No Law Against It  
"It's against the law for a candidate or his supporters to buy votes, but there's no law against his party voting in Congress to give blocs of voters something 'out of the general tax pot. Certainly we cannot afford to lose the propaganda value of letting the rest of the world know America has been preyed upon by a whole swarm of spies for many years."

**'61 CHEVY TRUCKS**

**WITH WORK-PROVED INDEPENDENT FRONT SUSPENSION!**

Chevy's '61 fleet swings in with a ready-made reputation as the trucks that are worth more because they work more... the latest editions of the haulers that scrapped the I-beam axle and proved the important advantages of independent front suspension!

You'll find new models for '61—long-wheelbase 4-wheel drive units—and thoughtful refinements throughout the line. But the big news for '61 is nailed-down proof (based on owner reports) that Chevy's torsion-spring design is the best thing that's happened to trucks in decades!

With Chevy's independent front suspension and Sturdi-Bilt design, you cruise over trails where other trucks creep. You feel the difference in less wheel fight and vibration. You can see why drivers are happier, why loads are better protected and why the truck itself will stand up to thousands of miles of more work. That goes for any size Chevy, too—pickups, tilt cabs, tandems, all of them.

Check the latest specs with your Chevrolet dealer: capacity, power teams, options. Then, by all means, drive a '61. Once around the block and you'll never be satisfied with a front axle truck again!

It pays to read labels on floor wax containers. The right kind for your floor is a great household aid. The wrong kind can do damage.

In general, there are three kinds of floor waxes — paste, liquid polishing and self-polishing. Reliable manufacturers list on the containers the kinds of floors on which the wax should be used. If your floor is not listed, select another type of wax.

Paste wax and liquid polishing wax contain naphtha-like solvent. Liquid polishing wax contains more solvent than paste. Paste wax gives maximum protection and a soft glow to wood floors, inlaid linoleum and vinyl tile. Liquid polishing wax is also excellent for the same purpose and easy to apply. Neither should ever be used on asphalt tile or many types of rubber tile, for the solvent may pit asphalt surfaces and soften rubber.

Self-polishing wax is water soluble and is the kind recommended for asphalt and many kinds of rubber. It may be used on inlaid linoleum, enameled felt base and vinyl. You may use it on wood or cork only if the surface is sealed with sealer, shellac or varnish and the finish is in good condition.

Gross National Product Up 7%

"At a moment when frenzied orations are urging that the government stimulate the economy to an annual growth rate of five per cent, the statistics on 1959 finally have come out. The Gross National Product went up about seven per cent last year, it turns out.

"Government spending programs can't in themselves improve the real GNP. To spend, the government must take the money from some taxpayer and prevent him from spending or investing it. And it can never be a substitute for free enterprise. It can only provide the climate for business and industry which will provide the growth and the real Gross National Product."—Martinez, Calif., Gazette.
