Miss Winnie Sosebee is visiting her grandparents, Mr. and Mrs. Egbert Fish, and family.

**Assistant Santa Fe President Dies Friday**

Amarillo, July 21 — Lee Lyles, 57, 25 East Delaware Place, Chicago, assistant to the president, Santa Fe Railway Company, died at noon today after an extended illness.

Born at Cameron, Texas, August 18, 1893, Lyles entered Santa Fe service as a stenographer and

clerk in April, 1911, in the operating department at Temple. He advanced through various positions in the freight traffic and law departments until 1930 when he was transferred to the executive offices of the Santa Fe in New York City. In June of 1936 he was appointed assistant to the president at Chicago and placed in charge of the newly-organized public relations department, which position he held at the time of his death.

**Antelope Shooting Season, October 2-10**

Austin, July 20 — Details of the fall antelope shooting season authorized for October 2 to 10 inclusive, by the Game, Fish and Oyster Commission, are being worked out, according to the Executive Secretary.

The final number of permits to be issued will be determined after results of the present antelope survey in the area west of the Pecos are compiled.

The Executive Secretary said the number of special permits, which cost \$5 each, probably will be less than the 702 permits issued in 1948, the last season that antelope were hunted legally.

The total bag that year of male antelope was 629. The Executive Secretary explained that more than 90 per cent of the hunters usually get their antelope.

Hunters again will make their application to the Game Department in Austin. Then, because the number of applicants usually exceeds the number of available permits, drawings are made to designate the lucky nimrods.

Present plans are to continue the arrangement whereby persons sending in their \$5 and being assigned a permit, may notify the department if they find they cannot make the trip so that their places may be taken by hunters who lost out in the drawing.

The hunt is arranged in three-day periods so that the concentrated game wardens may closely supervise the shoot. The overall hunt covers from 30 to 35 ranches in the nine counties. Ranchers are allotted 20 per cent of the permits so that they may designate friends and their families for the hunt. The kill on the ranches ranges from five to sixty male antelope. The maximum ranchers may charge individuals for each three-day hunt period is \$40. Only one antelope may be killed by each hunter.

Korea consists of a peninsula. It has a population of thirty million.

**RAIL SHIPMENTS**

Austin, July 20 — New crops of canteloups, corn, tomatoes, and watermelons boosted rail shipments of fruits and vegetables in Texas to 6,672 carloads in May from 6,141 in April, the University of Texas Bureau of Business Research reported.

Movements in May of fruits and vegetables were 24 per cent below the 8,934 carloads shipped during May 1949. Beets, cantaloups, mixed vegetables, and parsley showed increases from a year ago, while other kinds of vegetables presented declines.

Shipments of cucumbers in May lagged 85 per cent behind May 1949 totals; potatoes, 71 per cent; carrots, 56 per cent; and

corn, 45 per cent. Smaller increases varied from 9 per cent for tomatoes to 35 per cent for onions.

The north half of Korea given to Russia at the Yalta conference. It is by far the best of that country as it contains practically all of the industry and the best soil.

A plant to produce paper larger to that on which this newspaper is printed costs from \$7,000 up.

Robert Koch isolated the tubercle bacillus which causes tuberculosis. Angels are not biologically possible.

ECONOMIC HIGHLIGHTS

The problem of providing for the elderly part of our population has become a very difficult and serious one. It will become much more serious as time wears on. For, due to the progress of medical science and other reasons, the percentage of those past 65 is rising with great rapidity.

Even now, Herbert Hoover said in a recent address, "We have less than 70,000,000 providers in this group (persons aged 20 to 65) and they must provide for 80,000,000 children, aged, sick, nonproductive government workers and their wives. It is solely from the energies of this middle group, their inventions, and their productivity that can come the support of the young, the old and the sick—and the government workers."

How to deal with the case of the elderly has been commanding the intense attention of industry and the labor unions. The unions have concentrated an effort to gain retirement pensions for their members of \$100 or more a month, social security payments included. They have signed a number of highly favorable contracts, notably with U. S. Steel, Chrysler, and General Motors. According to Walter Reuther they hope, in 10 years, to make \$200 a month the standard pension. However, whether or not this occurs, few believe that such pension plans are anything like a complete solution.

Not can we yet be sure how much a pension plan will add to the cost of a company's product. On the debit side, it may increase the labor cost of each employe by 10 cents or more an hour. On the credit side, however, as the treasurer of Eastman Kodak has pointed out, "There are definite savings. The organization is kept on a more efficient basis . . . A sense of security is brought to the older worker and there is a good effect on the younger worker as well. There is a better feeling among the employes and in the community. . . Labor turnover will be lower."

So much for the pros and cons. Basically, the problem is to find a way to assure the old a comfortable retirement without depressing the economy, forcing commodity prices to ever-higher levels, and making the burden of taxation insuperable. — Industrial News Review.

Karl Marx was a German by birth, a Jew by extraction, and a Protestant by faith. Collective farms in the USSR are called Colkhoz.

Texas cotton producers are at the crossroads so far as the 1950 cotton crop is concerned and the wet, cloudy weather isn't helping the farmer in his fight against the threatening insects. The continuous use of insecticides seems to be the only solution.

Nevada has a population of 91,000, the smallest in the nation.

Mr. Link Robinson, 519 Lindsey is the most content and satisfied man in Newport, Ky. In fact, he says there isn't a thing in the world that can irritate or upset him now that he is on the HADACOL band wagon.

Here is what Mr. Robinson has to say about HADACOL which is now supplying liberal quantities of these essential elements: "I have been a steel worker for over twenty years. When you are a steel worker, you have to do plenty of good, hard work, and you need lots of good, substantial food. But when a stomach is . . . I couldn't eat. I had gas pains, stomach bloating and nervousness; well, I just couldn't eat the proper foods I needed. My boss told me about HADACOL and I started taking it immediately. After the second bottle I could tell a definite improvement. Now I can eat the foods I need to eat to really be on the job. In fact, I can eat anything I want to. I am not nervous anymore, either. Best of all, I haven't got those terrific gas pains and no more stomach bloating. HADACOL is the best ever. I recommend HADACOL to everyone."

HADACOL is Different. Countless thousands are benefiting from HADACOL . . . even hundreds of doctors are recommending HADACOL to their patients whose systems lack Vitamins B, B, Iron and Niacin. HADACOL is so wonderful because HADACOL helps build up the hemoglobin content of your blood (when Iron is needed) to carry these precious Vitamins and Minerals to every organ, and every part of your body—to the heart, liver, kidneys and lungs, even to the eyes, hair and nails. Give remarkable HADACOL a chance and if you don't feel better with the first few bottles you take—you get your money back. No man can serve two masters: for either he will hate the one, and love the other, or else he will hold to the one, and despise the other. Ye cannot serve God and mammon.—Matthew 6: 24.

The ice man no longer comes to many homes since the advent of the electric refrigerator but the ice pick continues to be the most useful tool about the average home.

An exchange notes that the trouble with too many people these days is that instead of talking of opportunities ahead that they might develop, they are talking of the prospects of pensions and welfare grants.

In Pharaoh's dream the seven lean cattle came out of the river and ate up the seven fat cattle. Joseph interpreted the dream to mean that the seven years of plenty, then being enjoyed, would be followed by seven years of famine in which the surplus produced in the years of plenty would be consumed. A considerable number of people believe that we are destined to see the old scene re-enacted. They believe that it is impossible for this economy to go on spending money in excess of its receipts, creating inflation and escape the judgment day and the years of famine. All the Pollyanna's notwithstanding, there will come a leveling off — an adjustment period, call it what you will, when the water and the inflation will be all wrong out of things and we will find ourselves back on a bread and butter basis sitting amid the ruins of a glorious though hectic past.

The best results are always obtained by regular advertising. A glance through any of the large publications of national circulation will show that the most successful firms advertise regularly. The very underlying principle of advertising demands regularity of appearance and repeated reading. Tell a man or a woman a fact about your merchandise this month and the same thing two months later and it will create little impression on his mind, but keep hammering it home every week and it can't help but get results.

Hollywood producer Sam Goldwyn, in a recent interview in Paris regarding Ingrid Bergman, stated in effect that he is not interested in the private lives of his stars and would not hesitate to star Miss Bergman if he had a good film for her. "She is a great actress," Goldwyn said, "one of the great."

Parking meters have been installed by 116 cities to date this year. At least 1297 municipalities of 5000 or more population use parking meters, a recent survey discloses.

NOTICE

Am planning to fly to Delaware soon. That is near Washington, Philadelphia, New York, etc., by way of Missouri, Kentucky, Virginia, etc.

Frank J. Halenak, et ux, to Cities Service Oil Co. — 100 acres of Section No. 355, Block A, H&TC Ry. Co. Survey.

In The News . . . 30 YEARS AGO

Newspaper items from the issue of the Foard County News of August 6, 1920:
B. J. Glover made about 65 bushels of oats to the acre on 25 acres of stubble that had never been plowed.

New Plants Program Launched in Texas by Experiment Station

The Texas Agricultural Experiment Station has launched a "new plants" program and already more than 2,000 foreign introductions and collections from the wild flora are included in the program, according to Joe Burkett, County Agent.

What We Think (By Frank Dixon)

I believe that the finest part of living comes not from the possession of material things, but rather from the inner riches of one's heart and soul and his concept of true values.
I have seen many instances of people who had everything they could desire, a big house beautifully furnished, a large social activity, and the money to travel extensively, who were not really happy. They rush from this to that, head long and pell mell in a mad, frenzied effort to find happiness and contentment and satisfaction.

The desire of every man buried in the cares and duties of business is to have one day, like the little girl in the story book, in which he might do just as he pleases.

The editor of one of our exchanges notes: Abraham Lincoln never said, "Hello Central," never rode in an automobile, never held a strap in a trolley car, never pushed a button for light, never heard a phonograph, radio or television, never saw a motion picture, an electric refrigerator, an electric washing machine—yet Abraham Lincoln died only 85 years ago.

If You Are An Average American

Your automobile is your second largest investment—and when you protect it, you also protect your largest investment, your home.
For if your automobile is uninsured or underinsured, it may become necessary for you to place mortgage on your home in order to pay a liability judgment.

Hughston Insurance Agency

Two Minute Sermon  
(By Thomas Hastwell)

They Know Not Faith: On the occasion of a recent visit with a friend, we fell to discussing the matter of faith. "Faith," my friend said, "is a thing about which many persons talk about glibly, but too few really understand or experience." I had never thought of it just that way, but I have seen so many persons whom I felt had little or no faith, either in themselves or in God. They would be surprised and shocked at the suggestion, but they live in an atmosphere of constant worry, and fear, and apprehension. They are afraid of this, and afraid of that. They are afraid this will happen and afraid that will happen. They are without a single steady force or influence. What they need to do is to learn what faith is, and what it will do for them. They need to put out of their lives the things that weaken and tear them down, and rob them of the real pleasure and joy of living, and put in their place the things that will strengthen and uplift them. They need to put their lives on a plane above the little and the petty doubts and fears, the plane where courage and faith and joyous living are found. They need to know, and experience faith, instead of merely talking about it.

### DECORATION DAY IDEA

The idea of Decoration Day was suggested by Mrs. Martha Gertrude Kimball, who served as inspector of Union hospitals during the Civil war.

### WHAT THE RETAILER KEEPS THE COUNTRY PRESS SAYS

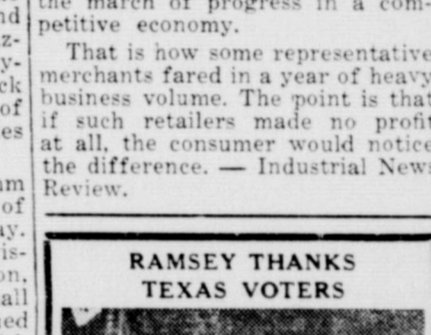

Two highly interesting reports on the profits earned by various kinds of retailers have recently appeared. They will come as a considerable surprise to people who think that retailers keep much of the money spent with them—and are, consequently, largely responsible for high prices.

First is a report issued by the Harvard Bureau of Business Research on operating results of department and specialty stores last year. Department store earnings after taxes were only slightly more than three cents on the consumer's dollar, the lowest figure since 1938. Specialty store earnings were but slightly more than two cents. Stores generally reported higher expenses during the year for payrolls, real estate, and advertising.

The second report has been issued in illustrated leaflet form by a major food chain. Of each consumer dollar this concern took in last year, \$1.2 went right out to buy stock, most of it to farmers. Then came wages, taxes, rent and utility costs, supplies and maintenance, and advertising. After all these bills were paid, that original consumer-dollar had shrunk to 1.7 cents. That was the profit—but not all of it went to the owners. Actually the stockholders got .8 of one cent and the remaining .9 of a cent was plowed back into the business, where it bought new equipment and paid for needed store and warehouse improvements—expenditures that any concern must make if it is to keep up with the march of progress in a competitive economy.

That is how some representative merchants fared in a year of heavy business volume. The point is that if such retailers made no profit at all, the consumer would notice the difference. — Industrial News Review.

### RAMSEY THANKS TEXAS VOTERS

Ben Ramsey, run-off candidate for Lieutenant Governor, thanked Texas voters this week for the vote they gave him in the July 22 primary election. Ramsey, shown here in his San Augustine law office, said his heart was "filled with humble gratitude," and asked his supporters to continue the fight and elect him Lieutenant Governor in the Aug. 26 second primary. Ramsey is the only experienced candidate in the race.

### South America extends farther south than Africa.

I wish to thank the people of Foard County and the 46th Judicial District for their support during my campaign for District Attorney.

I will do my utmost to prove myself worthy of the confidence you have shown in me.

Sincerely  
Leon Douglas

**Texas Highways Inadequate for Present Traffic**

Washington, D. C., July 24 — Texas' highways won't meet the demands of 1950's traffic for nearly 18½ more years at the current rate of road construction expenditures, the president of the oldest national good roads organization reported today.

Actually, Texas' motorists face an even worse highway picture, Col. E. R. Needles, president of the American Road Builders' Association, declared, because substantial increases in traffic volumes, weights and speeds — state registrations of motor vehicles were up 11.6 per cent last year over 1948 — are doing much to invalidate all-out efforts to overcome state highway system deficiencies reported by a Congressional committee to be \$1,294,-

**Woman Stars In Unusual Sales Job**

Outstanding success in an unusual field for women—selling trucks to large operators of automotive equipment—is the record of Mrs. Dorothy Dennis, fleet sales manager of a large Chevrolet dealership in St. Louis and believed to be the only woman in the country to occupy such a position in the automobile industry. Entering the highly competitive fleet business, Mrs. Dennis established a notable record in the sale of cars and trucks to owners of large fleets in the middle-west. Pictured above with two officials of the United Van Lines, Mrs. Dennis says the formula for sales success consists of hard work, enthusiasm and customer service.

**Premiere of First Texas-Made Movie of Wild Deer July 28**

Austin, July 20 — Kerrville will become the big game capital of the state Friday night for the premiere of the first Texas-made movie about wild deer, photographed in the intimacy of their natural habitat. Several hundred persons will rally for the first showing of Master Whitetail, all color, all sound production which has been almost two years in the making. The host group will be the Kerr County Wildlife Association. Among the notables present will be W. Scott Schreiner, Chairman of the State Game, Fish and Oyster Commission. Other officials of the Game Department will also be present. The movie provides a historical and documentary story of the white-tailed deer in Texas, linking the sleek animal's original and present status with the arrival and spread of civilization. Master Whitetail is built around the life span of a buck deer, showing it in its wobbly-legged infancy. It vividly pictures how the deer reacts to danger from predators and carries on through the adventurous and exciting days of babyhood, fawn spots and all, and on into maturity with its first antlers. Most of the filming was done in Kerr and adjoining counties of the Texas Hill Country. Lon Fitzgerald, Chief Photographer for the Commission, did the camera work. The narration is by Robert G. Mauermann, editor of the magazine, Texas Game and Fish. Several copies have been made of the picture so that it may be distributed, like other commission movies, to sportsmen's organizations, clubs, schools and other units.

boys and girls in livestock club work. Awards in the Meat Animal activity include gold-filled medals, gold watches, Chicago 4-H Club Congress trips and \$300 college scholarships, on county, state, sectional and national levels, respectively. The Soil and Water Conservation program is now set up for two age groups—one for boys and girls 15 to 21 years old, and the other for those 10 to 14, inclusive. The older group is required to complete a more comprehensive project. Medals for county winners, and gold watches and \$25 Savings Bonds for State champions are provided by Firestone Tire & Rubber Company. Sectional winners get Chicago Club Congress trips. National awards are \$300 college scholarships. This revised program is the result of combined planning by representatives of the Cooperative Extension Service, Soil Conservation Service, Firestone and the National Committee.

Bennie John Gallagher, of Clarkwood, Nueces county, was last year's national and state champion in the Meat Animal program, Carroll Fowler, of Lakeview, Hall county, won sectional and State honors in Soil Conservation. Complete information on these programs may be obtained from County Extension agents.

**Important National 4-H Awards Programs**

Two highly important national 4-H awards programs—Meat Animal, and Soil and Water Conservation—have been accepted for the current year by the Texas State Club office. This will be the 21st consecutive year that Thos. E. Wilson, meat packer and chairman of the National Committee on Boys and Girls Club Work, has provided incentives to help encourage 4-H

**MR. FORD AND A PLANNING BOARD**

A top officer of an oil company has vividly illustrated the fallacy of government direction of enterprise in these words: "Let me speculate . . . as to what might have been the attitude of a Government Planning Board in 1900, if one had existed at that time, toward the automobile and petroleum industries. There were then in operation in this country some 8,000 motorcars, consuming 80,000 gallons of gasoline in a year. That is just about enough gasoline to keep all the cars of today in operation for 2½ minutes. Let us imagine Mr. Ford, with his great vision of the automobile's future, appearing before that Board and asking that in its program for the next two or three decades it provide a few billions of capital, along with the necessary labor and material, for manufacturing automo-

biles. The Board would have recognized in Mr. Ford a mild lunatic. They would have asked him where he expected to get the gasoline for all those cars; and would have pointed out that neither the gasoline nor the crude oil from which to make it was anywhere in sight. And they would have rejected Mr. Ford's demands."

However, the speaker went on, there was no such Board in 1900. Mr. Ford went on building cars as fast as possible and so did other makers. And the gasoline which wasn't in sight appeared as needed. The oil industry didn't have to beg permission of a Government Planning Board to take a chance—and so it found new fields and vastly improved its technology. We see the results today in this nation-wide wheels. — Industrial News Review.

"Blind as a bat" is an incorrect saying, since bats can see.

**To the Voters of Commissioners' Precinct No. 2:**

I am grateful for your support in behalf of my candidacy for Commissioner in the July 22nd primary. I am asking again for your support in the August 26th primary.

I believe in economy in government, in community cooperation, courtesy in office, and, if I should be the people's choice, I will endeavor to do that.
