## Cotton Acreage May Be Increased

Cotton acreage under crop control allotments for most West Texas counties will be increased if a three-year average on cotton acres in cultivation is substituted for the present formula which is based on a five-year average.

Hearings are due to start in Washington before congressional committees during the coming week on House Bill 5655 and Senate Bill 2106, which propose

the substitution widely supported by many western cotton growers.

Information developed by the West Texas Chamber of Commerce from records published by the U. S. Department of Agriculture show that all but 20 of 117 cotton-growing counties in West Texas would gain acres by passage of these bills, largely because of new acreage put into cotton production during recent years.

The law now provides that allotments be based on an average acreage of five crop years—1947, 1948, 1950, 1951 and 1952. The year of 1949 was specifically omitted.

The new proposal would change the basis to the three years of 1951, 1952 and 1953.

West Texas as a whole would gain 688,900 acres for 1954 if the new formula is approved by Congress. The WTCC urges every grower to give his Congressman his opinion of the more desirable formula.

Foard County would be allotted 17,500 acres on the proposed three-year basis and 17,800 on the present five-year basis.

George Washington's second inaugural address is the shortest on record.

Here are some of Ford's "Worth More" features... but to get the full story, you'll find it worth your while to Test Drive a new Ford today!

**Less front-end road shock.** The kind of shock you feel most is reduced up to 80% with Ford's remarkable new ride. You get a smoother, more balanced, more comfortable ride all around!

**Suspended pedals** easier and make foot space the entire floor area. Suspended pedals are also a "keep on sign" to dirt and drafts... it's easier to keep the floor clean.

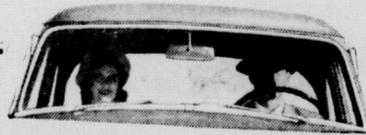

**Smooth V-8 power** is exclusive to Ford in its field. And Ford's Mileage Maker is the most modern Six you can own! Both the V-8 and Six-cylinder power plants deliver their hill-leveling "go" on regular gas—and not much of that, thanks to Ford's Automatic Power Pilot!

**An extra suitcase** will fit into Ford's luggage compartment—the roomiest in the low-price field. In fact, Ford's combined luggage and passenger space is the greatest in the low-price field... compares with that of many cars of higher price.

**Center-Fill Fueling** permits filling your Ford from either side of the pump... saves you time when refueling... and puts an end to hose scratches on your fender!

**Curved one-piece windshield** (below) and large picture windows, give Ford the most "look out" area in the low-price field... another reason your Ford is worth more when you buy it... when you sell it, too!

See it... Value Check it... Test Drive it...

by VERN SANFORD  
Texas Press Association

Austin, Texas—Texas politics appear calm on top.

Only an occasional ripple indicates the seething turmoil under the surface.

Such a ripple is the announcement by George W. Sandlin of Austin, secretary of the State Democratic Executive Committee, that the group will meet September 11 in Mineral Wells.

Small space was occupied in the newspapers by the announcement, which was casual in tone.

Sandlin said the purpose of the gathering was mainly "finding out what the members might have on their minds."

What they might have on their minds might be plenty. It would involve whether the Shivers' "conservative" people would retain control of the Democratic Party in Texas, or whether the "liberalist" faction would regain control.

Hopefuls in the political races of next year were concerned—especially prospective candidates for state and nation offices.

Politically and otherwise, a great deal depended on the governor's decision as to whether he will run for another term, seek some other office, or retire from the public service.

Several potential candidates are waiting for the governor's announcement before completing their own plans.

Some of the "experts" here said Shivers will try for a third elective term as governor, because in that position he could exert his influence most effectively in keeping Texas on the "conservative" side with respect to national politics.

A meeting of the executive committee at this time indicates strongly that the political forces are beginning early to prepare for next year's three-sided campaigns, with competition from both Democratic factions and the Republicans.

Otherwise, there was the busi-

ness of replacing two members of the executive committee. Mrs. L. E. Tennyson of Clifton resigned because of illness in her family. Peyton McKnight of Quitman left the committee to take a position with Jack Porter of Houston, oil man and national GOP committeeman.

Sandlin's announcement of the Mineral Wells meeting came while Shivers was attending the national governor's conference at Seattle, where President Eisenhower expressed his views on states rights. The federal government, said the president, should never undertake to do for the states anything that the states can do for themselves.

This was what most of the governors wanted to hear. Shivers, chairman of the conference, had said that the problem of "bringing the government closer to the people" was considered by most of the delegates as the most important question before the meeting. Governor Dan Thornton of Colorado agreed that there should be decentralization of government and that the nation is still in danger of "drifting into socialism."

From Seattle came an indication on the part of some for Shivers to enter the presidential race in 1956. Louisiana's Governor R. F. Kennon made the suggestion to reporters there—a thought that has been expressed in Texas and elsewhere before.

Everett L. Looney of Austin, president of the State Bar of Texas, has removed himself as co-counsel for District Judge C. Woodrow Laughlin of Alice.

Looney gave two reasons for his withdrawal: first, he is ill and unable to appear at the ouster proceedings; and second, some of the directors of the state bar felt that it was improper for him, as president, to appear in the Laughlin case.

Looney called for a special meeting of the bar directors for August 13 to determine what action if any the lawyers' organization should take in the Laughlin case.

Eleven South Texas attorneys petitioned the Supreme Court to hear a list of complaints against the Alice judge and to consider removing him from office.

The proceedings are scheduled to begin August 17.

Laughlin is accused, among other things, of interfering with a grand jury investigation into election matters in his district.

Annexation powers of cities is being studied by the Texas Legislative Council.

Laws governing annexation have not been changed for 30 years, and there is need for revision, in the opinion of many, including Representative Marshall O. Bell of San Antonio.

Bell told the council that "cities should grow in an orderly way, but we ought to prevent the incorporation of 'parasitic' areas seeking to avoid city taxes while obtaining the benefits of a nearby big city. On the other hand, cities should be stopped from annexing farm territory, or from expanding where there would be no benefit offered to residents of the area."

Findings of the Council will be referred to the next Legislature.

Scheduled in federal court is the National Labor Relations Board's attack on the Texas "right to work" law.

Federal Judge R. E. Thomason of El Paso ordered Attorney Gen-

eral John Ben Shepperd to appear and testify in regard to an injunction suit filed by the NLRB.

The board by its suit is undertaking to prevent the attorney general from enforcing parts of the law as applied to a San Antonio collective bargaining case. Texas' law in this instance is in conflict with the NLRB contents.

Behind the NLRB action are two injunctions forbidding the International Fur and Leather Workers Union of the United States and Canada from participating in an election to be held by workers of the Nelson Tanning Corporation of San Antonio.

Under present Texas laws labor unions are prohibited from operating in the state without first filing a detailed financial and operational report with the secretary of state. And union organizers must file a report and secure an organizer's card before conducting their soliciting activities in Texas.

Another Texas law under attack is the driver responsibility act.

The test is going to the U. S. Supreme Court.

D. C. Gillaspie of San Antonio has resigned as assistant state highway engineer to accept a position with the Portland Cement Association at San Antonio. . . . David Irons, assistant attorney

general and president of the Public Employees Assn. will go to Washington to lead a subversive activities training unit of the U. S. ## Health Letter

Texas State Department of Health, Austin, Texas, Geo. W. Cox, M. D., State Health Officer.

Most parents know exactly what State Health Officer Geo. W. Cox means when he says "there is no such thing as natural resistance to impetigo."

They know, perhaps from bitter experience, that the same child can suffer repeated attacks of what Dr. Cox calls an "offensive, annoying skin infection."

Impetigo, a purulent, highly infectious ailment can be found in any age group at any time of the year. But children are unusually susceptible, and most cases occur during summer. It isn't too serious, except in new born babies, but it can cause days of itching misery to afflicted youngsters and adults alike.

It's caused by a pus-forming bacteria called staphylococcus—the same sort of germ found in boils and sores where pus is present. Usually it forms an unsightly

crust over wide areas of the face and the material underneath is very infectious if allowed on other body parts.

It can easily be transmitted to anyone who uses the towel or clothing of the infected person, since towel and clothing permit the germ to travel.

Children living in the impetigo homes frequently get it, although it is more common in homes where personal sanitation isn't considered too important.

The best way to minimize the ill effects of impetigo is to keep the infection localized by using the serum under glass exuding into "clean" sores.

The family physician is infected child's best friend. He will advise mother how to combat the disease and keep it from spreading to other children through the family.

James A. Garfield, who at 49, lived the shortest any U. S. President.

## PATHS FOR LITTLE FEET

Dr. Benjamin Spook of the University of Pittsburgh, wrote during National Child Health Week: "Good health for a child isn't just having a nose that doesn't run. It means feeling good enough to want to sing and whistle. Good health for a child means a loving home, a wholesome neighborhood, understanding parents and teacher... and there are tens of thousands of children in America who still lack these essentials." Where will their feet lead them?

"The world marches forward on the feet of little children," said Phillips Brooks. Since this is true, mothers and fathers throughout our land should be careful into what paths they lead their children, those children entrusted to their care by God... because every child born into the world has an undying soul.

When mothers brought their little children to Jesus for Him to bless, He said: "Suffer little children, and forbid them not, to come unto me; for of such is the kingdom of heaven. And he laid his hands on them" (Matt. 19: 14, 15). Then, too, He gave this solemn warning: "Whoso shall offend one of these little ones which believe in me, it were better for him that a millstone were hanged about his neck, and that he were drowned in the depth of the sea" (Matt. 18:6).

The story is told of a little lad playing in the aisle of a transcontinental train. "Where are you going, my little man?" asked one of the passengers. "Out west, sir," he said. "But to what place?" asked the interested stranger. "I do not know, sir, but my father knows and I am going with him."

"My father knows, and I am going with him." Oh, that each child in our land might have that implicit faith and trust in his father, and even more so in his heavenly Father, whom we can know through the Lord Jesus Christ. Only in Him are children safe from the onslaughts of evil.

"The Lord our God is one Lord; and thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might. And these words, which I command thee this day, shall be in thine heart; and thou shalt teach them diligently unto thy children" (Deut. 6:4-7).

## Dividing Up Your Retail Dollar

A large food retailing organization in Florida recently described what happened to each dollar its customers spent with it in a late year. And this actual story is a significant one for budget-conscious consumers.

Here is how that dollar was divided up: 85.11 cents went to buy merchandise; 8.4 cents was used to meet payroll and to support various employee benefits; taxes took 1.38 cents; miscellaneous overhead expenses totaled 1.32 cents; rent and utility services cost 1.20 cents; depreciation claimed .85 cents; advertising accounted for .72 cents.

After all these costs were paid, 1.02 cents was left. And that was the retailing organization's profit.

In every branch of retailing the profit item is far smaller than most of us realize. In fields where problems of style and seasonal changes are involved the profit naturally must be higher than in the case of staple merchandise. Even so, the net profit of representative stores rarely runs above four or five cents and often is much less.

No other people gets so much for their retail dollar as we do.

## FOARD CITY H. D. CLUB

"Everyone admires a smart looking dress or suit, but have you ever realized that what lifts a distinctive garment out of the ordinary class often is the use of the garment fabric for the belt, buckle and possibly buttons?" asked Mrs. Fred Traweck of the Foard City Home Demonstration Club at the recreation room Tues-

day afternoon, August 4.

"Your belt is an important accessory to your costume, and if it is well made and the correct type for your figure proportions, it will add a professional touch to your costume," continued Mrs. Traweck as she explained the type of belt that is best for different figure proportions. She then demonstrated ways to make three belts, one the new contour belt, and how to cover buckles and several types of buttons.

Visitors were Kay Johnson, a 4-H Club girl, Rickey and Jay Traweck and Don Ray Borchardt. Members present were Mesdames W. M. Cox, Tom Callaway, W. L. Johnson, Virgil Johnson, E. V. Halbert, Floyd Borchardt Sr., Fred Borchardt, Frank Welch, O. N. Baker, Harry Traweck and Fred Traweck.

The next meeting will be at 1 o'clock, August 18, at the recreation room. Each member will bring and work on some article that she will take to Achievement Day in October.

LET'S TALK LIVESTOCK BY TED GOULDY

Fort Worth—While it appears that accusations of chiseling on the drought relief program, et cetera, will occupy the headlines for some time to come—the basic problem will remain.

Government authorities are watching very closely the percentages of cows and heifers being marketed each day. Until such time as the slaughter of females reaches 50 per cent of the total kill—then the cattle population is still swelling.

Many observers feel that huge cattle numbers, rather than drought, are responsible for the current low prices and the disastrous declines of the past year or so. Many sections of the southwest not in the drought areas, are heavily over-populated with cat-

tle at this time. Most observers in the Southwest hope that surplus cattle here can be moved before the heavy cattle runs from midwest and western ranges hit the markets later this summer and in the fall. Chaotic conditions could result in shipments are delayed in the Southwest and South.

Slaughter steers and yearlings brought firm to strong prices at Fort Worth Monday. Several loads of well finished cattle in the \$21 to \$22.50 bracket. Common and medium kinds sold from \$10 to \$17. Fat cows were steady at \$9.50 to \$12.50, and canners and cutters 25 to 50 cents higher at \$7 to \$9.50. Bulls ruled steady at \$8.00-13.50.

Good and choice fat calves were sold at \$14.00-18.00, and killing calves generally ruled weak to 50 cents lower. Cull, common and medium butchers sold from \$10 to \$14.

Good and choice stocker steer calves drew \$14.00-20.50, with heifer calves \$18.50 down, the top prices paid for a load of Montague County calves from S. D. Howard. Stocker steer yearlings drew \$12.00-18.00. Replacement cows cleared at \$10.00-15.00.

Hogs sold \$1 higher. Hog growers balked in the face of recent low prices. Offered only 42,000 hogs around 12 major markets—25 per cent below a week earlier. Top at Fort Worth Monday \$23.00-23.25. Sows steady at \$1.00-19.00.
