Who owns the Electric Company?

"I do ... it's part of my investments"

The Tailor is just one of the many people who

own the West Texas Utilities Company. We are owned by people. Thousands of people, like the Tailor, who invest their money to help us grow.

We are not owned or run by the city...nor by the state either. Not by any kind of government agency or co-operative. We are an independent investor owned business.

This is an important reason why you get the best possible electric service at such a low price.

A Flameless Electric Range means & cool clean Kitchen this summer. Economical too.,. for less than 3¢ the average family served by WTU can cook a complete meal the modern electric way. Ask us about FREE WIRING for your new electric range.

up 51%

in ten years

Everywhere in Texas, car owners pay 90¢ tax on every 10 gallons of gasoline they buy.

Does a tax this high-on a basic commodity like gasoline -really make sense? Gasoline taxes across the nation amount to a 50% sales tax-and that's five times as high as the tax rate on luxuries like diamonds and mink coats.

How did gasoline taxes get so high? Well, since World War II, there have been three increases in the federal gasoline tax alone. This brought the Federal tax to 4 cents a gallon, in addition to the State

tax of 5 cents a gallon. Looking at it another way, in the last ten years gasoline taxes have skyrocketed 51% -- yet the price of gasoline itself has risen only 5.5% during the same period.

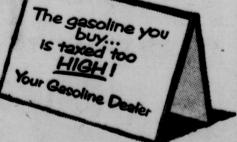

\$78 a year for gasoline taxes! Gallon by gallon, these taxes add up to a lot of money. Each year the average motor vehicle owner in this state pays \$78 for gasoline taxes alone. That's just a few dollars less than the average week's pay for most people!

Your gasoline dealer-who must collect these taxes from you-feels that gasoline taxes are much too high. More and more, thinking people are coming to agree. What do

HIGHWAYS AND GASOLINE TAXES

Your gasoline retailer, naturally, favors construction of the roads that the motoring public needs. He believes in fair and reasonable taxation for this purpose but feels that taxes on gasoline have now reached unreasonably high levels. He also believes that all special taxes on the motorist should be used only for highway purposes. Yet last year, out of every automobile tax dollar collected by the Federal Government from highway users, more than 40 cents went for non-highway purposes. If these automotive tax revenues were dedicated for highway purposes, there would be no need for the latest increase in the federal gasoline tax.

"These trails would shake the cab off an ordinary truck...but not our Chevy'

Few trucks are subjected to the body-wracking beatings that are part of a day's work for this Chevrolet Series 60 pulpwood hauler. It's owned by J. E. Fox, North Carolina logging contractor. As Bobby Fox, a partner in the business says, "Loaded with pulpwood, we drive over stumps and potholes you'd think would tear the truck to pieces. These trails would shake the cab off an ordinary truck, but not our Chevy. We can average an extra load a day . . . make \$45 to \$50 a day more with this Chevy than we can with the others."

OUR VALUE

In every weight class these Chevies are doing more work at less expense than trucks have ever done before. Drive one at your Chevrolet dealer's. It's an experience that could pay you big dividends.

"That 6-cylinder engine really per-forms," says Bobby Fox. "It's got the lugging power we need in the woods and walks right along with a full load
