

Kracker Krumbs

Odd Bits Salvaged
at Random

We get amused as some of the silliest things—women's hats for instance.

k-k

When we get our giggle-box all upset over some woman's hat, our wife usually says kinda apologetically, "Don't pay any attention to him. The only way I know he notices I have a new hat is when he laughs about it."

k-k

We get amused, too at those ornaments that are pinned through or clipped to the ladies' ear lobes. We sometimes get amazed, rather than amused, as the way those things keep becoming larger and larger. Used to be they were tiny things that dangled from the ear and sometimes with a "little gem" that would glisten in the sunlight. Now some of them almost as big as a cowboy's belt buckle.

k-k

Our amusement reaches the climax, though, when a fair lady hears the telephone ring and goes to answer it. With one hand she reaches for the receiver, with the other she reaches up and snatches off said ear ornament so the receiver will fit more comfortably to the ear.

k-k

But such is the style, and it's even more amusing what the fair damsel will endure for the sake of style.

k-k

Lots of column writers expound the virtues of newspaper advertising, but here's one we picked up recently that draws a picture we've never seen before:

k-k

"To me a merchant who won't do a justifiable amount of advertising because he thinks it is costing him too much is like a farmer who won't dig a few feet for water that would save his crops because it would cost him a few dollars, when in the long run it would pay him hundreds. Now I don't think there are any farmers who would be that foolish, especially if the water they were sitting over was good water."

k-k

And speaking of advertising, we think some people advertise some things too far ahead of time. Why, just last Monday we picked up a daily paper and noticed where a neighboring town was already advertising that Santa Claus is coming!

k-k

Here in Munday, most merchants seem to think their Dollar Day advertising helped business—especially since it was the first time for the event to be held on a larger scale. We know one thing—we saw more cars and people in town last Monday than we have during the first of the week in a long, long time.

k-k

Heard a familiar question asked last Monday, but it was the first time we'd heard it in several months. "Are you going to the football game Friday night?" "Oh, you know it!" was the reply. The beginning of school, beginning of the football season, etc., marks the beginning of a busy season for lots of people, especially students—maybe there are a few who were not ready for school's opening, but once they get into the scheme of things, we reckon most of them will be happy.

k-k

The flare-ups we've had in Texas and Tennessee over enrollment of negro students in the schools may not be according to law and order, but to us they prove one thing—the South is not ready for integration, yet.

k-k

The Labor Day week end was more than a holiday period for lots of people. It was a time of smashing autos, death and destruction, injured people and sorrowing relatives. Sometimes we think we're lucky to be living in a small town that doesn't close shop on every holiday, giving its people freedom of the highways and inviting them to participate in this mass killing.

k-k

Texas, it seems, led the nation in traffic deaths. Yes, we Texans do things in a big way—even to besting every other state in dealing death by auto!

J. B. Morgan of Copeville visited his sister, Mrs. J. B. Bowden, last week.

Knox County Hospital Notes

Patients in the hospital on Monday, September 3:

E. R. Hobert, Munday; Mrs. Rosa Wilson, Knox City; Mrs. R. A. Shaver, Rochester; Mrs. R. L. Headrick, Benjamin; Ricardo Balderaz, O'Brien; Mrs. C. H. Herring and baby, Munday; Mrs. Olene Browning, Knox City; Mrs. F. E. Walker, Knox City; William Condon, Knox City; William Harper, Knox City; C. O. Scott, Munday; Mrs. S. E. Robertson, Munday; Mrs. N. M. Howery, Goree and Mrs. Rebecca Kilcrease, Benjamin.

Patients dismissed since Monday August 27, 1956:

Mrs. S. P. Keny, Knox City; Jack Richardson, Vera; Geo. Segor, Haskell; Mrs. Sam Ferguson, Knox City; Mrs. Mike Hernandez and baby, Munday; Mrs. Anna Kuehler, Munday; Mrs. Trevina Rodriguez, O'Brien; R. D. Parker, Knox City; Mrs. Opal Smith, Knox City; Trine Zamora, San Antonio; Cathy Casey, Rule; Mrs. Manuel Lopez and baby, Corpus Christi; Mrs. Ed. Howeth and baby, Munday; Mrs. Clyde Covey, O'Brien; Mrs. Joe Sokora, Munday; Fred Glover, Benjamin; Steve Conner, Benjamin; Mrs. M. J. Wallace and baby, Munday; J. C. Morton, Goree; Jane Lopez, Munday; Mrs. J. F. Adcock, Truscott; Maria Torres and baby, Lockart; Manuela Barrientos, Sagerston; Mrs. Otis Frazier and baby, Abilene; Mrs. J. C. Koenig, Goree; Mrs. L. L. Kegley, Munday; Jim Blanchamp, Rochester and N. E. Hodges, Benjamin.

Births:
Mr. and Mrs. M. Torres, Lockhart, a daughter; Mr. and Mrs. C. Wallace, Munday, a daughter; Mr. and Mrs. Ed Howeth, Munday, a daughter.

Yarborough Won't Contest Election

Ralph Yarborough announced on Tuesday he would not contest Price Daniel's apparent victory in the August runoff primary for governor of Texas.

The statement said Yarborough, trailing by 3,343 votes in the latest unofficial count, did not intend to file a contest in the race, indicating the involved expensive contest procedures with resulting delay make such a course too impractical to pursue. Daniel is expected to be certified the Democratic nominee at the State Democratic meeting on September 10.

There were some indications that Yarborough, as well as Atty. Gen. John Ben Sheppard, might enter the race of U. S. Senate. Daniel will likely resign as senator within the next few days.

N. F. L. A. To Held Stockholders Meet On Saturday Night

The annual stockholders' meeting of Baylor-Knox N. F. L. A. will be held at Seymour Park next Saturday night, it was announced Tuesday by S. G. Cobb, Jr., secretary-treasurer of the association.

The meeting will open with a business meeting at 6 p. m. Saturday, to be followed with a barbecue supper and entertainment.

Mrs. Florence Low has assumed her duties as head of the new coordinated Department of Home Economics for research and extension on the campus of Texas A. and M.

Cotton Harvest Now Under Way, As Ginners Report Good Grade, Staple

A number of transient laborers have come into the Munday area for the 1956 cotton picking as well under way on most farms.

Two gin plants of Munday have been operating rather steady during the past week; however, only one of the three plants at the Farmers Co-op Gin had been in operation through the first of this week.

Ginners report that most of the cotton gathered has been grading good. Seventy-five percent has a staple of one inch and better. Dry land cotton grades strict middling, light spot, one inch or better. Most irrigated cotton is strict

C. A. Reagan, 74 Retired Farmer Passes Monday

C. A. Reagan, 74, resident of this area for half a century, passed away at 3:15 p. m. Monday at the Knox County Hospital. He had been in declining health for some time.

Born in Mississippi on July 8, 1882, Chester Author Reagan, was 74 years, one month and 25 days of age at the time of his death. He had resided in the county for 50 years and was engaged in farming until his retirement several years ago.

Funeral services were held from the First Baptist Church in Munday at 4 p. m. Tuesday, with the pastor, Rev. Robert H. Lloyd, officiating. Burial was in Johnson Memorial Cemetery with the McCauley Funeral Home in charge of arrangements.

Serving as pallbearers were Roddy Griffith, Hebert Stodghill, L. C. Guinn, Jr., Wilkie Guinn, Jerry Guinn and Donnie Yandell. Mr. Reagan is survived by his wife, Mrs. Maude Reagan of Munday; three sons, Leon Reagan of Spur, Author A. Reagan of Long Island N. Y., and J. C. Reagan of Dickens; three daughters, Mrs. W. D. West of Sycamore, Mrs. Chester Lain and Mrs. Ralph Cybert, both of Munday; 14 grandchildren and one great-grandchild.

Oil Activities

During the past week Ted A. Norwood et al spotted the No. 1 P. Wallace as a 2200-foot wildcat six miles southeast of Munday.

H. A. Rose and Burton E. Ellis of Fort Worth reported two completions in the Goree field, two miles south of Goree. The No. B-1 Joe Maloney pumped 42 barrels of 36 gravity crude per day from perforations at 1688-72 feet. Hole was bottomed at 1717 feet. The No. B-2 Maloney pumped 48 barrels from pay perforated at the same depth with total depth at 1721 feet.

Another new wildcat six miles southwest of Munday is the I & L Development Co. and Hayden Farmer of Dallas No. 1 H. Nicholson.

Toward the end of the week Schulz and Brannan Drilling Co. et al spotted the No. 1 J. T. Offut, one mile north of Munday. Depth will be 1999 feet.

Shell Oil Co. has reported its No. 1 B. Coffman in the Goree Field flowed 236.95 barrels of 35 gravity oil in 12 hours. Flow was through 32/64 inch choke from pay perforated at 1714-31 feet. Total depth was 1801 feet.

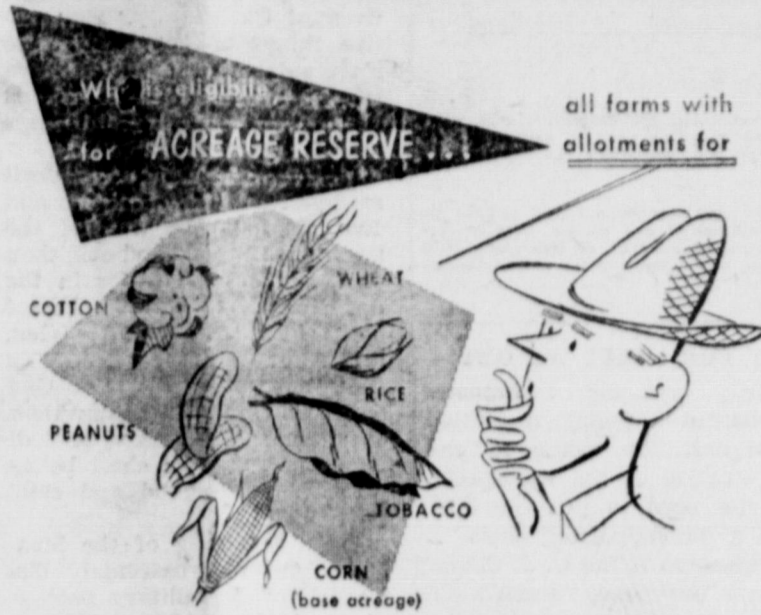

Soil Bank Program Will Be Explained

A special meeting for all farmers interested in the 1957 wheat acreage reserve program and the conservation reserve program will be held on Thursday, September 13, at 7:30 p. m. at the Munday elementary school.

Jesse Gilpin and members of the county committee will explain the 1957 wheat program, as well as the conservation reserve program.

All Knox County farmers and ranchers are urged to attend, as the deadline for application in the wheat program is September 21.

Miss Charlotte Hannah of Texas at University in Austin is spending the between semester holidays here with her parents, Mr. and Mrs. Leland Hannah.

All farms with acreage allotments for cotton, wheat, peanuts, rice and tobacco, or base acreages for corn, are eligible to take part in the Acreage Reserve of the Soil Bank. Farmers who participate will reduce their 1957 acreage of one or more of those crops below the allotment or corn base. All farmers who wish to participate in 1957 should work out their plans with the County Agricultural Stabilization and Conservation Committee, the U. S. Department of Agriculture announces. Payments will be made to compensate farmers for loss of net income resulting from crop acreage reduction. These payments will be based on normal crop yield for the reserved land, as determined by the County ASC Committee. Farmers may leave this land idle, or apply soil or water conservation practices on it. This land cannot be cropped or cut for hay during 1957 calendar year, and may not be grazed unless the Secretary of Agriculture determines an emergency exists. Farmers also may participate in the Soil Bank's Conservation Reserve for which all farm land regularly used to produce crops is eligible.

George Zeissel Tours 14 States On Trip With Son, Philip And Family

George Zeissel left Munday on August 16 for Austin, where he joined his son and family on a vacation trip.

On the 18th, they traveled through Louisiana to Jackson, Miss., where they visited relatives of the Philip Zeissels for two days. On August 21, they continued their journey, stopping for a tour of the famous Ave Maria Grotto in Cullman, Ala. From there they traveled through the northwestern part of Georgia, into Tennessee, then traveled through the Great Smoky Mountains of North Carolina, arriving in Washington, D. C. on the afternoon of August 23.

They visited more of Philip's relatives for three and one-half days and toured interesting and historic places in Washington, such as the national capitol, White House, Mount Vernon, Smithsonian Institute, Tomb of the Unknown Soldier, and many other places of interest.

They left August 27 for Belleville, Ill., traveling through Shenandoah National Park in Virginia, through West Virginia, Kentucky and Indiana. After leaving Belleville, Ill., they traveled through Missouri, visited Silom Springs, Ark., where George lived during 1918-19, then through Oklahoma, arriving in Munday on August 30.

The Philip Zeissels visited in Munday and Knox City until Sunday evening, then returned to Austin, completing their 4,000-mile journey.

HEBISON DAUGHTER BORN AT CROSS ROADS

Mr. and Mrs. Uyen Hebison of Cross Roads, N. M. are announcing the birth of a daughter on Wednesday, September 5, 1956 at 8:00 p. m. She made her arrival at the Portales, N. M. hospital. The little lady has been named Della Jane and weighed 7 pounds and 11 ounces. Mother and baby are doing fine. Paternal grandparents are Mr. and Mrs. W. L. Hebison of Cross Roads, N. M. Maternal grandparents are Mr. and Mrs. Earl Nichols of Littlefield. Great-grandparents are Mr. and Mrs. Harvey Hill of Munday. Mrs. Hill is very proud of her little namesake. Mrs. Hebison is the former Jane Nichols.

MOVE TO ROSWELL

Mr. and Mrs. L. H. (Hub) Ford left the latter part of last week for Roswell, N. M., to make their home. Mr. Ford will follow the carpenter trade there.

Weather Report

For Senate

Jim Hart, former Texas Supreme Court judge, has announced he will run for the U. S. Senate when and if a vacancy is created by the resignation of Price Daniel.

Hart, 51, is former chancellor of the University of Texas and is now a practicing attorney in his home town of Austin. He pledged support of the nominees of the Democratic Party and said he will cooperate fully with his fellow Democrats in Congress.

Gene Harrell Family Moves To Portales

Mr. and Mrs. Gene Harrell and children left the latter part of last week for Portales, N. M., to make their home.

Mr. Harrell, who has been associated with his father E. W. Harrell, in the Harrell Motors, has accepted a position in the comptroller's office of Eastern New Mexico University. He took up his duties last week, and Mrs. Harrell and children left Sunday to join him in Portales.

Mr. and Mrs. A. H. Mitchell were visitors in Dallas and Houston during the week end. Mr. Mitchell attended the bedside of his mother, who underwent major surgery in a Houston hospital, then remained in Dallas the first of the week for treatment for his sinus infection.

Mrs. T. G. Bengue was a visitor in Abilene last Sunday.

Vegetable Growers To Hear Specialists On Forming Of Marketing Association

Plans are going forward toward forming a marketing association for marketing vegetables grown in this area in the future.

A meeting will be held at 8 p. m. Tuesday, September 11, at the Production Credit Association office, at which time M. C. James, marketing specialist of Texas A. and M. Extension Service, will speak on the subject.

C. E. Boles of the Federal Intermediate Credit Bank of Hous-

Wheat Acreage Reserve Is Open To All Producers With Regular Allotment

Moguls Open Season Friday With Rotan Team

Moguls fans and followers will see the local team in action for the first time next Friday night, when they journey to Rotan for their opening game of the season against the Rotan eleven.

Coaches Stewart and Spann have been holding regular practice periods for several weeks, whipping the Mogul team into shape for the 1956 season. Comparative strength of the local team will probably be shown Friday night, but prospects seem bright for a good team this year.

This will be a non-conference game. The Moguls have four games scheduled before they enter the tough conference play, their first district game being against Paducah on October 5. Munday's first home game will be with Throckmorton on September 28.

Local fans are also getting primed for an exciting football season, and many of them will follow the Moguls to Rotan next Friday night.

Notes From Knox Farms, Ranches

By Roy England,
Knox County Agent

The Knox County Gilt Show will be held Saturday, Sept. 8th, at 10:00 a. m. at the Vegetable Cooperative Shed in Munday. This show is a continuation of a program promoted by the Sears-Roebuck Foundation whereby each year eight 4-H Club members are awarded a registered Duroc gilt pig. In return, these 4-H members agree to raise a litter of registered pigs and return one gilt to the program, thus continuing the program in perpetuity. In addition to the gilts, one boy is awarded a registered boar pig and agrees to furnish free boar service to each of the eight members receiving gilts.

The Sears Foundation also furnishes cash prizes for the county and area shows as well as for an area heavy litter contest.

The county champion gilt, to be named Saturday, and the county boar, owned by David Albus of Rhineland, will journey to Iowa Park on Sept. 15th to compete with other county winners in an Area Contest.

This year Knox County will have only seven gilts competing, due to the bad luck of losing one of our gilts to the summer heat during August.

Mr. Roy McClung, County Agent of Baylor Co. will judge our county show promptly at 10:00 a. m. Saturday.

Mr. M. C. Jaynes, Cooperative Marketing Specialist for the Texas Agricultural Extension Service, will meet with members of the Munday Vegetable Producers Cooperative Tuesday, Sept. 11, 1956 at 8:00 p. m. in the High School Auditorium in Munday to assist them with their organizational plans.

ATTEND BAPTIST W. M. U. HOUSE PARTY

Mrs. Clovia Winchester, Miss Jo Ann Winchester, Mrs. M. H. Reeves, Mrs. Cecil Gulley and Mrs. Verne Frost attended the Baptist W. M. U. house party at Waco last week. They reported a very enjoyable and inspirational meeting.

GOREE MAN PLAYING IN ARMY FOOTBALL

Pfc. Billy R. Weir of San Francisco, Calif., telephoned his parents, Mr. and Mrs. Oran Chamberlain of Goree, recently that his football club won their game with San Quentin 18 to 6. Weir, who is co-captain of the team, plays fullback.

Pfc. Weir is serving with the U. S. Army and is with the anti-aircraft artillery. He received his promotion to pfc. on August 16, 1956.

Any producer who has a regular wheat acreage allotment may take part in the Soil Bank's Acreage program for the 1957 winter wheat crop, Robert Shrauner, chairman of the Texas Agricultural Stabilization and Conservation Committee, said today. Producers on farms which receive an allotment as a "new farm" for the 1957 wheat crop, however, are not eligible for participation in the 1957 Acreage Reserve program.

Payments under the program will be made for reducing the acreage of winter wheat below the amount of the allotment, designating in a written agreement a specified part of the allotment acreage as acreage to be "reserved" from production. Land so designated may not be cropped or grazed for the period of the agreement.

The rate of payment for wheat acreage placed in the Acreage Reserve varies by counties. The amount of the payment will be based on the normal yield for the farm or the normal yield for the designated acreage, whichever is the smaller.

The Acreage Reserve agreement must be signed not only by the farm operator, but also—if the operator is a share tenant—by each person who as owner or landlord has control of the Acreage Reserve land or who is to receive compensation under the agreement. Provision is made for properly protecting the interests of tenants and sharecroppers under the program.

Chairman Shrauner explained that farmers may designate as much as 50 percent of their allotment or 50 acres, whichever is larger, for inclusion in the wheat Acreage Reserve. However, the wheat acreage designated for the Acreage Reserve may not exceed the wheat allotment. The minimum acreage which the farmer may designate for the Acreage Reserve is 3 acres or the wheat allotment, whichever is smaller. If any winter wheat is grown on the farm this fall, September 21 is the deadline for signing agreements to place 1957-crop wheat acreage allotment under the Soil Bank's Acreage Reserve.

Water Storage Facilities Said To Be Inefficient

Following a visit of engineers from the Fire Insurance Division, Board of Insurance Commissioners to inspect Munday's fire protection facilities, Mark Wentz, commissioner, stated in a letter to city authorities that our storage facilities are insufficient to warrant further reductions in the key insurance rate. The letter said in part:

"Your present ground storage reservoir facilities are 66 per cent deficient in capacity, and in order to avoid the present penalty charged in your key rate for this deficiency we recommend the construction of a 250,000 gallon ground storage reservoir.

"The present elevated tank is rather small and a deficiency of 55 per cent plus is now in order. To avoid the charge for this deficiency we recommend the installation of an additional 100,000 gallon elevated tank on a 100-foot tower to the bottom of the tank."

Similar letters have been sent to other towns in the area pointing out the deficiency in water supplies.

The city has taken steps to restore a 2 per cent credit on an arson reward ordinance by placing 8x12 placards in six public places within the city.

Drive carefully. The life you save may be your own.

GOREE MAN PLAYING IN ARMY FOOTBALL

Pfc. Billy R. Weir of San Francisco, Calif., telephoned his parents, Mr. and Mrs. Oran Chamberlain of Goree, recently that his football club won their game with San Quentin 18 to 6. Weir, who is co-captain of the team, plays fullback.

Pfc. Weir is serving with the U. S. Army and is with the anti-aircraft artillery. He received his promotion to pfc. on August 16, 1956.

PREVENTIVE MEDICINE STRIDES FORWARD

There are, broadly speaking, two kinds of medicine. The one with which we, as patients, are familiar is that which works to correct a specific illness. The other is preventive medicine. Its purpose, as the name implies, is to see to it that we don't become ill. And the progress made in this all-important field in the last half century has been little short of miraculous.

Writing in the Journal of The American Medical Association, Dr. James Watt says: "While literally thousands of cases of malaria were seen each year in my home state when I was a child, today there are virtually none. If the diphtheria mortality rate of 1900 prevailed today, there would be over 60,000 deaths a year. In 1950 there were actually 410. According to rates of 1900, there should now be over 45,000 deaths from typhoid; actually in 1950 there were 114. Similar figures could be given for other major communicable diseases." Now the medical fraternity is battling the diseases and afflictions which have not yet been defeated.

It is worth noting that preventive medicine has suffered most in countries where medicine is either socialized or controlled by government. Writers on England's national health system have pointed to this. Doctors in such countries are often overworked. They lack the time for study, experiment, and research. And the bureaucrats who make the rules and issue the orders have small interest in projects which may not produce results for long periods of time.

Progress in medicine—like all progress—flourishes in an atmosphere of freedom, and withers in an atmosphere of coercion.

ECONOMIC ILLITERATES

The odds are overwhelming that you are an economic illiterate. So writes Sylvia Porter, the well-known financial columnist. The reason for her indictment is this: "You're among the less than 5 per cent of all high school graduates in our land if you had even one semester course in economics."

Miss Porter recommends that economics be a required course in every high school and in the first two years of college. We live in a society which is dominated by economic considerations. As workers and consumers we make economic decisions every day of our lives. The failure of the schools in this respect must be remedied.

WE SHOULD PAY FOR WHAT WE GET

No less an authority than the Postmaster General recently applauded a policy resolution made by a business organization, calling it "one more dramatic demonstration of the widespread popular approval of the need to put the Post Office Department on a self-supporting basis."

The organization in question is the U. S. Chamber of Commerce. And the policy declaration, passing by some 4,000 delegates attending the Chamber's 1956 business meeting, reads: "Rates on fourth-class mail should at all times yield the Post Office Department revenues sufficient to cover the full cost of the service. Costs of services performed for the Post Office by other government agencies should be added to postal costs"

The fourth-class mail classification covers the parcel post service. And the recommendation made by the Chamber, and approved by the Postmaster General, is identical to that made by the Hoover Commission in 1955, after a thorough survey of parcel post over the years since its inception. The Commission found that the service has been heavily subsidized, in both direct and indirect ways—which simply means that taxpayers who do not use parcel post still pay a part of the cost which should be wholly born by those who do use it.

Putting parcel post on a self-sustaining basis would penalize no one. It would just follow the sound principle that we should pay for what we get.

RIGHT-TO-WORK IN KANSAS

The Republican gubernatorial primary in Kansas was hard fought. A dominant issue was the right-to-work law—the law which provides that a man can join or not join a union if he so chooses, and that he shall have the right to work at his trade in either case.

In this Kansas primary, the incumbent governor opposed the law. He was beaten by a man who supported it.

Long ago, the indefensible practice followed by some employers of blackballing union members was outlawed. The practice of making a man join a union in order to support himself and his family is blackballing in principle and equally indefensible.

America today is in the death grip of taxation. Taxes are too high from top to bottom. Much too high. . . . T. Coleman Andrews, Former U. S. Commissioner of Internal Revenue.

WHAT DOES THE BIBLE SAY?

When God Says No
"Thou shalt not" is of frequent occurrence in the scriptures, and it is as essential as any thing the Lord ever said. It is easy to overlook the negatives of Christianity. The positive things of the gospel are more outstanding than negative requirements. At least man is more impressed with the things he tell him not to do.

When God says no the devil says yes. God said to Adam and Eve, "But of the tree of the knowledge of good and evil, thou shalt not eat of it, for in the day that thou eatest thereof thou shalt surely die" (Gen. 2:17). But the serpent said, "Ye shall not surely die. For God doth know that in the day thou eatest thereof, then your eyes shall be opened, and ye shall be as gods, knowing good and evil" (Gen. 3:4-5).

Balak was king of the Moabites, and was extremely distressed by the military success of the children of Israel in overcoming the nations they encountered as they journeyed toward Canaan. Balak was a servant of the Lord, but Balak regarded him as a time saver. He thought that Balak would curse God's people for money and honor. Balak's messengers went to

Balaam with the reward of divination in their hands, and delivered unto him the message of Balak.

Balaam lodged them overnight, promising to answer them in the morning. That night the Lord said to Balaam, "Thou shalt not go with them" (Num. 22:12). This answer should have the end of negotiations. The Lord said no, why did Balaam not say no and stay with it?

Balak sent other messengers to Balaam—more honorable and with greater reward. The king promised to promote him to great honor. Balaam had a plain answer from the Lord that should have been final. But he said, "Tarry here this night, that I may know what the Lord will say unto me more." He wanted the Lord to change his word. He was anxious to go, and the Lord let him go, with caution that should have kept him from going.

When God give men a plain commandment, they should not try to explain away its meaning—they should not try to see what the Lord "says more."

This is plain. "He that believeth and is baptized shall be saved." But the majority of men turn away from it to see what the Lord says more.

MUNDAY CHURCH OF CHRIST

BOX 211 — PHONE 6151

PAYNE HATTOX, Evangelist

The most wonderful sight I ever saw was the St. Louis World's Fair in 1904. I was quite young but so vivid were the impressions that many are still recalled.

It was there that I took my first automobile ride—in a sight-seeing car around the fair grounds. I tasted grape juice for the first time—also orange juice. Theodore Roosevelt was

president then and there was a statue of him—in butter. I visited many State buildings, filled with exhibits—usually the building was a replica of the Capitol of the State) and I marveled at the huge ferris wheel—instead of a little swinging seat holding two riders, there were compartments that looked almost as big as a box-cars.

Then there was a clock, flat on the ground, with huge hands, and the numerals were made of blooming flowers.

We (for, of course, my parents were there) visited on Igorote village. These semi-savages were from the Philippines. (This was not long after the Anineldo campaign.) They lived in thatched huts and the men wore almost no clothes. I remember one was gnawing meat off a bone and I

had the impression that the meat was raw.

Also we attended a spectacle reproducing scenes of the Boer War, which only a few years in the past. In the cast were several who had fought in that war. The only action I can specifically recall was a soldier leaping through a window on a horse—a feat actually performed in the war by the man who reenacted.

Another exciting attraction was a Coast Guard demonstration on which a harpoon was fired to get a rope to a "distressed" ship and then the crew members slid to safety in a breechesbuoy.

Then there was a ride in which persons slid down a chute in a boat into a lake.

The sight that etched itself the deepest in my memory was the night scene with the fountains leaping, cascades flowing and huge buildings aglow with many colored lights.

Dr. and Mrs. John Wiggins and children were week end guests of Mr. and Mrs. J. Weldon Smith and children and Mr. and Mrs. M. L. Wiggins.

Legal Notice

NOTICE TO BIDDERS

The City Council of City of Munday, has determined that it is advisable to lease for oil, gas and mineral development certain lands owned by said City of Munday, described as follows:

First Tract: Being out of and a part of the Samuel Washburn Survey, and described as follows: BEGINNING at the SE corner of the Craft, subdivision of said Survey; Thence East 1075 varas to corner; Thence N 57 Deg. 11' W 1282.2 varas to corner, this call running on S. B. L. of highway; Thence S 702 varas to the place of beginning, containing 67 acres of land.

Second Tract: Being also out of and a part of the Samuel Washburn Survey, and described as follows: Beginning at the SE corner of a tract land allotted to Katherine Cartwright in the partition of the W.A. Cartwright estate, dated May 12, 1939, and of record in Volume 78 at page 209, Deed Records of Knox County, Texas; Thence N 712 varas to corner; Thence E 327 varas to corner, said point being the SE corner of a tract in the name of Mullins; Thence 920 varas to a point in the N. B. L. of highway; Thence N 57 Deg. 11' W 389.5 varas, along the N. B. L. of said highway to the place of beginning, and containing 47.7 acres of land.

Third Tract: Being also out of and a part of the Samuel Washburn Survey, and described as follows: BEGINNING at a point 47.5 varas East from the SW corner of the W. A. Cartwright tract of land in said Washburn Survey, and said point being also the SE corner of the Craft 700 acre tract; Thence East 315 varas to an iron pin in the S. B. L. of the aforesaid Cartwright tract, said point being 109.5 varas West from the NE corner of the North one-half of tract No. 6, in the Branch partition; Thence S 385 varas to an iron pin for corner; Thence W 250 varas to an iron pin for corner in fence lines; Thence N no Deg. 53' E with said fence line 285 varas to an iron pin for corner; Thence N 20 Deg. 7' W continuing with fence line 44.5 varas to an iron pin for corner at root of a 4" mesquite, set on east side and against tree; Thence N 69 Deg.

Weekly Health LETTER

Issued by Henry A. Holte, M. D., State Health Officer of Texas

AUSTIN—State Health Department laboratory personnel this week launched a three-year study of Chagas disease, a rare but potentially dangerous disease entity in Texas, State Health Commissioner Henry A. Holte announced today.

Dr. Holte said the study, which began September 1, is being supported by a \$10,000 research grant from the National Institutes of Health. It will run an estimated three years.

Dr. R. B. Eads, chief of the department's entomology section, will be the principal investigator. The study will concern the en-

tire state but will be mostly confined to Gulf Coast regions, the commissioner said.

Only two human cases of the disease have ever been reported in the United States—one from Corpus Christi and one from Houston. Both occurred last year. Why more cases haven't developed has long been a matter of puzzlement, since six species of the transmitting bugs in Texas have been found to be naturally infected.

The affliction is transmitted by various species of reduviid or triatomina bugs, commonly called kissing bugs, giant bed bugs, blood suckers, or assassin bugs. Dr. Eads invited the public to participate in his investigations by sending bug specimens to him at the State Health Department laboratory in Austin.

"We'll examine them as a means of determining the geographic distribution of the infection," Eads said.

He said also that the laboratory was maintaining a colony of triatomina bugs and that specimens would be supplied on request to private physicians interested in xeno-diagnosis of acutely ill patients suspected of having Chagas disease.

The malady has been of considerable concern in regions of Central and South America for many years, the health authorities said. It first vaulted into prominence as a public health threat in Texas in 1939 when Dr. Fackchanian of the University of Texas Medical Branch discovered natural infection in a high percentage of the bugs captured in a house in Three Rivers.

A subsequent investigation by health officials showed that Texas has at least six species of the bugs capable of harboring the natural infection. The reservoir of the causative organisms, known scientifically as "trypanosomes," are mammals of various species. Most prominent reservoir in Texas are said to be wood rats, armadillos, opossums, and house mice.

The infection is transmitted, investigations have shown, in the dejecta of infested bugs. Experience in South America has shown that young children are most usually attacked.

Eads said his study would consist chiefly of cataloguing various species of bugs, subjecting them to laboratory tests for infection, and searching for mammal hosts of the causative organism.

Mr. and Mrs. Guindell Ritchie and son of Wichita Falls visited her parents, Mr. and Mrs. Omar Cure, and with his parents in Vera last Sunday and Monday.

Kenny Foundation Broadens Work In Treatment, Research Fields

Minneapolis, Minn.—Scientists, professors and department heads of leading medical schools across the country are cooperating in the expanding medical program of the Elizabeth Kenny foundation, according to Marvin L. Kline, national executive director.

The program, he explained, includes medical research, and the sponsoring of fellows and medical seminars and scholarship grants. The medical research program which the Kenny foundation is sponsoring at its own treatment centers and a number of universities across the country is not limited to a field of spolio, but includes other neuromuscular disorders of various kinds, he asserted.

"Included on the medical advisory committee and planning committee set up by the Kenny foundation to help provide greater service," Kline said, "are doctors who are affiliated with the various departments of the following schools:

"University of Minnesota, Minneapolis, Minn.; Stanford university, Palo Alto, Calif.; University of California, Los Angeles, Calif.; New York university, New York City, N.Y.; Columbia university, New York City, N.Y.; Ohio State university, Columbus, Ohio; Baylor university (hospital), Dallas, Texas; Mayo clinic, Rochester, Minn.; College of Medical Evangelists, Los Angeles, Calif.; McGill university, Montreal, Canada; Washington university, St. Louis, Mo.; University of Wisconsin, Madison, Wis.; University of Michigan, Ann Arbor, Mich.; University of Illinois, Urbana, Ill.; Herman hospital, Houston, Texas, and Marquette university, Milwaukee, Wis.

"The Kenny foundation's expanding rehabilitation program offers help to persons of all ages who have nerve, muscle or joint disabilities which our medical staff believes may be lessened by such treatment."

The program of the Kenny foundation is made possible through funds contributed by the public.

FLOOR STOCKS TAX DUE BY OCTOBER 1

Business firms subject to the new floor stocks tax on products included in the recently passed Highway Act may now obtain copies of Form 2265 from the Internal Revenue Office at Wichita Falls, Administrative Officer C. B. Dixon said today. Returns, with payments, are due by October 15.

Increased taxes are levied on floor stocks of the following items on hand as of last July 1: gasoline; tires of the type used on highway vehicles; truck, bus and trailer chassis and bodies, and tractors. A new tax was imposed on tread rubber of three cents a pound.

An instruction sheet accompanies the new form, Mr. Dixon said. It explains and defines inclusions and exemptions in the products listed as taxable on the form itself. Taxing taxes called for under the Highway Act will be paid as part of regular quarterly excise tax returns. A 16-year road-building program to cost about 33 billion dollars will be financed by the taxes set forth in the new act.

Two million copies of the form were printed to meet the needs of affected business. Of these about a third are being distributed directly by trade associations and manufacturers, with the remain-

ing two-thirds to be available through district revenue offices. Returns and payments should be made payable to the Internal Revenue Service, Mr. Dixon reminded business firms.

College Graduates Dominate Reese Pilot Training Class

College graduates again dominate figures in Class 57-H, recently arrived for basic multi-engine pilot training at Reese Air Force Base, Col. Dross Ellis, base commander, announced Tuesday.

The class contains 45 student officers, four of them from Korea, and 34 aviation cadets, five from Cuba and two from Nicaragua. United States officers are all college graduates, except one man who lacks a few hours of a degree. One of the United States cadets is a college graduate, 19 others have been to college but have not degree, and 14 are high school graduates who received no further formal education.

Twenty-six states are represented. California has six officers and one cadet, while Massachusetts has six cadets and Ohio has three officers and a like number of cadets. One officer calls Monday, Tex., his home. Thirty-eight officers are ROTC graduates, Second Lt. Billy Brown received his bachelor of science degree and an ROTC commission in 1955.

The students came to Reese AFB from primary pilot training schools at Marana Air Base, Ariz.; Hondo AB, Tex.; Stallings AB, N. C.; Graham AB, Fla.; and Malden AB, Mo.

Humble is **FIRST** again! Humble is first among petroleum marketers in Texas to provide this newly designed, all-plastic Humble-matic credit card holder to its customers.

CARD SLIDES IN

it's thin

it's light

it's speedy

it's accurate

Something NEW for Humble Customers!

Humble credit card customers will soon receive a *new* all-plastic credit card holder that's thinner, lighter, more compact, more durable, more flexible and easier to carry and handle. This new credit card fits right into your wallet or purse.

In the Humble-matic printing device, your name and credit card number are printed in big, bold type that reduces the chance of an error to a minimum—and it does it in a second!

This new plastic credit card holder is typical of the conveniences that Humble provides its customers—Humble-matic printing to cut time in the station and to assure accuracy of the charge; interchange arrangements under which Humble's customers may charge their purchases when they travel beyond Humble's marketing area into every other state and Canada; a system that checks each invoice several times for accuracy before a statement is mailed; duplicate cards for family or business use are issued when needed.

HUMBLE OIL & REFINING COMPANY

HUMBLE

Push-button housekeeping?

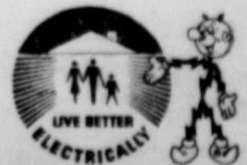

Plenty of electricity can make your home of the future a house of marvels! From a central control panel, you may be able to wash your dishes, raise and lower windows, control the lighting in every room—even make your beds!

To really live electrically, you'll need much more power—and it will be there waiting. America's more than 400 independent electric light and power companies are planning and building now for years ahead.

Unlike federal government electric systems, these companies don't depend on tax money to build for your future. Carrying their full share of the tax burden, and operating with private capital, the West Texas Utilities Company and other investor-owned electric companies will provide the dependable, low-cost electricity to help you Live Better Electrically.

In the future—as always—you will benefit most when you are served by independent electric companies like this one.

West Texas Utilities Company

NEWS FROM VERA

(Mrs. Thelma Lee Coulston)

Mrs. Ida Boone of Truth or Consequences, New Mexico, is visiting with Mr. and Mrs. Milton Ford and Mr. and Mrs. Clifford Roberson.

Mr. and Mrs. Cloyce Wolfe and children visited with his parents, Rev. and Mrs. S. A. Wolfe during the Labor Day week end.

Mr. and Mrs. Ike Sweatman of Bryson visited with his sister, Mr. and Mrs. Ed Allen last week end.

Mr. and Mrs. Joe Cox of Seymour visited last Friday with Mrs. Jim Roberson.

Mrs. Jake Welch is a patient in the Baylor County Hospital following another fall at her home on Sunday morning.

Mr. and Mrs. Edd Trainham of Holiday visited with their sons, Mr. and Mrs. Charles Trainham and Bobby last week end.

Ernest McGaughey and Nancy Allen of Abilene visited with relatives here Thursday and Friday.

Visiting in the Tom Russell home last week was their daughter, Mr. and Mrs. Mac Haymes and sons of Odessa.

Mr. and Mrs. Claudell Bratcher, Larry and Bert, were business visitors in Wichita Falls last Wednesday.

Mr. and Mrs. Gerald Russell of Crane spent the week end with his parents, Mr. and Mrs. Ted Russell.

Mr. and Mrs. Jerrell Trainham of Wichita Falls visited over the holidays with his parents, Mr. and Mrs. Wesley Trainham.

Mr. and Mrs. Plena Hardin were visited by the son, Mr. and Mrs. Ronald Hardin of Brownwood, over the week end.

Visiting in the homes of Mr. and Mrs. Hershell Hardin and family and Mr. and Mrs. P. A. Hardin, last week end was the ladies' mother, Mrs. C. D. McWhorter and a brother, E. D. McWhorter of Lipan, Texas.

Mr. and Mrs. Dan McGaughey and Kathleen and Mrs. Morris McGaughey, Joe and Donna Jean of Los Angeles, Calif., visited last week with Mrs. J. N. McGaughey.

Mr. and Mrs. Pete Gabin and Mrs. Liza Barry and Imogene of Vernon visited recently in the Hershell Hardin home.

Benny Carl and Jim Frank Coulston, Mac Archer and Jimmie Couch of Seymour attended the Oil Bowl Football game in Wichita Falls last Friday night.

Mr. and Mrs. Cecil Trainham and Clark of Abilene visited over the week end with Mr. and Mrs. Jess Trainham.

Miss Jessie Myers and her mother, Mrs. Minnie Myers, are at home again in their apartments with Mrs. W. F. Rabe. Miss Myers will teach the fifth and sixth grades.

Mrs. J. A. Fuller and Mrs. Wesley Trainham attended the Knox County Home Demonstration Council in Benjamin on Friday.

Mr. and Mrs. George McKinney and family of Houston have been visiting in the home of his sis-

ter, Mr. and Mrs. Johnny Gore. Mrs. W. F. Rabe is home after spending the summer months with her daughter, Mr. and Mrs. Bob Dumnivant and three daughters in Athens, Alabama.

The Vera Methodist W. S. C. S. met in the home of Mrs. Olen Coffman on Monday afternoon at 3:00 p. m. Mrs. Coffman had charge of the program on Volcanoes in Southeast Asia. Five other women assisted her in presenting it. Following adjournment, lovely refreshments were served to the following: Mesdames Bobby Roberson, Arthur McGaughey, Jess Trainham, Bill Townsend, Clifford Roberson, Wesley Trainham, Tom Hurd, J. M. Roberson, J. D. Jefcoat, W. P. Hurd and the hostess.

Mr. and Mrs. Joe Ed Sweatt and of Wichita Falls visited over the holidays with her parents, Mr. and Mrs. Henry Patterson.

Holder Family Reunion During Last Week End

The annual Holder family reunion was held during the Labor Day week end in the farm home of Mr. and Mrs. Ben Holder, northwest of Goree.

A total of 178 relatives and friends registered. Musical round games, horseshoes and dancing were organized for the young people, while the other prepared meals and visited.

Families represented were Jerry Holder, Nathan Phillips, Bill Weber, Clarence Holder, B. R. Holder, J. H. Holder, Loyd Gardner, Billy Nichols, Jack Holder, Cordas Lambeth, Jerry Massey and Mr. and Mrs. Stoval of Wichita Falls.

Others registering were Mrs. Annie Nichols, Mrs. Ann Mitchell, Miss Vida Holder, Mr. and Mrs. Don Vines, Miss Charlotte Holder, Dan Shine, Mr. and Mrs. Ray Hargrove of Wichita Falls.

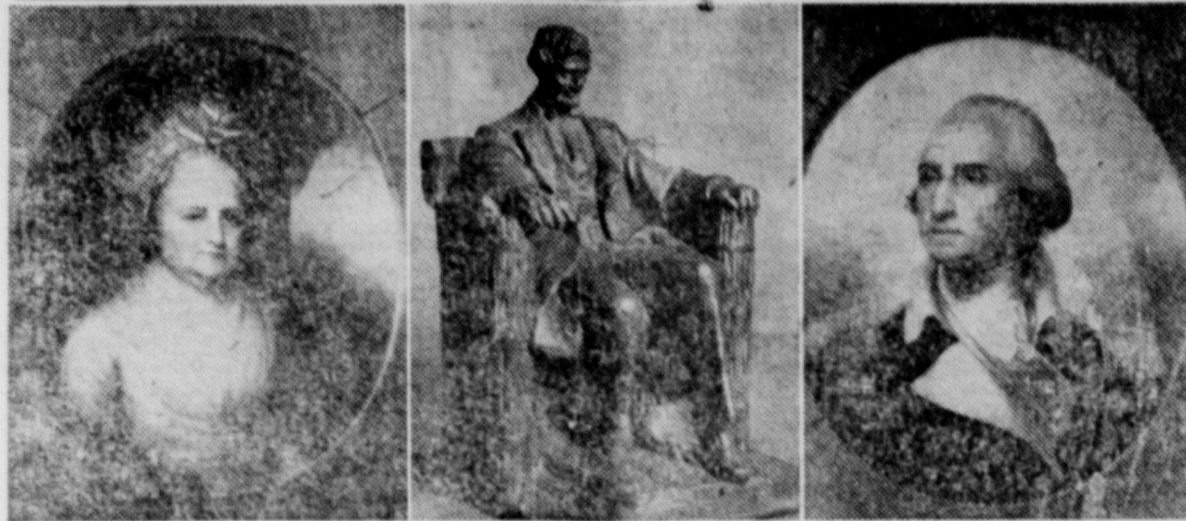

Mr. and Mrs. Ben Holder, Mr. and Mrs. Curtis Seals, Mr. and Mrs. Ruben Richards, Mr. and Mrs. Homer Lambeth, Mr. and Mrs. A. A. Brooks, Mr. and Mrs. Bob Lambeth, Mr. and Mrs. Ver-

nice Lambeth, Mr. and Mrs. F. Lambeth, Mr. and Mrs. Sam Hampton, Mr. and Mrs. Philip Struck, Mr. and Mrs. Lee Roy Brooks, Mr. and Mrs. Dave Jetton, Miss Emma Cooksey, Miss Nahwana Lambeth, Miss Evelynne Jacksbae, Tracy Jacksbae and Douglas Donake of Goree.

Mr. and Mrs. R. T. Holder, Mr. and Mrs. C. J. Williamson and Mrs. Bessie Freeman of Cleburne, Mr. and Mrs. Mike Parker, Mr. and Mrs. Joe Nasazrick of Seymour, Mr. and Mrs. Ray Barron, Mrs. Jimmy Frerich, Mrs. Gertrude Rodgers and Mrs. Irene DeLong of Graham, Mr. and Mrs. Charles Trainham, Bobby Trainham, and Miss Jan Richards of Vera.

Grady Brooks and Mrs. Bertha Rice of Lubbock, Mr. and Mrs. Glen Stovall and Mr. and Mrs. Charles Parker of Amarillo, Mr.

"Mr. President"—State Fair Art Feature

Portraits and sculptures of all 33 presidents of the United States and some of the nation's first ladies will be displayed by the Dallas Museum of Fine Arts in its "Mr. President" exhibition during the 1956 State Fair of Texas, Oct. 6-21. To be in-

cluded in the show are (above) the famous "Port-hole" portraits of George and Martha Washington, flanking the bronze model of "Lincoln Seated", from which the monumental statue in the Lincoln Memorial at Washington, D. C., was reproduced.

YOUNGSTERS' STYLES COPY THEIR ELDERES

Children's fashions for fall and winter are miniatures of styles in the adult fashion world.

The college girl is wearing cotton knit pullovers—and so is the kindergarten miss. The little school girl can copy her big sister and don knee length cable knit cotton socks to finish off her "grown up" look. The jumper is another style that rates high on the fashion popularity poll for style-conscious ladies, be they tots, teens, or otherwise.

Cotton corduroy is a favorite fabric of every age group and of both sexes. The small fry love printed corduroy in sophisticated "black watch" plaids like their elders wear. One manufacturer of children's wear has styled match-

ing suits for brother and sister in the rich tartan plaid corduroy.

The youngsters even have their own versions of the smart "car coat" in hooded poplin parkas.

Wrinkle-resistant cottons in both gay and muted plaids are popular with the grammar girl, as well as the glamor girl. Mothers especially like the colorful autumn cottons because they shed wrinkles easily and do not need much in-between pressing.

Any wheat producer who has a regular wheat acreage allotment may take part in the soil bank's acreage program for the 1957 winter wheat crop. Robert Shrauner, chairman of the Texas Agricultural Stabilization and Conservation Committee, has announced.

Rainfall Not Determined By Weather Cycles

Weather cycles don't mean a thing in making predictions of periods of "wet and dry" years.

And Munday area farmers and ranches can expect more years of below average rainfall than years above.

A study of rainfall records made at 31 locations on the High and Rolling Plains by Dr. R. J. Hildreth and Dr. Gerald W. Thomas of the Texas Agricultural Experiment Station show that cycles have little or no part in annual rainfall.

"Average or normal rainfall seldom occurs," Dr. Hildreth said. "The records indicate that farmers and ranchers in the High and Rolling Plains should figure more years—52 to 60 percent—will be below average in rainfall than years above average."

Records dating back to 1913 at Munday show more than half the years—56 percent—have had rainfall below the annual of 24.3 inches. Half the years had rainfall above 22.2 inches and half below.

"Using past records to predict the future, 10 to 20 inches of rainfall may be expected 34 percent of the time; 20 to 30 inches, 39 percent of the time; 30 to 40 inches, 24 percent of the time; and over 40 inches, 3 percent of the time, Dr. Hildreth added.

The seasonal distribution follows the usual pattern with peak rainfall in May and October. The highest average rainfall (3.6 inches) occurs in May and the lowest (0.9 inch) in January.

The study and publication of results—"Farming and Ranching

VACATION BOUND

Smartly dressed for auto travel, this pretty vacationer wears an Italian styled overshirt and trim contessa pants of vat dyed cotton gabardine by Gay Togs. The overshirt combines yarn-dyed, striped cotton gabardine with a solid color collar and slit side trim. The coordinated pants have a unique button trim over a concealed pocket and tapered legs slit at the bottom. The National Cotton Council reports that casual and practical cottons like these are favorite vacation fashions.

Risk as Influenced by Rainfall"—is the first of a planned series to include the Edwards Plateau, Trans-Pecos and Rio Grande Plain areas of Texas where drought also has severely affected farm and ranch income.

Couples Class Of Weinert Has Social August 28

The Couples Sunday School Class of the Weinert Baptist Church met at the roadside park north of Weinert on Tuesday night, August 28, for a social gathering and supper.

After a period of visiting and fellowship, members spread a supper of barbecued chicken, red beans, vegetable salad, cake and iced tea on one of the tables of the park. The following members and guests attended:

Mr. and Mrs. Toby Yates and children, Rev. and Mrs. Don Laing and daughter, Mr. and Mrs. Johnny Earp, Mr. and Mrs. Alfons Dunnam and son, Mr. and Mrs. Alton Sanders and son, Mr. and Mrs. Jay Cox and children, Mr. and Mrs. Vernon Ivey, Mr. and Mrs. Ray Overton, Jr., Mrs. Jack Therwanger, Diana Clark and Mr. and Mrs. D. L. Moody and sons.

Holiday guests in the home of Mr. and Mrs. Clyde Nelson were their daughter, Miss Ann Nelson, and two of her friends, Miss Mary Beth Kerr and Miss Alice Durpee, all of Dallas.

Choice Quality Always!

If You Don't Know Your Merchandise—Know your Merchant!

A steak, a straw hat, a cake or a car—no matter what you buy, you'll get a better deal when you patronize a business in your home community. Your local merchant is your friend and neighbor. FHA Loans Made Under Expanded Credit Program

September 1, all FHA county offices in Texas were ready to process applications under the new expanded credit regulations, State Director McKay advised.

The loans to refinance existing debts will be available until June 30, 1959 to owners of farms no larger than family-size. These loans will help farmers who have adequate real estate security and who are other wise in a sound position but who are unable to meet their present credit obligations and need credit on more favorable terms and conditions than is currently available from other lenders.

When debts are refinanced by the FHA the payments will be scheduled according to the ability of the borrower to repay. In the past, the agency has only refinanced existing debts when the refinancing was incidental to the making of a real estate loan for purchase or improvement of family-type farms. There is a limit of \$50,000,000 a year on the amount of this type of credit that can be extended on an insured basis.

Insured loans are made by the FHA from funds provided by private lenders. The loans will bear 3½ percent interest plus a 1 percent insurance charge.

Initial operating loans under the new law may be made in amounts up to \$10,000 to one borrower with a limit of \$20,000 on the amount any one borrower can owe for this type of credit. In the past the limit on the initial loan was \$7,000 with a \$10,000 limit on the total amount of debt that could be incurred. No more than 10 percent of the annual appropriation for operating loans can be used to make loans which would cause a borrower's indebtedness to exceed \$10,000.

The operating loans are used for the purchase of equipment, livestock, fertilizer, seed and other farm and home operating expenses needed to carry out efficient farming operations on family-type farms. The interest rate remains at 5 percent. For the fiscal year 1957, \$165,000,000 plus a contingency fund of \$15,000,000 to be used if necessary, has been appropriated for opening loans.

The increase in the maximum limits of these loans will enable the agency to serve farmers and ranchers in areas where heavy investments in machinery, live-

stock and farm operating expenses are necessary.

Operating loans are repayable over periods up to 7 years. Under the former law no new credit could be extended to borrowers who have been continuously indebted for 7 years. The new law increases from 7 to 10 years the period during which additional credit can be extended in hardship cases when the inability of the borrower to repay his indebtedness within 7 years is due to causes beyond his control.

Loans will also be available for operating and developing less than family-type farms, if the applicants are established bona fide farmers who have historically resided on farms and depended on farm income for their livelihood, and who are conducting substantial farming operations and spending a major portion of their time farming. Such operators must have dependable sources of outside income. The primary objective of these loans is to help farmers who live in areas designated for the Rural Development Program, who are unable to obtain enough land resources to develop full-time farms.

The interest rates and terms on these loans for operating and developing less than family-type farms will vary depending upon the purpose for which the loan is obtained. Loans for operating expenses will be repayable over periods up to 7 years at 5 percent interest. Loans for real estate development will bear charges of 4½ percent and will be repayable over periods up to 40 years.

These loans will only be made when the applicant's income from his farm and other sources appears adequate to enable him to meet living and operating expenses and to repay his debts.

These loans will only be made when the applicant's income from his farm and other sources appears adequate to enable him to meet living and operating expenses and to repay his debts.

The new act also extends until June 30, 1959, the authority for special emergency loans, and increases from \$15,000,000 to \$65,000,000 the total amount that can be advanced for these loans. Special emergency loans are made in areas designated by the Secretary of Agriculture to enable farmers Home Administration, will be made only to applicants who are unable to obtain adequate credit from other sources. With most types of loans supervision in the development and carrying

Boy Scouts to Get Out the Vote

The nation's 4,175,134 Cub Scouts, Boy Scouts, Explorers and their leaders, in cooperation with Freedoms Foundation of Valley Forge, are busy in a nonpartisan Get-Out-the-Vote campaign. One and a quarter million of these posters are being placed on display to remind citizens to register and vote. Just before Election Day, November 6, the Scouts will place Liberty Bell hangers on the doorknobs of 35,000,000 homes urging every citizen to vote.

out of balanced systems of farming will be provided.

MARKETING AND STORAGE TO FEEL EFFECTS OF SOIL BANK PROGRAM

Texas farmers will feel the effects of the soil bank program in their marketing and storage of basic agricultural commodities, primarily wheat and cotton.

Dr. Alvin B. Wooten, economist for the Texas Agricultural Extension Service, says "Grain elevators and cotton warehouses operate on a small charge per bushel or bale, depending on a large volume for their margin of profit. So, if the soil bank program is successful in lowering production then marketing firms storing and handling crops may expect an increasingly lower volume, thereby lowering their profit."

The soil bank program has as its major objective a reduction in the amount of wheat, cotton, corn, peanuts, rice and tobacco produced in the future. Many farmers will be affected by the reduced volume squeeze in their local cooperative marketing associations, too, Dr. Wooten added. Other farmers also will be affected because as volume drops storage costs per bushel or per bale warehouse firms will have to charge a higher rate to continue operation.

However, the considerable reduction in basic crops certainly should strengthen market prices. The soil bank adds to the cost for operating efficiency for both

marketing firms and on farms. The best management will have the best advantage. Many firms will find their volume insufficient for operation at a profit, Dr. Wooten concluded.

FARM MONEY-SAVING IDEA: SALVAGE WORN FLOORING OF WAGON

An old farm wagon or cart with a broken or splintered floor can be salvaged for a longer life! Cover the old floor with quarter-inch Masonite Tempered Presdwood. With this surface nailed to the floor, grain cannot trickle to the ground and be wasted. Farmers report that shoveling grain from the smooth surface lightens their work. The hardboard should be attached with 1½-inch casing nails spaced four inches around the edges and six inches within the panel.

LOCALS

Mrs. M. L. Joyce of Albany spent Tuesday with her mother, Mrs. J. B. Bowden. Johnny and Nena Russell returned home with her for a visit.

Recent guests of Mr. and Mrs. Joe Paterson were their daughters, Mrs. Gerald Doyle of Tell, and Mrs. Jimmy Rhame and daughters of Fort Worth. Mrs. Rhame and daughters visited two weeks returning Sunday with her

husband who was a week end guest. Mrs. Doyle visited one week and returned to her home Sunday with her husband, Rev. Doyle, who was also a week end guest in the Patterson home.

Sante Fe, N. M. The Deans also visited their daughter and family, Mr. and Mrs. Bill Rippetoe and Lubbock while on their vacation.

WINNER OF RANGE

Mrs. Eugenia Searcey of Munday was recently awarded a Wedgewood gas range which was given away at the Farmers Fair held in Hemet, Calif. Mrs. Searcey is visiting her daughter, Mrs. Harold E. Funk, in Hemet.

Sunday guests in the home of Mr. and Mrs. A. B. Warren were her mother, Mrs. J. W. Medley, and Mrs. Manuel Medley and children of Haskell

RECEIVES CATTLE

Deaton Moorhouse of Amarillo has received about 1,500 Angus calves during the past week at San Angelo, Brady, Mason and San Saba. He said weights have varied but averaged around 500 pounds.

Texas Underground Water Grows Short

An underground desert is in the making in Texas which may eventually swallow such cities and towns as Amarillo, Dalhart, Plainview, Lubbock and Muleshoe.

These population centers are located atop a vast formation of moisture-laden sands from which water is being pumped at a faster rate than nature can replenish it. The situation was created by nature and aggravated by man.

These sands of the Ogallala formation depend partly upon rainfall and the water and snow sheds of the Colorado and New Mexico mountains to replenish the underground flow. For several years, snow in these sister states has been insufficient to feed the formation at a rate greater than water usage.

The sand strata is thick in some places, thin in others. In some sections of the Texas Panhandle, the saturated thickness of sand is 50 and 60 percent less than a short six years ago.

The boom in irrigation on the High Plains sparked the increase in water consumption. Municipal supplies account for only about 15 percent of water withdrawals. Records show that of all water pumped since 1938, over 60% of it was used since 1950, due mainly to an expansion in irrigated acreages.

Irrigation cannot be called the "culprit", in this case, however. Rather, it is merely the victim of a natural situation—drought. Weather conditions have failed to keep our water supply in balance during a period of great demand by the farmer.

The lowering water tables are a matter of concern in other sections of the state, also. Natural springs in Central and South Texas are at their lowest ebb or have ceased flowing altogether for the first time in the history of white settlements.

Comal Springs in the San Marcos-New Braunfels area ordinarily flows about 317 cubic feet of water per second. Early this summer, the spring went dry for the first time.

Barton Springs in Austin, a natural water source that fluctuates rapidly with rains, was producing only 12 cubic feet per second in late August. Its usual flow varies between a maximum of 180 cubic feet to a minimum of 5 1/2 cubic feet according to seasonal changes.

Primarily, Texas' greatest need is rain—in the state and on the watersheds of the Continental

Divide. Secondly, the state needs comprehensive soil and water conservation measures which will keep the water in the vicinity which it falls.

Surface tanks, small check dams and storage in the small streams and rivers, coupled with soil conservation work in the fields will help save our precious water, and aid in replenishing the underground supply.

IT'S THE LAW
in Texas
A public service feature of the Munday Times

DOUBLE JEOPARDY

Most likely you can't picture yourself being brought into court on anything worse than a speeding violation. Nearly everyone feels that way. Even so, it is good to know that in this country you can't be made to stand trial twice for the same offense.

We have a provision in the U. S. constitution against "double jeopardy". That's one of the important safeguards in our system of law which makes it certain that once a court has reached a verdict of "innocent", the acquitted person may not be put on trial again for the same offense.

To add to the protection, if a person has been acquitted, the prosecution cannot appeal the case to a higher court. The constitution states specifically: "Nor shall any person be subject for the same offense to be twice put in jeopardy of life and limb."

This right holds good, however, only if a full trial is held and a verdict is reached. It is possible to face another trial on the same charge if the first trial ends with a "hung jury" or a "mistrial", or if a new trial is requested.

A classic example comes from the "Wild West" in the late 1880's. A man named Ball was charged with murder, along with two others. Ball was acquitted, but the others were found guilty. The guilty pair appealed to a higher court, and their original indictment was found to be faulty.

Once again the government accused all three men. Ball claimed his right against double jeopardy had been invaded, and the U. S. Supreme Court agreed. He didn't have to stand trial again. The other did and paid the penalty for their guilt.

The reason for the "double jeopardy" provision is to protect the individual from being hounded all his life. In old England, where the fear of tyranny first prompted safeguards for personal freedom, one court said: "Were it not for this rule, anyone obnoxious to the government might be run down by repeated attempts to carry on a prosecution against him."

(This column, based on Texas

A VAST NEW HOLIDAY LAND in the heart of Texas will be created under the Brazos River Authority's master plan for development of the river. The map shows how the Authority's Six-Dam Program will provide a chain of lakes 250 miles long stretching between Whitney Dam at Waco and Possum Kingdom above Mineral Wells. This continuous body of water, convenient to virtually all Texas sportsmen, will become a center of a great new recreation industry. This Land of Lakes of Texas will provide boating, fishing and camping facilities on a scale never before known in the Southwest. They also will assure the Brazos Valley of an ample water supply for irrigation, industry and municipal use far into the future. A by-product will be hydro-electricity. Besides the Six-Dam Program, the Authority plans various other reservoirs for local water supply and for special purposes, such as Allens Creek and South Bend, shown on the map.

law, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who knows the facts because the facts may change the application of the law.)

LOCALS

SOIL BANK GETTING INTO OPERATION

The Soil Bank program, based on legislation enacted late last spring, will get its first real try-out this fall, according to Robert Shrauner, Chairman of the State Agricultural Stabilization and Conservation Committee. Meetings are now being held throughout the state to bring details of the Acreage Reserve to winter wheat growers and of the Conservation Reserve to all farmers.

children of Ozona visited her parents, Mr. and Mrs. Jim Reeves over the holidays.

Mr. and Mrs. Marshall Benner and sons and S. G. Smith visited Mr. and Mrs. Bobby Graham and son in San Antonio over the week end.

Mr. and Mrs. J. C. Phillips and Joe Lynn and Billy Ray Henson visited Mr. and Mrs. Coy Phillips and family Levelland and in Lubbock over the week end. They report that the Phillips son, Bobby James, has enrolled in West Texas State College in Canyon for the fall term.

Mr. and Mrs. P. V. Williams returned home last Monday from a vacation visit with Col. and Mrs. Jack Williams and children in Fairbanks, Alaska.

In general, Chairman Shrauner explains, the program is aimed at reducing the surpluses of farm commodities, which have continued to pile up despite acreage allotments and marketing quotas. The Acreage Reserve part of the program enables farmers to reduce basic crop acreages below the acreage allotment level for their farms while maintaining income. The Conservation Reserve part provide financial assistance for farmers who reduce their acreage of general crops and carry out an approved conservation practice on the designated land.

To participate in the Acreage Reserve, the farmer will remove part or all of his basic crop acreage from production, harvesting no crop from it and not grazing it.

To participate in the Conservation Reserve, the farmer will designate a certain acreage of cropland other than the acreage for the Acreage Reserve and carry out an approved conservation practice. To reduce the regular rate annual payment, there must be a reduction in the acreage of crops which are generally called "depleting crops". The farmer may receive a Conservation Reserve payment for the conservation practice covering up to 80 percent of the cost, and also annual payments for each acre in conservation reserves.

600,000 4-H'ers Hunt Hazards

SAFETY is an important crop that's being harvested on the farms and in the homes of 600,000 4-H members taking part in the 1956 National 4-H Safety Program.

Through 4-H projects and activities, club members in all 48 states are correcting hazards which are responsible for an annual toll of 14,000 lives and 1,200,000 serious injuries among farm residents, and an economic loss estimated to be a billion-and-a-half dollars.

4-H'ers conduct surveys to locate hazards, and then correct unsafe conditions. They present demonstrations on a wide variety of topics pertaining to farm, home and highway safety, and members give talks over radio and television and before group meetings. In addition, club members build booths and displays for exhibiting at fairs and in store windows.

Realizing that motor vehicle accidents are responsible for

over 40 percent of all accidental deaths among farm people, 4-H'ers are increasing their participation in motor vehicle safety. In recognition of the outstanding safety work done by 4-H members, General Motors is again providing incentives in the 1956 National 4-H Safety Award Program. Included in the awards offered are four gold-filled medals for winners in each county; an all-expense trip to the National 4-H Club Congress in Chicago for the state winner; and \$300 college scholarship for the eight national winners. Certificates and plaques are also provided for clubs reporting outstanding safety programs on county and state levels.

The 4-H Safety Program is conducted by the Cooperative Extension Service, and the awards arranged by the National Committee on Boys and Girls Club Work. Complete information on the program is available from county Extension offices.

Mrs. John McGowen of Waco.

Mrs. Carl Patterson of Fort Worth, Mr. and Mrs. E. A. Darwin and sons of Lubbock and Mr. and Mrs. Alton Patterson of Pasadena were at home here over the week end visiting with relatives and friends.

FISH RESTOCKS BEING READIED

AUSTIN—When the rains finally come and the old fishing holes are ready for restoration, Texas Game and Fish Commission hatchery should be adequate, reports the Commission's Director of hatcheries.

He said only ten of the fourteen state hatcheries now are operating for lack of water, but that sufficient brood stock are available to get all in production in short order.

The Director said the hatcheries are geared to produce upwards of 15,000,000 fish annually, mostly black bass, Catfish, bream and crappie are produced in considerable quantity.

"Many folks are pretty depressed about their favorite fishing holes drying up," said the Director. "In many cases the temporary drainage of the tanks and small lakes, or even rivers, will mean a rejuvenated fish population when a normal wet cycle returns. Countless fishing places had become over-populated with stunted perch which were detrimental to stocks of desirable species, and therefore detrimental to fishing as a general rule."

Mr. and Mrs. Lee Haymes were guests of his brother and wife, Mr. and Mrs. B. M. Haymes, in O'Donnell last Saturday night and Sunday.

enter school this fall.

Little Sandra Kirk of Abilene is spending this week with her grandparents, Mr. and Mrs. O. L. Kirk.

Vollie Ressel of El Paso spent the week end with his parents, Mr. and Mrs. T. R. Ressel.

Mr. and Mrs. J. D. Brown spent the week end with Mr. and Mrs. Curtis Brown and baby in Lubbock.

U.S. Tanker Fleet Expands

CLIMAXING the newest series of supertankers is the S. S. Cities Service Norfolk just completed for launching at Sparrows Point, Md. Sponsor of the great new ship is Mrs. Charles S. Mitchell (nee) wife of the Vice President, Director and Manager of Transportation for Cities Service Company. The Cities Service Norfolk is 661 feet long, with 90 foot beam. Steam turbines generating 15,000 horsepower give her a speed of 16 1/2 knots. The ship will serve the eastern seaboard, Lake Charles, La., to Boston.

LOCALS

Knox Prairie Philosopher Worried Over The Idea Of Science Bringing Out A New Atomic-Powered Tractor

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek may be going out of his way to find something to worry about, his letter this week indicates

J. A.

Dear editor:
According to an article I read in yesterday's paper, well it wasn't yesterday's paper according to the date, which was about a week old, but any paper I read yesterday, if I haven't seen it before, is yesterday's paper as far as I'm concerned, scientists are predicting they'll have an atom-powered airplane ready to fly in a couple of years.

They said they based this on the fact the atom-powered submarine, which has now traveled 50,000 miles without refueling is such a great success.

And furthermore, they said, after the atom-powered airplane will come atom-powered automobiles.

Now I don't know what this will do to filling station operators, there won't be much for them to do if they can fill up your car with atomic energy and you won't have to come back until fifty or seventy-five thousand miles later, sounds like the hours would be fine though the pay might be low, but I guess they'll think of something, maybe join the small family-size farmer as a political problem and let Sec. Benson worry about them.

However, what's worrying me is that science isn't going to be satisfied to leave well enough alone and after they get airplanes and cars and trains running in-

definitely on atom power, some smart alec will turn his efforts to tractors.

Now a tractor that'd run almost forever with one handful of atom power sounds all right, for the man who just can't seem to get enough plowing, but I'd like to point out there are some farmers who look on a stalled tractor as one of the handiest things you can have on a farm. You take a man who's powered with old-fashioned food three times a day and put him on an atom-powered tractor that'll run forever on one dose, and you can begin to see that science is no un-mixed blessing.

I don't want to stand in the way of progress, and while I don't believe science can ever invent a machine so efficient I'd want to run it all the time, you can see that this idea of an endlessly running tractor operated by a fast tiring man needs some careful thought before it's brought out. It's a question of who's going to be in charge, a man or his tractor?

Yours faithfully,
J. A.

USDA Names 23 Wheat Varieties In 1957 Discount

Discounts to discourage plantings of undesirable wheat varieties were included in the price-support program for the first time on the 1956 wheat crop. Today the USDA released a list of 23 varieties which are classed as undesirable because of inferior milling or baking qualities. They will be discounted 20 cents per bushel in price-support rates on the 1957 wheat crop.

According to extension agronomists, the hard red winter varieties are most commonly grown in Texas and those on the undesirable list include Stafford, Pawnee Sel. 33, Red Chief, Chiefkan, Early Blackhull, Red Jacket, Kanking, New Chief, Blue Jacket, Purkof, Cimarron and Red Hull. Others listed are soft red winter, hard red spring, durum and white wheat varieties.

These 23 varieties were designated as undesirable by the Agricultural Research Service after consultation with state agricultural experiment station personnel, agronomists, cereal chemists and others on state and Federal staffs.

The extension agronomists point out that the discount on these undesirable hard red winter varieties should not hamper Texas wheat producers because research has developed varieties which are better yielders as well as producers of better milling and baking quality wheat.

The recommended varieties available for the High Plains of Tex. are Comanche, Concho, Westar, Wichita and Triumph. For the Rolling Plains area these same varieties are recommended along with Quannah for the eastern counties. In the north-central area of Texas, Quannah is preferred while Comanche and Concho have also done well. In the South-central area, Quannah is recommended because of its resistance to disease.

The discount was adopted in the support operation to lessen their production and the possibility of U. S. wheat of inferior quality finding its way into domestic and export channels. Representatives of crop improvement association have strongly urged the action.

The price-support regulations for 1957 will provide for producer certification regarding undesirable varieties.

Mr. and Mrs. H. D. Warren of Fort Worth visited relatives and friends here last Tuesday, enroute home from a vacation in New Mexico.

TO PROTECT LIVESTOCK

Livestock is protected from injury when feeders and shelters are made of splinter-free Masonite Tempered Presdwood.

DOTS WITH DASH!

Becoming and practical for bathing in sun or water is this brief, two-piece romper suit made from cotton bags at a cost of a few pennies. Two 100-lb. feed bags in colorful polka dot print were used to make up McCall's pattern \$1.69 in size 14. This is one of the summer fashions featured in the loan wardrobe collections offered for style show programs by the National Cotton Council, P. O. Box 9905, Memphis, Tennessee.

OXYGEN LOSS HITS FISHES

Lack of oxygen from natural conditions has taken a heavy toll of rough fish in shallow inland waters along the Gulf in the Houston area, reported the Assistant Executive Secretary of the Game and Fish Commission.

He said ninety per cent of the dead fish were menhaden, shad and such species.

The Assistant Executive Secretary said investigation showed that an unusually heavy growth of algae plus concentrations of ordinary toxic wastes caused the loss which had first been blamed to possible pollution of the bay waters from chemicals.

He said lack of oxygen also has damaged fish stocks in shallow inland lakes and tanks. Low water has been a contributing factor, he added.
