AND CROWELL INDEX

CROWELL, FOARD COUNTY, TEXAS, THURSDAY, SEPTEMBER 21, 1944

EIGHT PAGES

## Nazi Prisoners in France

German prisoners of war, 10,000 strong, are herded into their new enclosure as they prepare for a visit as guests of the Allies. They were seen in Allied pincers drive in France. The total number of prisoners here is believed, will exceed by far any previously captured by American and British units.

## Jumbo—a U. S. Signal Corps Man

A member of the American signal construction outfit is shown repairing a line from the back of an elephant. These slow-moving, patient animals are used to very good advantage in the swamps and in Assam, India, by native and Allied troops. The signal corps, under unusual conditions, have managed to install and keep open communication lines.

## Patton-Bradley Tour Brittany

Lieut. Gen. George S. Patton, left, and Lieut. Gen. Omar L. Bradley are shown aboard a C-47 plane used on a tour of the Brittany peninsula. General Bradley's troops cover so much area in France that he finds it necessary to use a plane to visit the farflung fronts. In the plane was a map, used by the generals on tour.

## In Service

Cpl. Orvil H. Jones, son of Mrs. J. H. Jones, has arrived safely somewhere in England, according to letters received from him by his mother.

According to a news release received by The News from headquarters of the Ninth Air Force in France, Sgt. John P. Cogdell, son of Mr. and Mrs. W. A. Cogdell of Crowell, is serving with an aviation engineer battalion of the Ninth Engineer Command, which is constructing airfields behind the front lines in France. Sgt. Cogdell landed with one of the first detachments of men from this battalion which started its operations on the beachhead on the morning of D-Day. His battalion was the first unit of the command to land on French soil and completed its first mission, an emergency landing strip, on D-Day in the face of continuous enemy fire. Since that time, the battalion has been constructing and maintaining airfields under fire from the enemy, and these operations will continue as the Ninth Air Force follows the advance of the invading armies to provide them with close air support. He had already served for two years in the United Kingdom, where aviation engineer battalions constructed airfields for British-based American bombers and fighters.

Sgt. Donald G. Loving, whose parents reside on the Tom Burnett ranch, has been in France for several months. He writes his parents that France is beautiful, even in war time.

Pvt. Frank Wisdom, son of Mr. and Mrs. A. B. Wisdom of Thalia, has arrived in England recently and says he is fine. Mr. and Mrs. Wisdom have four sons in the service and heard from all four of them last week. Sgt. Lew Wisdom is stationed at Bryan; Floyd Wisdom, S-2-C, is in Coronado, Calif., and Pvt. Jack Wisdom is somewhere in the Pacific.

Pvt. H. A. Phillips, son of Mr. and Mrs. H. M. Phillips, has finished his basic training at Camp Hood, Texas, and was here last week visiting his wife and baby daughter, Patricia, and his parents. He was en route to Camp Shelby, Miss., where he will be attached to the Quartermaster Truck Co.

Lieut. Mike Bird, son of D. N. Bird of Crowell, has arrived safely somewhere in England, according to a letter received by his father this week.

M-Sgt. Jim Riley Gafford of the U. S. Marines, who has been in the South Pacific for the past fourteen months, has arrived back in the States, according to a telegram received by his mother, Mrs. C. E. Gafford, Monday from San Diego, Calif. He expects to be at home in about two weeks. Sgt. Gafford had served 8 months in the South Pacific previous to his visit at home in November, 1942.

A-C Carl B. Morris visited his aunt, Mrs. J. M. Jackson, this week. He has been transferred from Naval Air Training Center at Corpus Christi to Great Lakes Naval Training Center at Great Lakes, Ill.

Pfc. Glenn B. Hopkins of Camp Polk, La., spent a 12-day furlough here with his parents. He returned to camp last Monday.

Mrs. H. T. Capps of Thalia received a letter from her son, S-Sgt. Henry Havis Capps, who is with Montgomery's British 8th, stating that he is now in a hospital somewhere in Italy for a minor operation.

S-Sgt. Lester W. Blevins visited his parents, Mr. and Mrs. Charlie Blevins, of Thalia, several days of last week. Sgt. Blevins has been transferred to Fort Penning, Ga., where he will attend Officers' Training School.

## Large Telescope to Be Set Up Sept. 25 and 26

Ennis Settiff announced Tuesday that he would set up his large telescope at his place of business, the Settiff Machine Shop, one block east of the square, Monday and Tuesday nights, Sept. 25 and 26, and give all people of this area an opportunity to take a look at the moon through this excellent instrument, provided the weather is favorable.

The construction of this large instrument was a hobby with Mr. Settiff and it was completed in October, 1940, when he lived in Eldorado, Okla. A story of its construction was carried in the issue of The News August 31.

A telescope of so great power is rare in this section, and everybody is invited to be present Monday or Tuesday night, Mr. Settiff stated.

## Their Best Friends

A couple of guys who can't resist a couple of puppies are Lieut. Gen. Omar N. Bradley, commander of U. S. ground forces in northern France, and Gen. Sir Bernard L. Montgomery, commander of all Allied ground forces in this area.

## Ballots Overseas

Overseas ballots for servicemen get top priority in the Pacific area where Pvt. Ted Robbins, Bloomsburg, Pa., Seventh AAF voting representative, is visiting shops, hangars, offices and flight line of squadrons from Hawaii to Saipan.

## Crowell Wildcats Defeat Floydada Two Touchdowns

The Crowell Wildcats visited the Floydada Whirlwinds Friday night for their opening football game of the season and scored a 12 to 0 victory.

The first quarter of the game was scoreless with both teams registering several first downs. In the second quarter, Pat McDaniel, the Wildcats' speedy quarterback and co-captain, broke through the center of the line for five yards and the first touchdown, after the ball had been advanced down the field on a series of successive first downs marked up by all of the backfield men. The attempt for the extra point was no good.

The powerful Whirlwinds forced their way twice to within a few yards of a touchdown but only to be stopped by outstanding defensive playing in the line. The most brilliant work on the defense was done by Ray Tamplen and co-captain Glen Taylor.

The second tally came in the fourth period when McDaniel uncorked a beautiful 85 yard run from the result of some splendid blocking by Crowell's other ten players. Again the attempt for the extra point was unsuccessful. Co-captain John Carter and guards Kenneth Payne and O. C. Wharton did some excellent downfield blocking throughout the game to pave the way for Crowell's ball carriers.

The men showing up best for Floydada were Geo. Mize, a tackle, and Bill DuBois, a backfield man.

The following boys saw service for Crowell: Howard Bell, Glen Taylor, O. C. Wharton, Travis Vecera, Kenneth Payne, Bobby Cooper, J. L. Brock, Pat McDaniel, Ray Tamplen, Kendrick Joy, John Carter, Joe Mason, Carlos McBeath, Larry Wood, J. L. Gobin, J. C. Patton and Horace Todd.

At the present time there are 11,000,000 men in the armed forces.

## Royal Commander

H.R.H. Prince Bernard of the Netherlands is shown talking to one of his men during inspection of Dutch troops fighting on the British-Canadian sector in France. He has been named commander of the Netherlands forces under General Eisenhower.

## Red Cross Makes Challenge to Ladies of Foard

Mrs. S. S. Bell, Foard County chairman of War Production, announced in last week's paper that the sewing room would be re-opened on Monday afternoon, Sept. 11, for the making of 144 Navy utility bags, as per an order from National Red Cross headquarters. The sewing room has been closed for several months on account of the hot weather and because the need for the kits was not urgent. However, the need is urgent now, and the room was re-opened by the announcement and not one lady appeared to assist with the work, with the exception of Mrs. Clint White, sewing chairman. The kits had all been cut by Mrs. White and were ready to sew.

Mrs. White served as sewing chairman last year and was faithful and efficient in every way, but she now feels that she cannot continue in that capacity. Mrs. A. L. Davis has consented to assume the chairmanship and the room will be opened again next Tuesday and Thursday afternoons and each Tuesday and Thursday afternoon until the work has been finished. The Foard County Chapter has been asked to make some hospital garments in the near future. The days of the week have been changed so that no conflict may occur for the ladies who attend church meetings on Mondays. It is sincerely hoped that a response will be made by the Foard County ladies so that the required quota may be attained.

Foard County has always made hearty response to all calls made upon it and, surely, now that the end of the war is in sight, there will not be a let-down. Not until the fighting is all over can our service men and women relax their efforts one bit and we should do as well," says Mrs. Bell.

This urgent call is for any lady who can do plain sewing and who will present herself at the sewing room in the court house on Tuesday and Thursday afternoons.

Mrs. Bell and several of the chairmen of the various committees for the War Production work plan to attend a district meeting of the Mid-West area in Wichita Falls Friday. At this meeting, definite instructions will be given chairman of each division.

## Car Accident Sunday Afternoon

Four Crowell young people, Gordon Erwin, Ana Jane Magee, Polly Davis and Craig Sandlin, figured in an automobile accident on the Quanah-Vernon highway just east of Quanah Sunday afternoon. The four were riding in the Erwin car and were side-swiped by another car going in the same direction, causing the Erwin car to turn over twice.

None of the four were injured except for minor bruises. The car was badly wrecked. The occupants of the car which caused the accident were uninjured.

## NEW OPERATOR AT RIALTO

Robert Thornhill, new projector operator at the Rialto Theatre, moved his family from Dallas to Crowell last week where they will make their home.

## Quanah Indians and Crowell Wildcats Will Meet in Their Annual Grid Game Tomorrow Night at Wildcat Stadium

The Quanah Indians, a Class AA team, will be playing the Crowell Wildcats in football here Friday (Tomorrow) night at 8:30. This will be the Indian's first game of the season, while the Wildcats have one victory to their credit, having defeated the Floydada Whirlwinds 12 to 0 at Floydada last Friday night. Crowell and Quanah usually play a close game, eight points being the largest margin that has separated their score in the past three years. The Indians have won by one touchdown the past two years, while Crowell came out on the big end of a 20 to 12 score in 1941. Both of these teams have four regulars back from last year and several other lettermen from which to select their respective starting lineups.

Probable Starting Line-Up			
No.	Crowell	Position	Quanah
82	Howard Bell	162 Left End	140 Jim McMenamy
71	Glen Taylor	225 Left Tackle	170 Eugene Rockholt
62	O. C. Wharton	145 Left Guard	181 Louis Boynton
51	Travis Vecera	140 Center	130 Roger McMenamy
61	Kenneth Payne	145 Right Guard	163 Stermon Wells
70	Bobby Cooper	158 Right Tackle	155 Jas. Yarborough
83	J. L. Brock	150 Right End	165 Billy Richardson
11	Pat McDaniel	158 Quarterback	150 Ted Jacobs
30	Ray Tamplen	165 Left Half	145 Russell Waddrop
10	Kendrick Joy	140 Right Half	140 David Sullivan
21	John Carter	169 Fullback	165 Bud Conley

**Quanah Reserves**  
Linemen: Billy Cole, 77, wt. 151; Earl Baldon, 54, wt. 140; Trice Epps, 56, wt. 125; Kamael Taylor, 62, wt. 140; Herbert Wright, 69, wt. 161; Billy Burch, 70, wt. 152; Vernon Baughman, 76, wt. 160; Billy Bumpass, 57, wt. 121.

Backs: John Ansel, 51, wt. 120; Wayne Johnson, 61, wt. 140; Rex Watkins, 79, wt. 140; Lynn Huffman, 55, wt. 145; Jimmy McKay, 50, wt. 130.

**Crowell Reserves**  
Linemen: Mason, 80, wt. 170; Gobin, 80, wt. 140; Bradford, 70, wt. 150; Short, 50, wt. 150; Wood, 63, wt. 135; Bond, 60, wt. 136; Ballard, 73, wt. 130.

Backs: Patton, 41, wt. 155; McBeath, 20, wt. 130; Todd, 31, wt. 132; Wallace, 40, 130.

**Official**  
Lt. Swope (Ohio State) Children's referee; Bill Clynych (A.C.C.) Children's umpire; Sgt. Murphy (Rice), headlinesman.

Bill Howarth, coach, Quanah; Harold Wilkinson, coach, Crowell.

## Claud Orr Becomes New County AAA Chairman

Clinton McLain, County AAA Chairman, leaves Sunday for the armed forces, and this position will be filled by Claud Orr, who is now vice chairman of the committee. Howard Bursey, regular member, will be moved to vice chairman, and A. W. Barker, now alternate member, will become the third member.

The AAA chairman is also automatically chairman of the County Farm Machinery Rationing committee, the Farm Transportation Committee, and the USDA War Board.

## Former Pioneer of Foard County Dies at Dalhart

R. A. Wells, one of the early settlers of Foard County and a resident of Crowell for many years before moving to Dalhart twenty-two years ago, died at the home of his sons, Rob and George Wells, near Dalhart early Wednesday morning. Funeral services will be held in Dalhart Thursday afternoon.

Mr. Wells had been in declining health for several years. He is survived by one daughter, Mrs. Wade O'Neal of Clayton, N. M., and the two sons, Rob and George Wells, of Dalhart.

## Captured Thousand

Lieut. Clarence E. Coggins of Poteau, Okla., was responsible for the capture of 1,000 Germans while a prisoner he convinced the Nazis that they were trapped—and they surrendered.

## Unrationed Meat

Civilians, residents of Ecochu, France, return to their homes and find a butcher shop open for business. They had fled to an abandoned chalk quarry when American artillery opened fire on their town to drive out the Nazis.

## HOSPITAL NOTES

Foard County Hospital

Patients In:

Meivin Ray Johnson

Patients Dismissed:

O. C. Hammonds

Casey Howton

Gene Smith

Evelyn Dean Hoyle

Visiting Hours: 9:30 to 11:30 a. m.; 2 to 5 p. m.; 7 to 9 p. m.

It is suggested that if the production of milk continues to slip it may go on the ration list. Even though it does not go on the ration list there is a possibility that the public will be limited through cuts in sales quotas of dealers.

## AUCTION SALE

The big auction sale of L. D. Fox will take place in the Gilliland community tomorrow, starting promptly at 10 o'clock. The location is three miles east and one-half mile north of Gilliland in Knox County. Four farms and one section of grass land, farm machinery and livestock will be sold to the highest bidder.

## OPENS FRUIT STAND

M. D. Durham has opened a fruit stand on the northeast corner of the square and will carry a stock of fruits and vegetables. A small frame structure has been erected to house the new business.

To get anywhere, strike out for somewhere, or you'll get nowhere.

MARGARET

(By Mrs. S. B. Middlebrook)

John Y. Bradford of Silvertown stopped over to visit his grandmother, Mrs. Sadie Bradford, and other relatives while en route to Dallas to join the Navy.

Mr. and Mrs. Oscar Marlow and son, James, of Thalia, visited Mr. and Mrs. Bill Marlow over the week-end.

Mr. and Mrs. Tuck Ingle left Saturday for Fort Worth. Mr. Ingle went for medical treatment.

Billy Wayne and Loraine Moore of Dallas are visiting their aunt, Mrs. George Wright, and family.

Mr. and Mrs. Riley McCurley, Mr. and Mrs. Eph Allen, and Edward and Gary Haseloff visited Mr. and Mrs. Doyle McCurley in Shamrock Sunday.

Mrs. Buddie McCrary of Goodlett is visiting her brother and family, Mr. and Mrs. Dink Russell, this week.

Mrs. Joe Bledsoe visited her sister, Mrs. S. H. Vaught, of Lubbock from Saturday until Sunday.

Lt. Weldon Bledsoe of Los Angeles, Calif., spent several days last week with his uncle, Joe Bledsoe, and family.

He finished fifty bombing missions over France and Germany and is being transferred to El Paso, Texas, as an instructor for student fliers.

Mr. and Mrs. John L. Hunter Jr. were in Vernon Saturday attending to business.

Mrs. J. F. Russell has returned from Paducah after visiting her son and family, Rev. Foster Russell.

Mrs. Jim Ewing has returned from Lubbock where she visited her son, Clarence Cook, and family.

Mr. and Mrs. Harry Black, who have been visiting her parents, Mr. and Mrs. G. Morrison, went to Dallas and Honey Grove on their return home to Amarillo.

Mr. and Mrs. Bud Mynard and sons, Pfc. Joe Allen and Earnest, visited George Wright Thursday.

Mr. and Mrs. Green Sikes visited their son, Guyton Sikes, and family, in Quanah Thursday.

Mr. and Mrs. Jim Owens visited in Quanah Sunday with Mrs. Frank King and Mr. and Mrs. Mack Bradford.

Mr. and Mrs. Everett Smallwood and family of Matador visited Mrs. Mary Hunter and family and Mrs. Jack Roden Sunday.

Mr. and Mrs. Grant Morrison visited Mr. and Mrs. J. L. Eason in Chidress Thursday.

Mr. and Mrs. Robert Long have returned from Canada, where they had been attending to business.

Billy Morrison spent Saturday night with Virginia Mabe of Crowell and attended the football game at Floydada.

Mr. and Mrs. Jimmie Moore and son, Bill, visited in Wichita Falls over the week-end.

Mr. and Mrs. Lonnie Halenack spent Sunday with Mr. and Mrs. Frank Halenack of Black.

Mr. and Mrs. Ben Saxton of Spur spent the week-end with her sister, Mrs. Grant Morrison.

Mrs. Weldon Garvy and two children, Judy and Lynn, left Saturday for their home in Houston after an extended visit with her aunt, Mrs. G. C. Wesley, and family, and uncle, John Taylor, and family.

Mrs. Ruth Shackleford of Nona visited her friend, Mrs. Harry Black, several days last week, while en route to San Diego, Calif.

Mrs. Foster and sons of Oklahoma visited Mr. and Mrs. Ralph Bradford and family this week.

Mrs. Nena Magill left Saturday for her home in Dallas after spending two weeks with her sister, Mrs. G. C. Wesley, and family.

She stopped over in Wichita Falls to visit her brother, W. B. Taylor, and family and nephew, John Wesley, and family.

Mr. and Mrs. Steve Mills and daughter, Neva, of Fort Worth spent last week-end with Mrs. Mills' parents, Mr. and Mrs. H. T. Kenner.

Mrs. John Kenner and daughter, who had been visiting in Fort Worth, returned home with them.

Orval Wharton made a business trip to New Mexico last week.

Mr. and Mrs. H. Galbraith of Lubbock spent the week-end with their niece, Mrs. Claud Lamond, and family.

THOUGHTS OF SERIOUS MOMENTS

There is much satisfaction in work well done; praise is sweet; but there can be no happiness equal to the joy of finding a heart that understands.—Victor Robinson.

There is but one road to lead us to God — humility; all other ways would only lead astray, even were they fenced in with all virtues.—Boileau.

The Kansas moniker "jayhawker" comes from Jay-walking warfare or irregular fights carried on by Confederate raiders from Missouri and Arkansas against the Unionists, in Kansas territory, during the Civil War.

A woman's pledge to be on time carries a lot of wait.

THRIFTY!

ONE-A-DAY Vitamin A and D Tablets

EACH tablet contains 25% more than minimum daily requirements of these two essential vitamins. Insufficient Vitamin A may cause night blindness, may lessen resistance to infection of the nose, throat, eyes, ears and sinuses. Vitamin D is necessary to enable the body to make use of the calcium and phosphorus in our food. Insure your minimum requirements of these two important vitamins, by taking ONE-A-DAY Vitamin A and D Tablet every day. Economical—50¢ or less - per month. Convenient—you take only one tablet a day. Pleasant—children actually like the taste—and so will you. IMPORTANT—when buying Vitamins, compare potencies and prices. Get them at your drug store.

Innocent Bystanders of War

Not the least amazing thing about this war is the manner in which children have endured terrible hardships and came up smiling. Their resilient young spirits apparently unimpaired, left, a little lad of Surbiano, Italy, puts on a winning grin. Right, a young lady of Trun, France, hauls her wagon load of possessions.

INTERESTING FACTS OF THIS AND THAT

It is the army policy to maintain at least one year's food supply in storage.

Fully 96 per cent of all men wounded on battlefields recover and about two-thirds of them return to duty.

The 1940 census shows the Philippine Islands having a population of 16,356,000.

A report from the Federal Reserve Board shows checking accounts in the banks of 100 largest cities totaled \$33,000,000,000 last month, a gain of more than 400,000,000 over a year ago.

According to Treasury Secretary Morgenthau, the Fifth War Loan netted \$20,639,000,000 compared with the goal of 16 billion.

The 20x30 foot canvas "Signing of the Constitution," facing the stairway in the House gallery at the Capitol in Washington was painted by Howard Chandler Christy. His fee: \$30,000.

QUESTIONS AND ANSWERS

- 1. What is the name of the famous insurance firm of London which started out by insuring vessels and their cargoes?
2. From what state does Harry Truman, Democratic candidate for vice president, come?
3. What nation built as its defense against invasion, the Maginot line?
4. What nation built as its defense against invasion, the Mannerheim line?
5. What number of ration points is required for a pound of creamery butter?
6. What is the name of the island otherwise known as Japan?
7. To what animal does the term karakul apply?
8. Which city lies furthest north, Los Angeles, Calif., or San Francisco, Calif.?
9. In what European country is the area known as the Riviera?
10. What was the fate of Joan of Arc of France?
(Answers on page 3).

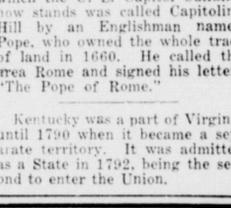

SAFETY SLOGANS

Keep your papers moving out of the house and you are removing a fire hazard. Many hospital beds are occupied with victims of accidents that a little extra care could have prevented. Holidays and crowded highways sort of go together, make sure your automobile is still in good mechanical condition.

HOUSEHOLD HINTS

An aid in making cake light and spongy is to add a teaspoon of lukewarm water to the eggs before mixing in. To whiten discolored china or earthenware and restore the original whiteness, scour the china with baking soda or vinegar and salt. To fix your window screens so that you can see out and passers-by cannot see in, paint the inside of the screens with thin white enamel.

YOUR CAR IS SAFE IN OUR HANDS

When you leave your car in our garage, you can leave it with confidence that it will re-care. Have a Thorough ENGINE CHECK-UP

**RAYLAND**  
(By Mrs. T. C. Davis)

Mr. and Mrs. Dick Ramsey and children of Childress have moved back to their home here.

Mrs. Ethele Abston of Houston is visiting her parents, Mr. and Mrs. T. E. Lawson, and family.

Cotton Roberts of the U. S. Navy was visiting friends here Sunday.

Mr. and Mrs. Carl Davis and son, Carl Wayne, of Kirklind visited their daughter and family, Mr. and Mrs. Dink Ramsey, over the week-end.

Mr. and Mrs. Willie Lee Lyles and son of Childress visited here over the week-end.

Mrs. Levi Lowellen has returned from East Texas after a short visit.

Wilbert Joe Wood of the U. S. Navy is visiting his parents, Mr. and Mrs. T. E. Lawson, and family.

Mrs. Wilson of Tyler is visiting her son and family, Mr. and Mrs. Marvin Wilson.

B. D. Beazley and James Cook have enrolled at Texas Tech College at Lubbock.

Mr. and Mrs. W. T. Raines and children of Farmers Valley visited in Rayland Sunday.

S. T. and Melvin Raines of Farmers Valley visited Mr. and Mrs. T. C. Davis over the week-end.

Mr. and Mrs. T. E. Lawson and daughter, Mrs. Ethele Abston, and Wilbert Joe Wood visited in Vernon Sunday.

Mr. and Mrs. Dewitt Edwards entertained the young folks Friday night with a party.

Mr. and Mrs. W. A. Daniels visited in Vernon Sunday.

Carl Lawson of Locketville visited here Saturday.

**RIVERSIDE**  
(By Mrs. Cap Adkins)

Mrs. Arlie Cato and sons of Ft. Worth are visiting her parents, Mr. and Mrs. R. G. Whitten and other relatives.

Mr. and Mrs. Bob Huntley of Vernon, Pvt. Robert Huntley and wife of Meridian, Miss., visited in the Cap Adkins home Tuesday evening.

Mr. and Mrs. Porter Turner of Thalia were dinner guests of Mr. and Mrs. Sam Tole Sunday.

Edmond Ward spent Sunday with his parents in Chillicothe.

Mr. and Mrs. Cap Adkins visited their son, James, and wife of Fort Worth, this week.

Seaman First Class Hugh Solis returned to his base in San Francisco, Calif., after a visit with his family and Mr. and Mrs. Bruno

**Your Horoscope**

September 18, 19, 20, 21.—You have high ideals, are conscientious and truthful and just in your dealings. You are somewhat inquisitive and like attention but people like you. You can be very sarcastic when you lose your temper, and may be misled by your intense nature, which would cause you some suffering.

September 22, 23, 24.—If a girl, you have a certain sweetness and charm that makes you a great favorite with everyone, especially the men. You never lack for admirers or lovers, but your truest friends are of your own sex. You take much pride in your personal appearance. You are faithful in every thing you undertake. In marriage no one will ever know it if you are unhappy.

**Texas Company Will Help War Veterans in Every Possible Way**

New York, N. Y., August 29.—The Texas Company intends to go "far beyond its legal obligation" in placing men and women who return to company service from military leaves of absence, declares Harry T. Klein, Texaco's president, in a letter to heads of departments and subsidiary companies, released today. Moreover, in placing physically handicapped war veterans the company's policy will be to endeavor "in all possible ways to find positions in which they can work and feel a sense of worthwhile accomplishment."

"Many of our employes," said Col. Klein, "will return with newly acquired skills and with greater educational accomplishments—and will have developed greater ability to assume responsibility and to exercise supervision." Such employes, he said, "should be offered an opportunity to use their education and skill to the fullest." Each department will endeavor to place its own returning employes, but when an appropriate position is not available in that department, or the veteran indicates a preference for work in some other department, the department head will contact other department heads in an effort to place the veteran most advantageously.

To help department heads in this work the company is setting up an Employee Counsellor Plan to acquaint the employe with the opportunities for educational and vocational training available to him through Federal and other agencies and generally assist him in making a "smooth and constructive transition" from military to civilian life.

More than 5,000 men and women employes of The Texas Company and domestic subsidiaries are serving with the armed forces.

**Hengyang Field Falls to Japs**

Photo was made during loss of Hengyang airfield, China, to the advancing Japs. Billowing clouds of smoke are spreading over the airfield. After Gen. C. L. Chennault's headquarters had issued orders to abandon the U. S. army 14th air base, the Japs moved in but found little of value for further operations.

As the Father hath loved me, so have I loved you; continue ye in my love.—John 15:9

Whether or not the Allies decide upon an international peace force to preserve the future peace of the world, we believe there should be a permanent organization to be known as a Congress of Nations for the preservation of peace and the discussion of other matters of Allied interest. These representatives should meet regularly and discuss conditions and situations in all parts of the world that might have a bearing upon the future peace of the world. In this way any developments on the part of any nation that might have a bearing upon peace could be brought out in the open and discussed as matters of national interest are now discussed in Congress. Had such an organization been in operation preceding this war, steps might have been taken to head off Germany and Japan in their war program before it reached the point where these two countries felt they were ready to whip the world and started out to do it. Without some such organization with the power to check up on the world conditions at any time we are going to be in danger of lapsing into the same indifference that permitted the ground work to be laid for the present war while the world struggled with the reconstruction programs made necessary by the World War I. We believe that if we are to enjoy world peace it will not come by accident. It will come because

of deliberate design and eternal vigilance. The World Congress might be made the watchman on the tower.

All over the country are young people who are going to be faced with the problem of whether they will continue to work or go to school. The decision is more difficult than usual this year. The great need for workers and the good wages are a temptation to skip school and stay with the job. It is a matter each young person will have to decide. Obviously in the light of the experience of thousands of men and women the wise thing is to go to school. The chances of returning to school later become less and less as time goes on. What started out as a short term of employment often lengthens into a life time job, and the time never comes when the worker gets around to quitting the job and going to school. Now is the best time to go to school.

Ever since we learned that \$400,000,000 is being returned to income taxpayers who overpaid their 1943 income taxes we have been looking for the long brown envelope that will bring us the check for the overpayment we might have made. We thought it had come the other day when a long brown envelope came in our mail from the revenue collector's office. We opened it with high hopes and anticipation only to discover that it was a notice that our third installment on the 1944 tax was due.

If every group demanding special legislation and special benefits would stop to think what effect the granting of such special favors would have upon those who are not permitted to share them, there would be less class legislation demanded. The similarity lies in the fact that most of such legislation is based upon selfishness and has no regard for the welfare of anyone else.

It is reported that Hitler and his associates have a plane in readiness to leave the country as soon as the critical moment arrives. It is also reported that there is some doubt about just where Hitler and his friends can go. Within the last week we have heard a score or more people suggest a good place for him to go.

It will come out after a while of course, but it is not known whether Donald Nelson's trip to China is an advance in position or whether he is being sent home by way of China.

There is nothing so dense and boneless as willful ignorance and prejudice.

Few realize to what extent the people of America live out of cans. Take the canned foods out of a grocery store and there wouldn't be much left. What was left could be stored on a few shelves on one side of the store. Singularly enough in the average store the fresh fruit and vegetable section occupies about a fifth of the space given over to the foods packed in tin cans and glass jars.

It appears difficult for the American people to realize that paper, a thing of which there has always been an abundance, is vital, needed in the war. Every community in this country should have some plan for saving and collecting waste paper. A few pounds here and a few pounds there will result in an enormous total. This is one way in which all of us can help with the war effort.

The report is that to date nearly 10,000 planes have been delivered by this country to Russia. Most of these have been flown across from Canada and Alaska. There is no discounting the value of this aid to Stalin's armies. Without doubt it is the thing that has thrown the balance of power in favor of the Russian armies.

Following the close of the first World War the government disposed of six billion dollars worth of surplus war goods. Following the close of this war there will be seventy-five billion dollars worth of surplus material to be disposed of.

Some folks are willing to be as patriotic as any one, a local philosopher said yesterday, as long as it does not require them to make any sacrifices, suffer any inconveniences, or give up anything they are accustomed to in normal times.

Some folks worry so easily that they don't have to worry about what they are going to worry about next.

The Hindus claim to have invented the wheel bar.

**HISTORY**

**Columbus Day—October 12.** As far as can be determined the first celebration of Columbus Day was held in New York City on October 12, 1792. It was sponsored by the Society of St. Tammany an Columbian Club, founded by William McKinley May 12, 1784. The society gave a dinner accompanied by extensive ceremonies on the three hundredth anniversary of the discovery of America. As a part of the decorations for the ceremony a monument was erected in the headquarters of the society the first to be erected in this country to Columbus. Between this date and 1892, the four hundredth anniversary, several monuments were erected in different parts of the country in the country's honor. An international exposition was planned for 1892 to be known as the Columbus Exposition to be held in Chicago. For the reason that preparations were not complete the exposition did not open until the following year, 1893. The first state to declare the day a legal holiday was Colorado in 1892. The same year was made by New York in 1892. In this territory the Italian citizens were held in New York for the occasion. Their crews participated in the parade. Some state Italian societies were in the procession. The day is now a legal holiday in thirty-four states.

**G. I. Bill of Rights**

Those men who served in this territory who served 90 days or more in active military or naval service after September 16, 1940 and were honorably discharged or released, will have opportunity to complete their education.

This is provided for under the provisions of the Government's legislation known as the G. I. Bill of Rights. The bill is now being considered by the Senate.

Under the law a veteran may attend an approved educational institution, provided he is acceptable to such institution. For these conditions apply. The education or training shall begin not later than two years after the discharge, or end of the war, which ever is later. It is training under the program for one year or the equivalent in continuous part time study. Upon satisfactory completion of the one year course they shall be entitled to additional training equal to the time the veterans were assigned to Army Student Training Program. But in no case shall the total period exceed four years.

Any course may be discontinued at the option of the progress of the student in found satisfactory. Payment not exceeding five hundred dollars per school year will be made to the institution for each semester to cover the customary cost of tuition, laboratory, library and other similar fees. This money also may be used for books, supplies and equipment, but not for board, lodging and travel. A veteran enrolled in an educational or training course may, upon application by the administrator, receive a subsistence allowance of fifty dollars a month without dependents, or seventy-five dollars a month with dependents.

**What We Think**  
By Frank Decker

For the past two or three weeks I have been discussing on this column past war industries for average small communities. I desire to continue the discussion in this article.

In my experience and study of small town industries one common fact stands out that will apply to all industries set up in small communities, that is that it is not only necessary that a good product be made but also that it be sold. It is comparatively simple to hit upon a good idea and equally simple to assemble men and machines to manufacture the product but difficult to market it as a profit. The selling end of every industry is the trouble because it has so many unknown factors that cannot be foreseen and that cannot be presented in blue print form, yet upon this most uncertain phase of the business rests the success or failure of the project.

In sections adapted to it, in my opinion, the dairy industry is the ideal community project. It is ideal because it is a small amount of equipment with a home production of good cheese is a mathematical science—an art any intelligent person can learn. Incidentally in the cheese field there is ample opportunity to attain recognition of one's product by producing a superior article. There is so much inferior cheese on the market that there is a place for a better product.

Dairy industries and industries allied to dairying are of course adapted to these sections of the country suited to dairying. Incidentally the dairy industry not only furnishes a good type of industry for the community from the industry standpoint but at also is good for the community from the fact that it will build up the soil and the farms of the community. It provides for employment not only in the plant where the milk is processed, but on the farms where it is produced.

A few examples of small town industries which have come to my attention might be interesting and might offer suggestions to communities in search of workable ideas.

A friend of mine operates a plant that manufactures screws. He makes screws of all sizes big and little, by the millions. I had never heard of a plant given over wholly to the manufacture of screws. I had supposed that each plant made its own screws. My friend informs me that few plants make their own screws, choosing to buy them from plants that specialize in making screws. Where he got his first market for them I don't know. "The market is everywhere," he said. "Thousands of things in use today are put together with screws. Some are too small to make them. It is often cheap to get a plant to make the screws in quantity. It is often cheaper to make them. We have kept our plant busy since the day it opened making screws for other people."

**WHERE THANKS ARE DUE**

A country grocer recently said to a somewhat irate customer: "If you had to keep track of all the rules and regulations that I get from those pencil pushers in Washington, you would be more lenient in your attitude toward the merchant. Men who apparently know nothing about meat cutting, tell us how to cut meat, what cuts we can keep in our show case, and how we can prepare it. We are all glad to help ration supplies and control prices but the rationing and price fixers ought to be required to have some practical experience before they are allowed to make their fancy rules and regulations."

We can all allow for many mistakes under the price control act, but we never want to accept the idea that after the war it will be necessary to continue indefinitely the restrictions which the buying public and the producers and merchants have had to endure.

Rationing and price control have been a success because of an efficient retail merchandising system which was able to carry out a rationing and price control program which, without the co-operation of the merchants, would have been impossible of accomplishment. The nation has its merchants to thank for the unprecedented distribution of necessities and luxuries which it has enjoyed during the war emergency.—Industrial News-Review.

A new type of furnace has been developed by the Anthracite Industries Laboratories at Primus, Penn. The new type of furnace occupies a space 2 feet by three feet and will heat a house in 15 minutes compared to 45 minutes required by present standard models. Designers state that the manufacture of the furnace will be left to private industry. The furnace consists of a horizontal pipe into one end of which coal is fed by means of a worm. At the other end of the pipe is a fan forcing a current of air against the advancing coal. As the coal advances by the action of the worm the ashes are forced out the other end of the pipe. A water jacket about the pipe conserves the heat.

The Civil Aeronautics Authority plans on having every town and city join in an air-marking program for the benefit of private fliers. This practice has been restricted during the war. The requirements are that the name of the town be painted in letters 10 to 20 feet high on some large roof at the town. Along with the name would be an arrow pointing north and symbols indicating the distance and direction of the nearest airfield and figures showing the latitude and longitude of the community. A manual and a set of templates for use in marking has been prepared by the agency which will be given interested communities upon application as soon as the Army clears the way for the order.

Woman's wish is to be weighed and found wanting.

**IN THE NEWS**  
**30 YEARS AGO**

Items below were taken in whole or in part from the issue of The News of Sept. 25, 1914. J. L. Martin, editor.

A deal was consummated this week in which C. P. Sandifer, who for four years has been active vice president of the Bank of Crowell, severed his connection with the institution, while R. B. Edwards, one of our leading merchants and business men, and already a strong stockholder in the bank, takes over Mr. Sandifer's interests in this well-known institution.

The new "war comet" is now plainly visible to the naked eye, and can be seen in the northeast about 4 o'clock in the morning. It is about midway between the Zenith and the horizon. It is said that a comet appears with every war and this has been called the "war comet."

R. S. Sparks died at Crowell Sept. 17, 1914. He was born in Shelby County, North Carolina, May 10, 1848. His wife died March 20, 1910. He is survived by four sons and two daughters.

Joe S. R. W. B. McCormick and Gray Thompson made a business trip to Vernon this week.

Herbert Edwards left this week for College Station to enter school at A. & M.

Decker Magee, mayor of Foard City, and who also has in his hands the destinies of the Crowell Grocery Company's interest at that place, was here mingling with friends Sunday.

Ross Woodall, the accommodating prescription clerk at the Owl Drug Store, spent a few days in Dallas last week.

Mrs. Sallie Nichols, who died Sept. 16, was buried in the Crowell cemetery Sept. 17.

The News man was at Knox City last week and run into Percy Ferguson, who has a good job with the Orient at that place.

After discontinuing the First Monday Trades Day for a few months, the business men of Crowell with the support of a number of our progressive farmers, have decided for another big day, Monday, Oct. 5, by giving a mule show and agricultural exhibit.

**NEW OPPORTUNITIES**

Our nation has long enjoyed superior distribution of its domestic products to consumers. In the not distant future, it will enjoy a similar distribution of world products. That this is no idle dream is evidenced by the announcement of low-cost commercial air service designed to expand post war international trade and tourist travel. One line has already announced passenger fares to compete with steamships and has made drastic cuts on cargo rates.

To gain some idea of potential international cargo business, it is interesting to note that domestic air express totaled 48,689 shipments in July, an increase of 16.7 per cent over July, 1943, according to the Railway Express Agency. This is a forerunner of the volume that will develop with expanded international trade. Combination air and rail express service for the shipping public is accomplished through the co-ordination of schedules which link the 350 airport cities in the United States and Canada with the 23-

**ASK YOURSELF THESE QUESTIONS**

Is my home protected by enough fire INSURANCE to cover cost of today's replacement value?  
 If I should have an automobile wreck, am I FULLY PROTECTED? If not, who will pay the bill?  
 It might pay you to drop around and discuss these matters with us before it is too late.

**Hughston Insurance Agency**  
Office Phone 238 Residence Phone 225

**VOLUNTARY HEALTH PROGRAMS INCREASING**

It is probably safe to say that no country in the world is developing group health insurance plans as rapidly as the United States. This form of security for individuals and families is being aggressively promoted by the principal underwriters.

Studies indicate, according to the Nation's Business, that employers may obtain complete health coverage for all workers and families (without medical examinations) at from 1 1/2 to 2 cents per payroll-hour—the cost being generally shared half by the employer and half by the employee.

**AMERICAN ENTERPRISE SCORES AGAIN**

After two years of research the announcement is now made that the oil industry is ready to produce at the command of military forces, a new super fuel for aviation so much more powerful than 100-octane gasoline that it will permit maximum bombing of the Japanese mainland on a "suburban service schedule." While the chemical details of the new product are withheld from the Petroleum War Council disclosed that this fuel, called "100-octane plus," is expected to surpass all other gasolines in the world in volatility and consequent performance.

William R. Boyd Jr., Chairman of the Council, said the product was designed to "draw from the futuristic B-29 Superfortresses the most modern fighter esc planes, their originally intended maximums in sustained speed short take-offs, combat radius and load-carrying capabilities."

It should be stated that this is just another accomplishment of private enterprise in the United States which again surpasses anything the dictators and their totalitarian governments have ever accomplished.—Industrial News-Review.

**THE REGION WITHIN THE PRESENT LIMITS OF THE STATE OF IDAHO WAS INCLUDED IN THE LOUISIANA PURCHASE OF 1803.**

Idaho was included first in Oregon and subsequently in Washington. It was made Territory in 1863 and admitted to statehood in 1890.

U. S. casualties up to the end of last month total about 300,000. This is 38,978 over World War totals. This is really below the loss in World War I for the reason we have been fighting three months longer and with a force three times as great.

Mississippi is another state having a name of Indian origin. Mississippi means "great water."

Mrs. Roy Powell and two sons, Jack and Joe, of Paducah, spent Sunday visiting in the home of their mother and grandmother, Mrs. T. S. Patton.

Mr. and Mrs. R. R. Lanier and son, Bobby, returned Tuesday from Fort Worth, where Bobby submitted to an operation for the removal of his tonsils.

Mr. and Mrs. C. R. Ellis have received word that their little granddaughter, Mary Sue Ellis, has been in the hospital in Portland, Ore., suffering from bad cuts on one arm. The latest report says she is doing fine.

## They Booted the Japs Off Guam

Once more in undisputed possession of Guam, first American possession snatched by the Japs after Pearl Harbor, Adm. Chester Nimitz and other high naval and marine corps officers look over the island. Left to right: Maj. Gen. R. S. Geiger, USMC; Rear Adm. F. Sherman; Admiral Nimitz and Vice Adm. Raymond Spruance.

stand the value of the form, and, therefore, make no attempt to conserve it, the War Price and Rationing Board announced this week. This form should be preserved by the car owner.

**Farmers to Attend Meeting at Paducah**

In response to a request sent out last week by County Agent D. E. Eaton, approximately seventy-five farmers met at the court house in Crowell Saturday afternoon for the purpose of considering the question of placing a ceiling price on cotton picking, snapping and hauling. Also to select a group of farmers to attend a hearing to be held on this problem at Paducah today, Sept. 21. Those who will be present at this meeting from Foard County are A. W. Barker, Jim Naron, Bill Wisdom, L. L. Morgan, Oscar Fish, Abb Dunn, Owen Rader and Claude Nichols.

The farmers who met in Crowell last Saturday went on record as favoring a ceiling price and recommended \$1.50 as the price for pulling cotton.

There will be three hearings on this proposition, one at each of the following places in the order named: Lubbock, Paducah and Sweetwater. Anyone interested in the question of price ceiling, labor or any other related problem, will be privileged to appear at these meetings.

At the conclusion of these hearings the State Wage Labor Board will set in motion regulations covering the recommendations made by the farmers at these hearings. This movement was initiated and conducted by the growers. Petitions are being circulated by farmers to secure signatures of fifty-one per cent of the cotton growers in Foard County. If the majority of the counties involved in this West Texas area favor the program, it may then go into effect.

## AGRICULTURE

(D. F. Eaton, County Agent.)

**Cheaper Poultry Feed**

By following these suggestions more home grown grains may be used in feeding poultry and thereby reduce the cost of feed. Feed manufacturers are co-operating in this program as it means more profit to the grower. At the most, a heavy hen will eat about 80 lbs. of feed per year, grain and laying mash. These two feeds are usually fed separately and about an equal amount of each is fed to the hens.

The proposed plan is to use one part poultry protein supplement and two parts home grown grain, such as wheat, barley, milo, begari, and oats, or a mixture of two or more of these with oats.

Should you use the old plan you would use, say 40 lbs. of grain and 40 lbs. of mash in a year; under this plan you would use 50 lbs. of protein supplement and 100 lbs. of grain. Less supplement, the costlier feed, and more grain, the cheaper feed, which may be grown. All this feed would have to be ground to get a proper mixture.

This protein supplement contains a variety of protein combinations such as meat scraps, soy bean meal, linseed meal and minerals.

By following this plan you can produce eggs 3 or 4 cents cheaper per dozen and production will be as efficient as under the old method.

This feed mixture may be fed to growing birds also with good results. Feed should be kept before the birds in self feeders.

—

**Treat Seed Grains For Smut**

Treating seed with disease-killing chemicals will safeguard winter grain crops against damage from fungus diseases called smut. Wheat, oats and barley are the grains most susceptible to attack. It will pay to treat your seed.

Wheat is subject to two types of the disease. One, called "stinking" smut, is difficult to identify in the field because the diseased heads do not differ outwardly from the healthy ones. But during threshing the spores are scattered over the undiseased grain. If such seed is planted without being treated the smut spores may germinate with the wheat, especially if weather and soil are rather cool at time of planting.

The other type, known as "loose" smut, is readily visible because it destroys the heads and leaves only black, smutty stems. Spores are distributed about the time the wheat is in bloom and those which lodge in the flowers will germinate and grow into the young kernels. Unfortunately, loose smut cannot be controlled by chemical seed treatment because the fungus is carried inside the seed. The hot water treatment is effective but difficult. It is simpler to plant seed from an uninfected field.

For stinking smut the chemical treatment consists of cleaning the wheat by fanning or otherwise to remove the smut balls, and applying either two ounces per bushel of 50 per cent copper carbonate, or one-half ounce per bushel of ethyl mercury phosphate called improved ceresan. The treating operation may be done with a commercial seed treating machine or a homemade container, such as an oil drum with a tight fitting lid revolving on an axis. It is important that the chemical be well distributed over each kernel. We have plans of this device.

Smut in barley and oats can be controlled by treating the seed with one-half ounce per bushel of improved ceresan or a mixture of one pint of commercial formaldehyde and 10 gallons of water at 60 to 70 degrees temperature. The formaldehyde solution should be sprinkled uniformly over 40 to 50 bushels of seed while it is being shoveled from one pile to another on a clean floor in a tight wagon box. Afterward the seed should be piled and covered with a wagon sheet for at least four hours or over night. It then should be sown at once & spread out to dry.

—

**4-H Feeder Fighter Program**

We know you will not only be interested but will be as proud of what your sons have done in carrying out this program as I am. In Texas one hundred and twenty-nine counties reported two thousand and twenty-one boys as having produced enough food to care for five thousand, three hun-

## Card of Thanks

We wish to express the thanks and appreciation we feel toward the friends who have been so good to us in our recent sorrow in the loss of our son, Gerald. Each deed and word of comfort has been deeply appreciated. May God's blessings rest upon each of you.

Mr. and Mrs. C. W. Branch and Family.

## Mileage Rationing Record

Car owners who destroy or lose their Mileage Rationing Record (OPA Form R-534, Stub) are going to be out of luck when they make application for their next gasoline ration. This form, which was attached to the Application for basic "A" ration, is detached by the board and sent back to the applicant with his new "A" ration. Reports are that the recipients apparently do not under-

## An Object Lesson

If the people of the United States need an example to show how the private industries have outstripped the government-owned and government-dominated industries of Europe and other parts of the world, all they have to look at is the oil industry as one example. Overnight, American oil producers were called on, not only to supply unheard of quantities of fuel oils, gasoline, and lubricating oils for our own mammoth war plans, but they were required to supply the bulk of the oil and fuels for our Allies.

Not only have they met all war requirements, but they have been able to fill the essential needs of our civilian population. On top of this, the industry had to take the lead in producing the basic materials for synthetic rubber and in producing quantities of high test gasoline actually surpassing that of the best foreign product.

While private enterprise was "rolling" the war machine of the United Nations, some of our finest government-owned reserves were prevented from producing, while politicians wrangled over how the job should be done.

In the face of unheard of demand, the price of gasoline is far below that of World War I, while taxes on the product are at all-time highs. The oil industry had ever filtered the United Nations' air fleets, navies, and armored forces could not be doing the jobs they are today. Yes, indeed, the oil industry is an object lesson as to why government should leave development of productive enterprise to the unrestrained initiative of its citizens.—Industrial News-Review.

## Unlimited Energy

Many advances have been made in coal mining, America's No. 1 source of energy and power, just as in other industries. The work in the mines has been constantly lightened, as the wages of miners have increased until they are now reported better than the average wage of industry as a whole.

Ninety per cent of all bituminous coal produced from underground workings is electrically cut and transported, and over half of all coal is loaded by mechanical tools.

Despite manpower shortages, America's bituminous coal industry is supplying an all-time record volume of coal, and that is another record the nation can be proud of.

No, Dorothy, the fact that they call him an early settler doesn't mean he pays his bills on time.

dred and fifty-one soldiers. Two hundred and six of these each produced enough for five additional soldiers.

Here in Foard County, out of a membership of less than 100 boys, we led the sixteen counties of this district in this program, in that we had twenty boys who grew enough food to supply eighty-two soldiers for a year. In the district, one hundred and sixty-nine boys grew sufficient food for three hundred and sixty-five soldiers.

In this county, Harold H. Fish grew enough beef to feed ten soldiers; Bill Fish grew enough beef and mutton to feed eleven; Gordon W. Bell Jr., enough beef to feed five; Robert and Oran Carroll, enough to feed seven; Herman Athey, enough pork to feed five; Bruce Bledsoe, enough pork to feed six, and Alton Alston, enough beef to feed six.

Other boys contributed in smaller quantities of various kinds of food.

The boys are continuing this work and are increasing their units. They now have fifteen calves on feed and others are securing calves to feed. They will enter a wide field of activities this year and more boys.

This does not include what was contributed by members of the Vocational group, who also did a splendid job.

The robot bombs with which England has been bombarded for the past three months travel at the rate of 350 miles an hour and carry a one-ton explosive charge.

To make your dreams come true—wake up!

As the Father hath loved me, so have I loved you; continue ye in my love.—John 15:9.

Whether or not the Allies decide upon an international peace conference to preserve the future peace of the world, we believe there should be a permanent organization to be known as a Congress of Nations for the preservation of peace and the discussion of other matters of Allied interest.

of deliberate design and eternal vigilance. The World Congress might be made the watchman on the tower.

All over the country are young people who are going to be faced with the problem of whether they will continue to work or go to school. The decision is more difficult than usual this year.

Ever since we learned that \$400,000,000 is being returned to income taxpayers who overpaid their 1943 income taxes we have been looking for the long brown envelope that will bring us the check for the overpayment we might have made.

If every group demanding special legislation and special benefits would stop to think what effect the granting of such special favors would have upon those who are not permitted to share them, there would be less class legislation demanded.

It is reported that Hitler and his associates have a plane in readiness to leave the country as soon as the critical moment arrives.

It will come out after a while of course, but it is not known whether Donald Nelson's trip to China is an advance in position or whether he is being sent home by way of China.

There is nothing so dense and hopeless as willful ignorance and prejudice.

Few realize to what extent the people of America live out of cans. Take the canned foods out of a grocery store and there wouldn't be much left. What was left could be stored on a few shelves on one side of the store.

It appears difficult for the American people to realize that paper, the kind of which there has always been an abundance, is vital, if needed in the war.

The report is that to date nearly 10,000 planes have been delivered by this country to Russia. Most of these have been flown across from Canada and Alaska.

Following the close of the first World War the government disposed of six billion dollars worth of surplus war goods.

Some folks are willing to be as patriotic as any one, a local philosopher said yesterday, as long as it doesn't require them to make any sacrifices, suffer any inconveniences, or give up anything they are accustomed to in normal times.

Some folks worry so easily that they don't have to worry about what they are going to worry about next.

The Hindus claim to have invented the violin bow.

HISTORY

Columbus Day—October 12: As far as can be determined the first celebration of Columbus Day was held in New York City on October 12, 1792. It was sponsored by the Society of St. Tammany or Columbian Order, founded by William Mooney May, 12, 1789.

G. I. Bill of Rights

Uncle Sam will see to it that Veterans who served 90 days or more in active military or naval service after September 16, 1940, and were honorably discharged or released, will have opportunity to complete their education.

This is provided for under the provisions of the Servicemen's Readjustment Act of 1944, popularly known as the G. I. Bill of Rights, which the U. S. Congress enacted last June.

Under the law, a veteran may enroll at any approved educational institution provides he is acceptable to such institution. But three conditions apply: (1) The education or training shall begin not later than two years after his discharge, or end of the war, whichever is latest; (2) No training under the program shall be carried on beyond seven years after the war; and (3) Any veteran not more than twenty-five years of age at the time of entry into military service shall be considered to have had his education or training impeded, delayed, interrupted or interfered with.

Persons eligible under these conditions or training for one year or its equivalent in continuous part time study. Upon satisfactory completion of the one year course they shall be entitled to additional training equal to the time in active service exclusive to the time the veterans were assigned to Army Student Training Program.

What We Think (By Frank Dixon)

For the past two or three weeks I have been discussing in this column post war industries for average small communities. I desire to continue the discussion in this article.

In my experience and study of small town industries one common fact stands out that will apply to all industries set up in small communities, that is that it is not only necessary that a good product be made but also that it be sold. It is comparatively simple to hit upon a good idea and equally simple to assemble men and machines to manufacture the product but difficult to market it at a profit.

In sections adapted to it, in my opinion, the dairy industry is the ideal community project. It is ideal for the reason that it produces its own raw material, is able to process it with a small amount of equipment with home labor and can market the product on the national market at no selling expense.

A cheese factory comes under the same category. A small amount of equipment is required in the manufacture of cheese and the production of good cheese is a mathematical science—an art, an intelligent person can learn. Incidentally in the cheese field there is ample opportunity to attain recognition of one's product by producing a superior article.

Dairy industries and industries allied to dairying are of course adapted to those sections of the country suited to dairying.

A few examples of small town industries which have come to my attention might be interesting and might offer suggestions to communities in search of workable ideas.

A friend of mine operates a plant that manufactures screws. He makes screws of all kinds, big and little, by the millions. I had never heard of a plant given over wholly to the manufacture of screws. I had supposed that each plant made its own screws.

Obviously the time to pay off debts is during periods of inflation and high prices and the time to create debts is when money has a high purchasing power.

A line from one of the songs popular in the last war was: "We did it before and we can do it again." We hope this time we won't ever have to do it again.

The brilliant achievement of General Patton in the invasion of France should go a long way toward condoning for the slapping incident in Italy. It also demonstrates that General Eisenhower is a good judge of men as well as a good leader of them.

We believe it wise to arrange for plans to dispose of surplus war materials before the war actually ends. Such disposal is inevitable. It will be a tremendous task and plans for it made in advance will insure orderly disposal at something like fair prices.

We are predicting that Cordell Hull will go down in history as one of America's true statesmen. Mr. Hull has given his life to the nation.

In spite of all the efforts of the experts to even things up, the small business man is hardest hit by the present income tax.

Perhaps the reason why the human wolf gets into so many houses is that he very often has a fur coat.

Was there ever a kid so onery that his mother did not worry about him running around with bad company?

One can get a pretty good cross section of a man by how he handles his money.

IN THE NEWS 30 YEARS AGO

Items below were taken in whole or in part from the issue of The News of Sept. 25, 1914. J. L. Martin, editor:

A deal was consummated this week in which C. P. Sandifer, who for four years has been active vice president of the Bank of Crowell, severed his connection with the institution, while R. B. Edwards, one of our leading merchants and business men, and already a strong stockholder in the bank, takes over Mr. Sandifer's interests in this well-known institution.

The new "war comet" is now plainly visible to the naked eye, and can be seen in the northeast about 4 o'clock in the morning. It is about midway between the Zenith and the horizon. It is said that a comet appears with every war and this has been called the "war comet."

R. S. Sparks died at Crowell Sept. 17, 1914. He was born in Shelby County, North Carolina, May 10, 1846. His wife died March 20, 1908. He is survived by four sons and two daughters.

Jno. S. Ray, W. B. McCormick and Grey Thompson made a business trip to Vernon this week.

Herbert Edwards left this week for Colliery Station to enter school at A. & M.

Decker Magee, mayor of Foard City, and who also has in his hands the destinies of the Crowell Grocery Company's interest at that place, were here mingling with friends Sunday.

Ross Woodall, the accommodating prescription clerk at the Owl Drug Store, spent a few days in Dallas last week.

Mrs. Sallie Nichols, who died Sept. 16, was buried in the Crowell Cemetery Sept. 17.

The News man was at Knox City last week and ran into Percy Ferguson, who has a good job with the Orient at that place.

After discontinuing the First Monday Trades Day for a few months, the business men of Crowell with the support of a number of our progressive farmers, have decided for another big day, Monday, Oct. 5, by giving a mule show and agricultural exhibit.

WHERE THANKS ARE DUE

A country grocer recently said to a somewhat irate customer: "If you had to keep track of all the rules and regulations that I get from those pencil pushers in Washington, you would be more lenient in your attitude toward the merchant. Men who apparently know nothing about meat cutting, tell us how to cut meat, what cuts we can keep in our show case, and how we can prepare it. We are all glad to help ration supplies and control prices but the rationing and price control is required to have some practical experience before they are allowed to make their fancy rules and regulations."

We can all allow for many mistakes under the price control act, but we never want to accept the idea that after the war it will be necessary to continue indefinitely the restrictions which the buying public and the producers and merchants have had to endure.

Rationing and price control have been a success because of an efficient retail merchandising system which was able to carry out a rationing and price control program which, without the co-operation of the merchants, would have been impossible of accomplishment.

A new type of furnace has been developed by the Anthracite Industries Laboratories at Primos, Penn. The new type of furnace occupies a space 2 feet by three feet and will heat a house in 15 minutes compared to 45 minutes required by present standard model furnaces.

The Civil Aeronautics Authority plans on having every town and city join in an air-marking program for the benefit of private fliers. This practice has been restricted during the war. The requirements are that the name of the town be painted in letters 10 to 20 feet high on some large roof in the town. Along with the name would be an arrow pointing north and symbols indicating the distance and direction of the nearest airfield and figures showing the latitude and longitude of the community. A manual and a set of templates for use in marking has been prepared by the agency which will be given interested communities upon application as soon as the Army clears the way for the order.

Woman's wish is to be weighed and found wanting.

ASK YOURSELF THESE QUESTIONS

Is my home protected by enough fire INSURANCE to cover cost of today's replacement value? If I should have an automobile wreck, am I FULLY PROTECTED? If not, who will pay the bill? It might pay you to drop around and discuss these matters with us before it is too late.

VOLUNTARY HEALTH PROGRAMS INCREASING

It is probably safe to say that no country in the world is developing group health insurance plans as rapidly as the United States. This form of security for individuals and families is being aggressively promoted by the principal underwriters.

Studies indicate, according to the Nation's Business, that employers may obtain complete health coverage for all workers and families (without medical examinations) at from 1 1/2 to 2 cents per payroll-hour—the cost being generally shared half by the employer and half by the employee.

Group health insurance, including doctors, hospitals, operations, accidents and maternity, present potential new business of \$500,000,000 in annual premiums. With this amount of business involved, it is safe to say that American ingenuity and enterprise will work out the finest and most economical health insurance measures the world has ever seen.

Polis show that workers prefer employer-sponsored plans to compulsory Federal programs under social security. And why should not they? When plans remain voluntary, the worker retains his independence and his choice of systems. When they become compulsory under government domination, the worker loses his independence and takes what he is told to.—Industrial News-Review.

NEW OPPORTUNITIES

Our nation has long enjoyed superior distribution of its domestic products to consumers. In the not distant future, it will enjoy a similar distribution of world products. That this is no idle dream is evidenced by the announcement of low-cost commercial air service designed to expand post war international trade and tourist travel.

To gain some idea of potential international cargo business, it is interesting to note that domestic air express totaled 48,689 shipments in July, an increase of 16.7 per cent over July, 1943, according to the Railway Express Agency. This is a foretaste of the volume that will develop with expanded international trade. Combined air and rail express service for the shipping public is accomplished through the co-ordination of schedules which link the 350 airport cities in the United States and Canada with the 23,000 off-air line offices of the Railway Express Agency.

With the coming post war aviation program, unimagined avenues of trade will be blazed to every corner of the world. Our distribution system is now being re-ordinated to render a service never before dreamed of. Thousands of new jobs will come into being along with thousands of new opportunities for advancement.

American enterprise is now and waiting for the starting signal.—Industrial News-Review.

AMERICAN ENTERPRISE SCORES AGAIN

After two years of research the announcement is now made that the oil industry is ready to produce at the command of military forces, a new super-erful than 100-octane gasoline that it will permit maximum bombing of the Japanese war land on a "suburban service schedule." While the chemical details of the new product are withheld, the Petroleum War Council has disclosed that this fuel, called "100-octane plus," is expected to surpass all other gasolines in a world in volatility and consequent performance.

William R. Boyd Jr., Chairman of the Council, said the product was designed to "draw from the lethal B-29 Superfortresses at the futuristic B-32 Bombers at the most modern fighter planes, their originally intended maximums in sustained speed, short take-offs, combat radius and load-carrying capabilities."

It should be stated that this is just another accomplishment of private enterprise in the United States which again surpasses anything the dictators and their totalitarian governments have ever accomplished.—Industrial News-Review.

## CARD OF THANKS

We wish to express the thanks and appreciation we feel toward the friends who have been so good to us in our recent sorrow in the loss of our son, Gerald. Each deed and word of comfort has been deeply appreciated. May God's blessings rest upon each of you. Mr. and Mrs. C. W. Branch and Family.

## MILEAGE RATIONING RECORD

Car owners who destroy or lose their Mileage Rationing Record (OPA Form R-534, Stub) are going to be out of luck when they make application for their next gasoline ration. This form, which was attached to the Application for basic "A" ration, is detached by the board and sent back to the applicant with his new "A" ration. Reports are that the recipients apparently do not understand the value of the form, and, therefore, make no attempt to conserve it, the War Price and Rationing Board announced this week. This form should be preserved by the car owner.

## They Booted the Japs Off Guam

Once more in undisputed possession of Guam, first American possession snatched by the Japs after Pearl Harbor. Adm. Chester M. Nimitz and other high naval and marine corps officers look over the island. Left to right: Maj. Gen. R. S. Geiger, USMC; Rear Adm. F. Sherman; Admiral Nimitz and Vice Adm. Raymond Spruance.

stand the value of the form, and, therefore, make no attempt to conserve it, the War Price and Rationing Board announced this week. This form should be preserved by the car owner.

## Farmers to Attend Meeting at Paducah

In response to a request sent last week by County Agent D. F. Eaton, approximately seventy-five farmers met at the court house in Crowell Saturday afternoon for the purpose of considering the question of placing a ceiling price on cotton picking, snapping and hauling. Also to select a group of farmers to attend a hearing to be held on this problem at Paducah today, Sept. 21. Those who will be present at this meeting from Foard County are A. W. Barker, Jim Naron, Bill Wisdom, L. L. Morgan, Oscar Fish, Abb Dunn, Owen Rader and Claude Nichols.

The farmers who met in Crowell last Saturday went on record as favoring a ceiling price and recommended \$1.50 as the price for pulling cotton.

There will be three hearings on this proposition, one at each of the following places in the order named: Lubbock, Paducah and Sweetwater. Anyone interested in the question of price ceiling, labor or any other related problem will be privileged to appear at these meetings.

At the conclusion of these hearings the State Wage Labor Board will set in motion regulations covering the recommendations made by the farmers at these hearings. This movement was initiated and conducted by the growers. Petitions are being circulated by farmers to secure signatures of fifty-one per cent of the cotton growers in Foard County. If the majority of the counties involved in this West Texas area favor the program, it may then go into effect.

## AN OBJECT LESSON

If the people of the United States need an example to show how their private industries have outstripped the government-owned and government-dominated industries of Europe and other parts of the world, all they have to look at is the oil industry as one example. Overnight, American oil producers were called on, not only to supply unheard of quantities of fuel oils, gasoline, and lubricating oils for our own mammoth war plans, but they were required to supply the bulk of the oil and fuels for our Allies.

Not only have they met all war requirements, but they have been able to fill the essential needs of our civilian population. On top of this, the industry had to take the lead in producing the basic materials for synthetic rubber and in producing quantities of high test gasoline actually surpassing production.

While private enterprise was "selling" the war machine of the United Nations, some of our finest government-owned reserves were prevented from producing, while politicians wrangled over how the job should be done.

In the face of unheard of demand, the price of gasoline is far below that of World War I, while taxes on the product are at all-time highs. If our oil industry had ever faltered, the United Nations' air forces, navies, and armored forces could not be doing the jobs they are today. Yes, indeed, the oil industry is an object lesson as to why government should leave development of productive enterprise to the unrestrained initiative of its citizens.—Industrial News-Review.

## UNLIMITED ENERGY

Many advances have been made in coal mining, America's No. 1 source of energy and power, just as in other industries. The work in the mines has been constantly lightened, as the wages of miners have increased until they are now reported better than the average wage of industry as a whole.

Ninety per cent of all bituminous coal produced from underground workings is electrically cut and transported, and over half of all coal is loaded by mechanical tools.

Despite manpower shortages, America's bituminous coal industry is supplying an all-time record volume of coal, and that is another record the nation can be proud of.

No, Dorothy, the fact that they call him an early settler doesn't mean he pays his bills on time.

## AGRICULTURE

(D. F. Eaton, County Agent.)

### Cheaper Poultry Feed

By following these suggestions more home grown grains may be used in feeding poultry and thereby reduce the cost of feed. Feed manufacturers are co-operating in this program as it means more profit to the grower. At the most, a heavy hen will eat about 80 lbs. of feed per year, grain and laying mash. These two feeds are usually fed separately and about an equal amount of each is fed to the hens.

The proposed plan is to use one part poultry protein supplement and two parts home grown grain, such as wheat, barley, milo, hegarri, and oats, or a mixture of two or more of these with oats. Should you use the old plan you would use, say 40 lbs. of grain and 40 lbs. of mash in a year; under this plan you would use 50 lbs. of protein supplement and 100 lbs. of grain. Less supplement, the costlier feed, and more grain, the cheaper feed, which may be grown. All this feed would have to be ground to get a proper mixture.

This protein supplement contains a variety of protein combinations such as meat scraps, soy bean meal, linseed meal and minerals. By following this plan you can produce eggs 3 or 4 cents cheaper per dozen and production will be as efficient as under the old method.

This feed mixture may be fed to growing birds also with good results. Feed should be kept before the birds in self feeders.

### Treat Seed Grains For Smut

Treating seed with disease-killing chemicals will safeguard winter grain crops against damage from fungus diseases called smut. Wheat, oats and barley are the grains most susceptible to attack. It will pay to treat your seed.

Wheat is subject to two types of the disease. One, called "stinking" smut, is difficult to identify in the field because the diseased heads do not differ outwardly from the healthy ones. But during threshing the spores are scattered over the undiseased grain. If such seed is planted without being treated the smut spores may germinate with the wheat, especially if weather and soil are rather cool at time of planting.

The other type, known as "loose" smut, is readily visible because it destroys the heads and leaves only black, smutty stems. Spores are distributed about the time the wheat is in bloom and those which lodge in the flowers will germinate and grow into the young kernels. Unfortunately, loose smut cannot be controlled by chemical seed treatment because the fungus is carried inside the seed. The hot water treatment is effective but difficult. It is simpler to plant seed from an uninfected field.

For stinking smut the chemical treatment consists of cleaning the wheat by fanning or otherwise to remove the smut balls, and applying either two ounces per bushel of 50 per cent copper carbamate, or one-half ounce per bushel of ethyl mercury phosphate called improved cerasan. The treating operation may be done with a commercial seed treating machine or a homemade container, such as an oil drum with a tight fitting lid revolving on an axis. It is important that the chemical be well distributed over each kernel. We have plans of this device.

Smut in barley and oats can be controlled by treating the seed with one-half ounce per bushel of improved cerasan or a mixture of one pint of commercial formaldehyde and 10 gallons of water at 60 to 70 degrees temperature. The formaldehyde solution should be sprinkled uniformly over 40 to 50 bushels of seed while it is being shoveled from one pile to another on a clean floor in a tight wagon box. Afterward the seed should be piled and covered with a wagon sheet for at least four hours or overnight. It then should be sown at once or spread out to dry.

### 4-H Feeder Fighter Program

We know you will not only be interested but will be as proud of what your sons have done in carrying out this program as I am. In Texas one hundred and twenty-nine counties reported two thousand and twenty-one boys as having produced enough food to care for five thousand, three hun-

Phone 63-M Office North Side of Square

dred and fifty-one soldiers. Two hundred and six of these each produced enough for five additional soldiers.

Here in Foard County, out of a membership of less than 100 boys, we led the sixteen counties of this district in this program, in that we had twenty boys who grew enough food to supply eighty-two soldiers for a year. In the district, one hundred and sixty-nine boys grew sufficient food for three hundred and sixty-five soldiers.

In this county, Harold H. Fish grew enough beef to feed ten soldiers; Bill Fish grew enough beef and mutton to feed eleven; Gordon W. Bell Jr., enough beef to feed five; Robert and Oran Carroll, enough to feed seven; Herman Athey, enough pork to feed five; Bruce Bledsoe, enough pork to feed six, and Alton Abston, enough beef to feed six.

Other boys contributed in smaller quantities of various kinds of food. The boys are continuing this work and are increasing their units. They now have fifteen calves on feed and others are securing calves to feed. They will enter a wide field of activities this year and more boys.

This does not include what was contributed by members of the Vocational group, who also did a splendid job.

The robot bombs with which England has been bombarded for the past three months travel at the rate of 350 miles an hour and carry a one-ton explosive charge.

To make your dreams come true—wake up!

Last War Heroes

American fighting men who battle the Hun in this war look for graves of relatives, fathers and uncles, who fell while battling the Hun at Belleau Wood, France, in World War I.

RACE AGAINST TIME—AND SOCIALISM

Expansion of non-profit voluntary plans for prepayment of hospital and doctor bills is continuing at a pace that demonstrates beyond a doubt the practicability of such plans. In the first six months of 1944, 1,754,000 additional Americans enrolled in a hospital service, known as the Blue Cross. Total membership of this organization is now nearing 15,000,000, exclusive of the 750,000 members serving in the armed forces. More than 1,011,000 persons, as of July 1, were also members of medical service plans coordinated with the Blue Cross. These medical plans pay the doctor or surgeon's bill for any person hospitalized by illness, injury, or who needs maternity care. Hundreds of other medical plans, wholly apart from the Blue Cross, set up by the medical profession, operate according to the same non-profit public welfare principles. Despite the fact that millions of Americans are included in the protection of these various plans, the movement is young. It is truly an example of the inspired effort of a free people are capable of putting forth. A race has developed between those who are fighting to preserve the traditional American medical system which is founded upon individual freedom and opportunity, and those who seek to destroy that system and establish socialized medicine under what may one day become a socialized form of government. Medicine is meeting the challenge of an alien political philosophy with the most powerful weapon at its command—unexcelled service.—Industrial News-Review.

Almost all of the earliest instruments recorded by the Hindus have remained in popular use until the present day.

CHURCHES

Christian Science Church Sunday services at 11 a. m. Wednesday evening services at 8:00 o'clock. Sunday School at 10 a. m. Sunday, September 24. Subject: "Reality."

St. Joseph's Catholic Church Time of Masses: October-April (inclusive). 1st Sunday at 11:00. 3rd and 5th Sundays, 9:00. May-September (inclusive) 1st Sunday at 10:30. 3rd and 5th Sundays, 8:00.

Truscott and Gilliland Baptist Churches Preaching services are held at Gilliland on the first and third Sundays, and at Truscott on the second and fourth Sundays. A most cordial welcome is extended to all. Deightful Christian fellowship. J. W. ENGLISH, Pastor.

First Christian Church Hear the Bible read next Sunday night at 8 o'clock. Great interest is being shown in this unique service. Come and listen to the simple words of Christ's sermon on the Mount. Rally Day will be observed in this church Sunday morning. Every member and friend of the church has a special invitation to be present. Our goal: 100 in Bible School. Bible School at 10 a. m. Preaching at 11 a. m. Bible reading at 8 p. m. G. O. McMillan, Minister.

Christian Science Services "Reality" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, September 24. The Golden Text is: "Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning" James 1:17. Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Be ye therefore perfect, even as your Father which is in heaven is perfect" (Matthew 5:48). The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "God is the creator of man, and the divine Principle of man remaining perfect, the divine idea or reflection, man, remains perfect" (page 470).

Land Commissioner Announces Receipt of \$20,576,819 Bascom Giles, Commissioner of the General Land Office, announced the receipt of \$20,576,819 for the fiscal year ending August 31, 1944. This amount was double that of any previous year in the history of the General Land Office, the largest previous amount having been slightly more than \$10,000,000 established last year. Commissioner Giles pointed out that \$11,742,000 of this money went into the Permanent University and A. & M. Fund, bringing that permanent endowment to \$46,981,000, an increase of 65 per cent during the last five years in which he has been Commissioner. The royalty receipts for the University Fund now amount to more than \$100,000 monthly. The Permanent Public Free School Fund was increased by the record-breaking amount of \$6,529,000 during the year just closed, bringing that fund to \$88,000,000 as of August 31, 1944, an increase of 42 per cent during the last five years. The Permanent Public Free School Fund amounted to \$62,268,000 on January 1, 1936. Commissioner Giles pointed out that this fund is increased by more than \$500,000 monthly through receipts of the General Land office.

WEST SIDE H. D. CLUB The West Side Home Demonstration Club met with Mrs. Gertrude Alexander for a lesson on "How to Make Chair Covers." Miss Elipabeth Elliott, county home demonstration agent, gave an all-day demonstration, in which she explained the kind of thread, material and methods of fitting the covers. She used a platform chair for an example. A covered dish luncheon was served and the members each brought a small gift to honor the hostess, as she is moving to Electra to make her home, and this was the last time to attend the club. Mrs. S. E. Tate will be next hostess to the club at her home on September 27. Many of the parts entering into the manufacture of automobiles are purchased by the automobile manufacturers from small plants which specialize in them. Because with few exceptions, lamentably few exceptions, the home community will not support a local industry by buying its products exclusively, it is well not to depend too much on the local market. The idea that nothing good can come out of Jerusalem still prevails and the industry that plans too largely upon the local trade is in for some disappointments.

You know you're in a traffic jam when you sit in your car and watch the pedestrians whiz by.

Political Adviser

Robert D. Murphy, recently appointed to the post of political adviser to General Eisenhower, will replace William Phillips, former career diplomat. Murphy is seated at his desk in the state department.

Weekly Sermon

By George S. Schuler, Member of Faculty, Moody Bible Institute, Chicago.

The Indispensable Man Our two political parties seem unable to eliminate from their thinking the phrase, "the indispensable man." To one party he is indispensable; to the other, he is dispensable. The verdict as to which of the two is correct seems to be based upon the popular vote of the people. The time will come when any so-called indispensable man—Italy had such a man—will be a thing of the past, and his place will be filled by another. There is, however, an Indispensable Man, speaking in the truest sense of the term. Unlike the political indispensable man, He has had neither predecessor, nor will He have a successor. Of Himself, He says, "Without me ye can do nothing." One of His spokesmen

Every Person Needs Birth Certificate

Austin.—Explaining the need for all Texas births to be registered through the Bureau of Vital Statistics, Texas State Department of Health, Dr. Geo. W. Cox, State Health Officer, said in Austin today, "There are many reasons why every person needs a birth certificate. It is necessary for entrance into school, for the right to vote, for work in Federal Defense projects, for proving American citizenship, for entering military service, for proving legal age for inheritance of property, for proving claims of widows and orphans, for settlement of insurance, for right of admission to certain professions, for collecting compensation from the government, and for many other important activities. In Texas whenever a birth is attained by a physician, it becomes the physician's responsibility according to law to file a certificate of birth. There are, however, children born in the state without medical attendance, and it is the parents' responsibility to have this birth registered through the regular channel. The tremendous load of work done in the past two and one-half years by the Bureau of Vital Statistics in effecting delayed registration and furnishing copies of birth certificates needed because of the war and its resultant changes in occupation and way of living has demonstrated conclusively that the registration of births at the time they occur is of great personal benefit to every individual. Much of the delay and embarrassment to people in search of a delayed birth certificate could be entirely avoided by general recognition of the value attached to each individual having his own certificate of birth. The Colonial Congress, for a number of years following its organization, had no permanent seat. It met in Philadelphia in 1783, was disturbed by riotous demands of soldiers for overdue pay, adjourned to Princeton, thence to Annapolis, and finally to New York. Minnesota derives its name from the Indian word meaning "sky tinted water."

says, "In Him we live, and move, and have our being." Jesus Christ is God's indispensable man. He does not depend upon armies with which to conquer. He does not need to resort to political intrigue to maintain His position of power, for in His own right and by the word of His mouth He upholds the world. The souls which He conquers love Him, are glad to serve Him, humbly worship at His eternal shrine. To them He is so all-inclusive that nothing extra or additional is desired. But except we place our whole-hearted faith and trust in Him, resigning ourselves to His holy sovereignty, we shall find ourselves outside the pale of salvation. According to the infallible Word, "Neither is there salvation in any other; for there is none other name under heaven given among men, whereby we must be saved" (Acts 4:12). When we speak of salvation, we do not mean salvation from a national or an economical condition such as may give rise to wars; we mean from a spiritually lost condition to the joy of eternal life. Are you enjoying the blessings of this Indispensable Man? Is He your precious Lord and Saviour? Acquaint yourself with Him in the private of your own soul. He is ready to hear and respond to the faintest cry of those who recognize their desperate need of Him?

## Granddaughter of Local Couple Weds in Monroe, La.

Miss Tola Daniel, daughter of Mr. and Mrs. J. E. Daniel of San Antonio and granddaughter of Mr. and Mrs. C. C. Fox of Crowell, became the bride of Aviation Cadet William M. Harris, of Urbana, Ill., in an impressive military wedding performed at twilight Sept. 1, in the North Chapel 4, Selman Field, Monroe, La.

The bride was escorted down the aisle by her father, as two-orchestra played Mendelssohn's "Wedding March." Chaplain F. F. Hubbell performed the double ring ceremony while the couple knelt on a white satin pillow before the four-banked altar, which was lighted with burning tapers in candelabra.

The bride was attired in a blue crepe, "sweet-length" dress, with black accessories. Her corsage was of white sweetheart roses and white tube roses, bordered with bouvardie.

Mrs. Thelma Mae Hunt of Crowell, cousin of the bride, served as matron of honor. She wore a forest green linen suit with white accessories and a corsage of white asters. Mrs. Daniel, mother of the bride, wore a black sheer frock and a corsage of black asters and bouvardie.

The groom was attended by A. C. Richard A. Roberts, who is stationed at Selman Field, as best man.

Mrs. Harris graduated from Vernon High School in 1942. For the past eighteen months she has been employed in Vernon as bookkeeper for the City Auto Supply. The groom, son of Mr. and Mrs. Robert Harris of Urbana, Ill., attended the University of Illinois where he studied constructive engineering. He is stationed at Selman Field, La.

The couple will make their home in Monroe, La.

### WESLEYAN GUILD

The Wesleyan Service Guild resumed its meetings at the Methodist Church on Thursday evening, Sept. 14, with a good attendance. The usual business was carried out. Miss Florence Black resigned as program chairman and Miss Thelma White was appointed to take her place. Mrs. Claude Brooks was appointed treasurer to fill the place made vacant by the resignation of Miss Mildred Cordill upon going to Eunice, N. M., to teach.

Mrs. J. B. Harrison was program leader for the evening and gave an interesting article on "Church in the New Guinea Jungle." She depicted the life of a soldier on the front lines and told what difficulties he encounters in order to worship with his fellow soldiers and to hear the chaplain as he preaches amid the burst of shells and the roar of planes.

### GAMBDEVILLE H. D. CLUB

The Gambdeville Home Demonstration Club met in an all-day meeting Tuesday, September 19, in the home of Mrs. J. C. Prosser. At this meeting, Miss Elizabeth Elliott, County Home Demonstration Agent, gave a demonstration on how to slip-cover a chair. The chair was measured, the cord covered and the material cut before noon.

In the afternoon, a short business session was carried out by Mrs. W. J. Garrett, president, at which time plans were discussed for some kind of entertainment for October. Following the business, sewing was begun and final instructions given for completing the slip-cover.

Visitors for the meeting were Mrs. G. J. Scott, Mrs. Herman Krenshaw and Mrs. Henry Ross of Crowell. The next meeting will be with Mrs. Luther Temple in October. Visitors are invited and all members are especially urged to attend.

## Joint Birthday Celebration, Sept. 17

Harold Thomson, son of Mr. and Mrs. H. E. Thomson and Pvt. Charles Dickerson, of San Antonio, were honored with a basket dinner at the Premier Hotel on Sunday, Sept. 17, in celebration of their birthdays.

A huge pink birthday cake, with the inscription, "Happy Birthday to You" and 16 candles, centered the table. The cake was for both honorees. Those present were, besides the two honor guests, Mr. and Mrs. C. C. Fox, Mr. and Mrs. Adrian Thomson of Paducah, Mr. and Mrs. J. E. Daniel of Vernon, Mrs. Roy Hunt, Mr. and Mrs. H. E. Thomson and children, Joyzelle and Karl Wayne and Mrs. Dickerson.

After the dinner, Harold was given a surprise when he was called home and found a number of Boy Scout friends present. They were George Johnson Jr., Joe Harris, Scates, Hardy Sanders, Don Wilkins, Blacky White, Wade Patty, James Weathers, F. L. Ballard, Perry Todd, Horace Todd. Others were Joyzelle Thomson, Karl Wayne Thomson, Leroy Todd, Mr. and Mrs. D. F. Eaton, Mr. and Mrs. Roy Todd and the hosts, Mr. and Mrs. Thomson.

After the guests had registered, they went for a swim and later enjoyed ice cold watermelon.

Harold received many remembrances.

## Thalia Service Club Meets Friday, Sept. 15

The Thalia Service Club met on Friday, Sept. 15, at the club house. Mrs. Blanche Sims, Mrs. Georgia Adkins and Mrs. Maggie Capps were chosen as a committee to get the Christmas boxes for service men packed and mailed.

The club will meet again Friday, Sept. 22, at 5 p. m., for the purpose of making reports on purchases made and to start wrapping and packing.

All parents and club members are asked to report any change of address of those in service in the community.

## Steak Fry Honors Service Visitor

Charles Dickerson, of the Army Air Force, stationed at Fort Sam Houston, San Antonio, was honored with a steak fry Saturday night at the South Pocket Park. The steak was supplemented with French-fry, tomatoes, onions, pie, cake and coffee.

Those who enjoyed the occasion were the honor guest, Mrs. Dickerson, Mrs. Roy Hunt, Mr. and Mrs. C. C. Fox, Mr. and Mrs. Roy Fox and son, Jimmy, and grandson, Michael Whitten; Mr. and Mrs. H. E. Thomson and children, Harold, Joyzelle and Karl Wayne, and Mr. and Mrs. Adrian Thomson of Paducah.

### VIVIAN H. D. CLUB

"Women of the World" was the theme of the lesson of the Vivian Home Demonstration Club at the meeting at the home of Mrs. J. B. Rasberry on Thursday afternoon.

Mrs. I. W. Cooper, vice president, presided in the absence of Miss Myrtle Fish, president. "Love Lifted Me" was sung by the group, with Mrs. Edd Self playing the piano accompaniment. Mrs. Cooper read a poem, "Life Has a Burden." After the usual business meeting, the program was given with the following parts, "I am a Woman," Mrs. Arthur Cantlin; "Free Women of Russia," Mrs. Oscar Fish; "Slave Women of Japan," Mrs. Cooper, and "Our Women in Uniform," Mrs. E. T. Evans.

Mrs. Evans then gave a bit of news of her daughter, Miss Margaret Evans, who is serving as a Red Cross nurse in Scotland. She gave excerpts from a letter, "Yesterday it rained a cold, chilly, rain all day. I worked out in it

## Chinese Receive Aid From Canada

To the grimy Chinese soldier creeping up on the Japanese sentry, the weapon he has cocked ready for action, is just a means to an end: the end of that Nip! But to thousands of workers in a Canadian small arms plant, the weapon is a Sten carbine, produced by them to assist an ally in his fight against a common enemy. To them that Sten carbine is a symbol, a symbol of cooperation and mutual assistance between allies.

In assisting allied countries in their mutual aid scheme, a Canadian version of U. S. lend-lease, Canada has not forgotten the needs of China. In the period from May, 1943 to March 1944, already 7,000 tons of material had been shipped to China, valued at an estimated \$10,045,253.

With air routes providing the only means of transportation into China, the weight, quantity and character of supplies conform with the exigencies of air transport. Largest item of supplies shipped, in terms of dollars, was made up of ammunition, with guns, anti-tank and anti-aircraft weapons, and many types of small arms, a close second on the list.

To help push these shipments through and advise on technical matters a Chinese military mission has been active in Canada since 1943 and has proven of great assistance.

(At top) Bren guns by the thousands for China! This picture, taken in a Canadian plant, shows Kay Crowd and Pat King, both of Toronto, checking tags on a mass of 5,000 Bren guns being readied for shipment to our ally in the war against the Nipponese empire.

Agnes Wong (at right), a Chinese Canadian who journeyed from Whitecourt, Alberta, to take a war job in the east, assembles a Sten gun for China. These Stens are extraordinarily simple in construction and are one of the deadliest small arms in use.

## County Federation to Meet Friday, Sept. 29

The executive board of the Foard County Federation of Women's Clubs will serve as hostesses at the first meeting which will be held at the Adelpian Club House on Friday, Sept. 29.

Mrs. T. W. Cooper will be program leader for the meeting. The devotional will be presented by Mrs. Henry Ross on Gen. 19:26, "Canoeing Down the River Jordan" will be the subject of a talk by Mrs. R. I. Hart. The History of Bible Plants will be told by Mrs. T. W. Cooper.

The usual covered dish luncheon will be served at the noon hour and the program will be resumed in the afternoon with Mrs. Hines Clark presenting the subject, "Isle of Frankenstein." "The Old Plantations Live Again" will be given by Mrs. Charlie Ferguson and Mrs. Charlie Thompson will discuss "Warriors Return."

### JUNIOR RED CROSS

The Junior Red Cross members of Foard County schools are now preparing to pack 100 gift boxes for children overseas. School pupils of Crowell, Thalia and Riverdale will fill these boxes.

Boys and girls have a real opportunity for service through this project. This year 175,000 boxes packed with new, well-made American gifts will be sent to England, Scotland, Alaska, Virgin Islands, countries in South America and other places.

part time. Gee, what glamor we Red Cross girls displayed, with our hair without curls, raincoat-wet from the rain, greasy from doughnuts, stained with coffee, faces shiny and we gave up the idea that we were morale builders and accepted the truth that the coffee and doughnuts are not the girls were the main objectives of the hungry soldiers. Our spirits rose, until we found out that from 10 to 12 p. m. we had another assignment. Again the rain, but it turned out to be fun, with the G. I. Johnnies and a sweet British M. P. helping us, we put it over.

The next meeting of the club will be on Sept. 28 with Mrs. Robert Fish as hostess. Miss Elizabeth Elliott will give a demonstration on re-upholstering furniture.

It is reported that there will be less butter for civilians in the next six months than at any time within the past 50 years. Warehouses of the United States at the present time have 35,000,000 fewer pounds of butter than a year ago.

As our men struggle along the hard roads to Berlin and Tokyo their needs for aid from every Red Cross chapter become greater than ever.

## Fourth President of Texas Tech Assumes Duties

Lubbock, Sept. 11—Dr. William M. Whyburn today became the fourth president of Texas Technological College, succeeding Dr. Clifford B. Jones, resigned because of ill health. The new executive was introduced to the faculty by the retiring president.

"I see unlimited possibilities for future development at Texas Technological College," Dr. Whyburn said in his first address to the faculty. The new president said his first task would be to become thoroughly familiar with the work of the institution and that no policies would be announced at this time.

With reference to post war plans being considered generally by colleges and universities, Dr. Whyburn pledged himself to work with the faculty in adapting the work of the institution to meet the needs of developments following conclusion of the war.

President Whyburn came to Texas Tech from the University of Southern California where he was chairman of the department of mathematics. He is first vice president of the American Society of Mathematicians. His brother, Dr. Thomas Gordon Whyburn, is head of the department of mathematics at the University of Virginia.

Doctor Whyburn is chief of the Operational Analysis Section of the Army's Third Air Force. He expects to continue in that capacity until such time as the work is completed.

Dr. Jones becomes the institution's first president emeritus after a connection which began as a member of the first board of directors. He was for years chairman of the board before becoming the third president of the college.

a position which he filled for more than five years.

Home service—production—volunteer services—these and other chapter programs bear directly on the morale of fighting men on every front.

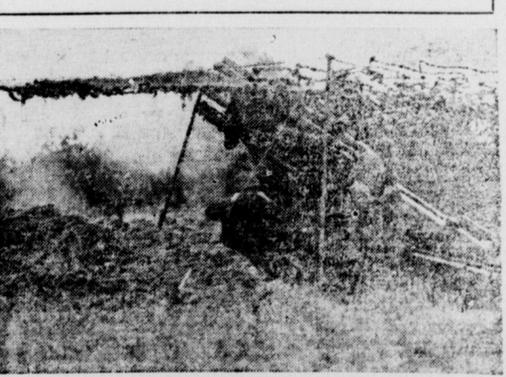

We are never too old to learn.

## Bolivian Reappears

Mauricio Hochschild, fabulously wealthy Bolivian mine owner, is pictured as he arrived via Clipper at Miami, Fla. His strange disappearance early in August for 17 days has never been explained. He was in political trouble.

## Prepare "Message" for Nazis

Three American gunners in France get ready to fire a 155-millimeter howitzer at the German positions.

## Camp and Hospital Committee Reports

Mrs. L. A. Andrews and Mrs. N. J. Roberts, co-chairmen for Foard County Camp and Hospital activities for Sheppard Field, Wichita Falls, Mrs. Leslie McAdams and Mrs. Foster Davis went to Wichita Falls Thursday to attend the meeting of the Camp and Hospital Council.

The following report was turned in to the Council by Mrs. Andrews: 3 joke books, Crowell Girl Scouts; 11 decks of cards, Mrs. Merl Kincaid, Mrs. Foster Davis, Mrs. Alton Bell and Mrs. McAdams; 2 large boxes of cookies, Mrs. Fred Dicks and Mrs. T. W. Cooper; 1 dozen pencils, Mrs. Cooper; 10 prize packages, Mrs. McAdams, Miss Maye Andrews, Mrs. Foster Davis, Mrs. A. Y. Beverly and Miss Nora Banister; 12 books, Mrs. N. J. Roberts; 8 maps, Mrs. Andrews; 40 Victrola records, Mrs. Grady Magee; 8 comic books, Mrs. Merl Kincaid, and 50 magazines given by various people.

### ROTARY CLUB

Visitors at the Wednesday meeting of the Crowell Rotary Club were Dr. Harold G. Cook, president of McMurry College at Abilene, and Alfred T. Smoke, who is also connected with the college, and Rotarian Vance Favor of Quantah.

News Commentator W. F. Kirkpatrick gave his weekly news report on the war situation and predicted that the war in Europe would be over by November 1.

Jack Seale was in charge of the program and made a very interesting and constructive talk concerning post war projects for Crowell. The projects were suggested to Mr. Seale by business men and others around the square.
