ever sought help from that source, which takes in practically everybody, in one way or another, and while I would be the last to argue against such a system, I think you can spread the notion too far out.

It's one thing to preach the American system throughout the world, but there are some aspects of it we ought to reserve

### WATCH FOR TURKEY CUTBACK IN 1955

Turkey raisers have an eye on reduced production in 1955 because of today's low prices.

Such a trend is expected after a record of 61,045,000 birds this year, says John G. McHaney, extension agricultural economist.

The extent of cutback in 1955 depends upon the number of breeder hens held for hatching egg production, says the economist.

Sixteen percent more light-breed birds and about six percent more heavy type turkeys were fed out this year. Prices, generally, are five to six cents a pound below last year.

Despite these figures, McHaney says Texas has not kept pace with other turkey producing areas. "The 'in and outers' increase the total turkey supply and effect prices received by all producers. The stable and efficient producers are the ones who build a solid industry and put it on a competitive basis with other high producing areas," says McHaney.

Mr. and Mrs. Earl McNeill, Marie and Alice spent Thanksgiving day with Miss Betty McNeill in Wichita Falls.

Mr. and Mrs. Lee Haymes visited with relatives in Big Spring and Odessa over the holidays.

for ourselves, and goin' to Washington for help tops the list.

Yours faithfully,  
J. A.
