# Ready-to-Use Foods Big Help in Hot Weather.

#### By EDITH M. BARBER

THESE are the days when the housekeeper takes advantage of the ready-to-use foods and makes at all her usual quick meals a matter of minutes as far as their preparation is concerned. Perhaps she will select a variety of sliced cooked meat which may include various types of what we call summer sausages, although most of them can be obtained in winter.

With ham or chicken she may like to use one of the fancy loaves of mixed meats, liverwurst and a salami type of sausage. By the way, if you are pernickety about the talk to me about white." usual garlic flavor, you may now get salami minus garlic. And have you tried the very popular new sausages flavored with Angostura bitters? One of two kinds of sliced. cheese also may be arranged with the meat and a most attractive platter will result if a garnish of green leaves, parsley and radishes is added.

With a platter of this sort, you may like to serve a smaller platter of relishes, which is colorful and refreshing, if slivers of raw carrots, dill pickles, cucumbers and flowerets of raw cauliflower are arranged in alternating plles.

Left-over cold meats may be "I Always Did Like to Live in made into a most appetizing jellied loaf if thought is taken one evening

And particularly, Land! do we like those pictures of dull, But where? What land, on our drab uninteresting rooms made modern charts? Some Bahaman isover into pleasant, smart and welland, without a doubt. The Indians coming interiors. We should have celled it Guanahani. Columbus reliked a "before" and "after" picnamed it San Salvador. But which ture of a bedroom we saw recently.

## island is San Salvador? Seaman First Saw Land.

room-a suite of mahogany furni-Unfortunately, Columbus' original log-book disappeared soon after his death, but not before Fray Las Casas, a contemporary, had made faithful copies of parts of it, one part being dated October 12, 1492. The cleric, no man of science, failed to preserve the mathematical reckonings which would have located the island exactly. He did however extract literally Columbus' picturesque description of his landfall. And that is how we know a stiff wind was blowing toward the west on the night of the discovery: and that Rodrigo, a scaman, was the first to see the tongue of land gleaming in the moonlight.

sibility that Watling might be the right island. But when I flew over the exposition's monument and down the east coast, I saw, not one

coral reef paralleling the coast as Columbus described, but three. The caravels would not have dared come within a league of this shore, day or night, and certainly not while a high wind was blowing, as the log-book recorded.

### Successful Search.

But the flight disclosed something else-"a large lake in the center of the island"-very large, and precisely in the center. Suddenly alert, we climbed higher in the seaplane, to 8,000 feet . . . Watling's island was visible below in its entirety, and it was unmistakably shaped like a bean. I looked for the encircling belt of coral reef. It was there, surrounding the island with scarcely a break. But what about the harbor? The coast was without any indentation whatsoever. And then I saw the harbor too. It was made by the reef swinging far out from shore at the northern end and back again, leaving a perfectly calm basin a mile wide inside the barrier, which acted as a natural breakwater. The basin was indeed big enough to hold all the ships of Fifteenth-century Christendom.

San Salvador! I had my island! But since it was apparent, even from the air, that the landing-monument was wrongly placed, I decided to search further and discover, if possible, the actual spot where Columbus stepped ashore in the New World.

To this New World cross-roads. therefore, Columbus' remains were transferred in 1540. The leaden casket, when it arrived from Spain, was reinterred with proper ceremony in the newly-built cathedral on the gospel side of the altar. At the same time the body of Diego Columbus, the son, was transferred to Santo Domingo and placed beside Both graves that of his father. were marked with marble slabs, which remained there to identify them for a hundred and fifteen

changed all that into a room of infinite charm.

Before it had been a typical bed-

The walls were repapered in a Weigh the crushed berries and add plain white satin-striped patternthe stripes wide and very "new" looking. The ceiling was painted a lovely, watery green. This home-

Reframing Old Pictures Makes All the Difference.

maker made her own curtains for the three windows. She bought yards and yards of white fine French voile and made straighthanging, very full glass curtains which came to the floor. At the top of each window she swag-draped a length of heavy green silk cording with long green silk tassels falling at the high points of the drapery. A white silk bedspread, corded with

the green silk rope carried that note to its logical conclusion. Family pictures were reframed

n unusual small oval and shadow box frames and grouped in one corner of the room, and several fine French engravings took their places on the more important walls. These were framed uniformly in pale green with a narrow gold mat around each picture. The room was carpeted in a deep blue-green and a really luxurious white throw-rug was placed in front of the dressing table. A small gilt French chair was bought to replace the old dressing table bench and a slipper chair was reupholstered in a white striped silk. The entire "after" scene was different, charming and very modern. By Betty Wells .-- WNU Service.

The same Spanish copy of the original record describes "San Salvador": "This island is guite large and very level. It has a large\_lake in the center. The shape of the island is that of a bean, and the vegetation so luxuriant that it is a pleasure to behold it." On October 14, after two days ashore, Columbus also wrote: "At daybreak I had the

boats of the caravels made ready and went along the island in a north-easterly direction in order to see the villages. The inhabitants,

coming to the shore, beseeched us to land there, but I was afraid of a reef of rocks which entirely surround the island. But within this belt is a harbor of such size, that there would be ample room for all the vessels of Christendom."

This is not a great deal of information. But it is all that exists, and with it my pilot and I laid our course for the Bahamas.

Four days I had spent exploring from the sea and the air, and so far not one of the islands had remotely

fitted the description given in the log-book. Perhaps Columbus, who did not hesitate to englamor his discoveries, was romancing again, Perhaps there was no lake, no harbor, except in his imagination. There still remained, however, one more island to be explored-Watling's island, the seawardmost of all. Watling's island was in the news in 1892, when the directors of the Columbian exposition accepted it as San Salvador and raised a small monument on the east shore to mark the place where Columbus presumably landed. An excellent book by Rudolf Cronau, more care-

fully reasoned and more persuasive

The east coast, facing Spain, was obviously out of the question, for its unbroken phalanx of reefs makes it unapproachable from the sea. Columbus would not have ventured such a hazard in a rowboat, much less a sailing ship. However, on

the west coast, right beside the hamlet of Cockburn, there is a beautiful beach, which boats can reach through a wide break in the coral wall. Columbus, as he reports in his log-book, having seen the moonlit tongue of land, lay to until daylight: and with the prevailing east wind, must have drifted past the northern tip of the reef. And then, during the morning, he sailed south. and finding the breach in the barrier, steered through and dropped anchor before the unobstructed beach. And it was here, on the leeward, the safe side, of the island, that he went ashore.

> My seaplane, descending to within 30 feet of the sea, easily spotted the low coral cay that Rodrigo had first seen at the northern tip. We followed Columbus' course down the west coast, into the opening in the reef, landed on the lagoon inside. and came to a stop on the very same spot, I suspect, where the Santa Maria dropped her sails.

#### Exploration of Harbor.

What schoolboy has not seen the painting of Columbus disembarking on the beach with his sword aloft his flag unfurled, and the Indians staring at him in wonder? I should have liked as a dramatic an arrival. But instead of a Spanish admiral and his captains all dressed in purple velvet, two grimy aviators came ashore dressed in cotton coveralls. and unfurling nothing more royal than a couple of pongee mufflers, with which we were removing the spattered oil from our eyes. The negro "Indians" however (the inhabitants are entirely negro, and number no more than 75) were sufthan the others I had read, also ficiently astonished, for ours was

to France. Unwilling to surrender the body of their great national hero, the Spaniards decided to remove the Columbus casket to Cuba. They dug into the cathedral floor, below the altar, just where tradition said the grave lay. Coming to a lead casket they reverentially removed it to the cathedral in Havana, and sealed it in a vault in the presbytery wall.

#### **Opening the Casket.**

After that the Santo Domingo cathedral, bereft of its glory, was allowed to fall into such decay that by 1877 it had to be completely rebuilt. Delving below the stone floor before the altar, the workmen came upon an ancient lead casket just like the one removed to Havana in 1795. On the lid were inscribed the abbreviations, D. de la A. per Ate., which Rudolf Cronau, the great authority on Columbus, has translated "Descubridor de la America. as Primer Almirante"-that is, Discoverer of America, First Admiral, On three sides of the box were engraved, one to each side, the letters C. C. A .- which could stand for Cristoval Colon, Almirante.

Realizing that this find was probably of extraordinary importance. the bishop of the diocese invited all the dignitaries of Dominican state and church, as well as the foreign consuls, to witness the opening of the casket. When the lid was raised it revealed on its under side a third inscription, Illtre y Esdo Varon Dn. Criztoval Colon, which could only be interpreted as "Illustre y Esclarecido Varon Don Cristobal Colon"-Illustrious and famous Baron Christopher Columbus.

There could be no doubt whose bones these were, crumbling in the bottom of the box.

It was not October 12 when 1 reached Santo Domingo to visit the old cathedral. Nevertheless a friendly church official granted me an extraordinary favor by opening the bronze chest and permitting me to examine the casket privately and at length.

cleansing from sin III. A Perpetual Memorial (vv.

24-28). God wants his people to remember. We, like Israel, are to remember the bondage from which we were delivered. Down through the ages the Jews have kept the Passover. Our Hebrew neighbors do it today. Let us honor them for their obedience to God's command and

at the same time seek to point them to the One who is the true Passover, Jesus Christ.

IV. Christ Our Passover (I Cor.

Let us add to the assigned lesson text this New Testament passage which speaks of our Lord Jesus Christ as "our passover . . . sacrificed for us."

The bondage in Egypt was terrible in its afflictions and sorrows, but far more serious is the bondage in which men find themselves under sin and the rule of Satan. Surely there is need of divine redemption, and there is none to bring it to us but the Lamb of God. He was the One who without spot or blemish (I Pet. 1:19) was able to offer himself in our behalf that in him we

might find "redemption through his blood" (Eph. 1:7, Col. 1:14). "Is the blood upon the house of

my life? Is the blood upon the doorpost of my dwelling place? Have I put up against the divine judgment some hand of self-protection? Verily, it will be swallowed up in the great visitation. In that time nothing will stand but the blood which God himself has chosen as a token and a memorial. "The blood of Jesus Christ, his Son, cleanseth us from all sin' " (Joseph Parker).

**Daily Duties** "As the duty of every day requires." That is a simple rule. Let it be pondered well. Resolve when you awake that it shall be to some faithful purpose, and that your renovated powers shall be obedient to Him Who has renewed them. Let not the opportunity that is so fleeting and yet so full pass neglected away.-Frothingham.

It's a cinch. Never a slip. Couldn't miss if I tried. I'd have poured my own months ago if I had realized what a soft job it is.

Well, no use being stingy, with a whole quart set out for me. Might as well give it the works.

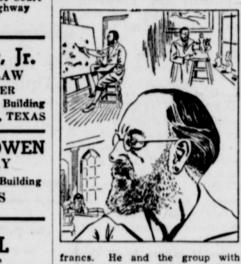

Now here's the thing that takes real skill. For I've heard Grandma say there's many a slip 'twixt the cup and the lip.

### APPRENTICE

HENRI MATISSE, one of the greatest of modern French artists, whose works now sell for hundreds of thousands of francs, might have been a commonplace lawyer had not Fate stepped in when she did. He was born in a small town in Picardy in 1869, son of a wheat dealer. His childhood was uneventful and he became a lawyer's apprentice. Then, Fate came along with an attack of appendicitis which left him an invalid for many months. In order to keep occupied while convalescing, he took up painting; and it proved so fascinating that he never opened another law book. Matisse's first paintings, in the

early 1900s, brought but a

which he associated himself, all famous now, were called "the wild Building beasts" because of their mad style. Their paintings outraged conservatives of the art world. Matisse was

accused of willful eccentricity, senseless disregard of nature, and a deliberate intent to advertise himself. His paintings were refused exhibition space in many galleries, but slowly he built recognition for \_ist?

hardly buy enough bread with the few francs his work brought could now afford to donate the picture to them, accepting only one franc in order to make the transaction legal.

SINGER WAS A BISCUIT PACKER

USUALLY we are inclined to give too much credit to chance or luck in analyzing the success of prominent people, forgetting that without the talent to take advantage of an unexpected opportunity they could not have risen. Helen Morgan's sudden rise to fame is an example. Born in Danville, Illinois, her fa-

mother practically penniless. when she was five years old, paint thrown by another child partially blinded her, and she had to spend a full year in a dark room. She sang to herself to pass the long dark hours and later she sang in a church choir in Chicago. There, she worked as a manicurist, a waitress, a comptometer operator, and a model She was a ribbon clerk at Marshall Field's department store and a bis-

cuit packer for the National Biscuit company. None of her jobs lasted long, for her eyes were always on the stage. She sang occasionally in cabarets and finally got a job through Ziegfeld in the chorus of "Sally." Dissatisfied, she quit, and Billy Rose hired her to sing in his Backstage club.

That was Helen Morgan's lucky chance. The Backstage club was so small that she was forced to sit on the piano! Most of us would consider it a disadvantage, and perhaps she did, too. But the public was interested; she became a sensation, and speedily rose to fame. Musical comedies and motion pictures starred her, and soon she was singing in a night club named for her, at a salary of \$1,500 per week. Today she is known the world over. Perhaps, if Helen Morgan had not had to sit on the piano in the Backstage club, she would never have risen to stardom. Perhaps, she would have sung comparatively unknown for a couple of years, and gone back to manicuring or biscuit packing. But, remember, she had something worth delivering when she sat on that piano.

massive kauri pines, some of which measure 22 feet in diameter and have reached hoary ages that rank them next to the sequoias. It also is the home of the smallest known representative of the pine-tree family. Giant fuchsias grow to the height of 40 feet: a white buttercup has blooms four inches in diameter: flax is produced from a lily; man has imported all of the mammals, and many of the native birds cannot fly.

The Maoris were the first-known colonists of these southern islands. Guided only by the stars and a knowledge of the winds and ocean currents, they boldly piloted their slender double canoes from their homeland of "Hawaiki" (probably Tahiti and the Cook islands) to the shores of New Zealand in the Fourteenth century. Legend credits them with having followed the sailing directions of the famous Polynesian navigator, Kupe, who is said to have preceded them by 400 years. To the new land they gave the lilting, vowel - studded name, Aotea-roa, which is variously trans-lated as "The Long White Cloud," The Land of Long Daylight," and The Long, Bright Land."

Here they lived, increased, warred against each other, and cultivated their taro and the more important kumara, or sweet potato, which they brought with them. Then came whalers, missionaries, and traders; and colonists arrived with gunpowder, conflicting social standards, and the desire to carve out new homes.

#### **Principal City Thrives.**

Protracted Maori wars, contested land claims, the discovery of gold, land booms, and a heavy depression-New Zealand passed through them all before she settled down to economic equilibrium.

With its 221,300 people Auckland today has more than twice the British population of the whole country in the early 60's of the last century. As a ship nears the end of its 6,000-mile journey from the west coast of the United States, or the 1,200-mile span from Australia, it skirts the islands that stud the cobalt waters of Hauraki gulf, enters Waitemata harbor, and finally ties up at the very foot of the thriving city.

The early colonists chose well when they staked out this harborthe country as capital and now is greenish-blue Milky Way. 1 ,

Rolling southward in January from Auckland on the ribbon of concrete and asphalt, you pass soon into smiling open country, checkered with fields. Men are having and herds of sleek cattle and sheep graze on a hundred rolling hills and valley.

powerful native race.

narrow it in places to a scant mile.

Abounds in Flowers.

town planning so far as the streets

broad park spaces.

year round.

Agriculture was the task to which the New Zealand colonists first directed their efforts, but in the passing years they have come to rely more and more on pastoral enterprise. An experimental shipment of frozen meat sent to England in 1882 ments, an illustration of all pointed the way out of a pinching depression that had followed the collapse of a land boom.

#### **Historic Battle Scenes.**

Today New Zealand butter and other dairy products have attained world-wide distribution. Of more than 4,300,000 cattle pasturing on the land, nearly half are dairy stock. More than 28,600,000 sheep also range North and South islands. making New Zealand the world's seventh largest sheep - producing country and the fifth largest in wool production.

Near the little town of Mercer was the old frontier between Maori and colonist. The whole region is historic ground, for here in 1863-4 the Maori warriors tested the best mettle of the British troops and long made pioneering a perilous venture. Today, instead of a battleground. the district is a peaceful, Englishflavored countryside. Upon a hill now stands the St. Stephens Maori Boys' college, where Maori youths are being trained for useful pursuits.

Just beyond Hamilton, the largest provincial town in Auckland province, you may run into peat fires that are smoldering and eating into the black soil in many places. The continued dry, hot summer weather causes an outbreak of many of

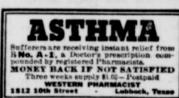

these destructive fires. A few miles to the west of the main road that leads to Te Kuiti are the fascinating Waitomo caves. Interest in the caves hinges on a tiny worm-an unusual carnivorous glowworm-scientifically, the Boletophela luminosa.

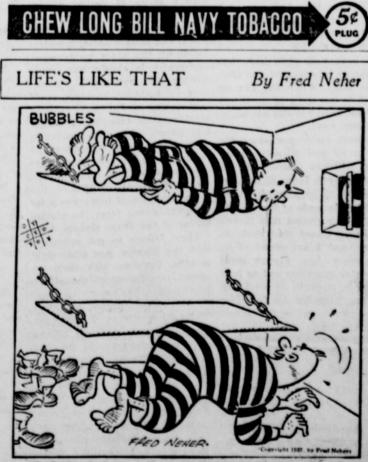

The Glowworm grotto is a magic ally uncanny spot. Floating along in a boat on the stillness of a subterranean stream, one looks up at myriads of these tiny creatures, with their lamps alight, that cover side settlement that once served the roof of the cavern like a dense,

public education in Texas.

school apportionment is made in the interest of longer terms of school for the children and in hopes hopes of better paid teachers, which will of course raise the standard.

One of the reasons why Texas is only 36th in the educational standard is because of the inadequacy of salary paid its teachers. While the average salary paid public school teachers is only \$840 per year in Texas, it is \$2250 in New York, \$2000 in Pennsylvania, \$2000 in Illinois, and I do not recall any southern State wrere the average teachers salary is as much as \$1000 a year.

The yearly requirments of teachers at their own expense makes it almost an impossibility to get a decent living out of the aversalary paid for the years work. All this is bound to have a bad effect on the teacher standard and has an undesirable influence against teachers wanting to make teaching their life work ...

Maybe we can get along with a lazy ignorant lawyer, maybe we can put up with a two bit preacher, and maybe, if we have to, we can endure inefficiency in many lines, but certainly we don't want to make the mistake of having incompetent teachers to instruct our children. # About Town With Otto B. Grate

How did you like last week's little excursion? Now if you can't say something nice dont say any thing. (Silence reigns)

Im still here and still trying to tell you what a good time you can have at home if you will put down those travel leaflets long enough to find out a few things. Go west, east, north, or south, what to take with you and check be remembered. your Paper's Around Town column to find who to take with you.

I'm a push over for a smile and one has both your old reporter goes out like the said light. Mr. chairman, for the most pleasant, painless salesladies in town, let nominate Mrs. Lawerence, Miss Eliska Gilliland and Mrs. Drug Store, The post office and the Theatre in the order named. For a pleasnt evening a stone's throw from home go to see Cafe Metropole at the Plaza next Sunday and Monday. As far as Im concerned this could get by with Tyrone Power alone as the attract ion but fortunately for those of you who want a little more than just a personality it has a good story with sparkling dialogue Wednesday and Thursday has oldCut-ups Martha Raye those and Bob Burns covorting through Mountain Music.

The candid camera is all the rage. The snoopers are already taking the town in an effort to something unusual in the get way of suprise shots Chief one you must be careful not to meet Eva Robinson who carries a mean kodak.

Whats a better name for House Keeper? Battle Axe? No, you dope, that won't do If anyone

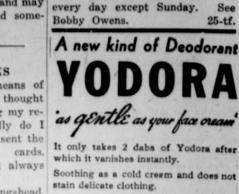

asks you such a question you'll know better that that to answer cause you want to enter the West Texas Utilities Contest Yourself. See about the details. Be with me again next week

won't you? You never can tell, keep reading this column and may be some day you'll find something good in it.

CARD OF THANKS

I wish to take this means of young man, and you will find a thanking all who were so thought made to order picnic spot that ful and kind to me during my rejust can't be beat. Part of the pop cent illness, and especially do I ulation has already found this out wish to thank those who sent the so why not you? Check your beautiful flowers and cards. In compliance with a law passed at the last session of the Legislature, Your Gas Company will begin to odorize the gas supplied to its customers within the next few days.

Notice

**TO GAS CUSTOMERS** 

If you should notice an unusual odor about your premises, your gas piping and connections should be checked for leaks. For this purpose we advise that you call your plumber in order that any necessary repairs can be made.

Odorization of gas does not affect your gas service, but it may enable you to determine whether your gas piping needs attention.

# CAUTION:

Do not look for leaks with matches or an open flame of any kind.

•• F THE amount of food taken is greater than necessary to provide fuel for the energy that is used or expended, the excess food is really the source of the accumulation of fat in the body; if the amount taken equals the amount required for the energy needs of the body. the weight remains stationary; if the amount is less than required to

provide for the energy used, the stored up fat is drawn upand loss of weight follows."

"Stated in the simplest language, it follows that the diet or food treatment of overweight consists n using less nourishment than is needed to maintain

body weight." Dr. Barton

The above are simple statements and known to most overweights, but as they come from Prof. Sanford Blum in his book "Practical Dietetics in Health and Disease." they carry the weight of one of our greatest authorities on food and diet.

reducing weight, that is rules that will fit every case, nevertheless the main idea that food must be reduced is the ideal or motto that should be adopted by every overweight who is in earnest about getting rid of his surplus fat.

Naturally, it is at once realized that a big framed individual doing hard work outdoors is going to need more food than an undersized one who works sitting down indoors.

# When to Reduce Diet.

Likewise it is more sensible to reduce the diet of an individual who regularly overeats than that of one who is a small eater, because there is a limit beyond which it is unsafe to further reduce the food intake.

It seems simple enough to outline a diet containing a definite number of calories or heat units, which being less than is being eaten at present, should, therefore, reduce the weight in proportion. Unfortunately no one knows just what will happen to certain foodstuffs in every individual because each body handles foodstuffs in its own individual way. It is not then the amount eaten but the amount the body uses that is important.

### **Principles of Treatment.**

Dr. Blum tells us that certain general principles are noteworthy in the treatment of obesity (overweight).

1. Overweight may be combatted by reducing the amount of food below the level required to maintain body weight.

2. Certain kinds of food have greater calorie (heat or fuel) value than others. Alcohol, fats, carbohydrates-starch foods such as potatoes, bread, sugar-are "fattening" foods. They have high caloric values and in laying out the diet for overweight the quantities of such foods should be limited or reduced in amount.

3. Some kinds of food have small

year.

tion take the ground that the important thing, both from their own selfish interests-which they generally construe as the good of the country-and the carrying out of the old Republican economic ideals, is not only to prevent the re-election of Franklin D. Roosevelt in 1940 but to prevent the election of any one chosen by Roosevelt who will carry on the New Deal policies.

The only thing that holds the Democratic party together at the moment, many of these writers insist. is the presence on the field of battle of their enemy, the Republican party. Some of them make the point that the old truism that there are more Republicans in the United States than Democrats-that this is a Republican country-is no longer accurate. A new generation has

come of voting age, which has no party ties rooted in the old tradition, they insist, and apparently a very large majority of the younger folks have very definitely affiliated with the Democratic party.

of hot air, and when it soars aloft Even the often made statement by Republican Chairman John D. M. Hamilton about the tremendous number of Republicans who voted same comparison might have been in the last election, nearly sevenapplied not alone to the balloon teen million, is the bunk, many of but to the gentleman who launched these writers go out of their way to assert. They point to the fact So let's remain calm. It's tradithat a tremendous number of these "Republican" votes were actually cast by Democrats who have no love whatever for the Republican party, its traditions or leaders. They boomer ever succeeded in taking instance Alfred E. Smith, John W. Davis, Bainbridge Colby, former Senator James A. Reed of Missouri, and though he never made a public statement that he was going to vote with modern improvementsfor Alfred M. Landon, many writers to prairie schooner days when restalso mention Newton D. Baker.

#### less Americans are living on wheels Would Scrap G. O. P. and housekeeping on wheels and

There is no way of telling how many Democrats, unhappy about the New Deal tendencies of their party, voted for Landon. But every one of the folks writing in recently and asking that the Republican party be scrapped in order to open a clear road for an effective conservative opposition to the New Deal seems to think a great many.

some settlers were discussing the Yet the opposition to being relative merits of various makes of classed as a Republican, or to givthose canvas-covered arks which ing aid and comfort to a revival of bore such hosts of emigrants westthe G. another.

#### T'S confusing to read that poor decrepit Jim Braddock, having reached the advanced age of thirty four or thereabouts, is all washed up, and, then, in another column, to discover that leading candidates to supply young blood on the Supreme court bench are but bounding juveniles of around sixty-six.

This creates doubt in the mind of a fellow who, let us say, is quite a few birthdays beyond that engendered wreck, Mr. Braddock, yet still has a considerable number of years to go before he'll be an agile adolescent like some senators. He can't decide whether he ought to join the former at the old men's home or enlist with the latter in the Boy Scouts. . . .

#### Quiescent Major Generals.

COMETHING has gone out of life. S For months now no general of the regular army, whether retired or detailed to a civilian job, has talked himself into a jam-a raspberry jam, if you want to make a cheap pun of it.

May be it's being officially gagged for so long while on active service that makes such a conversational Tessie out of the average brigadier when he goes into private pursuits and lets his hair down. It's as though he took off his tact along with his epaulettes. And when he subsides there's always another to take his place.

You see, under modern warfare the commanding officer is spared. He may lead the retreat, but never the charge. When the boys go over the top is he out in front waving a sword? Not so you'd notice it. By the new rules he's signing papers in a bombproof nine miles behind the lines and about the only peril he runs is from lack of exercise in the fresh air.

Maybe, in view of what so often happens when peace ensues, we should save on privates instead of generals.

**IRVIN S. COBB.** C-WNU Service.

ocratic nominee, running against a Republican.

Without the national Republican party opposition to hold it together. many of these letter writers believe, the Democratic party would almost immediately split into two parties, giving the country the conservative and progressive division on economic lines to which it is entitled, and getting rid of bygone issues, labels and prejudices which should no longer be permitted to becloud our presidential campaigns.

#### **Holding Corporations**

Not many votes are involved, so there is no telling what congress will do about it, but there are a great many individuals on Capitol Hill who think the personal holding corporation, in many instances, is perfectly moral and justified.

The best demonstration is one that did not happen. But let us take the case of the author of "Gone With the Wind." That book came out just over a year ago. It is generally estimated to have earned one million dollars for Margaret Mitchell. All of that million was earned in two calendar years, most of it in the first. And the government will take approximately half of that!

Now no one would object to the government taking fifty per cent of an income of half a million dollars a year-if the income came every year-if it was interest on invested capital or earnings from a going concern.

But here is a case where an author, certainly from a comparative standpoint, eked out an existence during the ten or fifteen years in which this major opus was under construction. Furthermore, while this statement may be confounded later, most authors think it is extremely unlikely that the writer of "Gone With the Wind" will produce another highly profitable work. As a matter of fact, there is no indication to date that she will attempt it.

Now to apply the corporation idea. If Margaret Mitchell had incorporated, the government would have taken fifteen per cent of that one mil-

ment reorganization proposal made by the President. Mr. Roosevelt can get part of this without any delay whatever, notably the half dozen additional secretaries he wants. But certain phases of it would be fought to the death by senators and representatives, some of whom are in entire sympathy with the President

on most of his proposals. But if Mr. Roosevelt should take the advice given him by Vice President John N. Garner before that astute gentleman left for Texas, it would amaze every one how quickly congress could clean up its odds and ends, clear its calendars of everything to which there is no real opposition, and scatter.

It has been apparent to every one with the slightest interest in looking beneath the surface that congress has been stalling for months.

# **Time Not Wasted**

But meanwhile the time is not being entirely wasted. There are reactions from the constituents of the congressmen. They gradually find out enough about home sentiment to determine whether they dare support or oppose certain measures. They can appraise the value of trades they contemplate making.

This year, however, this watchful waiting process has come pretty near to breaking all records, largely because of the two major pieces of legislation. One of them, the Supreme court proposal, is a major issue. The other, government reorganization, involves personal pol-

itics. And while they have hung back on this, with the senate adjourning for British week-ends, and meeting only a few hours-sometimes minuteswhen it does actually convene, the labor issue has become more important than anything actually on the agenda. In holding congress in session to

break the filibuster that is certain if the President pushes his Supreme court plan, Mr. Roosevelt is acting against the advice of most of his friends and party colleagues. Bell Syndicate.-WNU Service.

All over the country peture fans are enthusiastic over Claudette Colbert's grand comedy, "I Met Him in Paris," but in Hollywood it looks as if the run will never and, because the same people come back to see it again and again. His eyes reflected the flame i, Henri standing in the middle e floor, with the blinking green ot making queer noises under arm, or was this more night- Mrs. Hunt." e? She was awake. Sam was as he stood with his finger on switch. Jed Stewart was real, e puffed his lips in time to the as swing of the chair he clutched. Henghastly face, distended eyes, ri' the savage invectives which teeth, were real.

"Cut that line!" Sam took a step toward the butler. "You should appreciate this little surprise party instead of acting as if you'd stepped into a nest of scorpions. It wasn't but a couple of hours ago I saw you in this very kitchen dressed-or undressed-for bed. Why did you go out?

Henri made a desperate attempt to steady his quivering mouth. He looked like an innocent pris-oner haled before an accusing judge; his expression was incredibly grieved as he huddled the parrot under his arm and twisted his soft hat in one hand. He appealed to Brooke.

"I don't know why your brother should speak to me as if I was a criminal, Miss. Haven't I the right to go out at night, even if I had started for bed?" He attempted to inject the virus of defiance into his uneven voice.

Of course you have, Henri, but the papers are so full of burglaries and hold-ups that when we heard you stealing in we didn't know but what it was our turn. Where did you find Mr. Micawber?"

"That's why I went out, Miss. Couldn't go to sleep, had him on my mind. Queer where I found him. Everything's queer tonight." Henri shuddered. "Nothing strange has been happening in this house, has it?"

"Nothing at all, Henri, nothing at all," Sam assured quickly. "We sat uj talking and got hungry again.'

"I'm glad of that, Mr. Sam, that nothing strange happened, I mean, because I-I found things terrible wrong outside."

'Wrong!" Not until she felt Sam's foot on hers was Brooke conscious of her explosive exclamation. She noticed that the butler's long cruel fingers shook as he passed them over his slack mouth.

"I don't wonder you're upset, Miss; you'll be more so when you hear that the old madame's limousine is gone."

Henri's thin quavery voice broke the spell.

"Have you been hunting for the parrot too, Mr. Mark?" Mark Trent's hand was unsteady as he held a lighter to his ciga-

garage, Inspector." as he looked at the butler. "Not for the parrot, Henri. I'm are. hunting now for the man who killed

CHAPTER X

Mark Trent flinched as he approached the white cottage. It seemed days since he had driven away from this very house in the gritted through his chattering limousine filled with his aunt's silver; days since the message had come to Cassidy's garage from the police that Mrs. Hunt was dead and he had left there in a flivver with Mike at the wheel. They had stopped at Lookout House to make sure that the Reyburns were safe the middle of the night, and then I before they had burned up the road to get here. But it hadn't been

days, not much more than an hour had passed. No use waiting, he must go in.

As he entered a small livingroom, Inspector Harrison was kneeling by the fireplace. His piercing eyes glittered as he looked up and nodded to Mark. "They got her all right."

Mark Trent stepped forward, blindly for an instant. He sunk his teeth deep in his lips to steady them before he looked down.

Lola, the woman who had been his wife, lay on the floor. She was dressed for the street-had she been about to drive away the limousine full of silver? The question flashed through his mind only to be instantly submerged in a flood of pity. She looked so young, so shabby, so hapless. Her shabbiness hurt him most, she had been so exquisite. He was glad that he had made her that allowance. Her hat had fallen off. A current of air stirred a lock of her dark hair. Her hands were still now. One gripped an open bag, the fingers of the other were bruised. He dropped to his knee beside the inspector.

"Can't something be done? Can't we move her to a couch?" "No! No, not until the coroner

comes. "What happened?" "They got her rings. She had

rings, hadn't she?" "She had when I saw her-a few

days ago. Valuable rings. Other jewels too." "Then I guess we got the motive. Better come away, boy, you can't do anything." Inspector Harrison

suggested in his persuasive voice.

Foe of Demoniac Forces.

EW YORK. - Anatole France concluded his "Revolt of the Angels" with the observation that man's only hope lay in "The Conquest of the Demons of Anger and Fear in His Own Soul." The quotation may be a bit awry, since the book is not at hand, but it is pertinent to today's news of the expedition to the arctic in the interest of demonslaying-the first of its kind, barring Siegfried's hunting trip in the land of the ice queen.

The above ailusion suggests no over-simplification of the purposes of Dr. George W. Crile, famous surgeon and bio-chemist, who is heading a voyage to the Arctic. Specifically, he fights the demoniac forces of anger and fear which now range the world and which any newspaper reader can recognize on sight. At seventy-three, he hopes to find in the Far North knowledge which will strengthen his arm and temper his sword, supplementing knowledge which he previously gleaned in the African jungles.

Seals and walruses, neither of them particularly angry or scared, will be studied by Dr. Crile-not as examples of dignity and complacency, but as the owners and proprietors of certain unique energyreleasing mechanisms that seem to work better than the human carburetor, the suprarenal gland system. Dr. Crile has dissected and studied about 800 jungle animals in the interest of civilized human behavior, and now, to piece out his mosaic of life energy, he goes North -not to the ant but the sea lion.

These researches have enabled him in certain instances to cure chronic anger and fear. He finds that in this day of newspapers, radio and press agents there are high-voltage stimuli loose everywhere which make high blood-pressure the curse of the age. The name "John L. Lewis" will make one citizen apoplectic, while "Tom Girdler" will induce a similar embolism in another.

For aggravated cases of this kind, Dr. Crile has a simple "Denervation" operation, in which he throttles down the too rampant adrenal glands. Judging from the past, he could operate on the opposed principals in a labor dispute and have them falling over each other to sign an agreement.

A resident of Cleveland, he is the tounder and head of the Cleveland Clinic, which is carrying through profound studies of the adrenal and thyroid glands, and of bodily metabolisms generally. His researches in the world war vastly widened and deepened the knowledge of the mechanized functioning of the endocrine glands.

These discoveries led him to describe the human body as an automobile, in which the brain is the battery, the suprarenal gland system the carburctor, the liver the gasoline tank, the muscles the motor, and the thyroid gland the gearbox.

In Africa, Dr. Crile shot and disected hundreds of animals, from

inspector the rest that happened;

a trotting park to me to date, Bill, but tonight it seems a terrifying. Ma. Won't I, Bill?" "Sure, Mike, sure. What did you

"Take it easy, Maggie. Tell the

Henri shrugged thin sloping shoul ders. "That's what I asked myself when I opened the garage door and the big car wasn't there."

What did you do after you discovered that Mrs. Dane's car was missing?" asked Brooke.

"I ran to the Other House-you'll excuse me, Miss, for going to Mr. Mark first; I've always thought of him as being the heir, you see."

'Don't stop even to explain. Henri. Can't you see that we are frightfully excited? Perhaps something more than the car has been stolen. Did you find Mr. Trent?"

"No, Miss, and there's something queer there too. That Jap, Kowa, came rushing to the door when I kept my finger on the bell, and he shouts:

"'Where's my boss? I been over house, one, two, t'ree time. Boss gone! He been kidnaped, I t'ink! Loud noise, Mr. Jed's room. I run there quick. Green parrot in bathtub, swearing fine."

"I ran upstairs for the parrot, thinking the Jap had a bad scare on and I'd see Mr. Mark somewhere. But I didn't. The Jap and I looked everywhere but he was not there."

Tense silence in the white and green kitchen. Chilled and exhausted by his foray into the outside world, the parrot huddled within the curve of Henri's arm making sounds in his throat like a tribal dialect. The faint scent of bacon lingered in the stillness, a stillness haunted by tragic conjectures and possibilities which turned Brooke's blood to ice. Sam laughed from sheer nervous tension. Jed Stewart lashed at him furiously:

'You would do that! It's all theater to you Reyburns, isn't it, and side - splitting theater at that. I was woke up by a car stopping at Where's Mark? That's the only thing I want to know. Where's car. We don't have much late trade Mark?

"Present."

"Probably those ropes stopped beat it downstairs an' come into the circulation. Were you-Mark didn't hear the rest of the inspector's question. His eyes were on Hunt's right foot. Between the upper and sole of the unlaced shoe the inspector encouraged. "What was a faint line of red.

### CHAPTER XI

From behind the tea-table in the living - room at Lookout House, Brooke Reyburn watched the sun fling the earth a spectacular good-When I saw she wasn't breathin' I beat it to the garage, an' I night.

Mrs. Gregory, in a chair beside the crackling birth fire, set down

"Is it only two weeks since the tragedy at the filling station?" asked Brooke. "When, last Octoforehead and his eyes were closed. ber, I told Jerry Field that I was coming to Lookout House to live, he said:

"'What will you do marooned on a rocky point of land in a place where the residents dig in and nothing ever happens?'

"He can't say that nothing ever happens here now. The days have flown and have left behind them hours smeared with police questioning; men swarming over this house for finger-prints; newspaper front pages shrieking clues which were corrected in the next issue; skating and lots of it; poinsettias in place You know they do. So Mr. and Mrs. of chrysanthemums in the conserv-

was such a strange Christmas without Mother, and with Sam absorbed in the production of the play. Now New Year's has slipped into the limbo of yesterdays, and in 48 hours the curtain will ring up on 'Islands Arise.' "

#### (TO BE CONTINUED)

**Territory of Australia** 

From 1927 to 1931 the northers territory of Australia was divided for administrative purposes into two divisions. North Australia and Central Australia. The northern terri The capital is Darwin.

the smallest up to lions and rhinocerosi. He finds that lions have a sympathetic gland reinforcing system which enables the adrenals to deal action hormones with a tremendous kick. That's what makes the lion such a good self-starter and the sure winner of any jungle track meet. Lions, tigers and ferocious lone workers in general have

Herding animals have a less sensitive starting and stimulating mechanism. Less complex, coldblooded creatures, like crocodiles, with special defensive armament, have an even slower takeoff, but Dr. Crile's main point is that they all have an ignition system which perfectly serves their survival needs.

this hair-trigger starter.

As Dr. Crile sees it, the maladjustment or malfunctioning of our energy apparatus releases ungoverned emotions, precipitated in body poisons, and helps put the world even more out of plumb than it naturally seems to be. An artificially changed environment-with all the new problems of urban living and an unstable and complex economy -makes people keep on getting mad about things which they can't possibly affect or control, unlike the animals, and renders latterday man a signal failure in the main business

of life, which is "continuous adap-

tation."

there are an a second the same as The

At home in the wider generalizations of his subject, Dr. Crile sees here the collective elements of social instability-Fuchrers, mobs, demagogs, kluxers, messiahs, warmongers, and inflammatory and provocative inciters of world dementia in general. He thinks a general all-around job of scientific human reconditioning is possibly the only answer.

He is a native of Chilo, Ohio, taking several academic degrees before completing his medical educa tion in a number of foreign universities.
