When we came to Munday in 1938, Harvey was operating the Linotype machine at the Times office, and continued in that capacity for several years. He started his printing career back yonder - we don't remember the date — when his father, the late O. W. Lee, was publisher of the Crowned Queen paper. His only newspapering expaper. His only newspapering ex-perience outside the Times office Of Farm Bureau was a "short stretch" on the Stamford American, but he soon returned to this paper.

The gas taxes are excessive now, when you consider that gas is an absolutely essential commodity, used by practically everyone. The combined state and federal taxes average 9 cents a gallon, or about 40 per cent of the retail price of the fuel prior to taxes.

It's true, of course, that there is a rising deficit in the highway construction trust fund. But a higher federal gas tax is no more the only solution than it is the right solution. The fund would be solvent if highway user taxes which are now diverted to the general fund were placed in the highway fund where they belong. # Indispensable in our way of life... vital to our national defense

In the 100 years since the drilling of the first oil well in the United States, the usefulness of petroleum has been often demonstrated in many ways . . . It is an economical and efficient source of energy and a raw resource convertible through petrochemistry into innumerable useful materials. . . . It is indispensable in our way of life, and vital to the national defense.

It is comforting to know that today's reserves are ample for today's needs. And if incentives to undergo the heavy risks involved are continued, there is no doubt that more oil will be discovered and produced to replace the oil we use . . .

The United States has found, produced, refined, and used more oil than any other nation. This has made petroleum products a feature of the abundant American life. Americans use more petroleum products than any other people on the globe.

The past is prologue to the future. During its second century, oil can serve you and your grandchildren, and the nation, as well or better than ever before.

The Humble Company, incorporated in 1917, has participated in the development of new and better ways to find and produce oil, and in the research that has improved petroleum products and discovered countless new uses for oil and natural gas. Humble is a major producer of U.S. oil, with production extending all across the southern tier of states from

Florida to California. Marketing operations are carried on in Texas, New Mexico and Arizona. Humble's Baytown refinery, near Houston, is one of the great refineries of the world. (Humble Pipe Line Company, a major transporter of crude oil and finished products, operates more than 9000 miles of pipe lines in Texas.)

Minutes Count When Getting Your Children **Off To School!** 

Yes, even minutes are important when you are preparing your children for school each morning.

### A Time - Saving Suggestion:

Don't spend half the morning looking for change for your child's noon-day school lunch. Buy them a \$6.00 lunch ticket for \$5.75 from The Dairy Treat, and save time and money, too.

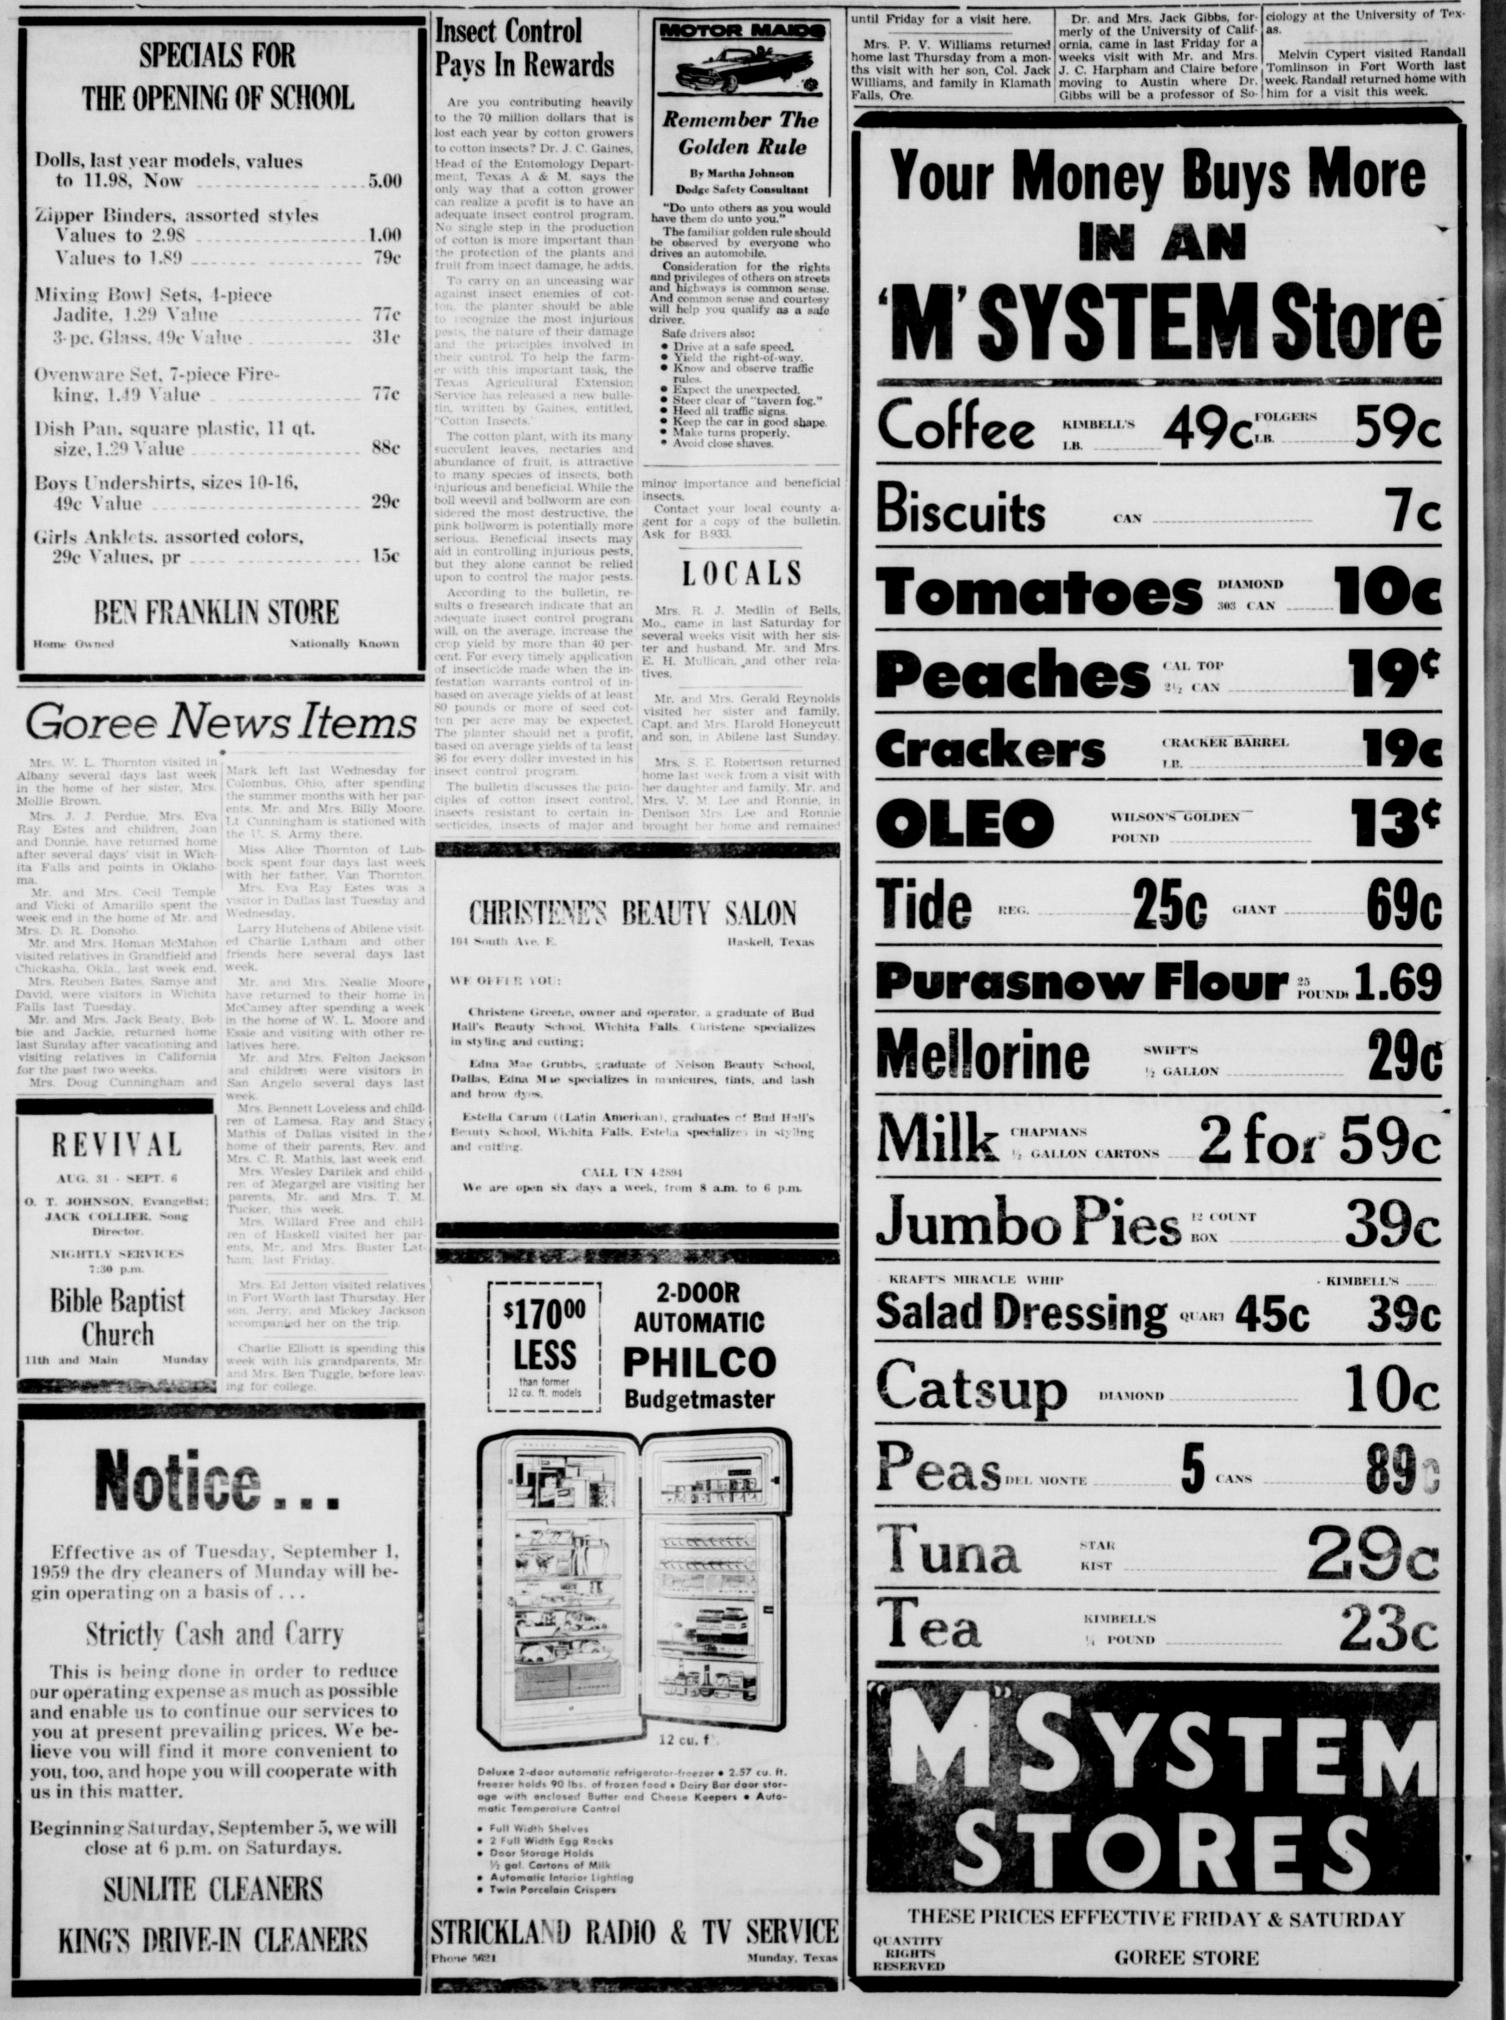

### **Prompt, Courteous Service**

That's what your child gets - and grownups, too — when they visit us for tasty meals or sandwich treats, together with those colder cold drinks. It's just a dandy place to eat out, and we're always happy to see you. Visit us often.
