### SUPPORT FOR THE SADLAK BILL

Public response to the Sadlak bill (H. R. 6452) for reducing federal income taxes can be accurately described as overwhelmingly favorable.

This measure would cut the maximum income tax rate from its present 91 per cent to 42 per cent over a five year period. That period could be extended to nine years if necessary to avoid unbalanced budgets and deficit financing. Taxes in all the income brackets would be reduced by substantial amounts, and none would be increased. The government would still get all the revenue it legitimately needs — because, according to Representative Sadlak's carefully documented computations, increased tax revenue from expanding and stimulated employment and economic activity would more than offset the losses from rate reductions.

Hundreds of organizations in every part of the nation — civic clubs, chambers of commerce, commercial groups, educational institutions, etc., etc. — have gone on record in favor of the Sadlak bill. The list grows steadily.

Mr. Sadlak himself has said that his proposal "is primarily designed to moderate the tax impact in individuals and on small and growing business, and to eliminate the tax barrier to starting new businesses." It is an obvious fact that present tax laws and rates work a greater hardship on the small business, with its limited assets, than on the long-established big business with its great assets. These laws, in other words, stand in the way of growth and success — and, therefore, deprive government of increased tax revenues that would follow growth and success.

The next step is up to Congress.

### SMALL BUSINESS PROBLEM

The theory that big business is destroying small business just isn't borne out by the facts.

The number of small business firms (those with less than 100 employees) has reached a record high in this country. A tabulation based on the latest available figures shows that there are 4,209,000 of these firms — an increase of 750,000 in the past 10 years. If the trend continues, as is expected, the number will swell to 5,700,000 by 1976.

The main problem faced by small business isn't big business. It is a tax system which penalizes successes and hampers growth.

—SAY YOU SAW IT IN THE TIMES—

### NO MAGIC IN GOVERNMENT POWER

Dr. S. C. Hollister, Dean of the College of Engineering, Cornell University, has asked and answered a few questions that are of direct financial interest to practically everyone in the United States.

Here's what he said: "How would you like to receive your electric bill with a notation that 35 per cent was being deducted because the utility furnishing your electricity could now do so without having to pay the usual taxes and the full cost of capital? This is what the biggest power producer in the business can do for its customers. Who is this producer? Your federal government. How does it do this? It taxes you to make up the deficit.

"How would you like to receive a note on your light bill saying that a sum has been added so that someone you never heard of could get his light bill reduced 35 per cent? This is what is happening to most of you, but it isn't being so marked on the bill. About 80 per cent of the people are paying a quarter to a third of the light bill for the other 20 per cent."

In those two concise paragraphs Dr. Hollister has shown why socialized power is superficially "cheap" — and has exploded the myth surrounding that alleged "cheapness." There is no magic in government power. The government can't build a dam or a generating station or a distribution system for less money than private enterprise — indeed, due to the nature of political undertakings, government costs for comparable projects are often much higher.

### STOP GOVERNMENT COMPETITION

Senator McClellan of Arkansas has introduced an "Anti-Government Competition" bill.

This bill is designed to hasten the termination of government owned or sponsored business-type operations. Its passage would put Congress on record as directing Federal agencies to get out and stay out of activities that compete with privately owned, taxpaying enterprise.

While the measure is said to face stiff opposition from Government employe unions, it has the backing of economy minded members of Congress and they hope to push it through this session. They need all the active public support possible.

## MODERN HOMEMAKING

Recipes . . . Household Helps

By Julia Hunter

HOME ECONOMICS DIRECTOR, LONE STAR GAS CO.

August is Sandwich Month! As popular as sandwiches are the year around, it seems in order to give them a month of special recognition. And what better month than August when weather makes sandwiches an ideal meal!

Sandwiches star at any meal, at any time of day, at any kind of get-together. Just fit the sandwich to the occasion. Ever try sandwiches for breakfast? A good breakfast dish for anybody, they fit especially the person who doesn't have time for breakfast or who "gets tired of the same old thing." For one of the best of breakfast sandwiches put thin crisp bacon between slices of cinnamon toast.

To give family or guests a treat, serve breakfast sandwiches of thin broiled ham between piping hot biscuits. If you've hearty appetites to satisfy, make the biscuits in plump three-inch size. If it's a breakfast on the party side, make the biscuits tiny one-inch size.

For luncheon and supper menus sandwiches need the makings of a main dish. Bacon and tomato is an all-time favorite and hard to improve upon, but add a new and delicious flavor by topping the tomato slices with thin slices of avocado.

Nothing will ever outrank hamburgers and hot dogs in their pure form, but a variation can make a hit. Season hamburger meat as usual and shape the amount ordinarily used for a hamburger around a stick of sour or dill pickle and a stick of American cheese. Shape to fit a hot dog roll. Broil the meat three inches from a full gas flame to the desired degree of doneness. Meanwhile, heat split hot dog rolls. When meat is done, pop into the hot rolls and serve at once. Have mustard handy.

Keep small cans of chopped ripe olives on the pantry shelf to be prepared with sandwiches on short notice. Added to certain staple items they make interesting sandwiches in a hurry. Mix them with chopped hard-cooked eggs, mayonnaise, and a dash of salt. Add them to creamed cheese or finely grated American cheese and mix with spreading consistency with mayonnaise. If you've a few pecans or walnuts on hand, mix olives with chopped nuts and mayonnaise. This makes a tasty party sandwich. Flavor and texture go well on brown bread.

Sandwiches are so important in

the American diet, each year the National Restaurant Association works with the Wheat Flour Institute in a nation-wide search for new sandwiches. Restaurant people develop sandwich ideas and enter them in a contest. After careful selection and testing, twenty best sandwiches of the year are chosen from this contest. Our Recipe-Of-The-Week is one of these twenty best.

And why not? Electric servants draw mighty low wages. Lower, even, than they were 25 years ago. For instance, if yours is the typical American home, you're getting twice as much electricity for your dollar today as you did in 1932. Your electric bill may be higher, but that's because electricity is doing so much more for you now.

\* Actually in homes served by WTU, the average cost of a kilowatt-hour of electric service is 20% LESS than it was 10 years ago!

Think about it for a minute. Don't you agree that electricity is the biggest bargain in your budget?

## Social Security Benefits Going To 282 Knox People For Total Of \$11,642

More than 282 beneficiaries in Knox County were getting monthly social security payments totaling \$11,642 at the end of 1956. The number of beneficiaries increased by 67 over 1955 and the total of monthly benefits being paid in the County at the close

of the year was \$8,934.00 over the total being paid a year ago.

Erton F. Tate, District Manager of the social security office announced today. These increases, he noted, result in part from the protection provided to farm families by the coverage of farm employment and self-employment under social security.

He pointed out that self-employed farmers were first brought under social security in January 1955. Those over retirement age at that time, or who reached retirement age before the end of 1956, became insured if they reported self-employment income of at least \$400 for 1955, and again for 1956. These insured persons were able to qualify for old-age benefit payments during the

latter year. Tate said that about 50 self-employed farmers and their dependents filed claims for benefits in Knox County in 1956. The number of farm claims filed in 1957 will be much greater. Tate said. For example, during the 6 months, January - June 1957, 70 farm claims for benefits has been filed.

Noting the impact of farm coverage in general on essentially agricultural areas like Knox County, Tate said that a farm employee, for instance, who was already at retirement age by mid-1956 became insured as of April 1 of that year if he had taxable wages of \$400 or more in 1955 and of at least \$200 in 1956. Benefits paid to farmers and their dependents, moreover, figured in the nationwide totals for 1956. At the close of the year, over 9 million people were receiving almost one-half billion dollars in monthly benefit payments.

In Knox County for the month of December 1956, 151 retired workers were getting \$7,648.00 monthly. Also, 61 wives or dependent aged husbands or retired workers were being paid a total of \$1,547.00 monthly; in the same county for December, a total of \$736.00 was being paid to aged widows or dependent aged widows and parents of deceased workers. This was an increase of 38 per cent in monthly payments to aged workers and their dependents and 60 per cent to dependent aged survivors of deceased workers in this area. The lowering of the age at which a woman without an entitled child in her care can start getting benefits is reflected in these figures, Tate pointed out. Effective with November 1956 benefits could be paid to women

starting at age 62. Monthly payments of \$1,711.00 were being made to 11 widowed mothers with children under 18 in their care and minor children of retired or deceased workers and accounted for 15 per cent of the total old-age and survivors insurance benefits being paid in Knox County, as of December 1956. Nine out of ten mothers and children in the United States now have social security protection. At the end of the year, nationwide, about 1,341,000 children under 18 were receiving monthly benefits because of the retirement of an aged insured parent. Children who become totally disabled before age 18 may now be eligible for disabled child's benefit payments after age 18. This type of social security insurance benefit, however, did not become payable until January 1957 and such benefits and beneficiaries are not included in the figures quoted above.

Commenting on the steady growth of the social security insurance program, Tate said that three-fourths of all men becoming 65 this year will be eligible for social security benefit payments.

the Jamboree in Valley Forge last month. Since then sporadic cases have cropped up at various points throughout the state.

Like all influenza, this is a highly communicable strain. Symptoms include a sudden fever lasting from one to six days, chills, aches and pains in the back and joints, sore throat and a cough.

In the Far East the attack rate has been extremely high—about one of every five persons being affected. The death rate so far has been comparatively low—two deaths per 1000 cases.

Cases experienced in Texas thus far have been relatively mild. But there is no assurance that the virus will not become increasingly virulent as it spreads from person to person.

Military experience indicates that the vaccine is 70 per cent effective. Therefore, thoughtful people will get themselves immunized as soon as possible after vaccine is available.

The State Department of Health will be unable to offer influenza vaccine for general distribution. Physicians will be able to pur-

chase the material directly from commercial drug outlets.

### PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 5, 1957.

HOUSE JOINT RESOLUTION NO. 3 proposing an amendment to the Constitution of Texas adding a section to be known as Section 49-c, Article III, providing for the issuance and sale of bonds of the State of Texas to create the Texas Water Development Fund to provide financial assistance to certain political subdivisions or bodies politic and corporate of the State of Texas in the conservation and development of the water resources of the State; providing for the payment of such bonds; creating an agency to administer said fund and to perform other duties prescribed by law; limiting the period during which financial assistance may be granted; and providing for the calling of an election and the publication and issuance of the proclamation therefor.

### BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article III of the Constitution of Texas be amended by adding a new section thereto to be known as Section 49-c, as follows: "Section 49-c. There is hereby created as an agency of the State of Texas the Texas Water Development Board to exercise such powers as necessary under this provision together with such other duties and restrictions as may be prescribed by law. The qualifications, compensation, and number of members of said Board shall be determined by law. They shall be appointed by the Governor with the advice and consent of the Senate in the manner and for such terms as may be prescribed by law.

"The Texas Water Development Board shall have the authority to provide for, issue and sell general obligation bonds of the State of Texas in an amount not to exceed One Hundred Million Dollars (\$100,000,000). The Legislature of Texas, upon two-thirds (2/3) vote of the elected members of each House, may authorize the Board to issue additional bonds in an amount not exceeding One Hundred Million Dollars (\$100,000,000). The bonds authorized herein or permitted to be authorized by the Legislature shall be called 'Texas Water Development Bonds,' shall be executed in such form, denominations and upon such terms as may be prescribed by law, provided, however, that the bonds shall not bear more than four per cent (4%) interest per annum; they may be issued in such installments as the Board finds feasible and practical in accomplishing the purpose set forth herein.

"All moneys received from the sale of State bonds shall be deposited in a fund hereby created in the State Treasury to be known as the Texas Water Development Fund to be administered (without further appropriation) by the Texas Water Development Board in such manner as prescribed by law. Such fund shall be used only for the purpose of aiding or making funds

### NUMBER THREE ON THE BALLOT

available upon such terms and conditions as the Legislature may prescribe, to the various political subdivisions or bodies politic and corporate of the State of Texas including river authorities, conservation and reclamation districts and districts created or organized or authorized to be created or organized under Article XVI, Section 52 of this Constitution, interstate compact commissions which the State of Texas is a party and municipal corporations in the conservation and development of the water resources of this State, including the control, storage and preservation of its storm and flood waters and the waters of its rivers and streams, for all useful and lawful purposes by the acquisition, improvement, extension, or construction of dams, reservoirs and other water storage projects, including any system necessary for the transportation of water from storage to points of treatment and/or distribution, including facilities for transporting water therefrom to wholesale purchasers, or for any one or more of such purposes or methods.

"Any or all financial assistance as provided herein shall be repaid with interest upon such terms, conditions and manner of repayment as may be provided by law.

"While any of the bonds authorized by this provision or while any of the bonds that may be authorized by the Legislature under this provision, or any interest on any of such bonds, is outstanding and unpaid, there is hereby appropriated out of the first moneys coming into the Treasury in each fiscal year, not otherwise appropriated by this Constitution, an amount which is sufficient to pay the principal and interest on such bonds that mature or become due during such fiscal year, less the amount in the sinking fund at the close of the prior fiscal year.

"The Legislature may provide for the investment of moneys available in the Texas Water Development Fund, and the interest and sinking funds established for the payment of bonds issued by the Texas Water Development Board. Income from such investment shall be used for the purposes prescribed by the Legislature. The Legislature may also make appropriations from the General Revenue Fund for paying administrative expenses of the Board.

"From the moneys received by the Texas Water Development Board as repayment of principal for financial assistance or as interest thereon, there shall be deposited in the interest and sinking fund for the bonds authorized by this Section sufficient moneys to pay the interest and principal to become due during the ensuing year and sufficient to establish and maintain a reserve in said fund equal to the average annual principal and interest requirements on all outstanding bonds issued under this Section. If any year prior to December 31, 1962, moneys are received in excess of the foregoing requirements, such excess shall be deposited to the Texas Water De-

velopment Fund, and may be used for administrative expenses of the Board and for the same purposes and upon the same terms and conditions prescribed for the proceeds derived from the sale of such State bonds. No grant of financial assistance shall be made under the provisions of this Section after December 31, 1962, and all moneys thereafter received as repayment of principal for financial assistance or as interest thereon shall be deposited in the interest and sinking fund for the State bonds, except that such amount as may be required to meet the administrative expenses of the Board may be annually set aside, and provided that after all State bonds have been fully paid with interest, and after there are on deposit in the interest and sinking fund sufficient moneys to pay as future maturities of principal and interest, additional moneys so received shall be deposited to the General Revenue Fund.

"All bonds issued hereunder shall be approved by the Attorney General, registration by the Comptroller of Public Accounts of the State of Texas and delivery to the purchasers, be incontestable and shall constitute general obligations of the State of Texas under the Constitution of Texas.

"Should the Legislature enact enabling laws in anticipation of the adoption of this amendment, such acts shall not be void by reason of their anticipatory nature.

"Section 2. The foregoing amendment to the Constitution shall be submitted to a vote of the qualified electors of this State at an election to be held on the 5th day of November, 1957, same being the 1st Tuesday after the 1st Monday in said November, 1957, at which election each ballot shall have printed thereon, the following words:

"FOR the amendment to the Constitution of Texas adding a new section to be known as Section 49-c of Article III, authorizing the issuance and sale of Two Hundred Million Dollars (\$200,000,000) in bonds by the State of Texas to create the Texas Water Development Fund to provide financial assistance to certain political subdivisions or bodies politic and corporate of the State of Texas in the conservation and development of the water resources of the State."

"AGAINST the amendment to the Constitution of Texas adding a new section to be known as Section 49-c of Article III, authorizing the issuance and sale of Two Hundred Million Dollars (\$200,000,000) in bonds by the State of Texas to create the Texas Water Development Fund to provide financial assistance to certain political subdivisions or bodies politic and corporate of the State of Texas in the conservation and development of the water resources of the State."

"Section 3. The Governor of the State of Texas shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of this State. The expense of publication and election for such amendment shall be paid out of the proper appropriation made by law.

## Weekly Health LETTER

Issued by Henry A. Holl's M. D., State Health Officer of Texas

AUSTIN—An epidemic of Asian influenza will almost certainly lay siege to Texas this fall and winter.

It is possible to make this prediction because the State Health Department laboratory has already isolated the specific virus in throat washings from several patients. Many more specimens are being studied and some of them will undoubtedly yield the virus.

A vaccine against this type of influenza is being rushed into production and will probably be ready in limited quantity by mid-September. A goal of 60 million doses is expected to be reached by February.

Looking at the National picture, it is clear that the disease has already made serious inroads. More than 11,000 cases have been diagnosed in the various states. Seven persons have died of flu or its complications. Surgeon General Leroy Burney has publicly announced the strong probability of a large-scale outbreak within the next few months.

This appears to be a brand new member of the family of influenza viruses, perhaps closely related to the type which caused the world-wide epidemic at the close of World War I. It started first in Hong Kong in the early spring, and by June had spread over the Orient and into India.

It entered the United States through a West Coast port. The first case in Texas was diagnosed in a Boy Scout who had attended

Mrs. V. F. Albus Hostess to Vera Home Demonstration Club "Low Calorie Refreshment Plates" was the program given by Miss S. C. Kinsey at a called meeting of the Vera H. D. Club in the home of Mrs. V. F. Albus on July 31.

Refreshments can be very appetizing and still be low in caloric content. The recipes and demonstration given by Miss Kinsey were designed to refresh one without adding too many calories to a diet. Fruit and vegetable juices, light salads, and gelatin deserts were suggested.

Pressure cookers were also tested.

Mrs. Grady Hardin presided over the business session with Mrs. Calvin Christian acting as secretary in the absence of Mrs. Bobby Roberson. Refreshments were served by Mrs. Albus to the following: Miss S. C. Kinsey, Mmes. Bill Feemster, Luther Christian, L. D. Allen, J. O. Archer, Clyde Beck, Calvin Christian, Grady Hardin, Fred Wiles, and Claudell Bratcher.

On September 10th at 2 p.m. club will meet in the home of Mrs. L. D. Allen. At this time officers for the following year will be elected.

**Stock Cattle Open Strong**

FORT WORTH—Trade was very active on stocker and feeder classes of cattle and calves at Fort Worth Monday and prices were fully steady to as much as 50 cents higher. There was a rather large representation of out-of-state buyers on hand, a factor which again lent strength to the bright prospects for the late Summer and Fall market for Texas cattle this year.

Last week agricultural economist in the cornbelt were warning farmers there against the trend toward "paying too much" for replacement cattle this Fall.

At the Corn Belt Livestock Feeders Association meeting in Chicago last week the fact cattle are in strong hands and ample feed and grass are available, was listed as a factor in the strong position of cattle growers. More than normal demand for replacements from grazing areas because cattlemen sold down in the drought, was also expected, and prospects of big feed grain supplies due to sharp increases in grain sorghum acreage and improved corn growing conditions in the Western Cornbelt were cited as bullish factors.

Later than usual marketing of stocker and feeders was also predicted, since cattlemen will hold for added poundage.

These warnings to cornbelt stocker and feeder buyers about

high priced replacement cattle found sympathetic endorsement among out-of-state buyers at Fort Worth Monday. But, as one buyer from the Hoosier State of Indiana put it, "We're in the cattle business, we need cattle and our farmers need cattle, supply and demand will adjust things sooner or later."

In the trade Monday good and choice stocker steer calves ranged from \$20 to \$24, the higher figure on some 517-pound steer calves, whose heifer mates cashed at \$21.50 and scaled over 100 pounds. Plainer stocker calves sold from \$14 to \$19, and stocker steer yearlings and feeder steers ranged mostly from \$21 down. Fleasly feeding heifers ranged from \$19.50 down. A few replacement cows sold from \$19 to \$24.

In the slaughter division good and choice fed cattle sold at the best prices since last Fall, as good and choice fed steers cashed at \$20 to \$26, the top for two loads of 950-pound fed steers from Oklahoma. Plain and medium butcher sorts cashed at \$13 to \$19.

Fat cows drew \$12 to \$15, and canners and cutters brought \$8 to \$12. Bulls cashed at \$10 to \$13. Good and choice fat calves sold from \$19 to \$22. Medium and lower grades cashed at \$10 to \$18.

**Hogs Open On Barely Steady Level Monday**

Choice butcher hogs topped at \$22.50 and \$22.75 at Fort Worth Monday, with top prices paid sparingly and the tone of the trade steady to a little easier. Medium to good butchers sold from \$18 to \$22. Packing sows cashed at \$17 to \$20.

Mr. and Mrs. E. H. Lowrance, Richard, Patti and Scotty of Pampa, Mr. and Mrs. G. D. Lowrance, Brenda, Stan and Denna Kaye, of Monahans were week end guests of their mother, Mrs. J. F. Lowrance.

## "Weedy" Milk On Its Way Out?

A headache of long-standing to the dairy industry may be nearing permanent relief through virtue of a new machine said to remove off-flavors from milk.

The new device, which uses steam and high temperatures to destroy and carry away grass, onion and other bad flavors, is

actually an Australian flavor-removing machine which was perfected and further developed at North Carolina State College.

Although very expensive as an addition to a dairy plant, the machine is believed fully justified by dairy farmers who in recent years have had to install proportionately expensive equip-

ment such as bulk cooling tanks themselves. The flavor-saver would prevent these farmers from heavy losses due to rejections for off-flavor, which nowadays could amount to entire storage tanks of milk being wasted.

What the machine will not do is to disguise inferior milk, and for that the public can be grateful.

## Bamboo — A New 'Specialty' Crop For Texas

Bamboo can be used for something more than oriental-looking window shades and fishing poles. And as a new money crop possibility for Texas' lumber-growing regions, bamboo is a natural.

As a source for pulp fiber, bamboo has a potentially bright fu-

ture because it grows faster than soft woods and yields four to six times as much pulp per acre; it could be harvested mechanically, eliminating the saw and ax; it would be cheaper to handle at the pulp mill; it will grow almost anywhere that the average minimum temperature doesn't go below five degrees — ready-made for East Texas' climate.

Also, bamboo fiber has proved to be better for certain specialty papers — such as facial tissue and fine writing papers — than other soft wood pulp.

Bamboo could never replace the reliable pulp-producers we have today. But in our time of crop restrictions, allotments, curbs and controls, it certainly shows promise as a possibility for idle Texas acres.

character." The philosophers Descartes and LaMettrie taught that animals were automatons, highly complex machines without feelings.

As a result the laws came for a time to allow much cruelty to animals.

But in recent years, the laws have changed back again to prove evidently changed our minds about the nature-of animals.

Our beliefs about crime — what causes it, and who's to blame, and how to control it — find expression each year in our legislation, in our court decisions, and jury verdicts.

(This column, based on Federal law and prepared by the State Bar of Texas, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who is fully advised concerning the facts involved, because a slight variance in facts may change the application of the law.)

offer to bet that you're not wearing socks." The other said, "You could lose."

"No," said his buddy, "take off your left sock right now. Then if he bets you're wearing socks, take off your left boot and you'll be barefooted. If he bets the other way, take off your right boot and there the sock will be.

And their little plan worked. A gambler in Spanish Fort was telling about a train being held up and he concluded, "It was a good thing I didn't have my six-shooter." Someone asked, "What would-a happened if you had had your gun?" The gambler replied, "They'd a-got it, too."

Spanish Fort was missed when the railroad built into the county in 1887 and so the town dwindled until the once turbulent place has only a handful of inhabitants now.

Miss Helen Phillips of Abilene visited her parents, Mr. and Mrs. Press Phillips, several days this week.

Sied Waheed and Joe Choucair attended market in Fort Worth and visited with Mr. and Mrs. Kay Waheed and daughter in Killeen the first of this week.

Mr. and Mrs. Hubert Hitt and Judy of Odessa visited friends here last Sunday.

Mr. and Mrs. Wyman Tidwell of Lubbock visited his parents, Mr. and Mrs. Jack Tidwell, and other relatives over the week end.

Mr. and Mrs. W. A. Jungman and Mr. and Mrs. C. L. Anderson and family attended the Knox-Haskell Counties pioneer reunion at MacKenzie State Park in Lubbock last Sunday.

Mr. and Mrs. H. F. Jungman were business visitors in Dallas the first of this week.

**LAW AND BELIEF**  
Our laws have their roots deep within our beliefs.

And the laws shift as our beliefs change. Thus working backwards, you can find a people's deepest beliefs by discovering their notions of justice — about adults, children, nature, animals, and other things.

Until this century, the laws held children fully responsible for crimes. Like adults, they faced trial and punishment — often prison or death. Today we seek mainly to reform child offenders, rather than to punish them.

Some primitive people hold inanimate things like stones and rivers guilty of offenses.

For centuries the laws held animals morally responsible for their acts, and therefore try-able in courts.

"And if an ox gore a man or woman to death," Exodus XXI says, "the ox shall be surely stoned."

Says Plato in The Laws: "If a beast of burden or any other animal shall kill anyone, except while the animal is competing in the public games, the deceased's kinfolks shall prosecute it for murder."

Courts in the Middle Ages duly summoned animals to appear. As late as 1750, a French court tried a she-donkey and condemned her to death, but later pardoned her because of "good

The town of Spanish Fort in Montague County was established on Village Creek, now silted up but then a pretty stream. Just across Red River was, of course, Indian Territory, which was infested by numerous outlaws, who frequently came to Spanish Fort. Three outlaws were lynched not far from the town but in Indian Territory.

Spanish Fort itself witnessed many exciting events. A woman whose husband had been killed moved from the farm into town. Three men were suspected of having killed the farmer. Perhaps the slayers thought that the widow might know too much. One night, her house was fired into; she ran out and was killed. The outrage led to the immediate forming of a posse and three men were tracked into a thicket. The thicket was surrounded, then two brave men — George Howard and Dave Price — crawled into the underbrush, got the drop on the trio and took them prisoner. They were tried, two were hanged and the other received a long prison term.

One of the busiest spots in Spanish Fort was the Cowboy Saloon. On Christmas Eve, about 1882, cowboys shot the front out of the saloon. Hundreds of shells were picked up next morning. Almost in front of the Cowboy Saloon, a pitched battle took place. Six men (three on each side) met face to face and bullets began flying. When the shooting ended, one group had been wiped out.

But life had its lighter side, too. Broke and thirsty, one cowboy said to another, "Tell you what we'll do. I'll go in the saloon and, after while, you come in and I'll offer to bet the bartender you're wearing socks and, if he won't take me up, then I'll

## Knox Prairie Philosopher Alarmed Over Argument That It's Illegal To Spend More Money Than You Make

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek thinks he has sighted an alarming trend, but what probably ought to alarm him is the state of his farm, not the state of the country.

Dear editor: A newspaper fell out of an airplane over my farm out here yesterday, one of my neighbors thought it was a hydrogen bomb and ran for cover but I knew better, anybody smart enough to make a hydrogen bomb would have too much sense to waste one on a farm like mine — from the air I imagine my farm looks like a place some bomb-dropper has already beaten the other fellow to — and I sat where I was and watched it float down. I walked over and picked it up and since one place is about as good as another to sit back down in I sat back down right there and read it. If I'd been thinking I wouldn't even have reached down to pick it up, but would have sat down beside it and saved the effort, but a man can't think all

the time. Wasn't much in it except for one article that struck me right between the eyes and sounded worse than a hydrogen bomb in its after-effects.

According to it, a man was being tried in Federal court for income tax evasion and the prosecuting attorney was trying to prove he didn't report all his income one year because his records showed he spent more than he claimed he took in.

The prosecuting attorney said this was clear evidence he hadn't reported all his income. I don't know whether you

realize it or not, but such a line of argument is a threat to the entire installment-buying economy of the United States and will destroy the peace of mind of three-fourths of the people.

If the government is going to take the attitude that anybody who spends more in one year than he makes it's obviously knocking down on his income tax, there's going to be the biggest shortage of defense lawyers in the history of the universe. Munday won't have a tenth enough lawyers to go around.

If the government is so far out of touch with reality it thinks it can make a case against everybody who finishes up a year spending more than he made, practically everybody might as well turn himself in and plead for mercy.

And come to think of it, two

years out of three, the Federal government itself spends more than it takes in, and who we gonna get to try it.

I'm not in favor of cheating on your income tax, but if Washington figures anybody who spends more than he makes is guilty of it, all I've got to say is sidetrack the Federal road-building program, call off foreign aid and halt all the defense spending, put all the funds in one pot and start building jails.

I think there ought to be a law against spending more than you make, but take this up with your family and see how far you get.

Yours faithfully, J. A.

Drive carefully. The life you save may be your own!
