Other long runs were made by Holliday for 35 and 59; Bobby Barker for 73; and George Boyd for a punt return for 62. Quarterback Ivan Cates tossed a pass to end Bill Gates that was good for fourth and set up Crowell's 60 yard touchdown. Jim Ayers led the way in scoring with points. He ran five touchdowns for 2, 35, 2, 17, and 59 yards. Also ran five out of six extra point tries. These runs were made by the other members of the Crowell team blocking their way for the season. ## Pastor's Brother to Speak at Layman's Service Sunday

On Sunday, October 19, the Methodist Church will observe Layman's Day with an effort to provide a lay speaker for every church in the district. This observance has gained wide acclaim as the Methodist Church once a year hears the message of Christian faith from the lips of a layman, from the man in the pew. The local Methodist Church will observe this day with a lay speaker in the morning worship service.

Ralph H. Hudson, brother of the pastor, Rev. Carl Hudson, will be the speaker. Mr. Hudson is a farmer about half way between Eldorado and Gould, Okla. He and his family: wife, Frances; Diane, age 7, and Dwaize, age 7, are active members of the Methodist Church in Gould, Okla. For the past two years, Mr. Hudson has served his church as the lay leader. For the past four years, he has farmed south of Gould and prior to his farming venture, he was shop foreman for the International Harvester dealer in Hollis.

Mr. Hudson graduated from the Hollis, Okla., High School; served three years in the U. S. Navy, much of the time as a mechanic; and following his discharge from the Navy attended Southwestern Institute of Technology in Weatherford, Okla., where he received his B. S. degree in Engine Mechanics. Although he is a skilled mechanic and highly respected in his trade, four years ago an opportunity came for him to return to the farming trade, in which he was reared, and Mr. Hudson returned to his "first love" in the form of 480 acres of irrigated land in the fertile Red River Valley.

## Frank Cooper of Estelline Named New Cicero Smith Lumber Co. Manager Here

Frank Cooper, manager of the Cicero Smith Lumber Company yard in Estelline for the past five years, has been named the new manager of the Crowell yard to replace Bert Kirk, who has resigned.

Mr. Cooper, a native of Estelline, has been a member of the Estelline Lions Club and will transfer his membership to the Crowell club. They are members of the Methodist Church.

Mr. Kirk, who has accepted a position with the Celotex Corporation, will go to work for the firm October 20, and plans to move his family to their new home in Wichita, Kansas, about November 1.

At the time of his resignation, Mr. Kirk was serving as president of the Lions Club, a member of the City Council, and served for two years as home service chairman of the Red Cross.

EDITORIAL

Why Education?

Much has been written about the value of education. Millions of dollars are spent each year so that today's children may learn to do better jobs in their chosen fields of endeavor. This is one reason why America has excelled all other nations in production. Our business leaders are educated men who by the use of modern machinery and careful planning have achieved what is referred to by some as "American know-how."

things. In history and literature he meets so many different characters. There are the weak and the strong, the good and the bad, the selfish and the unselfish; the tyrant and the benefactor — all interesting!

As education progresses, he tries to evaluate the things he has learned. In doing so, prejudice is overcome by truth. As one realizes there can be two sides to every question, he finds himself trying to understand the problems and cultures of other people.

The educated person makes a better citizen because he understands that civilization is based on rules—labeled "laws"—and he realizes that only by observing rules can our nation survive.

Linda Harris and Karl Bell—Senior Personalities

Linda Jane Harris is 5' 1" tall, has pretty blue eyes, brown hair, and is eighteen. She simply adores chocolate pie and anything that tastes good. Geometry seems to give her a little trouble, but English "just comes naturally."

Linda is interested in poetry and song lyric writing. In fact, she has a contract for her song lyric, "Last Saturday Night," with the Crown Music Co. If it makes a platter, I know the students of CHS will flock to the nearest record store to buy it. This is really some accomplishment, and we all owe Linda our congratulations.

Her pet peeve is a person who is not sincere. That's mutual. She has been in FHA, dramatics and pep squad. After graduation, Linda Jane plans to attend The Commercial College in Fort Worth to become a secretary. We know she will go far in anything she does.

Is that Tex Ritter walking down the street? Why, no, it's our very own Karl Bell. He's 6' 1" tall, has green eyes, blond hair, is eighteen, and is a real "honest to goodness" cowboy. Karl enjoys a good western movie starring Gary Cooper and all the feminine females, especially Jane Russell. Wow! He also enjoys hunting, rodeos and dancing. English is pretty hard for Karl, but bookkeeping is just down his

line. T-bone steak and all the trimmings; ah—what a meal! In between classes, Karl can usually be found just "shooting the bull" with the fellows or maybe trying to find a radio to listen to some good hillbilly and western music.

After school is out, Karl wants to be a farmer or rancher. Who knows, some day he may have a "spread" bigger than the King Ranch. Good luck, Karl.

Library Club Meets

The Crowell High School Library Club met at 2:30 on Oct. 9 for their second club meeting of the year. Pictures for the annual were made, and then Carolyn Aydelotte called the meeting to order.

Mrs. King gave each member some good pointers on library work. Each librarian should do her duty and her part to make library work easier and more helpful for all. She suggested that we have a short devotional at each meeting.

Peggy Cates gave an interesting book report, "Texas Yankee," which was enjoyed by all. Hostesses for the meeting were Helen Vessel, Judy Hollenbaugh, and Virginia Williamson.

Wildcats Swamp Eagles 46-14

Yes, it was last Friday night in the Wildcat stadium that the Holiday Eagles really took a "beating." If you were there, you know the excitement of the first few plays. We'll re-live it through comments I heard from a stranger who sat behind me.

His first comment (to anyone or no one), was "I don't know a player on either team, so I'll yell for the underdog." And that he did! At the most unexpected times he'd yell out "Come on Eagles!" I really got my money's worth by just listening to him. It went something like this:

8 p. m. (whistle blows, the kick off is made, Bradford making an 85 yard sprint for a touchdown.) "Look at that man go. He's a real Wildcat. Watch those boys block for him. Man! Come on Holiday!" 8:04 (Barker receives the ball and runs about 65 yards) "There he goes again. They'll have to

watch that number 10. No, that's not number 10, that's 14. You mean they have two boys who can run? I never heard of that! Watch 'em, Holliday!"

A little later (George Moss runs about 55 yards) "There goes one of those 100 yard runners again. Can't tell which one he is. It's number 16. Well, I'll be! What do they feed those boys? Do they all run like that? Come on Eagles!"

Still later (Jim Henry off on a long yardage gain) "There's another Wildcat on the loose! Can't tell whether that's 10, 16, or 14. What!!! 12? I give up! Those Holiday Eagles don't seem to pay any attention to my yelling for them. Guess they just can't stop those Wildcats, etc."

To make a long story short, we did enjoy the game. There was excellent running, passing, blocking etc.

We hope the team has good luck tomorrow night against the Henrietta Bears.

Club News

The Sub-Junior Columbian Club met in the home of Roxiann Adams Wednesday, Oct. 9. Interesting parts were given by Carol Bell and Alta Bartley. Delicious refreshments were served by the hostess, and the meeting was adjourned by the president, Bettie Knox.

The Sub-Junior Adelpian Club met Wednesday, Oct. 8, at the club house. Delicious refreshments were served by Linda McClain. The leader, Lillie Polk, read a beautiful poem, "The Road of Time." We Knew It Would Happen Sometime!

This is the article we didn't write!! Why? An unexpected class meeting another failing report card! (Pre-

pare for a funeral in November). If you'd stay home and study once in a while, you might make better grades.

Next Week You'll Be Late! Buy Your Annual Now!

I happened to be at the Home-making Cottage last Wednesday when the Roundup staff met to plan the '59 yearbook. The representative from Newsfoto Publishing Co. was there to help with the planning.

Those kids are planning an annual to top all annuals. It's supposed to be kept secret, but I heard that there will be lots of color and several changes which all the students should like.

The annuals went on sale yesterday and will be on sale until next Wednesday. Don't be left out! Buy your annual today! \$4.00 is the total cost, or a \$2.00 deposit will hold you an annual. The publishers will deliver only the number of books ordered in advance, so don't put it off. Buy now!

Band Beats

At Friday's game, the band did a performance representing the various types of sports that take place throughout the different seasons. The band formed a huge football symbolizing the fall season and football games. It then formed a basketball which symbolized winter and the indoor sport of basketball. The band then formed a baseball plate symbolizing the spring season and the famous game of baseball. Next, it formed a huge circle that symbolized the most popular sport now which is working the hoola hoop.

The band is beginning to practice on their routine which they plan to use at the marching contest in Wichita Falls Nov. 11. We hope that they make good progress so that they will make a high rating at the contest.

Anticipated Remarks by Parents Today—Report Card Day

Now, when I was a boy, I brought home all A's. Well, son, just park the car in the drive way. It burns less gas there, anyway. I think I'll die if you bring in another failing report card! (Pre-

pare for a funeral in November). If you'd stay home and study once in a while, you might make better grades.

Question of the Day

Question: What's the difference in a gum chewing kid and a cud chewing cow?

Answer: The intelligent look on the face of the cow!

Sophomore Party

On Tuesday, Oct. 7, the sophomore class left to go to the show at the Plaza at 6:30 p. m. Showing was "Bonjour Tristesse" starring David Niven and Deborah Kerr. As soon as the show was over, we loaded in the bus and went out to the Santa Rosa Cafe to eat. After everyone was full and contented, we returned home. The show and food were enjoyed by everyone.

This'sa and That'ta

1959 Ford Car Line to Go on Display Here Friday, Oct. 17

The 1959 Ford car line, which already has received an award at the Brussels World's Fair, styling elegance, will go on display at Self Motor Co. Friday, Oct. 17. J. O. Wright, Ford Motor vice president and Ford Division general manager, said "The 1959 Ford car is new in concept, new in style. The 1959 styling theme is good taste, a result of consumer demand for more elegance and dignity in automobile styling as opposed to gaudiness or exterism."

In addition to Ford engines that have been engineered for great fuel economy, Ford offers quality designed construction and a redesigned Fordomatic transmission with 105 fewer parts than in '57. The 1959 Ford engines of greater operating economy of improved engine design, the normal driving ranges, 30 to 70 miles per hour. Ford recommends regular grade gasoline and standard engines, which can suit in a saving of up to one dollar a tank full. These benefits have been achieved in part by slight horsepower reduction. Mr. Wright said every 1959 Ford is "quality designed," a term Ford engineers use to define emphasis placed on quality in the basic design of the car. The result is a simplified design where possible, elimination of unnecessary parts as in the case of the transmission, and more durable parts, such as Ford's new extra-duty muffler and Diamond Lure finish, an enamel that requires no waxing for the life time of the car.

The 1959 Ford line includes models. The full-flow oil filter, standard equipment on all 1959 engines, permits Ford to recommend oil change only every 4,000 miles, resulting in further savings to the customer. could it, Gayle? And from Maryland too! Why was Virginia Williams sad Saturday night? Was it cause Bill was working? DeeAnn Christian has a admirer from Altus. Could name be Bobby Freeman? Who was George spruced to see Saturday night? Man, looked real cool! We think Jo and Wesley are the cutest couple ever! Good luck kids! Janise and Jerry Don Pritchard are seeing each other a lot. Report on this is going to be a steady soon? Taylor and Ellie are still doing pretty strong.

The new, longer Ford station wagons have a cargo space that is eight inches longer and 11 cubic feet greater than in 1958. The second seat has a locking device that prevents the seat from folding forward in a sudden stop, and the foam rubber cushions from the third seat can be removed and used as ground cushions.

**Ducks and Geese Arriving Early on Texas Coast**

Ducks and geese are arriving on the Texas coast now in great numbers, according to E. M. Sprott, director of law enforcement of the Game and Fish Commission.

"Wardens all along the coast are reporting heavy night movements," the director said. "They expect about October 20 the heaviest movement will be over and the ducks and geese will settle down to living in their winter home."

Many South Texans have reported flights of geese over their houses during the night hours. Although some Canadas and white-fronts have arrived, most of the geese now on the coast are snows and blues. The early duck movement consisted mostly of teal, pintails, and spoon bills. Mallards, canvas backs and red heads are now beginning to move in, how-

**PETROLEUM—basic to the needs of our time**

Oil and natural gas have powered most of the great technological advances of modern times; petroleum hydrocarbons have transformed the dreams of inventors into the realities of engineers . . . Today, in the United States, oil and natural gas provide about 75% of the country's energy requirements; and large quantities of oil, available for production beyond immediate need, are necessary to the national security.

An obvious example is the gasoline that powers our automobiles; another is the diesel fuel burned by post-war railway engines. But do not overlook electric power plants, the airplane, whether jet or propeller driven, factory power plants, farm mechanization, and the revolution since World War II in home heating devices. Oil provides the energy that moves the trucks, airplanes, ships and tanks of our Armed Forces.

But petroleum as a source of energy is only part of the story. In the past two decades, the petrochemicals have supplied the country with a vigorous new industry; already most of our rubber is made from petrochemicals . . . the ubiquitous plastics derive from petroleum products . . . paraxylene, a petrochemical, is the raw material for one of the most useful of the new fabrics. In this area, wonders never cease; the petrochemicals contribute more each year to the efficiency, comfort, and convenience of modern living.

Thus, oil's progress has made other progress possible all along the front of American industry . . . Petroleum is the American resource that is

basic to the needs of our time . . . that is essential to our national security.

\*\*\*

The Humble Company, established in 1917, has developed with the industry.

Humble's exploration activities extend from Florida around the rim of the country to California, Oregon and Washington, and beyond to the new State of Alaska . . . The Company is a leader in the production of oil and gas in the United States . . . Humble Pipe Line Company is a public carrier transporting not only Humble's oil but that of many other companies and independent producers to Gulf Coast terminals . . . Baytown refinery is one of the nation's great manufacturing plants . . . And Humble is a marketer in the Southwest, supplying the needs of motorists in modern service stations.

The Humble Company believes strongly in research, maintains two outstanding research facilities, and annually budgets considerable sums for this activity . . . Humble research has made substantial contributions to the discovery, production, and utilization of petroleum.

## 1959 Chevrolets Now on Display at Local Dealer's

The 1959 Chevrolets, dramatically restyled and boasting an array of mechanical improvements, will go on public display at the Borchardt Chevrolet Co. showroom here Thursday morning, Oct. 16.

As is customary with the company, the presentation here against a festive background of decorations will be held simultaneously with the introductions at other retail locations across the country.

The new models have been veiled in secrecy. Advance word from Detroit, however, describes them as "the most unusual in company experience." The passenger body carries a unique design and the cars will reportedly incorporate equally as progressive refinements in the chassis.

Representative models of the entire passenger car line and the 1959 lineup of 139 commercial vehicles are slated for the exhibition here. The "formal" announcement period will continue through the remainder of the week.

According to Chevrolet, a revision in series identification is planned for the passenger cars. The Impalas, introduced with meteoric sales results as part of the Bel Air family a year ago, have been expanded into a complete series. Other models making their debut will be new Bel Airs, Bucaynes and station wagons.

Chevrolet will bring out its new models in the wake of an extensive promotion and advertising campaign. The newspaper schedule

### THIS WEEK -In Washington

With Clinton Davidson

A man Republican party chieftains wanted fired only three months ago, Ezra Taft Benson this week is being quietly groomed for entry into the 1960 presidential race.

As recently as last July many of the top Republicans in Washington labeled Benson a failure as Secretary of Agriculture and too big a liability to carry into the 1958 election campaign.

Why this sudden reversal? What has happened to change the quiet-spoken church official from Utah into a political hero almost overnight? His is, beyond doubt, one of the quickest political comebacks on record.

There are several reasons given, but the most plausible are that (1) Mr. Fred Glover.

Mr. and Mrs. Ott Whitaker and daughter and Mrs. Annie Mickey of Amarillo spent the week end here with her parents, Mr. and Mrs. C. C. Wisdom.

the farm revolt against him has quieted down; (2) he is popular with many city voters, and (3) he is a good speaker and campaigner.

Benson has been one of the most controversial men in President Eisenhower's Cabinet. He has taken without flinching criticism that would have discouraged many men. He has unwavering confidence in his principles.

**Farm Program**  
The Administration farm program which features more freedom for farmers from government pricing and production controls has been more popular with consumers than with farmers or, for that matter, with Congress.

Despite lower supports for many crops, the index of farm prices now is 5 per cent above a year ago, although still 15 per cent below 1952. Benson recently released figures to show that farm income so far this year has been 19 per cent higher than in the same months of last year.

Late in the past session of Congress Benson teamed up with congressmen from urban areas to defeat a farm bill backed by the Democratic majority, and then push through a bill which it was claimed will result in lower farm and food prices.

**A Taft Man**  
Benson was a close friend and

political supporter of the late Sen. Robert A. Taft, a distant relative. His middle name, Taft, is a family name. It is reported that Sen. Taft recommended him to President Eisenhower.

The quiet campaign to promote Benson for President is being backed by many of the former Taft supporters. They comprise what is generally described as the "conservative" wing of the Republican party.

Although Benson has been a staunch supporter of President Eisenhower, he has not become too closely identified with Eisenhower-Republicans branch of the party. He, however, campaigned for the re-election of Mr. Eisenhower in 1956.

Benson is a tireless and convincing campaigner. Since the close of Congress he has been making three and four speeches a week in support of his farm program and Republican congressional candidates, some of whom have in the past been critical of him.

He is a deeply religious man, having taken lease as a member of the Council of Twelve Apostles of the Church of Jesus Christ of Latter Day Saints to become Secretary of Agriculture in 1953.

Teachers leave the profession at the rate of 4,500 per year.

### Net Wire Diversion Explained by SCS

A net wire diversion is a short fence of net wire built to break up concentrated run-off water and spread it over a wide area.

Net wire diversions are effective in the control of gullies. They spread the flow of water to a point where vegetation can be established and used to stabilize the outlet ends of diversion terraces, grade terraces, and farm pond spillways. In some cases, net wire diversions are used in place of diversion terraces when it is desired that the water be spilled all along the diversion.

Net wire diversions should never exceed 600 feet in length. They should not be constructed on more than one-half of the grade of the land that they cross. Sharp bends in the diversion should always be avoided unless they are in a down-stream direction. Excessive amounts of debris may collect in any sharp bend in the diversion and result in the failure of the structure.

Hale-Aikin reports indicate that 4,343 teachers are needed now to relieve over-crowded classrooms.
