### RIVERSIDE

(By Mrs. Cap Adkins)

Luther Whitten left last week for a visit with relatives in Oklahoma City. He will go from there to Irving, Texas, where he and his mother will make their home.

James Adkins, who is with the Consolidated Air Craft of Fort Worth spent Sunday and Sunday night with his parents, Mr. and Mrs. Cap Adkins.

Mrs. Otis Tole of Byers spent a few days last week with Mr. and Mrs. Sam Tole and other relatives.

Darrell Simmonds of Vernon spent the week-end with Rex and Joe Whitten.

Mr. and Mrs. John Matus and family, Mr. and Mrs. Johnnie Matus and son, went to Bonarton Friday, to attend the funeral of Mrs. John Matus' uncle, Dan Regoni.

Jake Simmonds of Vernon spent Sunday in the R. G. Whitten home.

Mr. and Mrs. Tramel Pope and family have moved from the C. P. Sandifer place to the Carroll Jones farm.

Mr. and Mrs. Albert McWilliams of Black spent Friday afternoon in the Bob Miller home.

Mr. and Mrs. Johnnie Matus visited her mother, Mrs. Joe Motl in a Wichita Falls hospital Friday.

Mrs. John Bradford of Appleton, Wis., is spending a few days with Mr. and Mrs. Ben Bradford and family.

Mrs. Blake McDaniel of Feard City spent Monday with her father, C. W. Biedleman, and son, Harry.

Mr. and Mrs. Carl Bradford and daughter of Vernon visited in the Ben Bradford home Wednesday night.

Mr. and Mrs. M. Simmons, Mrs. Ethel Kennedy and children of Electra spent Sunday with their daughter and sister, Mrs. T. J. Cox and family.

Mrs. John Matus returned home Monday from Bonarton, where she had been on account of the illness and death of her uncle, Dan Regoni. She was accompanied home by Mrs. Regoni and daughter, Mary, for a short visit.

Mr. and Mrs. Fred Rennels of Bryan spent Thursday afternoon in the home of Mrs. J. L. Rennels and Mrs. Bailey Rennels.

Mrs. Bailey Rennels left Friday for a two weeks' visit with her husband, Bailey Rennels, of San Antonio and other relatives in Fort Worth. She accompanied Mr. and Mrs. Fred Rennels to their home and spent the night Friday leaving there Saturday morning for San Antonio.

Mrs. M. Simmons of Electra is visiting her daughter, Mrs. T. J. Cox, and family.

Mr. and Mrs. Lee Shultz of Leakey spent Monday afternoon with his parents, Mr. and Mrs. D. M. Shultz.

### RAYLAND

(By Mrs. T. C. Davis)

Mr. and Mrs. Otis Singleton and children of Alvord have moved to this community.

Homer Faughn of San Antonio is visiting his wife and daughter, Hazel, and mother, Mrs. Dora Faughn.

Mrs. Thelma Sitz is visiting in Vernon.

Miss Laverne Farrar of Riverside spent Sunday with Norma Jean Vaughn.

Mrs. Jim Abston and daughter are visiting her parents, Mr. and Mrs. Perry Tooley, of Fort Worth.

Miss Frances Lawson is working in Stockton, Calif.

John Strathair of Cisco is visiting his niece, Mrs. Homer Faughn.

Mrs. Hughes Faughn and children of Borger visited Mrs. Homer Faughn and daughter, Hazel, Thursday.

Mr. and Mrs. A. T. Beazley and children visited in Childress last Sunday.

Mr. and Mrs. Jep Haynes of Vernon visited her mother, Mrs. Rineha Creager, last week.

Mr. and Mrs. Bill Lewellen are spending the week in Snyder.

Mr. and Mrs. Tom Moore of Thalia spent Saturday with her niece, Mrs. Jim Abston.

P. D. Clark of Wichita Falls visited his parents, Mr. and Mrs. Buck Clark, here Sunday.

Wilber Joe Wood left Saturday for Dallas to enter the U. S. Navy.

Lester Martin spent last week with his parents, Mr. and Mrs. A. H. Martin.

Nathan Daniels of Vernon spent Sunday with his parents, Mr. and Mrs. W. A. Daniels.

Mr. and Mrs. Loyce Lambert spent the week-end in Levelland visiting his sister.

### Your Horoscope

May 31, June 1, 2.—You are quiet, faithful and loving, with a faculty of finding some satisfaction in any and every condition. You are fond of your home and family and would sacrifice your convenience and comfort for them if necessary. You have periods of deep depression but do not make a public exhibition of them.

June 3, 4, 5, 6.—If you were born on these dates you are venturesome, and at times reckless, but generally careful and cautious. You keep out of compromising situations. New undertakings look bright to you, but do not always end to your satisfaction. You are apt to change your opinions suddenly, more by inner intuitive action, which may not always be correct. Intuitions are valuable, but they want to be proven.

### Canning Food

(By Elizabeth Elliott, County Home Demonstration Agent.)

With prospects for food to be being good, our next problem that we are concerned about is the prospect for containers and equipment to use in canning food. The following information is given to relieve some questions in your mind:

Tin Cans—WPB order does not limit the number of cans to be available for home processed foods not to be sold. There will be restrictions on containers which are to be used for foods to be sold. All reports indicate that tin cans will be of inferior quality, and because of demand, there will be a scarcity. It will be even more important that care of cans in processing and in storage be practiced.

Glass Jars:

A.—No restrictions are on manufacture of jars.

B.—Closures and rings for jars. Three billion new closures are being made.

1.—There will be 2 1/2 billion two-piece self-sealing type, flat metal disk with rubber compound flowed into rim instead of separate rubber ring. The screw bands may be fewer in number because they can be used several times.

2.—There will be 634 million three-piece units consisting of glass cap, small rubber ring, and steel screw band.

3.—Only 144 million metal lids like the well known zinc lid will be made.

4.—A total of 79 million glass lids, lightning jars, with wire clamps and shoulder rubber rings will be made.

5.—Plenty rubber rings are available for these jars already on hand.

6.—Commercial pack jars in which mayonnaise, pickles, jam, coffee and the like, are sold may use same size lid as standard jars. However, some are slightly smaller, 63mm (about 2 1/2 inches in diameter). Many small metal disks are being made to fit these jars. If desired, the original metal cap of the jar (with liner removed) may be used to hold the disk in place for the sealing instead of a new screw band. These jars may be used for canning foods which do not require processing in a pressure cooker.

Pressure Cookers available. 150,000 pressure cookers will be manufactured in 1943. An estimated eight or ten thousand of this number will be available in Texas in 1943. These will be rationed through the County USDA War Board. Applications can be made at the County Home Demonstration Agent's office.

Sealers. We have no information about sealers being made. Cooker and Sealer Replacements (Information from J. P. Dowell, McKinney, Texas).

A.—Replacement parts of cookers: Mr. Dowell reports that his shop has been servicing many cookers and sealers that are being sent to them, but it will take eight or ten days, or maybe longer, because of the large number being sent and the shortage of labor. They maintain at present a complete stock of replacement parts for:

Master Automatic Sealers, Burpee Sealers, Automatic Cookers, Capitol Cookers, All American Cookers, most parts of National and Burpee Cookers.

B. Gauges: To get gauges repaired the order must be accompanied by a priority ration higher than any of us have, so repairs are out for the duration. Mr. Dowell reports his stock of new gauges to be almost completely exhausted but may secure some later.

C. Thermometers: To secure a maximum thermometer for checking pressure cookers one must submit a priority ration of A-10 or better. If you have broken your thermometer, you may get a new thermometer tube by returning the case to Dowell's with your order.

D. Cooker Repairs: (Quoted from a letter of Mr. Dowell's): "Referring to cooker repairs, the leakage at the petcock can often be overcome by removing petcock and filling the cover threads with joint compounds such as the plumbers use. If the threads are stripped it is necessary to tap and thread the opening to a large size, that is 3/4 inch pipe size and install a 3/4 in. by 3/4 in. bushing in which the petcock can be installed and made into a steam tight joint. In removing petcocks, safety valves or gauges, it should be remembered that aluminum is a comparatively soft metal and great care should be taken not to damage the threads

in the cooker cover. Fortunately, with our own make of cookers, we seldom ever have a case of 'sticky' lid. Our factory people are very efficient mechanics and give very careful attention to the machining of the kettles and covers. The necessary forcing off of sticky covers often scores the lid to result in a leaky cover. We can quite often regrind a corroded cover or kettle into a steam tight joint, but it is practically impossible to remove scored places. A lubricant such as cooking oil or lard applied to the inside flange of the cover will often help sticky covers, but we know of no specific remedy.

"Cracked kettles or cracked covers cannot, to our experience, be satisfactorily repaired. Our usual method of adjusting such difficulties under normal operations, is to accept the return of the old cooker on the purchase price of a new one."

**QUESTIONS AND ANSWERS**

1. Where is the town Ferryville which is frequently mentioned in the war news?

2. What general founded the American Flying Tigers, the American flyers who have been fighting on China's air force for the past several years?

3. In the manufacture of what important substance is butadiene a part?

4. In what manner and where did Lieut. General Frank M. Andrews meet his death?

5. Where is the island of Madagascar located?

6. Following the announcement of John Lewis that the miners go out on a strike, who was named fuel administrator?

7. What male movie player is distinguished by a large mouth?

8. What is a Beanie?

9. Where is Cape Bon located?

10. What day has been proclaimed this year by the President as Flag Day?

(Answers on page 3).

**SAFETY SLOGANS**

Care is better than dare. Success is a habit—so is safety. Make motoring a pleasure, not a peril.

An empty train of thoughts doesn't equal a little wheelbarrow of ideas.

Thinking of one thing and doing another causes accidents—watch your step.

Safety means a clear mind, a steady hand and quick action in emergencies.

A man is known by his safe or unsafe practices.

He who uses his sense will practice safety.

**HOUSEHOLD HINTS**

The odor of cooking turnips can be greatly lessened by adding a teaspoon of sugar to the cooking water.

Overstirring and mixing causes muffins to rise in peaks and burst open.

To get all the juice from lemons, warm it before squeezing. Grease can be removed from iron by rubbing corn meal.

The Irish potato originates from Peru.

Fish and son, Bill, and daughter, Mildred, and Miss Myrtle Fish made a business trip to Quanah Monday. Miss Neoma Fish is spending several days with her sister, Mrs. Tom Sivells, of Ogdan. Mr. and Mrs. Charlie Durham and daughter, Charlie, spent the week-end with relatives in Crowell. Mr. and Mrs. Marvin Sosebee and daughter, Winnie Jo, and sons, Lee Allen and James Marvin, and Miss Rosalie Fish of Anson, spent from Saturday until Monday in the home of Mr. and Mrs. Elbert Fish and family. Miss Bernita Fish is visiting her sisters, Mrs. Marvin Sosebee and Miss Rosalie Fish, of Anson. Lee Allen and James Marvin

Sosebee of Anson are visiting their grandparents, Mr. and Mrs. Elbert Fish. Mrs. Pennington is visiting her daughter, Mrs. Roy Everson. was consumed in cigarettes last year. The corn products industry which produces corn syrup, starch, sugar and oil, requires about 2,500,000 bushels of corn a week.

INTERESTING FACTS OF THIS AND THAT

About twice as many women as men live to be 100 years old. This country consumes 5,000,000 pounds of camphor annually. Much of this is now being produced in this country. Less than ten years ago our camphor was imported from the Island of Formosa and was controlled by Japan. More than a million Red Cross workers are engaged in producing surgical dressings for the United States Army. A single dining car with a crew of ten to thirteen will serve as many as 700 meals continuously. To date 750,000 copies of Wendell Wilkie's book "One World" have been printed. As many as 68,000 copies have been sold in one day. In Japan 75 million persons are crowded into an area no larger than California. The Japs have been increasing at the rate of about a million a year. Preflight training is being given to more than 250,000 young Americans from 16 to 18 years of age in more than 14,000 high schools. There are 250,000 civilian owned planes in the United States. In 1940 this country had only 76 major airports with paved runways of 3,500 feet or longer. Today there are 850 such fields. The country is now producing airplane engines of 2,500 horsepower. The largest engines used in battle planes by other nations are 2,000 horsepower. 600,000,000 pounds of tobacco

TAX EQUALITY ESSENTIAL

In spite of the generally expressed public desire for "pay-as-you-go" tax collections, there is determined governmental opposition to the plan. There is a feeling in the minds of many persons that the desire of governmental authorities is not so much to have equality before the law in matters of taxation as it is to enact a tax law that will charge "all the traffic will bear," depending on the individual. We are drifting far away from the foundation principle of our government—equality and justice for all—when our Treasury Department insists on tax legislation which would make one man pay double taxes while forgiving the tax bill of another. It makes no difference whether the amount involved is one dollar or a million—such a punitive tax system would be the rankest kind of immorality in government. —Industrial News-Review.

Humble yourselves in the sight of the Lord, and he shall lift you up.—James 4:10.

Some one has figured it out that the 25 million milk cows in the United States produced enough milk to float all the navies of the United Nations.

Boosting the home town means spending one's money in the home town instead of spending it in the nearby city.

We can remember when it was considered an item of minor importance when a country correspondent mentioned in her news letter that neighbor Jones had purchased a new Bain wagon.

HISTORY

Flag Day—June 14: The flag of the United States had its beginning on June 14, 1777, when the Continental Congress, sitting in Philadelphia, adopted a resolution declaring: That the flag of the United States shall be of thirteen stripes of alternate red and white, with a union of thirteen stars of white in a blue field representing the new constellation.

adoption of the flag was not observed until 1889 when Professor George Bolch, principal of a free kindergarten for the poor in New York City decided to hold patriotic exercises on that day.

A new American gun is called the Bazooka. It is said that it can drive a shell through a solid wall of masonry or wreck a tank.

Hogs reached the highest price in 23 years recently and still there isn't enough to go around.

Every community has two or three individuals who are in favor of the ration program as long as it doesn't in any way ration them.

Had is the past tense of money.

30 YEARS AGO IN THE NEWS

Items below were taken in whole or in part from the issue of The Foard County News of June 6, 1913:

The value of agricultural property in Foard County is \$6,594,169, according to a report of the United States Census Department which has just been issued.

Uncle Sam has just put our merry widow on the adding machine and finds we have in Texas 116,712 "sod" and 9,283 grass widows, a total of 125,995 of all ages.

J. W. Coulson, who sold his express delivery a few weeks ago and went south looking for a better place than Crowell, has returned and purchased the Crowell Barber Shop of Stowell & Thurman.

One of the enjoyable occasions of the year was a fish fry on the lawn at the home of Mr. and Mrs. T. N. Bell of this city last Friday evening.

Miss Lorena Cope and little niece, Mary Louise Witherspoon, are visiting W. F. George and family at Elmer this week.

Mrs. Jessie Ayers, wife of J. H. Ayers of the Margaret community, died at her home Monday, June 16. She was born in Townes County, Ga., on April 1, 1879, and came to Foard County with her parents in 1889.

Miss Gladys Benson returned Friday from a visit to San Angelo.

Tommy Hughston of Clarendon is visiting relatives and friends in this city.

Pupils of Miss Essie Thacker will give a recital in the school auditorium Friday, June 13. Everybody invited.

Otto Stalle of near Thalia brought to town one day this week 129 jack rabbit scalps. This breaks the record so far as has been reported to this office.

Miss Maude Self has returned from Waco where she has been attending school. Miss Maude is being heartily received by her many friends and associates.

Cliff Crowell has accepted a position in the garage at this place. Cliff says that he is tired of running around, and has come to Crowell to stay, and is going to learn the automobile business.

What We Think

(By Frank Dixon)

It is not uncommon, when one attends a picture show these days to hear a vigorous round of applause on every occasion when the American flag is shown, fluttering in the breeze, or when a news reel is shown depicting a victorious engagement of American forces with the enemy.

When we see and hear these things and know that at the same time there are those in this country, who, while protesting their patriotism, are not measuring up to the demands and the standards of real patriotism, we find ourselves wondering what the definition of patriotism really is to some people.

I think everyone will agree that patriotism is expressed by the young man who has given up his job, his plans for the future and enlisted in the army, the navy or the air force and who by this act is placing his life in danger every moment of his service because he feels he should do it for his country.

These acts by these young men express patriotism in its highest type because they give all—even their lives if need be, in defense of their country. They held nothing back. They ask for no exceptions. They endure hardship, at times hunger and thirst and mental and physical suffering.

Along with these are many thousands and millions of people who are serving patriotically at home, on the farm, in the defense industries, in the Red Cross, by the liberal purchase of bonds, by compliance with the ration program and by a loyal uncomplaining support of the war program.

On the other side of the picture are those whom I feel do not possess the spirit of patriotism or love of country. They have never sounded its depths. Self looms too largely in their lives for patriotism or real love of country to have a place there.

These are the ones who chisel on the tire program, who work all sorts of schemes to get around the restrictions caused by gasoline rationing and food rationing. They buy rickardly of bonds if they buy at all.

Unlike the soldier on the firing line their patriotism is but a lip service. They are willing to give three cheers for their flag but nothing of themselves for their country. Though the life of the country is at stake they are not willing to make any sacrifice—they are unwilling to go all the way.

on the streets during business hours. A number of automobiles have been damaged and therefore the habit of lounging in automobiles must be stopped.—Silas Moore, City Marshal.

CLOSING HATCHERY

I am closing my hatchery and will take off my last hatch on the 25th of June. Anybody wishing baby chicks, should let me know at once. I expect to hatch this fall and am taking orders for September hatches.

I am buying poultry, eggs, hides and cream at top prices.

I have a truck load of good red maize. Please bring your sack.

I will be Open Nights through harvest.

MOYER PRODUCE

Phone 183 Crowell, Texas

NOTICE To the Public

I am now operating the Life Fox Service Station. I will have in connection with the station a complete tire and tube repair shop and a full line of Texas products.

The tire and tube repair business is not new to me, having been in this business for the past seven years at Nocona and Bowie, Texas. Let me have your tires for re-capping.

I will also have a line of new batteries and cables. I will be open for business June 3rd, today.

I extend an invitation to the public to come to see me.

R. A. (Roy) COOPER

Approximately 160 lecture and laboratory rooms are part of the big physical plant of the Texas State College for Women, Denton, valued at about five million dollars. Regular students use 151 of these, while WAAC trainees have been assigned to 9. Regular students occupy six of the eight

main brick dormitories of the co-operative hall. The library of the Texas State College for Women contains more than 85,000 volumes, 50,000 identified pamphlets, and 10,000 zine subscriptions. It is a government depository.

ANNOUNCING

REMOVAL OF MY OFFICE TO

205 SOUTH MAIN STREET

1st Door South of First National Bank

Quanah, Texas

Where you will find the most modern, spacious and convenient offices and treating rooms, furnished with the very latest and best equipment.

DR. R. G. WARNER

Naturopathic and Chiropractic Physician

Quanah Hours, 1 to 5 p. m. Chillicothe Hours, 8 to 11 a. m.

I've been looking at a car that wasn't there

I WENT window shopping again yesterday.

I stared into a big, empty automobile showroom downtown—and pretty soon I saw a car.

She was kind of different from the bus I'm driving now. She was long, sleek and powerful-looking. The windshield went clear around her. There were no gears to shift. The cooling system was sealed—you never touched it.

She had synthetic rubber tires that wear like iron. And fast? Man! With that new high-octane gas her motor certainly packed a beautiful punch!

So—I made up my mind to buy her, then and there. And I will, too. One of these days, after the war's been over for a while, I'll walk in and drive her home. And I'll slap the money for her right down on the counter.

You see, I'm in the Payroll Savings Plan. Been in it ever since it started in

my plant. Every single payday, I'm tucking away all I can in War Bonds.

That money's going to come back to me in ten years—and bring more money with it. Four dollars for every three.

I get a real kick out of thinking how that money's piling up for me. Money that's going to let me have some of the things I've always wanted to have—do some of the things I've always wanted to do.

\*\*\*

Chances are, you're already in the Payroll Savings Plan—buying War Bonds—doing your bit. But don't stop there. Raise your sights! Do your best!

YOU'VE DONE YOUR BIT --- NOW DO YOUR BEST!

BOOST YOUR BOND BUYING THROUGH THE PAYROLL SAVINGS PLAN

TOWN and FARM WAR TIME

OFFICE OF WAR INFORMATION

RATION REMINDER

- GASOLINE—"A" book coupons No. 6, good for four gallons each, outside the Eastern gasoline shortage area. SUGAR—Coupon No. 13 became valid June 1, and will be good for 5 lbs. through August 15. COFFEE—Stamp No. 24 (1 lb.) became valid May 31 and is good through June.

More Canned Food For Civilians

Civilians will gain 30 million cases of canned fruits and vegetables as a result of reduced government requirements. The reductions are mainly for corn, peas, spinach, tomatoes, snap beans, fruit cocktail, sweet cherries, peaches, pineapple, and pineapple juice.

Pay Off Farm Debt

Increased revenue from crops and livestock should be used to pay off farm debt, said Secretary of Agriculture Claude R. Wickard recently. He emphasized that the payment of outstanding obligations, along with as large an investment as possible in war bonds, is a sound protection for the future.

Food For 3-Day Furlough

A service man on a leave or furlough of at least 3 days hereafter will be provided with a complete rationed food for the complete application form for obtaining rationed food before he leaves camp. He will give the application to the person who provides his meals, who will submit it to the local board for food certificates within fifteen days after the furlough ends.

Further Cheese Rationing

To conserve supplies of milk, rationing will be extended to include all cheeses and cheese products, except cottage, bakers, and pot cheese, the War Food Administration and OPA have announced. All hard cheeses and most cheese foods have been rationed since March 29.

Women Must Work

By December, 1943, one-third of the female population of working age—17.4 million women—will be required for the civilian labor force and the armed forces, said WMC Chairman Paul V. McNutt. At least 2 million women must be added to the labor force in 1943.

Lower Potato Prices 7 Per Cent

Consumers ceiling prices on potatoes have been decreased about 7 per cent according to a recent OPA announcement. At the same time, the price paid growers was increased 30 cents per hundred-weight on the 1943 early crop.

Sugar Supply for 1943

On the basis of prospective 1943 supplies of sugar, the current level of consumption in this country probably can be maintained, the War Food Administration has announced. The allocation of the prospective supply will be as follows: 1,159,000 tons for the armed forces, Lend-Lease and other exports, and 4,600,000 tons for civilian uses.

Stocking Regulations

OPA's new regulation setting definite maximum prices on rayon stockings is based upon construction, which in turn governs quality. All full-fashioned rayon hosiery sold at retail must be marked with the ceiling price and the gauge or needle count. Gauge and needle count govern wearability, not sheerness. First quality, full-fashioned rayon hosiery prices now range from 71 cents to \$1.51.

Teachers Can Take Summer Jobs

School teachers will not be prevented from taking jobs at higher pay under WMC Regulation No. 4, the "hold the line" order, nor will they endanger their regular positions by working during the summer vacation in war plants, agriculture or necessary

Price Support For Butter

Dairy farmers have been assured that wholesale prices of butter will continue to be supported at a level equivalent to 46 cents a pound, Chicago basis, until June 30, 1944, by the War Food Administration. The support point values for these items will not be immediately affected.

Specific Ceilings on Three War Models of Pressure Canners

Specific ceilings on three war models of pressure canners have been announced by OPA. Except in the far western zone, the consumer will pay \$13.90 for the National model, \$14.90 for the Wisconsin model and \$15.90 for the Burpee. In the far western zone prices are 60 cents higher because of transportation costs.

Maternity Care Provided

Wives of men in the four lowest pay grades of the armed forces can now get maternity care plus medical, hospital, and nursing care for their babies in 23 states without cost to the family, the Children's Bureau of the U. S. Department of Labor has announced. To apply for such aid the wife must fill out a form secured from the State Health Department. Additional states are expected to have approved programs soon.

Mileage From Scrap Tires

To obtain additional mileage from tires that can be made serviceable with the addition of liners, the Office of Rubber Director has excluded reusable tire carcasses from rubber scrap going to reclaiming plants. Because of this order some half-million otherwise unusable tires can be placed in service through the Defense Supplies Corporation.

Lumber For Farms

To relieve lumber shortages on farms for all repairs except those to farm dwellings, WPB has set aside a total of 500 million board feet of lumber for delivery on an AA-2 preference rating during June, July, August and September. Farmers who cannot obtain lumber with present ratings, should apply to the county farm rationing committee for certificates to purchase lumber for maintenance repair and new construction necessary to the food production program.

Canning Workers Needed

About 400,000 workers for the food canning and processing industry will be needed at the peak season this year. Canning is essentially a seasonal, hometown industry, manned by local workers—youths, housewives, mechanics and others—who normally work at other occupations during the rest of the year.

Food Dealers Well Off

Under community-wide dollars-and-cents ceilings now being established, food retailers and wholesalers will continue to enjoy the most favorable economic position on record, says OPA. The volume of business done, dollar margins over cost, and profits before taxes stand today at high levels, a favorable situation reflected in the fact that business failures are currently at the lowest point in half a century.

Saving On Farm Fertilizer

Farmers who use nitrogenous fertilizers—used mainly for topsoil reconditioning—will be saved approximately \$25,000 within a year by the six per cent freight reductions which became effective May 15, 1943. This saving will chiefly affect sales and purchases next year, since most farmers have already bought their 1943 requirements. The individual's saving will depend upon his location and upon the delivery system of the seller.

Falls Removed From Women's Wear

A clothing conservation program adopted by WPB will affect every branch of the women's and children's outerwear industry. Manufacture of dresses is now

subject to two controls, square-inch limitations on the amount of material which may be used for trimmings, collars, pockets, etc., and restrictions on size and design of the trimmings, and control of measurements of length, sweep, lap, hem, etc., listed in amended order L-58.

Rubber Boots For Workers

Rubber boots are now available to the following classes of workers: miners, loggers, communications linemen, construction workers, oil drillers, quarry workers and clay extractors. Formerly only miners and loggers were on the eligible list. Applicants must show ration boards a definite occupational need for rubber boots, but a purchaser is no longer required to turn in worn-out rubber footwear when he buys a new pair.

Extra Meat Rations

Loggers, miners, prospectors, fishermen, sheepherders and others who live or work far from population centers and who cannot supplement their meats-fat rations with fresh fish, poultry and eggs can get extra points for rationed meats and fats by two new OPA amendments.

Sausage Regulations

The price of some of the beef ingredients used in sausage manufacture has been rolled back from three-eighths cents to one and one-half cents a pound, effective June 1.

Canning Pineapple

By Elizabeth Elliott, County Home Demonstration Agent.

Fresh pineapple now is making its appearance on Texas markets, and with a No. 2 can of the sliced fruit requiring 23 blue ration points, many homemakers will be canning this delicious fruit. In some stores canned pineapple has disappeared from the shelves.

As a rule pineapple can be bought and canned for one-half to one-third the retail price of a good grade of canned pineapple. On the average, one good 4 lb. pineapple will make three pints of fruit and one pint of juice.

Follow these tips when buying fresh pineapple for canning: Fruit that has ripened before being gathered has the best flavor and contains more fruit sugar, a factor of prime importance in view of sugar rationing. Ripe fruit is orange in color and the spines may be readily pulled out. Do not purchase over-ripe fruit, since there is more waste. Under-ripe fruit should be wrapped in thick paper and kept to ripen a few days at an even temperature between 65 to 70 degrees Fahrenheit.

Other advantages of pineapple are its nutritional contributions. It is credited with being an aid to digestion and a better source of protective food values than many fruits.

Prepare For Canning

Here is how to prepare the fruit for canning. Cut off the stem and twist out the top. Place the pineapple on its side on a table and slice crosswise. Peel each slice. Cut out the core and shape the slices with a sharp round cutter or cut in pieces of any desired shape.

Juice or syrup for canning the fruit is best made from cooking the outer trimmings of the meat of the fruit, as the best flavor is the part next to the skin. Add cores and enough water to cover. Simmer until the fruit is clear, then strain the juice. If less sugar is available, make the syrup with one-half cup of sugar to one cup of juice. One cup of syrup usually covers one quart of fruit when it is well packed.

Sugar Substitutes

Corn syrup may be substituted for part of the sugar. Use corn syrup to replace up to one-third of your sugar. In other words, for each cup of juice use one-third cup sugar and two-thirds cup corn syrup. A large proportion of the syrup would mask the fruit flavor of the pineapple. Do not use honey or any other syrup such as maple, sorghum or molasses, instead of sugar, as they ruin the pineapple flavor altogether. Brown sugar is a satisfactory substitute, either. Do not use saccharine in canning at all for it gives the food a bitter taste when heated in canning.

Process Fruit in Water Bath

Water bath method is the best way to can fruit and tomatoes. These foods contain acid and will keep easily if sealed hot and processed in a water bath. The required length of time. Fruits are over-cooked when processed at the higher temperatures in a pressure canner, but vegetables and meats cannot be processed safely in a water bath.

An open kettle is sometimes used to can fruits and other acid foods. However, more food value is lost by this method, there is greater danger of spoilage, and the fruit does not have as good a flavor, texture or color as when canned in a water bath.

A water bath canner is easy to arrange. Any large kettle with a rack or false bottom and a tight fitting lid may be used. A wash boiler, a small tub, a bucket, or a roaster may serve the purpose. Some folks use a pressure cooker and leave the petcock open so that the temperature will not go higher than the boiling point. The kettle should be deep enough to allow covering the cans or jars with 1 to 2 inches of water. Have water hot when containers of food are put in the water bath. The jars should have hot food in them, so that when they are placed in hot water there will be no danger of breakage. The food is either precooked and packed hot or packed raw and steamed in the jar before sealing. Place the jars on the rack or false bottom to allow circulation of water. Count time as soon as the water

begins to boil and the steam accumulates under the cover. Keep the water boiling for the whole period. For altitude over 1,000 feet the length of processing should be increased four minutes for each 1,000 feet above sea level. That means 6 minutes will need to be added to the processing time in Foard County.

Steps for Canning in Water Bath

Use either method A or B, however, method B is considered the best.

A. Pre-cook and Pack.

Pre-cook fruit in the syrup or fruit juice 10 minutes. Use aluminum or heavy enamel cooking utensils. Pack hot into jars or cans. Cover with hot syrup or juice in which the fruit was cooked. Leave 1/4 inch headspace in jars and 1/2 inch headspace in cans.

B. Pack Raw and Steam in Cans.

Pack the container with prepared fruit as tight and as full as possible. Pour hot syrup or fruit juice over the fruit to within 1 or 2 inches of the top. The smaller amount of syrup is required, since some juice will be drawn out of fruit in the steaming process. Place the jars in warm water and the cans in hot water in the water bath. The water should be about 2 inches below the rim of the can or jar and should not be allowed to boil so rapidly as to bubble into the container of food. Cover the water bath kettle with a lid. Count steaming time as soon as the fruit is cooked. Rubbers that fit on the jar instead of in the lid may be placed on the jar before steaming for ease in handling. Do not use lids on tin cans while steaming, because the paper gasket would be ruined. At the end of the steaming period remove containers from water bath. Process food down. If container is not full, use fruit from one can to fill each of the others. Have fruit well covered with liquid. Leave 1/4 inch headspace for jar and 1/2 inch headspace for cans.

Have food hot when sealed, whether it is pre-cooked or packed raw and steamed. This pre-cooking or steaming is used to shrink the food and drive out the air which prevents loss of liquid during processing, discoloration, and even spoilage.

Process in water bath the required number of minutes: 20 minutes for pint and quart jars, 15 minutes for No. 2 and No. 3 cans. Use plain tin cans.

Cool tin cans in cold water immediately and cool jars as quickly as possible without placing them in a draft.

Office Supplies

The News has a good stock of Office Supplies, small items that are needed in offices and business houses around the square. Mimeograph stencils, typewriter ribbons, large receipt books, Mephisto pencils, Scotch tape, ledger sheets, two sizes; letter files; file folders, two sizes; legal pads, filing trays, typewriter carbon paper, 8 1/2 x 11 and 8 1/2 x 14, also pencil carbon cut any size; stamp pads, all colors.

We also have three Tot staplers and several thousand staples.
