HUMANS AREN'T ALWAYS LOGICAL
 Human being are not logical animals. And it would be a dull and unimaginative world indeed if logic decided everything.

But the fact that we all tend to take emotional approaches to the matter of living presents difficult problems to the businesses of this country, as it does to other institutions. One of those problems, so far as business is concerned, lies in getting facts across in the face of widespread misconceptions.

George W. Stark, Chairman of the Board of the American Meat Institute — the organization which represents the meat packers — touched on this in a recent talk. For instance, a housewife, faced with a steak that costs more than a dollar a pound, feels frustrated and often angry. She may know the steer from which the steak came brought its producer only 25c a pound. So she decides that she's being robbed.

To begin with, only about half a beef steer is beef — all the rest is waste or by-products of relatively little value. On top of that, steak amounts to only a small percentage of the total amount of beef in a carcass. The result is that the eternal, natural law is supply and demand makes steak expensive.

On the other hand, pot roast, which is roughly about a fourth of all the beef, commonly sells at a price not much higher than the wholesale price of the carcass. But the housewife looking at that expensive steak, doesn't think of that.

Truth is one thing — and getting it widely understood is another.

McGEHEE, ARKANSAS, TIMES: "With the spiraling prices of the past years on machinery and buildings there is a great difference in the amount saved towards replacement and the price of replacement, and this difference is often very difficult to make up . . . A revision of the tax laws in this respect would not only be more realistic, but it would help the farmer and the industrialist make these necessary replacements to the great benefit of the economy as a whole."

TERRE HAUTE, IND., TRIBUNE: "Opportunities for income tax evasion are becoming fewer. This may be frustrating for those so inclined, but it is good news for the millions of taxpayers who carry their full load of the cost of government . . ."

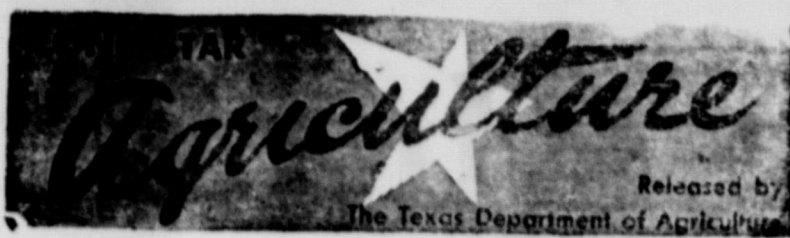

KEEPING UP WITH THE FARMER
 The supervisor of the farm practice research division of one of the leading farm equipment companies tells of a big problem the industry faces. It lies in understanding what the farmer wants and then seeking ways to provide him with in at a price he can afford to pay.

Farm equipment isn't designed, engineered and produced in a vacuum, so to speak. The agricultural engineers must put themselves in the farmer's shoes and think not only as he thinks today but as he will think tomorrow. They must have an intimate knowledge of what is going on on all kinds and sizes of farms, and what new developments the future is likely to bring about. In sum, they have to get out where the work is done, which is on the farm, and learn from actual experience, not just theory.

The supervisor also said, according to an article by E. T. Leavitt in Tractor Farming, that "knowing exactly why farmers buy as they buy is difficult. Such factors as comfort, leisure, and the important endless desire for increased capacity have resulted in the commercial acceptance of bigger, more powerful tractors, wider tillage and planning machines, and self-propelled harvesting equipment when perhaps a formal economic analysis would not justify them." It's a case where the producing companies face a real job in keeping up with the ideas of the farmers whom they serve, and who determine whether any given product and innovation will fail or succeed.

HARTFORD, KENTUCKY, THE OHIO COUNTY NEWS: "A writer for this newspaper, visiting in Europe a few years ago, observe that the average European family gets much more out of the simpler things than the average American family. This is interesting, in view of the great material wealth of the American family — as compared with the average in Europe . . . The moral of all this is to develop a philosophy of life which will allow you to enjoy what you are doing, or to find a way to do something you enjoy doing. At the same time, of course, you will have to make a living and meet your responsibilities as a citizen . . ."

Federal excise tax collections showed a substantial jump in the first quarter of this year as compared with the same period in 1958 — from \$2,516,949,000 to \$2,680,521,000.

By John C. White, Commissioner

Recent findings on the effect of light on poultry have caused poultrymen to sit up and take notice.

Nature in her vision has seen fit to correlate reproduction with the light phase of seasonal change.

Age affects the response of poultry to light. During the brooding period the chick needs lots of light. This means that all-night lights are beneficial during the brooding period. During the rearing period the light requirement is quite different. Rest periods are necessary for proper growth as the birds become older.

In the summer months additional lights may be given at night to induce greater feed consumption. Intermittent light is preferable. For example, one hour or light could be followed by a rest period of three hours of darkness and the process repeated throughout the night.

Too much light during the growing period is harmful in several ways. All-night light of high intensity may encourage feather picking. More important is the possible reduced life-time productivity of pullets given all-night lights during the growing period.

The hours of light required for egg production is not an all-or-none reaction. Pullets will reach sexual maturity with six hours of light. In addition to the hours of light, the intensity must be considered. While one foot candle is required for optimum egg production when the hens are given 14 hours of light, about a fourth of that amount is required when all-night lights are used. With fryers, it is necessary only to give enough light so the birds can see to eat.

Tests are still being conducted, but with the desire to get a sustained high egg production, it is quite certain that most poultrymen should consider light control for pullets.

Retailing of turkey parts, turkey steaks, cut-up turkey, and turkey patties is gradually increasing in Texas retail food stores. A recent survey shows that most purchasers interviewed at a supermarket handling the parts year-round are steady users of

the product. More than half the shoppers served turkey parts three to five times a month. Those buying turkey parts rated them very favorably as to family acceptance compared with other meats such as beef, pork, fish and chicken. A wide variety of dishes is being prepared with turkey parts. Baking is the most prevalent method of preparation. Other methods include smothered, steamed, stewed, creamed, soup and salads.

That interest in O. Henry is still keen, nearly 50 years after his death, is shown by the fact that the two copies of his latest biography in the Austin Public Library were taken out 38 times in 1958. The book is Gerald Langford's "Alias O. Henry." The fact that O. Henry lived in Austin as a young man and the further fact that the biographer is a member of the faculty of the University of Texas may have given the book an appeal greater than in other cities but, allowing for these factors, it is evident that many people find the life story of the short story writer of real interest.

There have been many surmises as to the origin of William Sidney Porter's nom de plume. The one oftentimes encountered is that it was derived from the name of an official in the prison where Porter served a term for embezzlement—a charge of which many believe he was not guilty. But Porter linked his name and the pseudonym, O. Henry, in an inscription in an Austin album in 1886, which was long before his tragedy.

When I went to Eastland in the summer of 1912, a predecessor as editor of the Daily Oil Belt News had been H. A. Mc Eachin (pronounced, approximately, "Mc Cann") and some of the publicity articles and publications still came addressed to him as the editor.

It was not until years later that I learned that he had been connected with O. Henry's magazine, the "Rolling Stone." The publication announced that H. A. Mc Eachin was "associated in the business and management of this paper." The association was brief for, only four issues later, the career of the paper came to an end.

I met Mc Eachin only one time and that when he paid a short visit to the Oil Belt News office along about 1923. I recall him as heavy-set and as smoking a pipe. Had I known then that he had been O. Henry's companion, he would have been pried with questions. Mc Eachin, being a newspaperman, doubtless could have told much more than did the untrained observers of O. Henry's Austin days. So far as I know, Mc Eachin never wrote down his impressions and experiences and so the information is lost.

E. E. King of Tahoka visited friends here on Wednesday of last week.

Mr. and Mrs. Cordell Clanton and son of Milford visited her sister and family, Mr. and Mrs. Bob Brown, Sandy and Linda over the week end.

Promotion Of Boating Safety Aim Of New Water Safety Act In Texas

BY J. O. MUSICK
General Manager
Texas Safety Association

PART II

Purely and simply: the intent of Texas' new Water Safety Act is the promotion of boating safety.

This purpose is partially accomplished by the requirements, explained in Part I, of proper and uniform safety regulations.

What might be called a second phase deals with accidents, enforcement and penalties of the new Act, to be administered by the Texas Highway Department when it goes into effect August 11.

PROHIBITIONS — Under the Water Safety Act it will be unlawful for any person to operate any class of motorboat, ski or similar contrivance, in a reckless or negligent manner that endangers the life, limb or property of any person. This is just about as specific as a law can get and still cover all situations.

ACCIDENTS — In essence, the Act requires the operator of any boat involved in an accident caus-

ing death, injury or property damage, to stop, render assistance, give his name, address and identification in writing to any person injured, or to the owner of damaged property.

In case where an accident results in death, injury or property damage in excess of \$100.00, the operator of any motorboat must file a full description of the accident with the Texas Highway Department; such report is not admissible in court as evidence.

INTOXICATION — Any person who operates any vessel, or manipulates any water skis, aquaplane or similar device, while intoxicated will be guilty of a misdemeanor.

Upon conviction, the person may be fined not less than \$50.00 or more than \$500 and/or be imprisoned for not more than 6 months.

PENALTIES — A person who violates any section of the Water Safety Act is guilty of a misdemeanor. Upon conviction, such person may (where another penalty is not provided) be punished

by a fine of not less than \$10.00 or more than \$50.00.

LOCAL REGULATIONS — Just as the Water Safety Act must be in conformity with the Federal Boating Act of 1955, so, too, local regulations must conform to this Act.

However, there is nothing to prevent local adoption of laws relating to operation (including zoning), equipment and other safety measures, if the provisions are consistent with the Water Safety Act.

Also municipalities may adopt ordinances limiting the horsepower of motorboats operating on lakes within its jurisdiction.

ENFORCEMENT — All of Texas' duly authorized peace officers are given authority to enforce the provisions of the Act. Furthermore, a violator may be taken into custody if he refuses to sign a promise (ticket) to appear in court within 30 days.

Courts of the county in which the violation occurred have jurisdiction.

Mr. and Mrs. Everett Kuehler and sons and Mr. and Mrs. Kenneth Stubblefield and son visited with the girls brother, J. A. Brewer, and family in Wickett from Monday until Wednesday of this week.

Goree News Items

Mr. and Mrs. Gene Beaver and family of Levelland are visiting in the home of her parents, Mr. and Mrs. Bill Decker.

Mrs. W. L. Thornton has returned home after a week's visit with her son, Grady Thornton, and Mrs. Thornton in Glen Rose.

Mr. and Mrs. Joe Butler visited in the homes of their parents, Mr. and Mrs. J. J. Perdue and Mr. and Mrs. H. L. Butler last Sunday. Dickie and Barbara returned home with them after several weeks visit here. Bobby Gene remained for a longer visit.

Mr. and Mrs. Virgil Proffitt of Brownfield visited his sister, Mrs. George Crouch, last Monday.

Mr. and Mrs. Earl Howry, Tommy, Jackie and Evelyn and Mr. and Mrs. Eldon McSwain attended the Howry reunion at a park near Lawton, Okla., last Friday through Saturday.

have in the House, and Representatives will be elected to the new seats in the 1962 election. In addition to the gain that Texas will make, several other States in the Southwest and West will gain substantially. This shift of population from the East and North to the Southwest and West could to a great degree change the attitude of the Congress on many questions and marks the continuation of the already shift of political power to the great area West of the Mississippi.

Visitors from home this week were Mr. and Mrs. Tyra Roper and children of Henrietta; Mr. J. B. Jarratt of Wichita Falls; Mr. and Mrs. Gaines West and children of Denton; and Mr. W. B. Woodruff, Jr., of Decatur.

Mr. and Mrs. E. A. Ragdale and daughter, Eugenia, of Fort Worth visited her parents, Mr. and Mrs. C. M. Thompson, and her brother, Everett Thompson, and family, Miss Nancy Thompson accompanied the Ragdales Friday for a weeks vacation in Oklahoma and Colorado.

News From The U. S. Congress

By Congressman Frank Bcard

The representation of Texas in the House of Representatives will be increased by two or possibly three Members after the 1960 census. Proportionment of representation the House among the fifty States will be determined on the basis of the census. The Constitution provides that seats in the House shall be apportioned among the States according to their respective numbers and that each State "shall have at least one Representative." The thirteen original States were allotted sixty-five Representatives in the Constitution. After the first census in 1790 the size of the House increased to 105 seats, and from time to time seats have been added as new States were admitted to the Union. Through 1910 the size of the House was increased after every census except the one in 1840 when the Membership was temporarily reduced; however, since 1910, the Membership has remained fixed at 335. With the admission of Alaska last year, membership was increased temporarily to 436 in compliance with the Constitutional provision that each State must have at least one Representative. The number will rise to 437 with the admission of Hawaii this year. Under the present law, however, the size will revert to 435 seats after the 1960 census. The census is taken as of April 1, 1960. By December 1 of that year the Secretary of Commerce must transmit to the President the official population total of each State and showing the number of Representatives for each State. The President then advises the Congress of the census figures and the apportionment resulting therefrom. This will be done in the first week of the next session of Congress. Then, unless Congress takes action to the contrary, within fifteen days the apportionment becomes effective, and the Governor of each State is advised how many Members each State will

Something Wonderful Happens

When you cook better..live better..Electrically

It's like having a whole staff of chefs cook dinner for you... That's what homemakers say after they try one of the new automatic electric ranges.

And you'll agree with them! Imagine a wonderful world where all the work and worry of cooking is gone forever — with an electric range that almost thinks for itself. Time and temperature controls cook delicious meals without your even having to watch... when you live better—cook better electrically.

3¢ For less than 3¢ the average family served by WTU can cook a complete meal in a modern electric oven... and enjoy the cleanliness and convenience of Electric Living. Change over to Electric Cooking.

NEWS FROM VERA
(Mrs. Theima Lee Coulston)

Mr. and Mrs. Bob McCaughey and daughter, Jennie, of Lubbock visited over the week end with his mother, Mrs. J. N. McCaughey.

Mr. and Mrs. J. J. Head of Huntsville, visited Mrs. Iola Scott and Ike Shipman last week.

Rev. Gene Louder is spending a few days this week with his parents, Mr. and Mrs. Earl Louder, in Lubbock.

Mr. Simms Dodson of Jacksboro passed away at the home of his sister, Mr. and Mrs. George Sutton, last Monday evening at 7:30 p.m. Funeral services were held in Jacksboro.

Mr. and Mrs. Willie Peddy accompanied Mr. and Mrs. John Murphree and family to places of interest in Arkansas, last week.

Mr. and Mrs. Donald B. Reeves and two sons, Don Jr. and Ronnie, of Knox City visited Sunday in the home of her parents, Mr. and Mrs. George Hughes.

Mr. and Mrs. Claudell Fratcher, Larry and Bert, visited points of interest in South Texas on their recent tour.

Mr. and Mrs. K. B. Ritchie and Melba visited over the week end with Mr. and Mrs. Anson Ray and Mr. and Mrs. Lamoine Ritchie in Amarillo. They took their granddaughters home after a few days visit in their home. Melba remained for a few weeks visit.

Mr. and Mrs. George Hughes and Mrs. Jim Hughes accompanied Mrs. Wallace Gore of Hobbs, New Mexico, to a family reunion of the Jones families at Novice last Saturday and Sunday.

Miss Karen Sullins, accompanied by her friend, Miss Virginia Greenhill of Lubbock visited Saturday with Karen's parents, Mr. and Mrs. Hoyle Sullins. On Sun-

day the young ladies attended the wedding of Patsy McMillan, a former roommate of Karen, at Texas Tech in Levelland.

Studies Made On Cotton Root Rot

Cotton root rot has been a serious disease in Texas for at least 100 years, says Dr. L. S. Bird, Texas Agricultural Experiment Station plant pathologist.

Obtaining information on root rot were objectives first given by the Texas A&M College System to L. H. Pammel in 1883. Dr. Pammel reported his preliminary findings in Texas Agricultural Experiment Station Bulletin No. 4 in December 1888.

Dr. Pammel said correctly that root rot is caused by a soil inhabiting fungus, and to control the disease the spores and fungus threads which transmit it through the soil from plant to plant must be destroyed. He said that from a practical point of view, a proper method of crop rotation is the best way to destroy the fungus.

Following this pioneer work, a large number of scientists working for the Texas Station, the USDA and other public agencies have studied and many are still investigating the root rot problem. Dr. Bird says

Observations and experiments indicate that the root rot fungus attacks some 2000 species of wild and cultivated plants, with cotton the major cultivated crop attacked. For this reason, the disease is commonly referred to as cotton root rot.

Many methods have been used to try to eradicate root rot, among them; tillage practices — using deep plowing and large disk plows; crop rotation; building up soil organic matter; increasing soil microorganisms; chemical control; conducting biochemical investigations; soil and fertility experiments; and by trying to find cotton varieties resistant to root rot.

Dr. Bird adds that the best practices to follow in a control program are: rotating cotton with crops which are not susceptible to root rot, increasing the amount of organic matter in the soil, deep fall plowing, and by nitrogen fertilization.

Miss Sandy Brown left Thursday, this morning, for a visit with Rev. and Mrs. Grady Allison. Miss Brown will play for the revival Rev. Allison will hold next week.

Kitchens Family Reunion Held At Seymour's Park

The Kitchens family reunion was held in the Seymour Park on Sunday, July 26, with the following present:

Mr. and Mrs. Martin Voyles, Peggy and Teresa, of Lubbock; Mr. and Mrs. Elton Lauderdale and Wilbert of Hale Center; Mrs. C. B. Yates of Goree; Mr. and Mrs. Bill McDowell, Linda and Tommy, and Ranelle Atehinson of Fort Worth; Mr. and Mrs. Muri Feemster, Miss Gewndolyn Groves, Miss Mildred English and Miss Grace Halley all of Wichita Falls; Mrs. Melba Ward, Delby and Denise of Tulsa, Okla.; Arthur Kitchens of Sand Springs, Okla.; Mr. and Mrs. Ira Kitchens, Bunt, Gail and Larry, of Muleshoe; Mr. and Mrs. Willard Heathington, Hal and Ronnie, of Muleshoe; Mr. and Mrs. Robert Feemster June and Jan, of Vera; Mr. and Mrs. Bud Kitchens, Ronnie, Raynay and Nancy of Whittier, Calif.; Juanice Adkisson of Vera; Mr. and Mrs. H. D. Matthews, Jr., Dowell, Susan and Vickie, and Mrs. D. M. Groves of Munday.

Mr. and Mrs. Riley Bell and Vickie spent Sunday and Monday in Abilene getting a check-up for Vickie and visiting Mr. and Mrs. Jimmy Bell and family. Vickie stayed for the remainder of the week to visit Nadine Bell.

Drownings Increase In The Rural Areas

The purpose of swimming and boating is to have fun and relaxation, not to drown yourself as over 1100 rural residents of the U. S. do every year.

The large majority of these drownings could be prevented by observing simple safety rules, says Edwin H. Cooper, extension wildlife specialist. When you are boating, observe ten simple precautions and come back alive-not much of a hindrance to your pleasure considering you have your life to lose.

Cooper lists ten rules for water safety. Always find out how many passengers a boat can safely carry, and never exceed this number. Always carry an extra paddle in the boat, in case one is broken or lost. Before leaving shore, be certain you ask an informed person about hazards in the lake or stream, such as location of swift water, whirlpools or hidden obstructions. Always wear shoes and clothing that can be removed easily in case the boat sinks or capsizes. Have a life preserver for each person in the boat, particularly non-swimmers.

When using a motor, make sure it is the proper size or horsepower for your particular boat. Be as cautious when steering a boat as you would when steering a car, and learn and observe the rules of the water such as speed limits, yielding right of way and forbidden zones. Don't stand in a boat unless necessary and then

be careful of your balance. Always wear clothing that will protect you from sunburn, since sunlight is intensified by reflection off the water. And lastly, never go boating when warnings of high winds or severe weather have been issued, Cooper says.

These are simple rules, but their observance could save your life, Cooper concludes.

Egg producers and handlers may expand their outlets and volume of sales if they meet the demands of many buyers for wholesalers, local chain and independent stores and national supermarket chain stores, says F. Z. Beamblossom, extension poultry marketing specialist. Generally, he says these buyers are asking for the things that will satisfy their customers and give the greatest possible chance for repeat sales.

spent the last week in the home of her parents, Mr. and Mrs. John C. Spann. Her husband joined her on Sunday.

Mr. and Mrs. Joe Duke and Jo Ann and Miss Pat Bowden of Livingston, N. M.; visited Mr. and Mrs. A. B. Warren and Mr. and Mrs. Ben Yarbrough and other relatives here Wednesday of last week until Monday of this week.

Mr. and Mrs. Leland Hannah visited their daughter, Miss Charlotte Hannah, in Lubbock last Sunday and with Mr. Hannah's brother and wife, Mr. and Mrs. Allen Hannah, in Plainview on Monday.

Recent guests in the home of Mrs. D. M. Groves were Mr. and Mrs. Ira Kitchens and family of Muleshoe, Mr. and Mrs. Bud Kitchens and family of Whittier, Calif.; Arthur Kitchens of Sand Springs, Okla.; Mrs. Edd Ward and daughters of Tulsa, Okla.; Mr. and Mrs. Martin Voyles and daughters of Lubbock.

Mrs. Carl Green spent last week in Wichita Falls to be with her son, Gilbert Green, who underwent surgery on Wednesday at the General Hospital. He was able to be taken home on Saturday and reports are that he is doing fine. Mrs. Green returned home on Friday.

Preacher Adjudged Of Unsound Mind

A former Knox City Baptist preacher, Robert L. Dodson, was adjudged of unsound mind by a jury in 39th District Court at Haskell recently, and was ordered committed to a state institution.

The sanity hearing was the outgrowth of a felony case pending in the court against the 39-year-old man, in which he was charged with fondling the alleged incident occurred in November, 1958, and involved the man's daughter.

Constable Ace Davis of Haskell carried Dodson to the state hospital at Wichita Falls.

Weekly Health LETTER

Issued by the State Health Department

We don't know how you feel about it, but we're watching out this year for those nasty Megalopye opercularis. For those of you who don't have an entomology textbook handy — that's a moth, commonly called "asp" or "puss caterpillar," in the larval stage.

These brown or gray, semi-crescent shaped larvae may become extremely abundant, feeding on the foliage of a variety of trees and shrubs.

Schools have experienced difficulty in the past as a result of the prevalence of the insects on school yard trees. They represent a very real problem to house holders during warmer months.

The large number of requests for information concerning the "puss caterpillars" now being received by Texas State Department of Health entomologists indicates a population peak of these

insects.

Everyone should familiarize themselves with the appearance and medical importance of these stinging caterpillars. Children, in particular, should be warned to avoid them.

Individual reaction to the stings varies greatly, dependent upon many factors such as age, sensitivity status, size of caterpillar, area of skin involved, and the amount of pressure on contact.

A mature larva dropping from a tree into a person's shirt or blouse and mashed against the skin in several places before being retrieved would likely cause a much more painful condition than the simple act of brushing an exposed arm or leg against a small specimen.

A burning pain is felt almost immediately on contact. Small, raised, whitish spots appear, later becoming red. The inflamed area may spread for several inches, accompanied by swelling.

The resulting skin reaction frequently lasts for several days. Further systemic symptoms may arise of an allergic nature.

If illness develops, a physician should be promptly consulted. For localized reactions a sodium bicarbonate soak or one of the

MOTOR MAIDS

High Humidity Causes Trouble

By Martha Johnson
Dodge Safety Consultant

Getting the car to start promptly on a humid or wet day usually is more aggravating than serious.

The cause of poor starting on high humidity days often is the pumping of the gas pedal by the driver.

Instead of helping to start the car, pumping the gas pedal works just the opposite, having the same effect as over-choking or flooding the engine.

These tips may help in getting a prompt start on a humid or wet day:

Don't pump the gas pedal. Simply turn on the ignition key, hold the gas pedal all the way down to the floor, then step on the starter until the engine starts.

If the car has been kept in a closed garage overnight, open the hood to let the air circulate for a short time. Also, open garage doors and windows.

Possible mechanical causes of a no-start situation are many. The trouble could range from a weak battery, coil, condenser or plugs, to worn out distributor points, a minute crack in the distributor cap, or oily, corroded and exposed wiring.

many soothing lotions and ointments may help to relieve the itching.

If you need to kill them out, a spray made up of lead arsenate (two tablespoons per gallon of water) or 50 percent wettable DDT (two teaspoons per gallon of water) will probably prove successful.

IT'S THE LAW in Texas

FACTS NEEDED TO PLAN FACTS

In planning your will, your lawyer will want to know your true wishes; and then, to help you realize them, he will want to know a few vital facts.

Are you married? Any children or grandchildren? Previously married? Widowed? Your age and those of your beneficiaries? Legal residence? Health?

Why these questions? You'll have to work out your plan in view of the laws governing death taxes, property laws, and, if you are married, separate and community property.

Age? If you wish to set up trusts in the will, your age and those of your beneficiaries may help you to decide whether, for example, to use capital of the trust fund as well as its income for the beneficiaries.

Your residence? Most important, since state laws govern many items of personal property.

Do you plan to move to another state? If so, consult its laws. Many people who come to Texas from other states should see that their wills conform to and take advantage of our laws.

Some people live half the year in Texas and half elsewhere. If you do, take steps to nail down your claim to reside in one state or another, to avoid needless litigation and possible claims to taxes in both states.

Your health? If possible, have your will drafted while you are in good health and clear minded.

Contests, though relatively rare in Texas, still do take place. In some cases, for example where non-relatives inherit, it may be a good idea to give reasons for these bequests in your will and to tell why you may have left some relative out (for instance, where a child has been taken care of by gifts or in other ways).

(This column, prepared by the State Bar of Texas, is written to inform not to advise. No person should ever apply or interpret any law without the aid of an attorney who is fully advised concerning the facts involved, because a slight variance in facts may change the application of the law.)

Carol and Randy Green of Wichita Falls are spending this week with their grandparents, Mr. and Mrs. Carl Green.

CARD OF THANKS

Friends: We want to express our sincere thanks and appreciation to you for your kindnesses and sympathy during the sudden loss of our beloved little son and grandson. May we be ones worthy of this friendship and may God bless each one of you.

Sincerely,
Mr. and Mrs. Jack Coffman
Mr. and Mrs. Orb Coffman
Mr. and Mrs. Jack Johnson, etc.

Mr. and Mrs. Leon Hargrove of Pensacola, Fla., is here visiting his parents, Mr. and Mrs. Arthur Hargrove, who live near Gore, and with friends and relatives in Munday. Leon will report for sea duty at Portsmouth, Va., on the 23rd.

Mrs. Lila Masters and Bobby returned home last Sunday night from a two and a half weeks vacation to interesting points in California. They accompanied Mrs. Master's daughter and family, Mr. and Mrs. I. W. Gunter and children of Monahans.

Week end guests in the home of Mr. and Mrs. Carl Green were her sister and husband, Mr. and Mrs. S. E. Cumble of Fort Worth; L. E. Tomlinson and his daughters, Mrs. Dorothy Youngblood and children and Mrs. Mozelle Wigginton and children all of

Weatherford. The Cumble's daughters, Mrs. Mattie Lee Schumak and Mrs. Leon Tuggle, of Snyder were Saturday guests in the Green home.

Drive carefully. The life you save may be your own!

Miss Bera Faye Spann, Bobby Boyd Marry In Church Rites Here Sunday

The First Methodist Church in Munday was the scene of a wedding ceremony uniting Miss Bera Faye Spann of Munday and Bobby Dwight Boyd of Idalou, Tex., Sunday afternoon at 4 o'clock.

The bride is the daughter of Mr. and Mrs. Oscar Spann Sr. and the groom is the son of Mr. and Mrs. E. P. Boyd of Idalou.

Rev. Rex L. Mauldin, pastor, performed the double-ring ceremony before an arch decorated with lemon leaves and yellow gladioli. Baskets of yellow gladioli and palm sprays flanked the altar. Candelabra decorated with palm sprays held tapers.

Mrs. Herbert Pijan of Lubbock was soloist with Mrs. David Rackley of Rochester, organist.

Given in marriage by her father, the bride was attired in a formal gown of white imported Chantilly lace over bridal bouquet satin. The fitted lace bodice featured long tapered sleeves fashioned with a row of tiny buttons. The portrait neckline was accented with iridescent and seed pearls. A panel of lace extending over a large bow in back was attached to a crown of seed pearls and tulle. Her flowers were a cascade arrangement of white feathered carnations centered by a white orchid.

Matron of honor was Mrs. David C. Link, sister of the bride of Andrews, Tex., who wore a white bouffant-skirted dress styled with a bateau neckline and a mint green organdy cummerbund with flowing panels. Her headdress was a flat bow band of matching green organdy and she carried a cascade arrangement of yellow gladioli flowerlets.

Bridesmaids were Misses Marcell Moore of Bovina, Tex., and Nancy Cockrell of Littlefield who wore costumes and carried flowers identical to those of the matron of honor.

Candlelighters were Miss Linda Moore, Plainview, cousin of the bride, and Wayne Boyd, brother of the groom of Idalou. Flower girl was Cindy Spann, niece of the bride of Sweetwater, and ring bearer was George Link, nephew

of the bride of Andrews. Serving as best man was Herbert Boyd, brother of the groom of Lorenzo, and ushers were Harlan Reddell, Idalou; Douglas Pummell, Dallas; Dale Boyett, Albany, and Von Prahl, Jacksboro.

The bride, who was graduated from Munday High School, holds a BS degree from McMurray College, Abilene, where she was graduated in 1958 summa cum laude. At McMurray, she was a member of Alpha Chi, honorary society, Wah Wahaysee and Delta Beta Epsilon social club. She was elected to Who's Who in American Colleges and Universities. This past year she has taught in the Lubbock public schools.

Boyd attended McMurray College and was a member of Kiva social club and the Chanters. He was graduated from Texas Technological College, Lubbock in 1958 with a BBA degree where he was a member of the Tech Choir. He did graduate study at Tech this past year.

Mr. and Mrs. Oscar Spann Sr. were hosts for the reception in the church social hall. Assistants were Mesdames John Spann, Levi Bowden, Erin McGraw, G. F. Hawkins and Miss Jan Hawkins. Out-of-town assistants were Mesdames C. J. Reese, Knox City; Darrell Vines and George Spann, both of Lubbock; Oscar H. Spann Jr. of Sweetwater; O. E. Moore, Plainview, and Misses Barbara Carver, Knox City and Mae Frances Heffner, Anson.

After a short wedding trip, the couple will make their home in Amarillo where the bride will teach in the Amarillo schools and the groom is employed by Burlington Lines.

Parents of the bride and groom were hosts for the rehearsal party Saturday evening in the Methodist Church social hall.

Mr. and Mrs. Claude Hill have returned home from a visit with their son and wife, Mr. and Mrs. Claude Larry Hill, in Roswell, N. M. They also visited in Ruidoso while away.

MRS. BOBBY DWIGHT BOYD
... formerly Bera Faye Spann

Accidents Cost \$12 Billions Each Year

CHICAGO—How many schools and hospitals could you build with 12 billion dollars a year? Quite a few.

Yet, according to the National Safety Council, this is the amount accidents cost the nation in 1958. The Council's 1959 statistical

yearbook, "Accident Facts," reports that wage losses alone from accidents amounted to nearly four billion dollars. Medical fees and hospital expenses accounted for another 950 million dollars. Property damage, production loss and insurance costs took the remainder of the 12 billion dollars.

BIRTH ANNOUNCEMENT

A beautiful auburn haired girl arrived at the Knox County Hospital at 12:22 p.m. Monday, August 3, 1959 to make her parents, Mr. and Mrs. Clyde Hendrix, Jr., and brothers, Donnie, 11, and Jerry Lee, 18 months, about the happiest family in town. She weighed 7 pounds 10 ounces and has been named Melissa Sue. Her grandparents are Mr. and Mrs. J. L. Yost and Mr. and Mrs. Clyde Hendrix, Sr.

Spann Relatives Here For Wedding

The Spann relatives who were here for the wedding of Miss Bera Faye Spann and Bobby Dwight Boyd last Sunday were Mr. and Mrs. D. C. Link and children of Andrews, Mr. and Mrs. O. H. Spann, Jr. and daughters of Sweetwater, Mr. and Mrs. George Spann of Lubbock, brothers and sister of Miss Spann; Mr. and Mrs. Joe Spann and children of Panhandle; Mr. and Mrs. Johnny Spann and daughters of Abilene; Mr. and Mrs. A. C. Sarsfield of Irving; Miss Ida Mae Spann of Wichita Falls; Mrs. Ruth Ford of Lawton; Mrs. Kate Donald, Charles and Jane and Mr. and Mrs. Ernest Cherry and daughter of Azle; Mr. and Mrs. George Spann of Abilene and Mr. and Mrs. Will Campbell of Lubbock. Friends attended from Idalou, Lubbock, Littlefield, Vernon, Albany, Dallas, Fort Worth, Abilene, Rochester, Rule and Knox City.

The Spann family also used this occasion for a family reunion as it was the first time in many years that the Spann brothers and sisters had been together.

Gems Of Thought

"GREAT NEED OF MANKIND"
More love is the great need of mankind.

—Mary Baker Eddy

It is a beautiful necessity of our nature to love something.

—Douglas Jerrod

Anything will give up its secrets if you love it enough.

—George Washington Carver

Life is a flower of which love is the honey.

—Victor Hugo

It is astonishing how little one feels poverty when one loves.

—Edward George Bulwer

Love must be learned, and learned again and again; there is no end to it. Hate needs no instruction, but waits only to be provoked.

—Katherine Anne Porter

Mr. and Mrs. Joe Price and daughters of Snyder visited in the home of Mr. and Mrs. C. L. Anderson and family last week.

LOCALS

Lee Haymes returned home last Friday from a two weeks vacation to points in Missouri, Illinois, Kentucky, Tennessee, Mississippi, Louisiana, Oklahoma and Arkansas. He was accompanied on the trip by his two brothers, Joe Haymes of Lubbock and Mac Haymes of O'Donnell.

Mrs. O. B. Paulsel of Fort Worth visited her mother, Mrs. T. A. Brown, and sister and husband, Mr. and Mrs. Chester Bowden, over the week end.

Suzanne and Kenneth Hightower of Dallas are spending this week with their grandmother, Mrs. A. E. Womble, and other relatives.

Week end guests in the home of Mrs. F. T. Jarvis were Mrs. Prudence Newsom and Mrs. Margaret Brock and Sandra of Fort Worth.

Mr. and Mrs. W. E. Reynolds and their son, Don Reynolds of Decatur, left Wednesday for a two weeks vacation in California where they will visit their daughter and sister, Mrs. George Tweed, and family in Modesto.

Mrs. Maurayse Blacklock visited with friends in Snyder over the week end.

Mr. and Mrs. A. A. Smith, Jr. and Mr. and Mrs. Bruce Burnett were guests of Mr. and Mrs. Gordon Stone on their ranch near Stanton over the week end.

Mr. and Mrs. Ray Taylor of Quannah were week end guests of Mr. and Mrs. W. E. Braly.

Mr. and Mrs. Lee Lemaster and Bill of Lake Jackson and Mrs. Dale Williams and children of Plainview visited their mother, Mrs. Lucille Stodghill, over the week end.

Mr. and Mrs. David Eiland and Mr. and Mrs. Chas. Moorhouse were visitors in Dallas the first of this week.

Mr. and Mrs. Raymond Hargrove of Lubbock spent the week end with Mrs. Ralph Weeks and with Mr. and Mrs. A. H. Hargrove in Goree. Other visitors in the Hargrove home were Mr. and Mrs. Jesse Hargrove and children of De Leon, Mr. and Mrs. Marion Strickland of Rochester, Mr. and Mrs. Bud Hargrove and daughter and Mr. and Mrs. Roy Kirkpatrick of Goree.

Mrs. Tom Bullington, Janet and Tommy, left last Friday for El Paso for a month's visit with her mother, Mrs. Paul Espey.

The FAIR Store

Even when it says Wash 'n' Wear

I depend on my **SANITONE Dry Cleaner!**

WITH SANITONE SERVICE I'M SURE my wash 'n' wear things will come back looking like new even after dozens of dry cleanings. I don't have as much confidence in my own efforts. Stubborn spots, perspiration stains, and even the embedded dirt and gritty particles that chafe fibers and cause wear are gone. Therefore, I can expect my Sanitone Dry Cleaned clothes to look better longer than home-laundered ones. And Sanitone's exclusive Style-Set® Finish fully restores the like-new finish every time it's cleaned.

AND IT'S SO CONVENIENT to call my Sanitone Dry Cleaner and have him pick up the clothes I want cleaned. I don't have to spend valuable time doing them myself, and I'm never surrounded by a "forest" of garments dripping dry in my bathroom or backyard.

Call us today!

For Sanitone Dry Cleaning

Time For That Fall and Winter Suit!

And we have just received our new Fall and Winter line of fine fabrics. With both the Ed V. Price line and M. Born line of fabrics, we are able to give you a wider choice in your new suit. Come in and look these samples over at your earliest convenience.

 Mr. and Mrs. Laster Skiles, Knox City, a son and a daughter.

Deaths:
 Mr. A. J. Fuller, Vera.

Mr. and Mrs. Joe Spann and family of Panhandle and Mr. and Mrs. John Lee Spann and family of Abilene were week end guests in the home of their parents, Mr. and Mrs. John C. Spann. Mrs. Joe Spann and children remained for a visit this week while Joe is attending a coaching school in Fort Worth.

USDA Announces 1960 Conservation Reserve Program

College Station — Texas farmers will receive a basic rate of \$12 an acre under announced plans for the Conservation Reserve of the Soil Bank for the 1960 crop season by the U. S. Department of Agriculture. A tentative goal of 452,000 additional acres was also announced for the State.

Principal changes listed for the 1960 Conservation Reserve in the USDA announcement include regulations relating to publicly owned land, tenure of ownership, method of setting payment rates and the determination of priorities when more applications are received than can be accepted.

Land owned by a state, county, town or local government will be ineligible for the program. This rule is already in effect on Federally owned land. Land which has changed ownership (except through inheritance) since December 31, 1956 is ineligible to enter the program in 1960.

If land under a 1960 Conservation Reserve contract is sold, the contract generally may be assumed by the purchaser only after it has been in effect for three years.

The priority system of accepting applications has been modified to assure first consideration to farmers who were unable to participate in the 1959 program because of lack of funds.

Detailed information as to the application of these and other changes to individual farm situations will not be available in county ASC offices until mid-August, stated the USDA announcement.

This will be the fifth year of the Conservation Reserve program. If farmers contract for the expected 5 million additional acres in 1960, the total acreage in the program next year will be approximately 28 million.

4-H Club Members Of Texas On Farms And In Cities Share Many Projects

Timeworn distinctions between farm and city cousins are rapidly disappearing, say rural sociologists. Another fusion taking place is in 4-H Clubs.

In Texas as in virtually every other state, non-farm 4-H boys and girls are carrying many of the same projects as their counterparts living on farms, according to the Cooperative Extension Service.

With the help of county Extension agents, local volunteer 4-H leaders, and junior leaders the young people "learn by doing."

Two examples are the electric and entomology projects. Every household at one time or another has need of simple electrical repairs on iron cords, switches, fans, wall outlets, small motors, and the like. Made-to-order items such as lamps always find favor with mother, while converting man-made energy to electrical energy makes many chores easier. These are but a few things that 4-Hers learn to do and demonstrate in the electric project.

The entomology program of ten starts 4-Hers in an exciting

hobby like collecting butterflies, and identifying rare or indigenous species of insects. They also learn to recognize helpful as well as harmful ones.

Whether club members cultivate small gardens or vast acres they can apply this knowledge to growing better vegetables, flowers, fruits and grains. Pets and farm animals are benefited, too.

All 4-Hers strive to "make the best better," and awards do not come easy. Slightly more than 10 per cent of the 1,526 Texas club members enrolled in entomology last year won county medals, and nearly eight per cent of the 6,153 received medals for their electrical know-how.

Only one state winner in each category is selected. Miss Jean-

ette Pfeiffer, 16, of Carmine, Fayette county, was 1958 state entomology winner, and Olen Baley, 18, of Wichita Falls, was electric winner. Their award was a trip to the National 4-H Club Congress in Chicago.

Westinghouse Educational Foundation has been donor of the 4-H electric awards for nearly a quarter of a century. This is the eighth year that Hercules Powder Company has supported the entomology program. Arrangements for awards are made by the National Committee on Boys and Girls Club Work. All winners are announced by the State 4-H Club office, Texas A. & M. College.

Landowners Still Can Stock Quail

Some 34,000 quail have been released on Texas lands since January through the Game and Fish Commission's restocking program, according to the assistant executive secretary.

Of this number there were 18,000 bobwhites and 14,000 cottontails. They have been planted on farms and ranches where there are suitable conditions both as to cover and feed.

"Even though there has been a steady increase in quail populations throughout the State in the last year or so," Mr. Cutbirt said, "many areas remain underpopulated. Landowners usually

know if their particular area is short of quail."

The Commission's game farm at Tyler is maintaining a large supply of quail for stocking such areas. Landowners can mail their applications directly to the Austin office or contact their local game wardens.

To insure landowners that quail will survive on a particular piece of land, a game warden checks the area to be stocked soon after applications are received. If the land is satisfactory quail habitat, the hatchery will ship the number of birds requested at 50 cents each.

It's not the size of the dog in the fight, but the size of the fight in the dog!
