...And that amounts to a lot of cents!

It came over the airwaves recently that a truck loaded with five million pennies was in collision with another vehicle, and the copper coins were scattered all over the roadway.

The two drivers lost their lives in the accident, which makes it seem a little bit unsympathetic to deal with the accident lightly. We imagine, though, that the fact that brand new pennies were scattered everywhere attracted quite a bit of attention.

At the time of the news report, it was not known just how many of the coins were salvaged.

Along about the same time came a report from Washington that some of the "high ups" are recommending taking the pennies away from the American public. To some it appears that they have nothing but pennies left after divvying up for all sorts of taxes here and there.

Then to quit making the pennies would, in the true sense of the word, leave them penniless!

A group making a study sponsored by the government have recommended that pennies be eliminated as part of our medium of exchange by 1980. They gave the reason that the penny is so expensive to

It was stated that since the buying power of the penny has dropped, and the coin has tended to circulate less freely. The act of sorta hoarding the almost worthless coin causes the mint to manufacture more of them to meet demands.

The coppers bearing the Dolph Briscoe designating likeness of Abe Lincoln account for 75 per cent of the 19 billion coins produced annually, according to estimates. By 1990, they would account for 90 per cent of the 41 billion coins produced.

The cost of producing and distributing the one-cent pieces would rise from about \$95 million now to \$540 million by 1990.

Then by 1880, the estimate reveals, the cost of the pennies would exceed their value. The present cost of seven tenths of a cent would rise to an estimated 1.5 cents by 1990 as a result of higher copper prices and increased production costs.

Doing away with penny would eliminate the need for increased production capacity at the mint. They claim a \$60 million production facility in the Denver area is on the drawing board just to

take care of the pennies! It surely looks like some of our government officials should take lessons from the American farmer. These people have had experience in producing products at a greater cost than their

market value. Unlike the plan forecast for the mints, the farmer cannot eliminate their productive efforts, else the whole nation and world

would face starvation. We wonder, too, if the plan calls for the use of tokens, scrip, or some other method of making change. One can rarely go to the

FTA District Workshop Held Here Saturday

A district workshop for each consultant who shared Future Teachers of America his time and talent to make of District IX, was held in Munday last Saturday in preparation for the district Johnson, who prepared the convention on October 23. The district is composed of 10 counties, with approximately 700 members.

Scotty Abbott of Munday is district president, while Phillis Hutchinson is president of the local chapter. She also serves as corresponding secretary for the district. Other officers are from Graham, Wichita Falls and Burkburnett.

Workshops were held for each of the chapter officers, with excellent consultants in charge. Clint Norman headed the leadership workshop for presidents. Dr. Bill Kingston directed the vice presidents, Mrs. Ronelle Cude was in charge for secretaries and treasurers, while the workshop on parliamentary procedure was directed by Dick Bates. Who is a 4-H'er? Not only the boy who raises a calf and cares for its healthy development, or the girl who cans homemade preserves and designs patchwork quilts...but also their city cousins who work at keeping parks and waterways clean. Lifestyles may differ, but the goals are basically the same. A 4-H'er is a youth who works for a better tomorrow, using the skills developed day by day in everything he does.

Bill's Blabbin

By Bill Bowley

You might say we had a lost weekend. Ole Boy decided we might have sleepin' sickness because of the way we spent the weekend. Saturday afternoon we took a short nap from 2 til 5 p. m., then we watched television until 9 and went to bed and to

blab We got up around 6:30 a m. Saturday morning and got our Saturday chores performed so we wouldn't miss our "Sattidy" afternoon nap. We managed to stay awake until 12:30 after fixing Ole Boy a big lunch..oh well alright, sorter big, warmed over barbecue, warmed over pinto beans, and candied yams (not warmed over) and light bread. For dessert some Jello left from the day

blab

We waked up around 4:30 that afternoon, worked hard at solving cross word puzzles and watching TV until that night and we hit the hay at 9:30 and slept until 7:30 a. m. Sunday morning. Got up and had our coffee and ate two pieces of bacon, Ole Boy had left from his breakfast, cleaned up the kitchen and went back to bed and to sleep.

blab We slept until 12 noon and got up to see if Ole Boy had our dinner ready. Sure enough he didn't so we prepared another big dinner, soup we think. Then back to bed around 1 and finally woke up to watch the last quarter of the Cowboy football game. Think that isn't a bunch of sleeping?

blab Mrs. J. B. Booe Jr. tells us our little grandsons are not the only painters. She said her Chad had painted the porch of their neighbor and his parents had cleaned it up and were in the house when a knock was at the door, Come to find out it was the next door neighbor.

He asked Mrs. Booe's daughter, can't think of her name, if there was any paint around that was opened. She told him no she thought not. He then said "There must be, Chad has just painted my Police Car. And we thought we had troubles.

VRJC Will Host Workshop Oct. 2

Vernon Regional Junior College will host the annual Texas Joint Council of Teachers of English workshop on its campus Saturday, October 2. The workshop will begin at 9:00 a. m. and conclude with a noon luncheon, according to workshop chairman Doug

Guest speakers will include Mrs. Merle Anthony and Mrs. Dorothy Montgomery of Wichita Falls. A special feature of this year's workshop will be two sessions of idea-sharing among the participants.

Mrs. Anthony is an instructor of history, literature, and the humanities at Wichita Falls High School and of citizenship/immigrant classes at Midwestern State University. She has been named Teacher of the Year in 1973 by the Wichita Falls Classroom Teachers Association. She has also been a DAR Medal of Honor winner and a recipient of Beta Sigma Phi's Woman of the Year award.

Mr. Montgomery, a teacher-specialist for the past twelve years in programs for students with learning disabilites will speak on "English Skills for the Unskilled." In 1975-76, she received the Wichita Falls Classroom Teachers Association Teacher of the Year award and also the Region IX Council for Exceptional Children's Outstanding Special Education Teacher

TJCTE is an association for all levels of English and language arts teachers, and the workshop is open to all English teachers, elementary to college levels.

Fertilization of small grains at planting time is essential for a good root system, early grazing and profitable grain yields. Other than moisture, the supply of available plant nutrients in the seedling root zone is the major factor affecting early growth.

The rate and method of

fertilizer application is especially important for soils low in phosphorus. Numerous research studies have shown that a high level of available phosphorus is needed in the seedling root zone for rapid plant development. If phosphorus is drilled with the seed or in a band beside the seed row, a lower rate is needed to maintain this high level of readily available phosphorus as compared to broadcasting. However, with broadcast planting, also broadcast the fertilizer and disk it into the soil.

Nitrogen is also essential for early small grain growth but can be topdressed after the stand is established. Not more than 10 to 15 pounds of actual nitrogen should be applied with the seed

although more can be put in a band beside the seed row or in the soil before planting.

The total amount of nitrogen needed depends on grazing management, moisture and other conditions that affect the amount and rate of growth. From 60 to 80 pounds of actual nitrogen per application should be considered. As many as three applications can be used, especially for a long grazing period that might be obtained from an oats-ryegrass mixture or other combinations.

If potassium is needed for small grain production, it should be applied at or before planting, with the amount needed based on a soil test. Profitable small a grain

production depends on many factors, but fertilizing to correct soil deficiencies and to meet production requirements is essential.

Cattlemen won't see higher beef prices in 1977 unless a lot of cows, non-fed cattle and calves are slaughtered this year.

Dr. Ernest Davis,

Thanks To All

I have sold my sand and gravel business to the Home Building Center, effective last week. I take this means of thanking all the customers whom I have served during the past 30 years, and to solicit your patronage for the new owners.

Daniel Ramirez of Home Building Center will now serve you when you need well rock, driveway gravel, mortar sand, fill dirt or concrete gravel.

A. E. Bowley

livestock marketing specialist for the Texas Agricultural Extension Service, says that despite the high levels of cow and calf slaughter last year, cattle numbers are still

"We still have 53.8 million cows, 11.2 million replacement heifers and 96.7 million feeder cattle on hand in this

country," Davis says. He feels that at least 10 million cows, 5.8 million non-fed cattle and 5 million calves need to be slaughtered in 1976 for Choice feeder cattle prices to ease the \$50 per hundredweight level in If cattlemen don't reduce

the cow herd by keeping up a high level of slaughter, beef prices in 1977 will be no better than prices in 1976. The main goal of cattle-

men should be to cut feeder cattle availability by putting more cows, calves and non-fed cattle on the market.

"Cattlemen need to be aware of the market situation and adjust their cattle supplies to meet market

needs to keep prices up." Davis says that even if the cattle supply is cut back by 1977 there will still be beef price fluctuation caused by

fluctuating feedgrain prices. "If feedgrain prices go up, there will probably be more non-fed cattle slaughtered and lower beef prices this fall. On the other hand, if feedgrain prices fall, there should be more movement of cattle to feedlots, delaying marketing and resulting in higher prices during the fall."

TEXAS TALK

By Tommie Harper

"It's a small, small world" was one of the themes espoused during July 4th bicentennial celebrations. Realities of a shrinking world are most clearly evidenced by OPEC and American agricultural dominance in the field of foreign trade. Development and maintenance of this export market becomes continually more important to the prosperity of American producers. Two factors influence this much needed growth. One... the hunger of developing countries, faced with problems of over population. Secondly... the affluence of the developed countries, their demand for higher quality and greater variety. Both these demands are being met successfully by the American farmer...met because of his abilities to produce an unparalleled abundance of food and fiber.

Farm-facts A Weekly Report Of Agri-Business News

Compiled From Sources Of The TEXAS DEPARTMENT OF AGRICULTURE John C. White, Commissioner

A Super Bargain . . . Numbers Of Cattle On Feed Declines . . . Milk Production Up And Down.

Whether you buy your beef in a supermarket or from the corner grocery, the fact remains: beef is a super bargain. And it's likely to continue that way through the rest of this

The unfortunate part of this story is the producer. He is the one who continues to take a beating. Cattle prices to producers are now a fourth below what they were a year ago.

Cattlemen continue to liquidate their herds in an attempt to get supply and demand back in some sort of balance so the cattle producer can have hopes of improving his economic situation next year.

And as that situation continues, more beef comes to market lowering the cattlemen's price and in turn providing consumers with bargains in beef.

Beef prices to consumers are down from levels of a year ago, but have not yet reflected all the declines that producers have taken.

But beef continues to be probably your best food buy today. And now is the time to enjoy it.

CATTLE ON FEED in Texas as of Sept. 1 totaled 1,470,000 head, according to the Texas Crop and Livestock Reporting Service.

This is 10 per cent above a year ago, but is one per cent below last month. During August, Texas cattle feeders placed 337,000 head into their lots. Placements are 25 per cent above a year ago and 29 per cent above the previous month.

In the seven major feeding states -- Texas, California, Arizona, Colorado, Iowa, Kansas, and Nebraska -- cattle on feed as of Sept. 1 totaled 6,432,000 head. This is eight per cent above last year's record low number. It is also six per cent below the same date in 1974.

The number on feed on Sept. 1 was above last year in five of the seven states.

JV TIES WITH SEYMOUR

by Montie McAfee The Munday JV team played a hard fought battle with the Seymour team Thursday night on the Seymour field and wound up with a 14-14 tie. Seymour struck first with a 4 yard pass from Jeff Styles to Mike McElroy, then converted the try for two points.

Later in the second quarter Willie Beamon returned a 40 yard punt return. The try for two points failed. No other scores were turned in during the first half, as the score stood 14-0 at half.

But determined in the next half, the Moguls scored on a run by Isom Murray. Then Murray ran in for the two points to make the score 14-8. Then on the very next kick-off the Moguls recovered a fumble and drove deep into Seymour territory where Otis Adams scored from the 4. Omar Choucair was stopped short on the try for two. Defense for both teams held up for the rest of the game and it ended 14-14. PRESENTING THE

with the singing of five of the old favorite songs of the 1900's. Mrs. Cecil Welch told the history of each song with Mrs. Ronnie Ward as accompanist.

Mrs. Welch brought a devotional "A Wealth of Wisdom" and dedicated it to the mothers of long ago. She used as her scripture the first 5 verses of the second chapter of Titus. She closed with a poem telling the hardships of the frontier women. A very interesting discussion followed with the group reminiscing 'about the good old days.'

Delicious refreshments were served to the ladies and each one was given a miniature picture typical of the early days.

Those attending were Mmes. Irene Claburn, Florence Fly, Gillie Lewis, E. H. Mullican, Press Phillips, C. A. Reagan, Gladys Roberts, A. M. Searcey, Ben Tuggle, Lawson Wallace, Effie Younger and Miss Florence Gaines.

Ladies representing the church were Mmes. Welch, Roe Myers, Ronnie Ward and Chester Lain, Helen Phillips, Onie Ladd and Marie Baker represented the official hostesses.

Social security checks, which are normally delivered on the third of the month, will be delivered Friday, October 1 since the third is a Sunday, Mr. Carl R. Beisner, Social Security Claims Representative, has announced.

The Friday check delivery is a new policy, Carl Beisner said. Social security checks will be delivered on a Friday whenever the third falls on a Saturday or Sunday. The same schedule will apply to beneficiaries who have their social security checks deposited directly in a bank or

other financial institutions. Formerly, checks were delivered on Saturday when the normal delivery date fell on Sunday, but many people had to wait until Monday to cash the checks. The new policy will eliminate that inconvenience Carl Beisner

The delivery of SSI checks will not be affected by the new policy.
