Odd Bits Salvaged
By The Editor

Roger Maris got his'n!

Time was running out on Roger—just like it was on Babe Ruth back in 1927—so he stepped up to the plate and whacked his 61st homer last Sunday. He set a record for himself, being the first player in history to hit 61 home runs in a season.

He did not break Ruth's record, due to a ruling by Baseball Commissioner Ford Frick that the Babe's record had to be broken in a 154-game series. We believe, though, that Maris will go down in history as one of the baseball greats of all time.

And speaking of history, that was what was made at Benjamin last Saturday. Sheriff Homer T. Melton became the first Knox County sheriff to resign his office and become a Texas Ranger.

We've had lots of contacts with Homer T. since he became sheriff in 1947—he was elected in 1946 and took office the following January—and we've never known a more courteous man to hold such an office. He was one of the leading lawmen of this area—possibly an important reason why the Ranger forces wanted him.

He and his family will be moving to Lubbock, but our guess is that we'll be seeing Homer T. in the future.

Knox County had a new sheriff at 12:01 a.m. Sunday. Chief Deputy H. C. Stone was appointed to fill the unexpired term, and Melton's resignation was effective at midnight Saturday.

Stone has served as deputy sheriff for a number of years and knows the duties of office. Our guess is that he will pick up the reins like a veteran and carry on in a splendid manner. Our congratulations and best wishes go with him as he takes over the "chief command."

Talk about sardines in a can! If you had any doubt about lots of cotton pickers being in the area, a visit to the bank or post office last Monday would have convinced you. The rain Sunday drove the pickers out of the fields, and they had important business at the bank and post office.

We've abandoned our old summer straw, at least for the time being. Once when a cooling norther and rain came several weeks ago, we donned a felt job. The weather cleared and warmed up, however, so we decided to at least make our straw last until October. The more dilapidated it became, the more comfortable it was.

It became cool enough last week end, that we put it aside again and dug out the twice cleaned and blocked felt. And that may be the last of the straw—we wouldn't be surprised to find it in the trash barrel any day!

We outlasted Jim Harpham by several weeks. You know Jim and I kinda run a race each year to see who is the first to don a straw and the last to discard it. Several weeks ago, Jim pointed to his felt job at the Lions Club meeting and said: "The whole crown came out of my summer hat, and I had to throw it away."

Goodbyes are sad occasions, many times, and we always dread the day when we have to say goodbye to our comfortable old summer straw hat.

Inspection Sticker For '62 Available

Motorists can now have their vehicles safety inspected for the 1962 Inspection Sticker.

Captain Alan Johnson of the Motor Vehicle Inspection Service, Texas Department of Public Safety, said today that over 5,000 inspection stations have started inspecting more than 4 1/2 million vehicles coming under the provisions of the Motor Vehicle Inspection Act. All such vehicles must display the new safety sticker by April 16, 1962.

Johnson said, "We feel that the vehicle inspection program in Texas has proved a deterrent to vehicle accidents on our streets and highways." He urged all motorists to get their vehicles inspected before the bad weather of winter begins, when it is so essential to have vehicles in safe operating condition.

"It takes just a few minutes to have a vehicle safety checked," Johnson stated, "yet those few minutes thus spent today could mean the saving of someone's life tomorrow."

Johnson noted that the per cent of accidents in which vehicle defects were causative factors has been cut approximately in half since the program was started in Texas.

In a history making move for Knox County, Sheriff Homer T. Melton resigned as sheriff of Knox County at Benjamin last Saturday to take a position with the Texas Rangers. Melton is believed to be the first sheriff in Knox County to resign his office and the first to be appointed to the Texas Rangers.

A special meeting of the Commissioners Court was called to accept Melton's resignation, which became effective at midnight Saturday.

Deputy Sheriff H. C. Stone was appointed by the court to fill the unexpired term, and has accepted the appointment.

Mr. Stone has served as deputy sheriff for a number of years. He is well acquainted with the duties and operation of this office and is expected to assume the duties with efficiency and experience.

In another unprecedented move, Sheriff Stone named Mr. Melton as his deputy for the time being. Melton will serve until he enters the Texas Rangers school, which will likely be in about ten days.

Melton was elected sheriff in 1946, taking office on January 1, 1947, and was in his 14th year of office. Mr. Stone has served as his deputy most of this time.

Melton has been assigned to Company C in Lubbock.

Moguls Down Bearcats For Dist. Opener

The Munday Moguls opened District 11-A football play last Friday night with a thriller-diller 6 to 0 win over the Henrietta Bearcats on Scruggs Field.

The Moguls got their winning touchdown in the second quarter, with only 40 seconds left in the first half. The TD was made by Douglas McGrady, who went straight up the middle on a 47 yard carry. End Tommy Dickerson threw the main block that cleared the field for McGrady.

Munday threatened again deep in the third quarter, but bogged down on the 10 yard line.

The Bearcats remained around the Munday 30 in the last quarter, but were never able to score. The visitors threw many passes, but the stiff Mogul defense held off the threat.

The Moguls racked up 152 yards rushing to 117 for the visitors, and also led in first downs, 10 to 8. Munday completed two passes for 22 yards, while the Bearcats completed two seven yarders.

The Moguls will take an earned rest this week, being idle on Friday night, before taking to the road for four consecutive games.

BAD MEDICINE!

Dr. Leonard W. Larson, president of the American Medical Association, testified before the House Ways and Means Committee in opposition to the bill which would provide government-paid medical care to everyone drawing social security benefits. He had an extremely forceful case—for the AMA has compiled more than 50 reasons why this proposal would amount to "billions of dollars worth of bad medicine for the people of this country."

At the end of his testimony, Dr. Larson came straight to the heart of the matter with these words: "The American people have been called upon to sacrifice to build up the strength of the nation so that we can meet the rising peril of communism. But we don't believe that America can be strengthened by sacrificing the best system of medical care in the world. We don't believe America can be strengthened by copying medical systems under which one foreign country after another has lost leadership in the science and arts of medicine. We don't believe the strength of this nation lies in the direction of substituting medical failure for medical success."

The basic question is whether the medical profession or a bureaucracy is to establish the rules governing the practice of medicine and the related arts. What government pays for, it controls—and all the arguments on earth can't contravene that historical truth. The proposed bill would be bad even if it didn't cost a single penny—because it would inevitably lead to a deterioration of the standards of medical care.

DEFENSE TAKES MORE THAN ARMS

The military budget, which was greatly increased by this year's Congress without significant dissent approaches the \$50 billion mark. This, it seems, is the price we must pay for the world's current insanities.

But there is more to the nation's defensive strength than arms. We must be fully prepared to fight an economic war which has no foreseeable end.

An essential weapon in that war is ocean shipping. And the only ships we can fully depend upon are those which fly the U. S. flag, or are entirely within the control of U. S. enterprise. In an emergency, the vessels of even our staunchest allies could be lost to us.

American government policy stipulates, and long has stipulated, that we have a merchant marine second to none. A vast modernization and replacement program, extending over the years, is

now underway. To implement this policy, the government provides differential subsidies for ship operation and construction—subsidies made necessary by the fact that it is far more expensive to build ships in the United States, and operate them under our flag than it is in the other maritime nations with which we must compete, due primarily to our wage and working standards.

Finally, much greater use should be made of American vessels by American shippers. The shipper who patronizes our own merchant marine is given the ultimate in service in every respect, at reasonable, competitive rates. Then, beyond that, he is making a contribution to our strength and to our position in the world.

HUMAN PROGRESS

Ninety-four years ago, on October 18th, Alaska was bought from Russia by Secretary of State William H. Seward for \$7,200,000.

Alaska is our largest state in area and the smallest in population—which gives her people an opportunity to reaffirm the pioneer spirit of their forefathers.

Mr. Seward once said, "The whole hope of human progress is suspended on the evergrowing influence of the Bible."

The 21st annual National Bible Week will be observed October 16-22. National chairman of the Week is Erwin D. Canham, editor of the Christian Science Monitor. On accepting the chairmanship, Mr. Canham said, "Mankind has no nobler nor more useful guide-lines to thought and action than the Holy Scriptures."

National Bible Week is sponsored by the Laymen's National Committee, Inc., an all-faiths organization. The theme for the Week is, "Read Your Bible—Your Finest Hours."

Football is in the air again—literally. Thousands of them are being tossed and kicked by hundreds of thousands of American boys. The American Medical Association offers some suggestions that can help to reduce the danger of serious injury, and even death, from this rough personal contact sport. Proper physical conditioning prevents injuries by hardening the body and increasing resistance to fatigue. Careful coaching leads to skillful performance, which lowers the incidence of injuries. Good officiating promotes enjoyment of the game as well as protection of the players. The right kind of equipment and facilities serve a major safety purpose. And adequate medical care is a necessity in the prevention and control of athletic injuries.

CHURCH OF CHRIST

MUNDAY, TEXAS

"And ye shall know the truth, and the truth shall make you free." — John 8:32.

I believe the Bible regards sincerity as a noble virtue and I believe that one should be genuine in his feeling or expression, especially in religion. Paul closes his epistle to the Ephesian brethren with this thought, "Grace be with all them that love our Lord Jesus Christ in sincerity." He wanted people to love Christ without any hypocrisy and their affection to be genuine and real.

However, let us not be deceived into believing that sincerity ALONE will save us or please God. God has always required more than sincerity of those who would be saved. In Acts 10 we read of a man described as being a very sincere man but not a Christian. Peter was sent by the Lord to tell this man WORDS whereby he might be saved and having a heart of sincerity he responded to TRUTH which Jesus declares will make man free. John 8:32 It took more than sincerity for this man to be saved and we exhort you not to depend upon sincerity alone but SINCERITY AND TRUTH. "Fear the Lord and serve Him in sincerity and truth." Joshua 24:14.

"If any man speak, let him speak as the oracles of God." — 1 Peter 4:11.

Weekly Health LETTER

Issued by the State Health Department

AUSTIN — Between now and mid-December is the critical period for taking immunizing shots against influenza — particularly for people in "high risk groups."

Health and medical authorities are in unanimous agreement as to the probability of an upswing in influenza this fall and winter. Especially vulnerable, say the experts, are people with heart disease, pulmonary disease, diabetes and other chronic illnesses, persons over 65, and pregnant women.

Recommended vaccinations procedures, drawn up by the national advisory committee on influenza, have been mailed from the State Department of Health to all local health officials throughout the state.

Most of the 86,000 flu-triggered deaths between September 1957 and March 1960, were among people in these categories, the record shows.

Some Asian flu outbreaks are expected, since they come in two to three year cycles. Also, Texas is due for Type B flu outbreaks, which usually come in four to six year cycles.

Asian influenza has been dormant in Texas since March 1960, and it has been more than six years since Type B has caused much of a flurry.

State Health Department officials say susceptible persons should be vaccinated early for maximum protection. Generally, the most troublesome time for flu in Texas is toward the latter part of December.

To reduce the hazards to persons in high risk categories, it is recommended that they be immunized with a multiple-virus vaccine—a product which will protect against more than one form of the disease—well before the beginning of the flu season. Protective antibodies usually develop within two weeks after inoculation, so it is important that the vaccine be administered before epidemics occur.

A second dose is recommended approximately two months after the first. Persons previously immunized should be re-inoculated with a single booster dose each year.

In view of the predicted upswing of influenza for 1961, it is recommended that serious consideration be given to the vaccination of people in vital public service post and for those among

whom the disease incidence rate is usually high—namely persons between the ages 5 and 25.

Storek-Lawson Nuptials Are Solemnized in Goree

Miss Mary Jane Lawson of Goree became the bride of Ernest Storek of Seymour in a double-ring ceremony in the First Methodist Church in Goree Tuesday evening, September 26th, at 6 o'clock.

The bride is the daughter of Mr. and Mrs. J. B. Lawson of Goree and the groom's mother is Mrs. Frank Storek Sr., of Seymour.

The ceremony was performed by the Reverend Walter Hadley, pastor of the First Methodist Church in Happy. Vows were pledged before an altar flanked by baskets of gladioli.

Mrs. Barton Carl, organist, provided traditional music.

The father of the bride presented her in marriage. She wore a gown of tulle over net and taffeta. The basque waist was fashioned with a sweetheart neckline trimmed with medallion lace. Tiny covered buttons emphasized the back of the waist. The ballerina length bouffant skirt featured a row of medallion lace just below the waist line. A row of lace medallions extended the length of the sleeves which came to a point over the wrist.

The brides finger tip veil of tulle was attached to a tiara of seed pearls. She carried a bouquet of white gardenias.

The brides jewelry was a strand of pearls, a present from the groom. She also wore the

traditional something old, something new, something borrowed and something blue.

Knox Prairie Philosopher Will Renew His Subscription If It's Not Contrary To The World Opinion

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek examines world opinion in his letter this week.

Dear editor:
Every once in a while you hear a world leader—although I'd like to say before I go any further that I didn't know what a world leader is, the direction the world's going these days, I don't know of anybody who'd like to be accused of leading it—at any rate, you hear one of them say action of this or that nature will be condemned by world opinion, or endorsed by world opinion.

I don't know what they're talking about.
You take Russia. When Russia started testing nuclear bombs again, lots of prominent people said, World opinion will condemn her for it.

Well, she's been testing them right and left for the past few weeks and whatever the world's opinion of her is, it hasn't put a stop to the tests. It's my opinion that it's not world opinion but Khurschev's opinion and his staff's opinion that decide how many tests are going to be made.

Understand, I'm not in favor of Russia's testing these bombs, as far as I can tell they work too satisfactorily already, the world now has enough bombs on hand to supply the equivalent of ten tons of TNT for each man, woman and child on earth, which as far as I'm concerned is plenty for me, somebody sure has over-rated me, I ain't that indestructible, but so far in the history of man world opinion has been one of the most ineffective weapons imaginable against a dictator bent on holding on to his job.

It's a shame, too. Nothing would suit me more than to decline to get on my tractor and start work on account of it might be contrary to world opinion. I can see real advantage in going into the bank and announcing I'd better not pay off my note on account of world opinion already claims America is too rich and I don't want to add any fuel to that flame.

World opinion some day may be an effective weapon, but right

now there are too many countries where you can get into office without being elected.

When my subscription to The Munday Times comes due, send me a bill and I'll check with world opinion to see if I ought to pay it.

Yours faithfully,

Falls In Home Main Cause Of Accident Deaths

Falls are the main cause of accidental deaths in the home.

Fatal home falls in a recent typical year totaled 13,400, according to Mr. O. F. Gates, Lone Star Gas Company Manager. Lone Star and The Munday Times are co-sponsors of the 1961 Home Safety Program in Munday.

"The 13,400 fatal home falls," Mr. Gates said today, "represented 47.9 per cent of all home accidents."

"From year to year," Mr. Gates said, "Only motor vehicle accidents outrank falls as an accidental killer, and approximately 64 1/2 per cent of all falls occur in the home."

The greatest number of fatal falls occur in the bedroom. Falls on the stairs and kitchen follow in that order. Fatal falls in fewer numbers occur in the living room, bedroom, dining room, hall, basement, garage and on the porch.

Approximately 86 per cent of the victims of fatal falls are more than 65 years old. Eight per cent are in the 45-64 age group. The remaining 6 per cent are spread through the 0-44 age group.

A majority of fatal falls occur while victims are walking on a level surface. However, they also occur while the victims are standing still, ascending or descending stairs, working, sitting, playing, eating, drinking, climbing and reclining. Some occur while the victims are sleeping!

"Particular attention," Mr. Gates said, "must be given to the problem of protecting the older people. Lighting, particularly on stairs, must be adequate. Do not leave loose objects in the middle of the floor. This particularly endangers an older person. His sight may not be able to detect the objects. If he trips, he is less

PRISON RODEO STAR — FATS DOMINO, versatile nationally-famous jazz pianist and singer, will be the featured attraction for the opening performance of the 30th Annual Texas Prison Rodeo in Huntsville, Sunday, Oct. 1 at 2 P.M. "Fats," the "Blueberry Hill" man, will appear along with thrilling convict riders competing for top prize money. Other features of the two-hour, fast-moving show will be several inmate entertainment groups, plus free-world calf roping, a girls' barrel race, and mounted quadrilles. Net proceeds from ticket sales are earmarked for the benefit of inmates of the Texas Department of Corrections. The Rodeo is held every Sunday in October and highlights a different top TV or recording star during each performance.

cover his balance. "Keep an orderly home. Arrange furniture so that it does not prevent free passage around the room. Do not let beds, vanity benches and other furnishings in the bedroom jut into the middle of the room. Keep doors closed. Close dresser drawers when not in use. Do not leave shoes in the middle of the floor. "When a person gets out of bed in the middle of the night and tries to make his way to the bathroom or kitchen in the dark, he is more than likely to fall over any improperly placed object. This danger can be eliminated by keeping the house in order and by having a light located within reach of the bed and at the entrance to all of the principal rooms," Mr. Gates concluded.

It was discovered that a very large number of people do not completely read the directions. Heed the warnings, or study the formula. . . If simple patent remedies are always as safe as some of the ads state, why are cautions about their use required by law to be printed on the labels? The truth is that all medicines should be secured from a Pharmacist. We can warn you against any possible danger.
