#### GEORGE MOFFETT

In a recent article, Byron Utecht, staff correspondent for the Fort Worth Star-Telegram, who is regarded as one of the most able and unbiased newspaper correspondents in Austin, had this to say about George Moffett in discussing the reforms that might be expected of the newly elected administration: "There is a group of legislators who really run the State Government, and the Legislature usually cares very little for what a Governor may think, because, they point out, they and not the Governor were elected to enact laws. The Texas Legislature is the most independent body of men on earth, Congress not excepted. This group of powerful members is seldom in the limelight and do not seek it. Without identifying them, but by way of illustration, Representative George Moffett of Chillicothe is more informed in state tax and financial problems than any other House member. He works hard studying the problems and gets abundant data, statistics and information in his research. Naturally other members have much respect for his views on the tax problem."

George Moffett is one man who has gone to Austin with a sincere desire to render a service to his constituents and to the State of Texas. He has applied himself diligently to the task of acquiring a complete understanding of problems of the State Government, and can be relied upon to safeguard the interest of the masses, and we'll be hearing from him in future years.

#### A CHALLENGE

Inventor H. P. Williams, 567 E. Moran, Stamford, Texas, and partner, J. D. Maberry, McCaulley, Texas.

After 8 years close work and experience with the WILLIAMS ALL-PURPOSE PLOW, we are firmly convinced that it is the most practical and economical tractor plow on the market.

For the benefit of the 100 enthusiastic owners in the territory, and the hundreds of those considering tractor purchases, and who want the best and the most economical equipment possible, we have arranged a public demonstration for the WILLIAMS ALL-PURPOSE PLOW mounted on Farmall tractors. With due respect to competitive tractors and without comment on their equipment we hereby challenge and invite the following tractor dealers or manufacturers to be present and demonstrate their best equipment in farmer's presence, in competition with the WILLIAMS ALL-PURPOSE PLOW.

Tractors invited: John Deere, Case, Oliver, Hart Parr, Allis-Chalmers, Massey Harris, and International, including the International F-12.

Work to be done consists of bedding, re-bedding, planting and cultivating work, and any other work the competitors want.

This challenge is issued in all fairness to the above competitors that interested farmers may decide on best equipment and will be held Tuesday, October 2, 1934, beginning at nine o'clock on John Whaley's farm west of Tuxedo on Stamford-Hamlin highway.

This item is appearing in the Anson, Hamlin, Stamford, Haskell and Munday newspapers and the date of the demonstration set in order to give all competitors ample time to be prepared to do their best.

Don't forget the time and location as we promise some interesting disclosures upon tractor implements. Seeing is believing, so you good farmers come and see where to

spend your money.

#### RAISED TOMATOES IN SPITE OF THE DROUGHT

"We have sold \$10.00 worth of tomatoes from our garden this year and we are going to have plenty to can for home use," said Mrs. J. G. Swamer, of the Gillispie Home Demonstration Club.

"We had unusually good luck with the Porter tomatoes this year. They are a small, uniform, dark red tomato and they are very meaty which makes them especially good for tomato juice," said Mrs. Swamer.

These tomatoes have been raised in sandy land and in a place where they could be irrigated and protected from the wind, therefore the drought

and hot winds did not damage them greatly.

#### MAKING TUFTED BEDSPREAD INTERESTING

"Because my garden failed, and I did not get to can my tomato products, I did not let that ruin my club work this year," said Darlene Moore, Sunset 4H club. "I only tried harder to accomplish my bedroom goals by making a tufted bedspread."

"As I was wanting an all-over design for my bedspread, I planned for circles which lap in the center forming flowers. It was a hard task making the circles even. I cut my design from cardboard forming a large petal, and when four of these were joined together, the center

## A V-8 is no longer the *privilege* of the Wealthy

IT is not just chance that the Ford V-8 is the only V-8 selling today for less than \$2,500. It is due entirely to the skill of Ford engineers. For the V-type engine costs more to build. It is the type of engine that powers the most expensive cars—holds every world speed record. And only Ford has been able to put it in a low price car. The advantages of a V-8 are apparent the moment you drive it. Increased flexibility in traffic—faster pick-up—an ability to get places without driving strain. The new Ford V-8 is not only low in first cost. It costs less to operate than any other Ford car ever built. Gasoline and oil costs are lower. Valve grinding is virtually eliminated. Drive this new Ford V-8—and you'll want it!

"INDEPENDENTLY AND HOME-OWNED" THANK YOU!

**Your Power Company**  
A Service Institution

West Texas' phenomenal progress during the past decade has been equalled only by the steady expansion of its West Texas Utilities Company, for while West Texas has been carving industrial history, this company—to aid and foster that growth—has kept its facilities modern and in advance of immediate needs.

Today 2,600 miles of cardinal Transmission Lines—energized from three large, strategically located main generating stations and strengthened by many auxiliary or stand-by plants—has replaced the precarious and costly part-time "lighting" plant of yesterday. This new-day Transmission System insures an immediate supply of power sufficient to meet any development.

The program of this Company has been, and will continue to be, the rendering of increased use of service by constantly decreasing rates. Since the organization of the West Texas Utilities, the consumers have benefited by total rate REDUCTIONS amounting to MORE THAN SIXTY PER CENT—an unheard-of accomplishment in the days of isolated plants.

Electricity renders one of the most valuable services to the household. Yet it is sold at the lowest price of any item of the household budget. It represents approximately only one per cent of the workman's total expenditures. Electricity is cheap! You should use much more of it.

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule... and adds only a small amount to your total bill?
