Then the architect made some unty, are as follows: remarks in which he said we had But he was viewing it from an- year. other angle.

He agreed with Mr. Cox and school board members that something needed to be done, and now! He wasn't looking at it from the administrator's viewpoint, but from that of an architect.

That "good building" he saw was in the view of remodeling and incorporating the structure in to the new school plant. The walls and foundation are good, he said; the windows can be fixed, a heating system installed and the entire building remodeled to serve our meeds for several years to come, and with a considerable saving.

He had plans and sketches, drawn, showing the present building with its face lifted and modernized; new wings added to provide more classrooms, the vocational ag and home ec departments,

The school board had seen all these, and they wanted patrons to see them, too, and give them the "green light" or go-ahead signal.

Some few questions were asked and answered with accuracy. We all saw a school system that was busting out at the seams from be-

MUNDAY'S NEEDS FOR 1948

1. A modern and up-to-date high school building, to care for the present and future educational needs of our children.

quirements of health, sanitation and supply.

4. A clean-up campaign of lasting effect; yea, neighbor next door. She returned home to find the the convention activities and then

one that extends even across the tracks. 5. Completion of our drainage and paving program, which will probably be accomplished this

6. More activity among our civic organizations, looking forward to, and planning for, a better Munday in the future.

ENVY OF THE WORLD

The history of the world, since recorded time began, has been blackened at regular and frequent intervals by terrible famines. Countless millions have died miserably from hungar. And those cataclysms were not confined to long past, primitive times. In the last quarter century starvation has stalked through China, Russia, and other nations.

Yet, in the United States, we have never had a because we are blessed with an abundance of resources. But other countries, where the standard of living is abysmally low compared with ours, have great resources also. Some may think it is because we work harder. Yet in the hunger-ridden as wages and employment remain near present high nations the average man and woman work much levels," says a Wall Street Journal commodity let- Baker and Kenneth visited relalonger hours, and perform a great deal more man- ter. From where I sit ... by Joe Marsh Three Mighty Important Ideas

Maybe you read, where a great encyclopedia has sorted all basic ideas into a few select groups. Under the letter "T" they have:

Temperance - Truth - Tyranny.

Sounds like a funny combination. And to philosophize a little, notice that Truth is in the center-between Tyranny and Temperance.

Now and then you hear folks criticize temperate people who enjoy a moderate glass of beer ... who talk about "two beers" getting some one into trouble, and claim: "There ought to be a law!"

Then Truth steps in between, and points out that two beers never got anybody into trouble-and that somebody's trying to distort the facts. No, there shouldn't be a law -there should be Truth.

From where I sit, those ideas are arranged just right. Temperance on one side, Tyranny on the other-and Truth in the middleseeing that Tyranny never encroaches upon Temperance.

Gift Tea Given To Honor Grace Bisbee Recently

The home of Mrs. G. H. Beavers was the setting for a gift tea, honoring Miss Grace Bisbee, bride elect of Mr. Henry Black, on Saturday afternoon, May 29, 1948, from 4:00 to 6:00.

Mrs. Beavers was at the door as guests arrived. They were received by Mrs. Myrtle Bisbee, mother of the honoree; Miss Bisbee, and Miss Helen Bisbee, sister of the honoree.

Each guest was registered in a bridal book, with Mrs. J. W. Parker presiding.

After the guests had seen the many beautiful gifts, which were on display, they were invited to the dining room, where the table was laid with a lace table cloth and centered with a boquet of white asters and pink carnations, flanked by tapers of white candles. Mrs. Collins Moorhouse presided over the punch bowl. Mrs. Oran Driver served the wedding slipper, shaped ice cream.

Forty Four guests were registered during the afternoon.

Hostesses were Mrs. P. W. Laird, Mrs. Doyle Pyatt, Mrs. L. M. Williams, Mrs. Oran Driver, Mrs. Collins Moorhouse, Mrs. Clyde

TINER DRUG

Williams Tool Bar Chisel Plow!

This is a subsoiler, or chisel plow, that has many advantages over the regular dray-type chisel plow. Here are some of the advantages:

- 1. Easier to operate—works closer to the tractor.
- 2. Cheaper to buy.
- 3. Lifts with tractor power.

See us for other farming needs, too. You will find our stock increasing.

DAVIS WEARWELL TIRES ONLY____ \$ Guaranteed Quality at Lowest Cost!

GUARANTEED 2 YEARS

NEW LOW PRICES

The chisel-type cultivation of the Jeoffroy "Soil Control Cultivator" is not new! In fact, · the first plows of this type were made over 3,000 years ago by the Egyptians for farming along the Nile River. They used a sharpened stick, while in the Jeoffroy machine, silicanmanganese steel is required to stand present-day speeds and uses. Down through the ages many plows have been used and discarded, but the chisel-type plow has proved to have less draft, control erosion, and conserve moisture more effectively than

any other plow invented! * Plows and cultivates the natural way. * Conserves the moisture. * Prevents blowing. * Stops erosion. * Cuts plowing cost in half. * Constructed to last a lifetime. * Pre-war prices. * Made in 4 sizes to fit your power:

7 ft. - 10 ft. - 13 ft. - 16 ft. Hughes-Dayton Imp. Co.

Disc-type cultivation leaves a smooth surface that quickly seals and causes water run-off.

Weekly Health

Issued by Dr. Geo. W. Cox M. D., State Health Officer of Texas

Austin-A warning against the hitch-hiking germ of typhoid fever 45-1tp. has just been issued by Dr. Geo. W. Cox, State Health Officer. They must catch a ride from an infected person to the well per- the Women's Editor of this newsson; this is generally accomplish- paper. ed by water, milk, flies, fingers, * or food. Every case is contracted by way of the mouth and digestive Art; Mrs. W. P. Farrington and A carrier is a person who has Mrs. Hal Fairman were business

had typhoid fever at some time visitors in Temple the first of and who even after recovery car- this week. ries the germs of the disease in the urine and discharge of the Bonner Barton, who is now with bowels. Carriers who are careless the army air corps stationed in in their personal habits are likely San Antonio, spent from Friday to infect any food they handle with to Monday visiting his parents, unwashed hands. Some of the Mr. and Mrs. Cecil Barton, and most serious and far-reaching with other relatives and friends. outbreaks of the disease have been caused by drinking milk or eating foods that have been handled by carriers. Persons may be carriers without knowing it.

Typhoid fever is unnecessary and preventable. Every case is due either to community negligence or to the ignorance or carelessness of some individual. Persons planning a vacation or trip where sanitation may not be rigidly enforced should protect them-selves against this disease by being vaccinated. Inoculation with typhoid vaccine, a week apart, is all that is necessary to secure protection against this disease for two years. The purity of water, milk, or food cannot be judged by looking at it so the best thing to do is to play safe and have your physician protect you.

Upon discharge from his four years in the army, Walker returned to Menard county as county graduate study in September, 1947, receiving a Master of Science degree in range management from Texas A. and M.

Range Specialist

A. H. (Fred) Walker, extension

acting director of the Texas Ex-

with a B.S. degree in animal hus-

In September, 1947, Walker was appointed assistant pasture specialist-range in the Texas Extension Service, with headquarters at College Station.

Under his recent appointment as Extension Range Specialist, Walker will be devoting his activities to proper range and pasture management on native vegetation pastures and range lands.

Walker will move his office from the Experiment Station building to the Range and Forestry Department in the Agricultural Engineering building.

be before he is considered "old"; Anyone is old who is 10 years older than you are.

When I was on the staff of the Fort Worth Star-Telegram, the lady who was bookkeeper had a birthday. A girl who worked in the classified advertising department said, "So today is your birthday! I hope I'm as well preserved as you are when I'm 35!"

My mother's favorite story was about a woman who wouldn't tell her age. It was her boast that she had kept it a secret since she was 20. A man said, "But someday you'll accidentally reveal it." "No," the woman replied, "when a woman has kept a secret for 18 years, she'll never reveal it."

And my mother used to tell about a farmwife up in the hills of Arkansas. Every fall at harvest time, the men took turns in helping each other with their crops. And when they came to this particular farm, just as they sat down for dinner (the noon meal, of course), before they'd had time to take a single bite, the farmwife said, "Well! I believe we'll have enough left for sup-

Millions Hear Broadcasts From Sunday School Classroom

ATLANTA, GA .- The Sunday morning broadcasts of four denominations originating in the Sunday school classroom here are heard by millions over a network of 66 stations. The room has been converted into a well-equipped broadcasting studio. Fifteen minutes after the broadcast, members of the Four Square class of Druid Hills Baptist church begin to arrive.

The choir sings for the Baptist, Episcopal, Presbyterian and Methodist programs. The Methodist Hour, directed by Dr. James W. Sells and produced by Warde Adams Jr. (l. to r., inset), has played an important part in that denomination's four-year Crusade for Christ. which currently is emphasizing church school enrollment and at-

Announcing the Addition Of The

Superior Chisel Plow

To Our Line of Farm Implements. Available With or without Hydraulic Lift.

Chisel type plowing is comparatively new. It is a separate and distinctive method in itself. It is the only method that fits in exactly with nature's plan to check erosion and permit water to drain into the subsoil.

The Superior Chisel Plow, if properly used, will work hand in hand with mother nature in building back your land to fertility and productiveness . . . in keeping your fertile land at maximum productivity.

Land plowed on the contour with The Superior Chisel Plow is left with a six inch terrace every twelve inches. The hard pan is broken. Water is taken into the subsoil.

Trash is left on the surface to shade the land. Crops receive moisture. The farmer profits.

The Superior Chisel Flow, used on the contour, more than doubles the moisture penetration ordinarily achieved by any other type of plow. This plow follows identically the plan that nature so persistently uses. Farmers can (and do) violate nature's own rules of protecting and safeguarding the topsoil. When such violation occurs it is an invitation to water and wind erosion. This means waste and, if continued, can only end in disaster.

For your own protection and profit, see The Superior Chisel Plow, today!

Toward Socialism

By GEORGE S. BENSON President of Harding College Searcy, Arkansas

DR. ROBERT A. MILLIKAN, | one of the world's most distinguished scientists and Nobel guished scientists and Nobel prize winner, has referred to current proposals for federal aid to education as "another of those efforts to clear out the cockroaches by burning the house down." That is right. More federal aid might bring increased teachers' salaries, which all of us want. But I stand in constant want. But I stand in constant amazement that so many folks in the education profession are blind to the tremendous dangers of

Not to be outdone by those clamoring for money to be routed via Washington for the public schools, college and university administrators recently climbed on the bandwagon and put in for their share. At a major conference of higher education in Chicago, Dr. Alonzo Myers of New York University proposed a catch-all program that would call for expenditures dwarfing those in public school bills now in Con-

Ask For AMONG other Your Part things, this program would set up an "Educational Reconstruction Finance Corporation." As a government project, this bureau would no doubt take bookkeeping lessons from RFC and TVA. Both of these have tucked away millions of wasted tax dollars. Experts have said that it will be impossible for RFC ever to account for all of its funds. After this ERFC, we can expect other RFCs for any group that has enough power and votes to get the ear of Congress.

Not to be outdone in the scramble, educators from several private colleges (not state-supported) fought strenuously at the above-mentioned conference for federal aid. Their impelling mo-

tives went like this: In any disposal of federal funds, we must not be neglected! In other words, as long as Washington is throw-

Must Keep TO ME, all these Local Control things look like very poor Americanism. Is this a generation that runs to Washington and Congress to receive cure for every ill that besets the community? If our local people (states and communities) haven't got the backbone to take adequate care of their educational problems, then for sure more money from then for sure more money from the federal government will not

munities have done plenty, still only, a Veterans Administration are doing things about local and survey reveals. state needs in education. I have no patience with those who hallow the internal propaganda ma-chine in Russia and call it educacate our youth than any Communist country ever will be able to do — under Communism. There's nothing radically wrong with American education. But there will be—if we hand control over to Washington.

Education is one of the biggest ment the purse strings for local education, then we have taken the long step toward Socialism. What we must do is get the federal government off the necks of taxpayers. Then the states can collect more taxes and there is no rime nor reason left to get education expenses from Washington. We must draw the line on this dangerous trend. Let's have no so-called "federal aid."
