Odd Bits Salvaged  
By The Editor

The country is not in the mess it was two weeks ago.

You see, it all depends upon which party is in convention. At Los Angeles two weeks ago, the Democrats were speaking their pieces, and it appeared that nothing would get the world out of its present state of deplorable affairs but to put the Democrats in complete power.

The Republicans started their convention last Monday and it appears that the Democratic ticket is not the answer at all. The Republicans have spent the past eight years trying to clean up the mess the Democrats had our nation in, and to "change political horses" at this time will be the most deplorable thing we can do.

Personally, the only thing we expect to do about it is to let the people decide next November.

Our schools are not in "the mess" some people have been led to believe they're in, either.

Willis Apple, Munday's new superintendent, talked at the Lions Club meeting last Tuesday and explained some of the criticisms offered by the accrediting committee in placing the local schools on the "warned list." According to the committee's report, read in part by Mr. Apple, the schools are in pretty good shape with the exception of the Dunbar colored school.

The committee noted that work toward correcting the deficiencies in the colored school has been done. Mr. Apple stated that work is under way to correct all departments which drew criticism from the committee, including an additional teacher, improving the buildings, etc.

"There is no time limit set for meeting these requirements," Mr. Apple said, "as we're not in that bad shape. The time limit is set when a school is in the final stages of losing its accreditation. We hope that when the committee visits our schools again during next school year, we will be removed from the warned list."

And the opening of school is right upon us. The superintendent announced that football practice begins on August 15, school opens on Thursday, September 1, and the first football game will be with Rochester on Saturday, September 3. The schools will observe the Labor Day holiday on September 5.

"The faculty is complete," Apple stated, "with the exception of a band director, an assistant coach, and the teacher which will be added to the Dunbar school."

Our town is in a bigger mess than most of us seem to realize!

Our recent cleanup campaign was waged during hot, dry weather — and the recent July rains have made us realize that we need a followup on this cleanup. Weeds and other vegetation have sprung up like nobody's business.

The rear of the Times office had been gone over thoroughly a couple of times this year, and we were kinda resting on our laurels. Just a few days ago, we happened to have occasion to glance at the back — and we received a complete surprise. Weeds were head high, and the thing looked like a wilderness. We quickly dispatched Roy Ross back there with a hoe.

We've noticed, too, that other places are in as bad shape as ours was. Some attention has been given to vacant lots, which have been plowed, but others need the same attention.

Flies have become more numerous and more pesky than in many months — and that ain't healthy! This is something we can all do something about — if we'll just set our minds, hearts and muscles to it!

### THE CHANGING FACE OF FARMING

An editorial in the Antigo, Wisconsin, Daily Journal, muses on some of the changes that have taken place in American farming. It says: "In past generations, the farmer depended heavily on his neighbors. His church, his school, and his cheese factory were local community institutions, every one of which he helped to build and he felt he had definite responsibilities to them."

"But today local institutions mean less to him or are gone entirely. His markets are broader, his contacts are wider, yet he may know little about the neighbors across the road."

This means that the farmer has become more and more dependent on others — even as others have become more and more dependent on him, in the complex society in which we all now live. The Antigo Journal points to various instances of this, one being: "He no longer grows 'fuel' for horsepower in the form of oats and hay but gets it from the city in the form of tractor gasoline and oil."

There is no doubt that there have been losses because of the inevitable changes that have overwhelmed agriculture. But the gains outweigh them by far. Mechanization of farm work, in which gas and oil for the tractor have replaced oats for the team, is a top example. It has eliminated a vast amount of drudgery. It has cut costs. It has made possible land reclamation and conservation practices that would have been impossible in former times. And it enables a smaller farm population, working a more or less fixed acreage, to meet the needs of a swelling total population.

Railway Age reports that the annual cost of the wage and other payroll benefits demanded by the railroad brotherhoods is computed by the carriers at \$765,641,000 a year, or about \$1,010 per employe. This is more than the railroads have earned in any of the past three years.

HUMBOLDT, IA., INDEPENDENT: "With Russia trying to destroy the United States' position in the world, both as a military power, and as a world leader of free nations, there should be no political party lines drawn by either party. National defense is not political. It is a fight for survival."

### DO-IT-YOURSELF HEALTH PROGRAM

A great deal of attention is being given to the health problems of the growing elderly proportion of our population. Out of this, it is to be hoped, will come programs and policies that will meet the needs without imposing on us the costly regimentation that some proposed legislation would make inevitable.

One point deserves to be much more widely understood than it is — the problems involved are not, by any means, confined to medical care and hospital and nursing home service. Dr. Edward L. Bortz, a past president of the American Medical Association, has made that clear. As he puts it, major afflictions of older citizens today can be traced to faulty diet, flabby bodies, excessive fatigue, and aimless living. And, he adds, a do-it-yourself health program designed to cure or alleviate these afflictions can be the greatest insurance policy for a longer, healthier life.

In his words, our society is "immature and youth-oriented." So this is the time to cease "worshipping the glamour and romance of youth" and concentrate on the contributions that the mature older citizen makes to our society.

One of the most urgent needs is to abandon the custom of compulsory retirement at age 65 or any arbitrary figure. Great numbers of people now attain their period of top performance at 65 or older. To consign them to the ranks of the idle is to do them a grave injustice — and to deprive the nation of energies, abilities, and experience it can use to vast advantage.

DENISON, TEXAS, PRESS "After studying and working with juveniles for a period of over fifty years, and having ourselves reared a family of nine, we have come to the conclusion (long ago) that a great mother, along with a fairly decent father, can get the job done without any court action, clubs to fence them in, community houses or youth centers."

NEW HAVEN, MO., LEADER: "Fiscal affairs are at the heart of the democratic process. Citizen concern over taxes originally led to our representative form of government. If democratic government is to survive, not only in this country but in the world, citizens must somehow gain control of government spending and taxes, instead of letting them dominate their business and personal lives."

## Chips From The Carpenter's Workbench

By JAMES HALLMARK

PREJUDICE: This is a word which is daily coming into more common use. Racial prejudice has been a topic of conversation in recent months, and now with the November elections imminent we are hearing more and more references to religious prejudice. As we are brought face to face with the term via the news media almost daily, it might be well for us to examine prejudice and determine whether this is a characteristic to be cultivated or avoided.

Webster defines prejudice in this manner: "Preconceived judgement or opinion; unreasonable predilection or objection; esp., and opinion or leaning adverse to anything without just grounds or before sufficient knowledge-Syn. Bias; judgement."

Prejudice is certainly not a desirable attribute! Let us not

be guilty of not wanting to be confused with the facts because our minds are already made up. This is prejudice! This is wrong! No opinion should be drawn on any question; whether racial or religious without first carefully considering the facts. look to others for guidance but we must learn to exercise judgement ourselves in these matters, lest those that who one day look to us for leadership will receive little assistance. Learn to think for yourself. Of course, we are to weigh advice judiciously in the approaching months let us dig down and get the facts before making up our minds on the issue. Let no one be guilty of "pre-judging." However, it is necessary that we judge the issue and take a stand. Let's stand on knowledge.

### Recent Law Will Benefit Handicapped Veterans Of County

A large number of Texas veterans who have serious handicaps resulting from active military service will benefit from a law recently enacted by Congress and signed by the President. This announcement was made today by Ray Willis, Veterans County Service Officer in Knox County.

Veterans who have disabilities resulting from service in the Armed Forces may receive compensation from the Veterans Administration for these disabilities. If the service connected condition is disabling to a degree of 50 per cent or more, additional allowances are payable to the veteran on account of his wife, dependent children and dependent parents. Prior to passage of the new law this additional allowance was payable on behalf of only three of the veteran's children.

The new law provides for an additional allowance for all dependent children of the veteran, if the veteran has disabilities of service origin evaluated at 50 per cent or more. Those disabled veterans who are receiving compensation at 50 per cent or more and who have more than three dependent children are advised to contact Ray Willis, or any office of the Veterans Affairs Commission of Texas, for additional information and assistance in obtaining these additional benefits.

He stated that this new law became effective on July 1, 1960, and benefits payable as a result of the new law will be effective from the date the Veterans Administration receives proof that the disabled veteran has such additional dependents.

JACK NANCE, Granite, Oklahoma, says, "I've gone north on custom harvesting ever since 1941 and have seen a lot of different conditions and crops. GLEANER combines take all kinds of cutting with no complaints, better than any other combine I've ever seen or used. In one field this year, my five GLEANER combines cut nearly the same acreage as eight other machines of another make. The difference was . . . we kept rolling steady while they stopped, started and repaired." Ask us about the Allis-Chalmers plan to finance your fine purchase of farm equipment. ## Not a single cracked egg since Chevy took over the route

That '60 Fleetside pickup you see takes whatever kind of road comes along, and makes about 250 stops a day delivering eggs house to house for Mr. Harry Hansen of Missoula, Montana. "With my previous truck," Mr. Hansen writes, "I always had some cracked eggs. Cargo damage always cut into my profits. But the new Chevy eliminated that problem completely. I haven't had one cracked egg with my new truck and I've had up to a ton of eggs in it without any difficulty. . . . I didn't know a truck could ride so nice."

Chevy rides nice, all right; takes good care of fragile cargoes. But that's not even the half of it. Torsion-spring suspension also means longer life for the truck, extra thousands of working miles, because the sheet metal and body components take less of a beating. You can run off-the-road or over back trails at faster safe speeds, too; get in more trips a day, make more money. Those facts are as true of the big Chevrolet heavyweights as they are of the pickups. Any model you name. Get one on your job and you've got the world's most efficient, most economical way to haul any load over any road. Your dealer will be happy to prove that statement any day you say.

"I'm getting close to 20 miles to the gallon," Mr. Hansen states, "and that's on stop-and-go delivery."

Week end guests of Mr. and Mrs. L. A. Parker were their children and families as follows: Mr. and Mrs. Louis West of Fort Worth, Mr. and Mrs. Wilbur West and children of Lamesa, Mr. and Mrs. Connie Gray and family of Morton, Mr. and Mrs. Jack Garrett and children of Bossier City, La. and Dwayne Parker and children of Amarillo. Dwayne just last week returned to the States from Germany where he is stationed. His family in Amarillo will return to Germany with him. Rev. and Mrs. K. E. Wooley and family of Oklahoma visited friends here one day last week.

Mr. and Mrs. Oscar Hudspeth visited her mother, Mrs. J. A.

Mr. and Mrs. Everet Beecher spent a quite day in their home Friday which marked their 60th anniversary.

They were married July 22, 1900 in the home of the minister of the First Baptist Church, Rev. Walter Givis in the little community of Highland in Erath County near Dublin, Texas.

Mrs. Beecher, only 14 at the time of her marriage was born in Erath County and is 74. Her husband born in Tarrant County is 80.

After their marriage they lived on the farm of Beecher's grandfather which they worked for a year before moving to Crosby County in 1901, where he ran a freight wagon from Emmert to Canyon, which was 118 miles and took nine days.

He recalls no matter the weather, rain or snow, the freight wagon had to go through and of the times he and his helper, split a fence post in half to make a fire to keep warm during the freezing winter trips across the plains.

They told of the freighting experience of a prairie fire which started in Briscoe County and sweep through Crosby County surrounding many homes as well as their own—Of them plowing a path around the house and barn to save what they had. The fire finally burned itself out at the Caprock.

After a bad fall from a horse, Beecher was unable to continue the freight line trips and they moved back to Erath County.

In 1914 they moved to Knox County where he farmed and in 1935 they moved into Munday but continued to farm.

Up until 7 years ago, his team of horses pulling his plow was a familiar sight around town, breaking gardens and small patches of ground. He never operated a tractor.

Mrs. Beecher said they owe everything to their good health. On only two occasions has a doctor been in their home during the 46 years they have lived in Knox County.

They have two sons and three daughters, Pete Beecher, Goree; Edgar Beecher, Dimmit; Mrs. T. V. Yost, Munday; Mrs. Loy Dutton, Lubbock; and Mrs. Leslie Hallaway, Slaton; 12 grandchildren and 13 great-grandchildren.

It was a drizzling, gloomy day and a windshield, smudged with mud whenever another car passed, made driving a task. As I pulled into a service station, the thought arose: Here is a man who is sheltered from the weather and safe from the hazards of the highway. The proprietor, as he filled the gas tank, asked "Do you drive around over the State a good deal in your work?"

"Yes," I replied.

He continued, "I just stay here by the road and watch others go by. You have a job that is real living."

People who don't make speeches think that it is a simple matter for an experienced speaker to make one.

How mistaken this idea is! In the space of 11 months, this chronicler has made eight addresses in the Lower Rio Grande Valley. On an average, I use 20 jokes in a speech—that's about one per minute. For fear that someone at one of the meetings will be present at a later one, eight different speeches were made. This required about 160 stories and that is about equal, in words, to one-third of the book, "I Give You Texas."

And it's not as simple even as that. You can't use just any stories; they have to have a purpose, an idea to emphasize and they must be fitted into a pattern; so, with the planning, the selection of material going through it to get it in hand and the physical and mental effort of actual delivery—besides the worry as to whether the remarks will flop—this all adds up to a serious undertaking, even if it is a humorous speech.

Waco has a "midget market." Sappy Sam says, "I didn't thing Waco would have enough midgets to support a market."

A sign on a little store in Austin, "Yep, we're open."

Mr. and Mrs. Alois Schumacher of Canyon visited their parents, Mr. and Mrs. Bill Orsak of Goree and Mrs. Emma Schumacher of Rhineland, over the week end.

Mr. and Mrs. H. F. Jungman and Mr. and Mrs. W. C. Hertel are vacationing in points in Colorado this week.

Drive carefully. The life you save may be your own!
