American farmers must take justifiable pride in a new 11-story "farm headquarters" building recently dedicated by President Eisenhower only a couple of hundred yards from the White House.

We attended the dedication ceremonies and felt the pride that all friends of farmers must feel in the gleaming white limestone building erected by the National Grange and housing many other agricultural organizations.

The President's remarks were especially significant in stressing that this is a non-governmental building, a fact which Herschel D. Newsom, Master of the 800,000-member Grange, had mentioned in his introduction of Mr. Eisenhower.

"I think," the President told 3,000 persons gathered from all parts of the nation, as well as from Canada, "these words (a non-governmental building) are some that ought to be cherished by each of you and spoken with pride when we talk about improving agriculture and making certain that its benefits reach all of our people."

Temple of Agriculture

Newsom compared the modern Grange building to the Temple of Ceres created some 2,000 years ago by Greece in honor of the farmers of that time.

"Since the Grange was organized in 1867," Newsom said, "we have dreamed of a modern 'Temple of Ceres' for American farmers that we may be able to meet not only the individual citizenship responsibilities imposed upon us by self-government, but also the group responsibilities which are increasingly important in our modern and complex economy and society."

Secretary of Agriculture Ezra Taft Benson spoke of "the record of outstanding accomplishments by this great organization of rural Americans," and praised the Grange for its unswerving adherence to the principle of a self-reliant agriculture.

Story of a Building

The story back of the building interested us, and we think it will you. Several years ago the Grange purchased an 8-story building just around the corner on Jackson Place.

Early in 1957 the Government took title to that building without consulting the Grange and offered \$360,000 in payment. The Grange protested this was less than 50 per cent of the value of that building.

It was not until almost two years later, after Congress had ordered the Government to offer a "fair price," that the Grange agreed to give up the building for approximately double the original offer.

The new building, valued at a million and a quarter dollars, is located within two blocks of the U. S. Chamber of Commerce and

Wheat Allotments 1961 Mailed to Producers Last Week

Producers of farm allotments for the 1961 wheat crop were notified last week by the Texas Agricultural Experiment Station and Conservation Commission. Most of the allotments differ only slightly from those for 1960, since the average allotment remains a minimum of 55 million bushels, Davenport said.

He pointed out that all growers will produce more than 15

acres of wheat as grain in 1961 will be eligible to cast ballots in the July 21 referendum on marketing quotas for the '61 wheat crop. Growers with smaller acreages and those in the feed wheat program are not eligible to vote since their wheat would not be subject to marketing quota penalties.

Davenport said the referendum would decide important questions for wheat producers and he urged all eligible growers to cast a ballot. Marketing quotas will be in effect for the 1961 wheat crop if two-thirds of the growers casting ballots favor their continuance. Too, marketing penalties will apply to the excess wheat of grow-

ers not complying with their farm allotments, and price support at not less than 75 per cent of parity will be available.

If more than one-third of the voters oppose the quotas, no quotas or penalties will be in effect on the 1961 wheat crop and price support at 50 per cent of parity will be available to producers who plant within their farm allotments.

Growers who like to make their own decisions should cast a ballot on July 21, Davenport said. Local announcements will soon be made regarding polling places and opening and closing times for the balloting. Local ASC office can supply additional information on the referendum or it may also be obtained from community and county

Overweight Is Biggest Health Problem

The nation's biggest health problem is overweight, in the view of Dr. E. Vincent Askey, new president of the American Medical Association. He adds that we Americans are eating more and better but exercising less—"As a result, actuarial statistics show that an alarmingly large number of persons are seriously overweight, and obesity and long life usually don't go together."

STATE CAPITAL

Highlights AND Sidelights

by Vern Sanford

TEXAS PRESS ASSOCIATION

Austin, Tex. — Although budget balancing is the most discussed of the problems facing the next Legislature, many lawmakers expect redistricting wrangles may raise more blood pressures.

Legislature is required by the Constitution to re-define legislative districts after each federal census. It used to put off this troublesome task, but a 1948 law provides that if it fails to act in the first session after a census, a Legislature Redistricting Board shall take over.

This insures, as it did in 1951, that the Legislature will redistrict — somehow, some way.

Battle will be between big city delegations who will demand more representation in line with their swelling populations and rural members who will try to hold on to as much as they can.

In their election campaigns, many representatives promised their constituents they'd be in there pitching for the home area. Members from growth areas said they'd go after extra representatives, state senators and congressmen.

A rural legislator told his people, "At least twelve rural districts will disappear in the next redistricting. I certainly do not want this district included in that twelve."

Incumbents cited their experience as an asset. Personal feeling often enters into redistricting, and lawmakers are notably reluctant to "squeeze out" a popular and respected senior colleague by erasing his district.

HOME INSURANCE CUT — Beginning August 1, premium rates on certain types of homeowners' insurance policies will be cut 10 per cent.

State Insurance Board announced the new lower rates would apply to the "home owners package" policies which account for about 80 per cent of the home coverage sold in Texas.

Reductions were made possible because insurance companies have had a relatively low loss ratio on the package policies, first introduced about three years ago.

CREDIT RATE EYED — Board of insurance also is considering a further lowering of credit insurance rates.

Many loan companies require borrowers to take out insurance payable to the loan company in case something happens to the borrower before he repays.

Two years ago the Board cut in half the rates that could be charged for credit insurance. It was charged that loan companies were making excessive profits on loans through the insurance.

Board says that even now rates seem high, with losses running 27 per cent of premiums paid in. If losses run less than 50 per cent of the premiums, rates are considered too high.

NO ROAD PROBLEM — Stiffened federal road inspections pose no problem to Texas, says State Highway Engineer DeWitt C. Greer.

New federal standards are no tougher than those Texas has insisted on all along.

Scandals stemming from misuse of federal road building money in other states has caused the Bureau of Public Roads to tighten its inspection requirements. Greer said the new federal approach will necessitate no change in Texas procedures.

Texans who have been motoring cross-country during their summer vacations will not find this hard to believe. So noticeably superior are Texas roads to those of surrounding states that returning Texans usually give a sigh of relief when they cross the state line.

SPEAKERS' BATTLE BOILS — Candidates for Speaker of the House continue their months-long battle of "claimsmanship."

Rep. Wade Spilman added five to his list of House members pledged to support him and said this gave him a "rather conclusive" lead. Rep. James Turman, Gov. Gohmert claims a definite majority of 79.

Votes of 76 of the 150 House members are needed to elect.

Spilman also has invited the House General Investigating Committee to look into charges that members were being subjected to improper pressure on how to vote.

COLLEGE FUNDS SOUGHT — Texas Commission on Higher Education will ask the next Legislature for an appropriation of \$3,082,183 for the 1961-1963 biennium.

Bulk of the increase asked is for meeting expected enrollment increases in the 18 state-supported colleges and universities.

In a discussion with members of the State Finance Advisory Committee, the Commission considered recommending an increase in state college tuition charges—now \$100 for a nine-months term.

Dr. Ralph Green suggested raising this by \$50. It would bring the state an extra \$5,000,000 a year in new revenue, he said.

PRISON NEEDS CITED — Texas Board of Corrections also wants more money—a \$2,654,846 increase over their present allocation for the next two years.

"If the amount is granted, Texas prisoners will cost the state \$1.85 per day per man," said State Prison Director O. B. Ellis. "This is just a little more than half the national average."

Ellis and Corrections Board members regard prison needs as critical. Board Chairman H. H. Coffield of Rockdale reported that "the prison population trends indicate it will keep on multiplying."

Conclusion Reached by Military Leaders

From the U. S. News & World Report: "The following hard conclusions have been reached by this country's military leaders and by the Atomic Energy Commission: 1. The lead of the U. S. in big nuclear weapons and in tactical atomic weapons is being cut down rapidly by Soviet Russia. 2. There is reason to believe that the Soviet Union is cheating and will continue cheating by testing new atomic weapons at a time when the U. S. is abiding by its agreement not to test new weapons. 3. It is vital, if the U. S. is to remain a first-class power, that it resume tests of its weapons—both nuclear weapons with strategic missions and tactical weapons for battlefield use."

Interest Is Second Most Costly Item in Nation's Tax Bill

According to Citizens Public Expenditure Survey Inc., interest on the public debt runs to \$18,973,232 a minute, or \$1,084,400 an hour. If you have a \$5,000 a year income, your share of the cost is \$51. Interest is now the second most costly item in your federal tax bill, headed only by national security expenditures.

Well, it's just about over, and football season is just around the corner. Regular scheduled games have all been played, we've already competed in the national play-off tournament, and now all that remains is possibly a few games in blue jeans and T-shirts—maybe a game or two for our all-stars, our Colts and another we're especially eager to see develop: a game for our ten year old kids.

Sheppard Field Tournament Notes: Quite a few Crowell fans stayed over to see a couple of innings of the Munday-Knox City game last Thursday. We all stayed the complete 8 innings. A tip of the hat to the sportsmanship taught by the Knox City coaches . . . a Munday player hit the ball out of the park . . . and, as he trotted around the bases, every Knox City baseman shook his hand. Ditto with the hat to the umpires in that game. They retrieved all the home run balls . . . gave them to the "kids what hit 'em" for a valued souvenir . . . A "sharpie" play by a Munday speedster: about three steps to the home side of third base, he waited 'till he saw the left fielder throw to the pitcher, then he sped for home . . . the play for him at the plate wasn't even close!

Tough Luck Champion: the little Knox City kid who thought there were three outs . . . walked about three steps off third base . . . was tagged out . . . and his run just might have won the ball game for Knox City. You could just read the difference in experience in all the Thursday teams: Munday, who has played Little League for five years, was a little more confident and sharp than Knox City, a three year team, and Knox City was a little more confident than our own little two-year kids. Adding to the color: the fat little Munday third base coach who paced back and forth in the third base coaches' box like a caged lion, whistling like crazy.

Iowa Park, with only one ace pitcher, was a little undecided on whether to throw him at us in that first game or whether to try to beat us with their second best and save him for Sheppard Field. Our kids will tell you the decision they finally made . . . they shot

their ace at US! With a whip arm that delivered each pitch "From Port Arthur," this boy Dawson was terrific. He struck out nine, allowed only one hit, and our kids failed to hit the ball out of the infield! (Sheppard defeated Iowa Park 9-8 in the semi-final game . . . (Dawson wasn't eligible to compete in this one.)

Well, it was a good year, I'm thinkin' . . . regular league went off well, and we got in our first year of tournament play. The Pee-Wees grew under night play . . . we had about 8 or 9 last year who worked regularly . . . this year we had about 30 . . . but everyone is saying now: "Just wait 'till next year!"

There also will be an increase in bag limit on mourning doves for the upcoming season. The shooter will be permitted to take 15 per day and have 30 in possession.

Whitewing shooters, who may also kill mourning doves at the same time, will be permitted to have 10 whitewings and 5 mourners for the first day of hunting. They may have 20 mourning doves and 10 whitewings in possession after the second day.

Generally, the Texas quail season will begin December 1, under the general laws. The Commission will set the quail season in regulatory authority counties at its meeting October 7. At that time, biologists will know more about the supply of birds.

Another drastic change in the hunting laws will be legalizing spike bucks in counties under regulatory authority.

Home Demonstration Notes VIRGINIA JACKSON

I will be out of the office on Thursday and Friday taking two days of my vacation.

The 4-Hers have put out several posters during National Farm Safety week and we are asking 4-Hers to come at 10 o'clock Friday morning to help take them down.

Our Home Demonstration program for October is on drying flowers and arranging them. Now is the time to start collecting material to be used at that time.

I will list some suggested things that dry attractively: crepe myrtle pods, dusty miller, wild horse mint, corn tassels, okra, cockscomb, Johnson grass, pampas grass, wheat, barley, small grains, china berries.

To dry, gather plants at or just before their prime. Plants should be free of moisture. Remove most of extra foliage on flowers. Hang or place in dark, dry place about two weeks.

For drying petals and some leaves, use one inch of corn meal in a box. Place flower head down and sift another inch on top of it. Leave about two weeks or less in mid-summer. Use this for canna leaves, milk weed, and anything with petals such as zinnias, golden rod, carnation, chrysanthemums, etc.

For full pods such as okra, trumpet vine pods, cat tails, etc., shellac them to keep them from bursting.

School Classroom Construction

During the last five years, says the Chamber of Commerce of the U. S., the number of school classrooms constructed was sufficient not only to house yearly enrollment increases, but to replace annually about 16,000 substandard or abandoned classrooms.

Long Season and 15 Limit Set on Doves

Hunters seem to be well pleased at the bonus dove shooting they will get during the 1960 season, according to H. D. Dodgen, executive secretary of the Game and Fish Commission.

The north zone season this year will start at 12 noon Sept. 1 and close at sunset October 30. The south zone will open October 7 and close December 5, except in the counties where white winged dove shooting will be permitted three days earlier.

The white winged dove season will be for three days, September 9, 10 and 11. This season will be from 2 p. m. until sunset.

There also will be an increase in bag limit on mourning doves for the upcoming season. The shooter will be permitted to take 15 per day and have 30 in possession.

Whitewing shooters, who may also kill mourning doves at the same time, will be permitted to have 10 whitewings and 5 mourners for the first day of hunting. They may have 20 mourning doves and 10 whitewings in possession after the second day.

Secret Romance

Is there a mother anywhere who can't remember a scene like this? Remember the heartaches, the almost unbearable yearnings, the tormenting fear that you wouldn't be popular? And remember the dread of intrusion at those moments? Respect Susie's privacy. Her emotions can be thrown into a turmoil very easily. She needs understanding. She craves the assurance of her mother's unwavering affection.

\$5 Billion Changes Hands Illegally During 1959

Frank Gibney, in the new book entitled "The Operators," (Harpur & Brothers) reports: "Last year by conservative estimate, some five billion dollars, roughly one per cent of the total U. S. national product changed hands under innumerable desks, counters or expensive restaurant tables in kick-backs, pay-offs, or bribes. The country's employers lost more than half a billion to embezzling employees. A half billion went down the drain in home-repair frauds alone."

New Wheat Variety to Be Released

Seed from Tascosa, a new red winter wheat variety, produces excellent yields of standing quality, will be available from producers of certified after the 1960 harvest.

Tascosa was developed by the Small Grains Section of the Agricultural Experiment Station in cooperation with the D. A. It was named for the early Panhandle settlement west of Amarillo.

Tests on the Rolling Plains Tascosa ranking first in yield regional trials in 61 station tests, Tascosa averaged 32.7 bushels per acre over a 4-year period compared with 33.3 for Comanche and 31.4 for Comanche. This variety has not yielded as well as Crockett in North Central Texas tests, and because of this and its susceptibility to certain diseases, it is not recommended for these areas.

Tascosa differs considerably from the present commercial varieties grown in Texas. The plants are shorter in stature and straw is strong, which aids in resisting lodging. The variety resists shattering and may require special setting of the combine for threshing because the seeds are held tightly by the glumes.

Further information about Tascosa can be obtained by writing the Agricultural Information Office, College Station, Texas, asking for Leaflet 483.

Had Rather Serve in British Political System Than U. S.'s
"Adlai E. Stevenson candidly declared he would rather serve under the British than the American political system. He prefers the Parliamentary system because the spokesman for the opposition is always on the floor of the House of Commons and there is more party discipline. Our political system, he avers, is based on local rather than national politics. He's right about this last, but in such a big country, regional problems must be represented to create cohesion. The president speaks for the nation as a whole."—Clarissa, Minn., Independent.

Take Time Out to Meet Your Game Warden

"It is unfortunate that some persons never meet a game warden until they are involved in some difficulty," writes H. D. Dodgen, executive secretary of the Texas Game and Fish Commission, in an editorial entitled "His Work—Our Wealth" in a recent issue of the agency's official publication. "It is just as unfortunate that so many persons never get to meet a game warden at all." "Basically," writes Dodgen, "the warden's job was created to enforce game laws passed by your legislature. This still is a very important part of the job which he likes. He has become a disciple of the great outdoors. He is a walking encyclopedia of information on how to hunt and fish, and where. He must know the multiplicity of laws that govern the ownership, control, and harvest of wildlife. "Your game warden is your neighbor. He wants to take part in your civic club activities; he will pass the collection plate in your church, or serve as a scout master, or provide motion pictures and talks for the garden club and the P. T. A. on the subject of conservation or wildlife appreciation. "Your game warden is not perfect nor is he a saint," concluded the executive. "But he is a dedicated man who is doing his best at his job, and with your help he'll do it better. Get acquainted with him."

Hunters Find 9,073 Bands in Ten Years

Some 9,073 banded waterfowl were reported killed within Texas boundaries from 1948 to 1958, according to a report released by the Wildlife Restoration Division of the Texas Game and Fish Commission. "These migrating birds came from as far away as Hudson Bay in Canada and parts of Alaska," said the director of the division. "Nearly every state in the Union was represented with a band." Of this total number, 6,875 were ducks or coots and the remaining 2,198 were geese. Pintails produced the most bands, with 2,988 being returned. Mallards carried 1,925 bands into the state, while redheads accounted for 608 bands. During the ten-year period, only two bands were recovered from ruddy ducks. A like number were recovered from buffleheads and greater scaups. Snow geese carried 1,228 bands into Texas marshlands. Some 436 bands were turned in by hunters bagging Canada geese. Another 396 bands were taken from the legs of blue geese. Jefferson County hunters returned 737 bands, to lead the State in band returns. Chambers state, while redheads followed third Arkansas county followed third

From the News THIRTY YEARS AGO

News items below were taken from the Friday, July 18, 1920, issue of The Foard County News:
Foard County's taxable valuations for this year are \$5,404,000 compared with \$5,466,820 for last year. Claude Callaway, assessor, stated the principal reason for the drop was due to personal property.
Marvin Jones of Amarillo, present Congressman of this district and candidate for re-election, was a visitor in Crowell Friday.
L. Kamstra is now conducting a jewelry shop in the front of Mabe's Shoe Shop.
A financial report of the condition of the Crowell Independent School District was made last Friday at the meeting of the board of trustees by L. A. Andrews, secretary of the board.
Dr. J. M. Hill's Ford coupe was stolen from the south side of his home some time Tuesday night.
Mrs. A. L. Davis of the Foard City H. D. Club won first place in the sheer wash dress contest that was held in Crowell Wednesday. Mrs. E. A. Dunagan of the Gambelville club won second.
Thalia lost its second game this season to the Phillips Petroleum team at Thalia Sunday. Only two games out of 31 have been lost by the Thalia ball club.
Only one bid was made to the commissioners court for cutting down the court house square and for paving this was made at the meeting Monday. A contract was not awarded.
Mr. and Mrs. Luther Denton of Crowell spent Sunday in the home of Mr. and Mrs. Bill Murphy at Margaret.
Mr. and Mrs. Walker Todd left the first of the week for Canyon to attend summer school at the Teachers College.
Mr. and Mrs. Bruce Gibson of Vernon visited in Crowell Saturday and Sunday.
Robert Oswald, Guy Todd, Ernest Spears and Ragsdale Lanier returned Wednesday from a visit to Medicine Park, Cordell and other points in Oklahoma.
Mr. and Mrs. Travis Brown and two children of Wilson, Okla., were here this week visiting relatives.
Ab Dunn and wife left last week for points in New Mexico and Colorado.
Ray Nichols of Vernon, governor of the 41st district of Rotary International, paid his official visit to the Crowell Rotary Club Wednesday.
The Thalia H. D. Club met Friday afternoon with Mrs. M. C. Adkins as hostess.

Fifteen negroes and three whites were arrested Saturday night while gambling on a farm north of Crowell.
Relatives of Frank Meason and Ben Meason held a reunion at the Frank Meason home Tuesday.
Miss Leoma Knox returned Sunday from Hollis, Okla., where she has been visiting her uncle.
"Arizona's Senator Barry Goldwater, easily the dominating personality on today's political spectrum drew wild applause and a standing ovation in the packed auditorium of New York's Hunter College day after the summit collapse. "I am not as worried about Russia," he said, "as the lack of moral might in this country of ours."—San Marino, Calif., Tribune.
"Someone has said that failure to take part in politics has its penalties, the greatest of which is to be ruled by your inferiors. This should be ample reason for all of us to vow that politics after all, is our business, as is the destiny of this land of ours. "We can have good government if we are vigilant and determined in our effort to attain it."—Chester, Ill., Herald-Tribune.
We have no quarrel with the man who has lower prices. He knows better than anyone else what his services are worth.

People Must Regain Control of Government

"Fiscal affairs are at the heart of the democratic process. Citizen concern over taxes originally led to our representative form of government. If democratic government is to survive, not only in this country but in the world, citizens must somehow gain control of government spending and taxes, instead of letting them dominate their business and personal lives."—New Haven, Mo., Leader.

They Don't Mean the Communists

"When knowledgeable statement tell us these days that people all over the globe are rising for freedom and independence, they do not, of course, mean those hundreds of millions within the Communist orbit."—Franklin, Ind., Republican.

Products of Future

Columnist Sylvia Porter writes: "Of every \$100 of goods you'll be buying only three years from now, at least \$12 will go for products not even being made today—for absolutely new things or products so changed that they reasonably can be called new."

Worried About Lack of Moral Might Here

"Arizona's Senator Barry Goldwater, easily the dominating personality on today's political spectrum drew wild applause and a standing ovation in the packed auditorium of New York's Hunter College day after the summit collapse. "I am not as worried about Russia," he said, "as the lack of moral might in this country of ours."—San Marino, Calif., Tribune.

Politics Is Our Business

"Someone has said that failure to take part in politics has its penalties, the greatest of which is to be ruled by your inferiors. This should be ample reason for all of us to vow that politics after all, is our business, as is the destiny of this land of ours. "We can have good government if we are vigilant and determined in our effort to attain it."—Chester, Ill., Herald-Tribune.

Farmers Home Administration Meets with Farm Families

Approximately 55 farm families, representing a good proportion of those using Farmers Home Administration credit in Foard, Hardeman and Wilbarger counties, have completed a series of individual meetings with F. O. Smith, the agency's county supervisor, to take a careful look at their 1950 operations and to make 1950 plans. Mr. Smith said this analysis is a service given by the agency which makes loans to eligible farmers to operate, improve, or enlarge family-type farms. Farm families in Foard, Hardeman and Wilbarger counties now using FHA credit include 52 with operating loans, 18 with emergency loans, 15 with farm ownership loans, and 8 who have soil and water conservation loans. Loans totaling \$226,760 have been made to farmers in this area since July 1, 1950. Good farm planning and record keeping are carried on throughout the year and play an important part in operations financed with FHA credit. As proof that good practices pay off, during 1949, 14 borrowers repaid their loans in full and are now obtaining their necessary credit from local banks or other lenders.

SEE TEXAS FIRST...
Not only is there more to see in Texas, but Texas also provides the best avenues to get there. Texas has more private roads than any state in the Union. Today there are 1,591 miles of superb divided concrete highways. The total will reach 2,700 by 1975. Truly, there's more to see in Texas—and you can see it better. Stone houses over 500 years old in Texas? Yep, in our Texas panhandle. Nope, they don't build 'em like they used to any more. These were built by the Pueblo Indians and were discovered in 1907. You can see them today just 18 miles southeast of Perryton. A life-sized statue of Popeye, the sailorman of newspaper cartoon fame, stands at Crystal City, south of Uvalde, in Southwest Texas. Why is it there? You guessed it. Crystal City is the spinach capital of the world.
