Mayor Proclaims Garden and Yard Beautification Program; Schlagal Asks All Citizens to Support Project

Whereas, it is common knowledge that all movements which encourage the improvement and beautification of the home grounds of our citizens also result in cleaner streets and alleys, the removal of rubbish and garbage from back yards and vacant lots, eradicating breeding places of disease and improving general sanitation, and

Whereas, planting and beautification of home grounds encourage us to live and work more in the open air, providing a healthier environment for our children, making our back yards their playgrounds instead of our streets and alleys, where danger from automobiles and trucks is always present, and

Whereas, more attractive home grounds increase real estate values, create a more beautiful city and enhance municipal pride and civic loyalty,

Therefore, I, C. T. Schlagal, Mayor of Crowell, hereby urge all of our citizens to interest themselves in and support the Yard and Garden improvement program.

C. T. SCHLAGAL, Mayor of Crowell.

FARM PLANS EXPECTED TO ARRIVE SOON

New Program Will Go Into Effect in Texas First

The signal to go ahead with the new farm program is expected by the Foard County agents within a short time. According to government statements, plans were under way to get the new program into operation the first part of this week, but an unforeseen tie-up in governmental affairs made impossible the immediate application of the plan.

The Federal Government will make grants of money to farmers, conditioned upon the actual evidence of good land use. President Roosevelt announced upon signing the new \$500,000,000 "Soil Conservation and Domestic Allotment Act." The new law authorizes up to \$500,000,000 for use in any one year to pay farmers for soil conservation. Grants will be made to farmers for this work.

President Roosevelt, after signing the bill on February 29, issued the statement that the actual soil conservation and domestic allotment act represents an attempt to develop, out of the AAA efforts, a long-time program for American agriculture.

Three chief aims of the legislation were listed by the President as tied up with the national welfare conservation of the soil itself was named as the first of the purposes of the act.

The second purpose is the re-establishment and maintenance of farm income at fair levels so that the great gains made by agriculture in the last three years can be preserved and national recovery can continue. The third major objective is the protection of consumers by assuring adequate supplies of food and fiber now and in the future.

The President also strongly pointed out that there would be no contracts with farmers. Such contracts constituted one of the Supreme Court's objections to the AAA. While saying that such absence of production control might make impracticable the attainment of parity prices, Mr. Roosevelt said he is "confident that the farmers co-operating with the government" (Continued on Page Five)

Retail Business Due For Sharp Rise, Say Nation's Merchants

Chicago. — Retail business in Texas, showing its greatest volume in 1935 since before the depression, is due this year to attain heights of "recovery" that will place 1936 beyond even the climatic boom year of 1929, a consensus of the Lone Star state's leading merchants indicates.

Averaging of scattered replies to a questionnaire sent by the Merchandise Mart here, nation's largest wholesale center under one roof, to 230 Texas retail store executives, reveals that the state's retail trade in 1935 was reported as 8.66 per cent ahead of 1934, and only 7.68 per cent behind 1929 business. The questionnaires were sent to leading Texas stores as part of a national campaign being conducted by the Merchandise Mart in an effort to stimulate retail activities generally.

Estimates as to expectations for 1936 ranged from an 8 per cent decline up to 40 per cent increase, the average being a predicted net gain of 9.63 per cent. This, combined with the figures showing 1935 only 7.68 per cent behind 1929, means that, barring unexpected crop failures, 1936 will see Texas retail business going stronger even than in the last pre-depression year. Widely divergent local crop conditions and other local factors apparently accounted for the big range in estimates reported for 1936.

Singularly, the fact that this is a "presidential year," traditionally ignored by the merchants in their comments on probabilities of 1936 retail trade trends. This is interpreted by T. J. Reed, general manager of the Merchandise Mart, as evidence that the age-old forces of supply and demand are again dominant, with demand due to be unusually heavy because of the depreciation which has taken place during the depression years of minimum purchasing, particularly of household goods and furnishings.

The contention of many merchants and economists that long-deferred replacement of "things for the home" is providing one of the country's strongest vehicles for buying its way back to financial normalcy is substantiated by analysis of the sales gains as broken down into subdivisions of the larger stores, Reed pointed out. Generally speaking, those departments dealing with the most basic elements of home furnishing—that is, furniture, floor cover-

ings, and curtain, and draperies—showed by far the most striking and consistent gains.

Customs of long ago will be paraded before modern audiences at Bowie, April 21, in the presentation of the Centennial Folk Festival.

THE NEW 1936 MODELS NORGE-ROLLATORS Are on Our floors for Your Inspection THIS YEAR 1936 MODELS all carry a 10-YEAR WARRANTY on the FAMOUS NORGE-ROLLATOR. The NORGE-ROLLATOR is NORGE'S "PUMP" or "COMPRESSOR". All Electric Refrigerators have to have a "COMPRESSOR" to pump the fluid around through the system and recover it for use again. There are mainly three types. NORGE-ROLLATOR (PATENTED) and no one else dares to try to use it) which is a shaft around which a close fitting roller slowly revolves and which rolls around in a cylinder, and all submerged in a permanent bath of finest oil, under pressure of not less than 50 pounds, which keeps a film of this fine oil between all working parts all the time—hence long life and efficiency as compared to other types, which have many moving parts, which travel many times faster to cause loss of compression. And early overhaul.

The Man Who Knows Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor Ask Him Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with Genuine Bayer Aspirin. We say this because, before the discovery of Bayer Aspirin, most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of Bayer Aspirin largely changed medical practice. Countless thousands of people who have taken Bayer Aspirin year in and out without ill effect, have proved that the medical findings about its safety were correct. Remember this: Genuine Bayer Aspirin is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly. You can get real Bayer Aspirin at any drug store—simply by never asking for it by the name "aspirin" alone, but always saying BAYER ASPIRIN when you buy.

Farm Plans—

(Continued from Page One)

Government will work hard within the existing legal limitations to achieve the new law's goal, which is parity not of farm prices but of farm income.

The money to carry on the plans will be allotted to each State after the State agency has been set up. The Act further reads that the Secretary of Agriculture shall report on or before November 1 of each year, such funds as shall be necessary to carry out the State plans.

Farmers in preparing for the new program are planting soil improving and soil erosion prevention crops. Because planting time is so near, it is impossible for farmers to lay definite lines as to the acreage of such crops. However, Texas farmers, to profit by the new law, are planting sufficient crops of such nature as to meet the demands of the new law which was enacted for the purpose of building up the Nation's land.

Following the signing of the bill by the President, plans to speed the new program were immediately taken up in discussions by officials in the Department of Agriculture.

Calls for four regional meetings of farmers and farm representatives were issued. The first two in Chicago and Memphis to study details and make suggestions for the new set-up; the other meetings were scheduled in New York and Salt Lake City March 9, 10 and 11.

Administration officials also announced that the program will be put into operation first in the Southern States, where planting of cotton starts soon. Texas falls into this category.

Clyde King Chosen President of Odd Fellows Thursday

Eight members of the Crowell Odd Fellows and Rebekah lodges attended the annual convention of the organizations held in San Angelo the first part of this week.

Those who attended the annual meeting were J. W. Franklin, C. R. Dodd, O. O. Hollingsworth, A. W. Barker, Frank Welch and Clyde King of the Odd Fellow organization, and Mrs. Clyde King and Miss Idura White of the Rebekahs.

The quarterly meeting of the Hardeman-Foard lodges was held in the Crowell lodge hall Thursday night, March 12, with representatives from Truscott, Quanah, Chillicothe, Goodlett, Medicine Mound, Margaret and Crowell.

Clyde King of Crowell was elected president of the organization, E. P. Storm of Truscott was chosen vice president; and Miss Lou Faulkner was made secretary-treasurer.

At the program Thursday night, R. D. Oswalt made the welcome address and E. P. Storm gave the response. Ebb Scales' orchestra played special music and Florence Griffith talked on "Language of Cattle Brands" as a special feature of the program.

At that time every car operator will be required by state law to have an operator's permit.

Those in charge of issuing the licenses urge that all operators get their permits as early as possible to avoid a last minute rush just before the deadline.

The oldest man to receive a license in this county is D. M. Shultz, 81, of the Gamblierville community.

In keeping with resolutions offered by Senators Hayden and Norris, the present status of all federal and non-federal projects under PWA and WPA were filed with the Senate last week.

Impeachment of Judge Ritter

The Senate last week was sworn in as jurors to try the charges filed and approved by the House of Representatives. These charges as approved by the House are divided into four counts, specifically pointing out the alleged high crimes and misdemeanors charged against Judge Ritter.

Relief and Tax Legislation

These two remaining "must" measures occupy the spot light this week. The President is expected to send up a message outlining his recommendations on necessary relief legislation.

AAA Personnel

War Clouds

It seems that every day brings the hovering of war clouds closer together in Europe, almost anything may happen over there at any time, since Germany has marched more than 50,000 of her picked troops into the Rhine territory in violation of the Locarno and Versailles Treaties.

Crop Production Loans

The President vetoed the crop production loan, Senate bill 3612, however, he has issued an executive order providing \$30,000,000 to be distributed as follows: \$7,000,000 immediately; \$13,000,000 available March 20th and \$10,000,000 available April 10th.

The Calendar

The Senate has considered and finally passed the Treasury and Post Office Appropriations bill, enacted resolutions providing committees to investigate excessive campaign expenditures and continued lobby investigations of the special interests.

Former Senator Jones, deceased, of New Mexico, who served in the Senate from 1916 to 1927 was the first to advocate levying on reserves, as now being presented by the President — he first offered such legislation back in 1917.

No doubt, if he were here he would feel that his tax theories are about to be vindicated.

Miss Genevieve Ferguson, daughter of Mr. and Mrs. Percy Ferguson of San Angelo and granddaughter of Mr. and Mrs. S. J. Ferguson of Crowell, has been elected to the National Honor Society from the Junior class of San Angelo High School. Only members of junior and senior classes are eligible and there were only five per cent of the upper quarter of the Junior class elected.

To be eligible for this honor, the student must have, in addition to good grades, certain extra curricula activities. It is a distinctive honor for a high school student to attain membership in the Society.

Miss Ferguson has spent quite a bit of her life in Crowell, her parents having lived here when she was small and she returns on frequent occasions to visit her grandparents.
