Down Town Bible Class

Rev. Warren Everson brought the Sunday morning message to 17 men present at the Sunday morning meeting of the Down Town Bible Class. Dick Todd presided, Rev. Clarence Bounds led the group singing and Miss Jeanette Moody played piano accompaniment. A. V. McCombs was a visitor.

Consider our water... This is the universal liquid of life and part of our very existence. It is everywhere around us, in the air and earth. Without it we could not survive, nor could any plant, animal, or living thing. Water can be so abundant as to invite waste and neglect, but it is so scarce as to set man in earnest contest for it. It demands understanding and respect. It has the power to turn the mighty turbines of Grand Coulee, and it can strike in the angry form and force of a flood. It can produce crops, trees, and grass—or the ugliness of a polluted stream. Water provides the drama of Old Faithful, the majesty of the Mississippi, and the grandeur of Niagara Falls. In infinite variety it is a thirst-quenching drink for the parched, a cooling accessory for the steel mills, and a vital irrigation for the sunward fields of Arizona. It appears as soaking rain on Olympia's forests, the hush of a Vermont snowfall, and the quick excitement of a Kentucky thunderstorm. It is a miraculous gift of God, given to us for our use and endless uses. But our neglect can waste it, and our abuse can turn it into offensive sewers of pollution. Water tests our sense of responsibility to God and man. Its care, requires our self-discipline, and responds to our management. This priceless water has been here before and by God's will will be returned again and again for us to use according to our maturity, either with wisdom or with shameful neglect. Consider our water. Consider it well.

Consider our water. Consider it well.

STATE CAPITAL Highlights AND Sidelights by Vern Sanford

Austin, Tex.—Eight tired men will sit down Saturday night—but not to relax.

Probably it will be well into Sunday before four know that they have won and four know that they have lost the Democratic runoff primary for four important state-wide offices.

John Connally and Don Yarbrough have battled it out for governor. James A. Turman and Preston Smith are the two tired men in the race for lieutenant governor, possibly the most important job in state government. Waggoner Carr and Tom Reavley competed for attorney general. Woodrow Bean and Joe Pool were the busy men seeking nomination for Congressman-at-large, a statewide seat in Congress which likely will be abolished within two to four years.

Following Saturday, they can rest a bit before taking up their campaigns against the Republican nominees who are expected to make the strongest bids since 1874 in the general election on November 6.

redrafting of the state amusement tax law to exempt non-profit cultural institutions.

The Dallas society's payment "under protest" may pave the way for a court decision. State Comptroller Robert S. Calvert said he'll welcome one. "Frankly, I don't know if symphonies should pay an admission tax," he admitted, "but I don't think they can be called a charity."

WATER PROGRAM ACCELERATED—Speed with which federal water projects are coming into final stages is shown by the fact that the Texas Water Commission has reviewed 17 federal projects since September 1, with two more coming up for hearing June 11.

Chief Engineer John Vander-tulip said that projects already reviewed by the commission have a total first cost of \$225,366,000 of which \$192,052,000 is federal. These projects are up for congressional authorization or financing this year, so odds are fair that work by federal agencies in Texas will be accelerating greatly in the next two or three years.

Water Commission will hold hearings on June 11 on two U. S. Corps of Engineers' projects—Plum Creek and the Sabine-Neches Waterway improvements. The latter project, which calls for deepening of existing channels to accommodate super-tankers, totals \$20,830,000 federal cost and \$1,548,000 non-federal.

LIVESTOCK CONTROL FUNDS SUPPLEMENTED—R. G. Garrett, executive director of the Texas Animal Health Commission, notified Gov. Price Daniel that nearly \$9,000 of a \$10,000 appropriation for livestock tuberculosis control program has been spent. Remaining funds virtually are exhausted.

So the governor approved a \$5,000 emergency grant to boost the commission's program to August 31.

Animal Health Commission now has 69 herds of cattle under quarantine due to tuberculosis. Plans call for completion of testing in 15 counties as well as additional testing in 19 more counties.

36TH COMMANDERS PROMOTED—Governor Daniel announced the promotion of the Texas' 36th Infantry Division's two top commanders. Amarillo At-torney Everett S. Simpson, commander of the division, was promoted to major general, and Ralph M. Krieger, an Abilene businessman, was named to the rank of brigadier general.

Simpson, one of Texas' most-decorated soldiers, participated in every major engagement that the 36th Division was involved in in World War II. In the same campaign, Krieger won the Combat Infantryman's Badge, Bronze Star and Legion of Merit.

Short Snorts
Billie R. McElroy of Austin, firearms training specialist for the Texas Department of Public Safety, won the Elihu Root medal for marksmanship for training civilian marksmen.

Texas Education Agency revealed that more than 100,000 Texans now have completed the Civil Defense "Education for Survival" course, leading the nation in adult participation in this program.

Miss Ruth LaVerne Gallman of Temple, education coordinator at Scott and White Hospital School of Nursing, was named to the State Board of Nurse Examiners. Governor Daniel appointed C. D. Acker of Jacksonville, H. T. Latham of Stephenville and Paul D. Lindsey of Dallas to the Texas Finance Commission.

Tax Share Per Person Increases \$107 in Year

Plans for Santa Rosa Roundup Are Announced

Plans for the 17th annual rodeo and quarter horse show to be held at Vernon in E. Paul Waggoner's showplace arena for four nights June 20-23 were announced this week by Hartley Easley, Marion Hughton and George Self, local members of the Board of Directors of the Santa Rosa Roundup.

Directors approved plans for the big rodeo—recognized as one of the greatest events of its type staged anywhere—at the annual director's meeting Monday in Vernon, where they were guests of Mr. Waggoner at a chuck wagon feed.

A brilliant assortment of specialty acts plus competition by the top professional rodeo performers in the nation are expected to make this show equal or surpass the greatest ever presented in the Santa Rosa Roundup arena.

The world champion cowboys and their top challengers, who regularly converge on Vernon for

the big event, will be competing for \$8,000 plus entry fees in prize money.

The traditional rugged action of bareback bronc riding, calf roping, saddle bronc riding, steer wrestling, brahma bull riding and a world champion cutting horse contest will be supplemented by the glamour of a new stage and singing star—Linda Loftis, Miss Texas of 1962, who'll be coming directly from Las Vegas, Nevada, appearances to perform at the rodeo. Miss Loftis, third place winner of the Miss America contest and the "most photogenic" in the Red Skelton TV show, in Fort Worth opera, and starred in Fort Worth Casa Manana productions.

The dessert for the solid rodeo menu, topped by the colorful commentary of Cy Tallion, recognized as rodeo's greatest announcer, will include the classic precision drills by the famed Santa Rosa Palomino Club of Vernon, plus these feature attractions:

Ruby Nance and his cowboy band; Ken Boen, clown prince of rodeo, featured in the Western Horseman, and booked for 1961 in the world's largest stage production, the Canadian National Exhibition; D. J. Gaudin, the Kajun Kind, selected by the nation's top bullriders for the National Finals Rodeo; Goldie Carlton, a repeat performer at the Santa Rosa Roundup, whose barrel and bull-fighting acts were one of the features of the Fort Worth Fat Stock Show and rodeo; Frank Gilbert and his White Sock Jumpers; attractive women trick riders Karen Womack, Janet Plunkett and Patty Davis, a second-generation performer whose mother previously appeared in Vernon.

The Beutler Brothers, Lynn and Jake, of Elk City, Okla., foremost in the nation in their field, will again be producing the rodeo.

The horse show division will be greatly expanded this year. Western pleasure and pole bending divisions have been added to the cutting, reining and barrel race divisions of previous years. The horse show will open at 9 a. m. Wednesday through Friday and at 8 a. m. on Saturday, when the quarter horse halter classes will be presented. The quarter horse cutting championship will be un-reeled Saturday night.

Page 2— Foard County News Crowell, Texas, May 31

Morning and afternoon horse show events are open to the public free of charge and the public may also visit the Rosa stables on the grounds. Mr. Waggoner's famous string of champion quarter horses, including the famous John Biggs of Vernon, general manager of the Roundup, and other valuable animals are available for sale. Write Santa Rosa Roundup at Headquarters, Vernon, Texas.

Inflation Creates Intolerable Economic Conditions

"The final victory for the communists in many lands was possible by internal sabotage and the creation of intolerable economic conditions within the lands. The Communist agents created intolerable economic conditions by creating inflation. An example can be found in Hungary. . . . There the Soviet leashed the wildest current of inflation on record. That inflation was aimed at classes of Hungarians as a class as guns are aimed at the . . ."

THE FOARD COUNTY NEWS

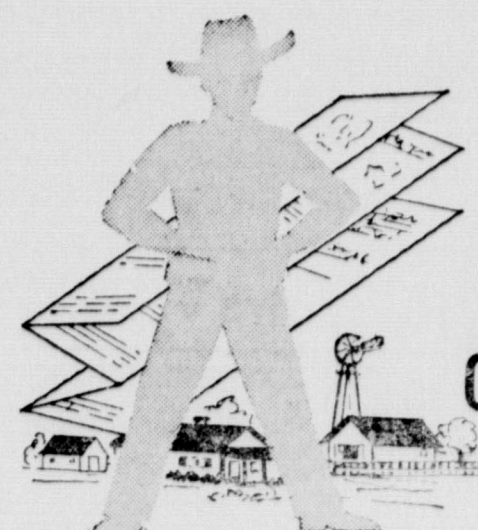

surplus crops in 1962 has been approved without objection by the House of Representatives and Senate of the United States. Congressman Graham Purcell of Wichita Falls sponsored the original bill. The approved bill is House Resolution No. 11413, and it includes the minor oilseed crops, guar, sesame, safflower, castor beans, sunflower and also flax. Part payment rate is to be set on individual crops by the Secretary of Agriculture. The indicated rate for guar is 50 per cent of the farmer's feed grain or wheat conservation payment. At the indicated 50 per cent rate for guar, a farmer whose total milo conservation payment, for example, is \$30.00 per acre can collect \$15.00 per acre, and harvest a guar crop too. He also remains eligible for price support for his planted milo crop.

County ASCS offices will be advised concerning the details of this new program just as soon as word is received from Washington, according to the State ASCS Director Lewis David of College Station. "We know it is planting time," said David, "and we will rush any information we receive to the counties, so farmers can take advantage of the program." Interested farmers should watch local newspapers for formal announcement regarding this program through county ASC committee offices.

Congressman Graham Purcell of Wichita Falls, representing Texas' 13th Congressional District, commented, "This is a bill apparently beneficial to everyone, and especially to the United States Treasury. It will save the government half the cost of retiring planted to these non-surplus, non-price supported crops. The legislation met with favor in Congress and the Department of Agriculture. They realize last year's increased price supports and attractive acreage retirement payments

for feed grains and wheat create unfair competition for the minor oilseed crops, whose price is set in the world market."

Congressman Purcell listed these advantages, in addition to reducing the cost to taxpayers for retiring diverted acreage: first, better land will be retired if it is going to be planted to these crops, thereby helping reduce surplus stocks of wheat and feed grain. Second, in every community where the crops are grown, farmers' income will be increased, and farmers can continue to farm using supplies, fuel, fertilizer, machinery and all the other items supplied by local businessmen. Third, these new crops can continue to expand under this program, helping to utilize idle acres resulting from any future acreage or production controls. "It is a good program for everyone concerned," concluded Congressman Purcell, "and I am pleased to have sponsored the original bill."

Aubrey F. Russell of Margaret was one of 232 graduates who received degrees from Baylor University in Waco June 1.

The adoption of a platform and a report of county candidates who have signed the association's salary pledge constituted the most important business at the meeting of the Foard County taxpayers league which was held here Saturday afternoon.

Two Foard County girls, Miss Ella Patton of Crowell and Miss Bernice Wisdom of Foard City graduated from the Baylor University College of Nursing at Dallas Monday night.

Mrs. Phebe K. Warner of Claude, candidate for Congressman-at-Large, spoke in the district court room here Wednesday night to a fair-sized audience.

With the beginning of the wheat harvest in Foard County, present indications are that there will be sufficient local labor to take care of harvesting needs since a greater part of the crop is to be harvested by combines.

Two Minutes With the Bible

Knowing Christ as He Should Be Known

John the Baptist introduced our Lord with the proclamation: "Repent, for the kingdom of heaven is at hand" (Matt. 3:2). Throughout His early ministry Christ was known as "the Son of David," the king with whom God had made a covenant to establish his kingdom forever.

The Old Testament prophets predicted that Christ would—and He will—reign on earth upon the throne of His father David. While His kingdom was being proclaimed "at hand," He walked and talked and ate with men as "the Son of Man." Wornied with traveling he sat at Jacob's well and asked for a drink of water. Pressed by the throng, He got into a fishing boat and addressed the multitudes from the sea. Hated by His adversaries, he was tied, scourged, spit upon and nailed to a tree. This was indeed "Christ manifest in the flesh."

With regard to His humiliation, however, the Apostle Paul says, by divine inspiration that "God also hath highly exalted Him and given Him a name which is above every name" (Phil. 2:9).

Again, the apostle declares that God's mighty power was "wrought in Christ, when He raised Him from the dead, and set Him at His own right hand in the heavenly places, far above all" (Eph. 1:20). He is no longer to be known as "the lowly Jesus" but as the exalted Lord in heaven. And this has its bearing on us too:

"Wherefore henceforth know we no man after the flesh; Yea, though we have known Christ after the flesh, yet now, henceforth, know we Him no more (II Cor. 5:16). Our blessed Savior is now to be known as the glorified Son

Let's Forget Some of This Government Birth to Burial Care

"It is hard to understand how putting medical care in the Social Security setup will reduce local welfare expense to any extent as most of the people on welfare rolls are not eligible for social security. Thousands of people now paying premiums for health and accident insurance would have an added expense thrust upon them. Let's forget some of this having the government take care of us from birth to burial!"—White, S. D. Leader.

The Road to Freedom Lies in Unity and Peace

"Six months after the birth of the European Common Market a prototype coin of what some day may become common currency throughout the member nations was minted. . . They are not yet in common use, but the inscription on them may be prophetic: 'Unitate et Pace' on one side, and on the reverse, 'Via Est Libera.' Freely translated, the Latin means 'The road to freedom lies in unity and peace.'"—Silver Spring, Md., Record.

VOTE—DON YARBOROUGH FOR GOVERNOR OF TEXAS— FOR ALL THE PEOPLE

A Loyal Democrat of the Old School, that goes down the right side of the road helping preserve the Democratic Party that our founding fathers put into being, Yarborough is 100 per cent with the Kennedy Administration, always loyal to the Chief. Yarborough doesn't have money to charter a train of Pullman cars and diners, to take aboard his choicest friends in their glamor, to cross Texas, whistle-stopping, yelling for votes. Yarborough doesn't even have money for T. V. costs, nor the thousands of dollars needed to put into his campaign. "Money isn't all."

Yarborough does have a brilliant mind of mature thoughts. Yarborough does have a body full of energy and is ambitious to use it. Yarborough does have an idea of sympathetic understanding for his fellowman. Yarborough does have a soul full of ambitions to help all Texans go forward, to keep pace with sister states and the Nation's New Frontier. Don Yarborough, with the same old Democratic Party our Fathers knew, will be our next Governor. You Loyal Democrats, vote for Yarborough, courteous, honest, efficient, industrious, knowledge to serve all the people. Vote Don Yarborough for Governor this June Primary.

Rural Housing Loan Program Benefits Texans

L. J. Cappleman, state director of Farmers Home Administration, recently stated, "The Rural Housing Loan program was started in Texas some twelve years ago and the records show the success of the program. Up to December 31, 1961, some 2,730 loans have been made and not one penny has been lost or written off as uncollectible."

"More than \$20,440,000 has been advanced in Texas in rural housing loans and the principal and interest payments made total over \$8,845,000. Over 24 per cent of these loans have been paid in full. Payments of principal and interest on the 2,064 loans outstanding total over \$4,561,000, or 104 per cent of the amount that has become due," Cappleman said.

"This is a remarkable tribute to the financial integrity of rural families and their ability to manage their financial affairs," the state director said. "Loans under this program are made only to those who cannot obtain financing from conventional sources. As a result, the 2,730 Texas families who obtained these loans have had to be extra diligent in meeting their repayment obligations."

"This program provides benefits throughout the entire rural-based small town economy and the overall economy of these counties," he added. "Contractors, small businessmen supplying contractors, and building trades workers all benefit through increased business. Their stepped-up activity in turn stimulates the entire rural economy. The approximate \$4,800,000 the Farmers Home Administration in Texas will make available this year is the equivalent of several new industries in terms of more jobs and greater purchasing power."

Message Advocates the Virtues of "Legal Driving"

Col. Homer Garrison Jr., director of the Texas Department of Public Safety, this week issued a special message to Texas motorists calling attention to the pleasures afforded them in summer vacation travel and the virtues of "legal driving."

"Texans are more fortunate than people in many other states when vacation time arrives, in that they have better highways on which to travel to more enjoyable places," the safety director said.

"Those of us charged with the responsibility of traffic management are proud of these things, and we like to see the citizens of our state taking full advantage of them."

"We would like to emphasize, however, that vacation and week end driving during the summer months is far more enjoyable when traffic laws and rules of the road are observed. Obviously, it is more relaxing to stay safely within the law rather than run the risk of marring your driver's license or, far worse, causing an accident."

Garrison said his message was timed in connection with Memorial Day last Wednesday, since this event is the signal for the opening of the summer holiday season for many Texans. He also suggested that those whose vacation travels will take them outside Texas familiarize themselves with the laws and regulations of the states in which they will be driving.

At the same time, he reported

that safety officials have high hopes that if the driving public will concentrate on the value of "heads up" driving habits in the coming months, the current three per cent reduction in traffic fatalities will be immeasurably improved.

"Think about it—isn't it easier, less expensive, and far safer to drive within the law?" Garrison asked.

Aerial Mesquite Control Advocated for Texas Land

There are several methods for controlling mesquite, but one of the most economical and practical for Texas is the aerial application of 2,4,5-T. This method is usually used on relatively pure stands of mesquite, explains G. O. Hoffman, extension range specialist.

For the aerial application of 2,4,5-T to produce the desired results, several factors must be present. There should be plenty of soil moisture to make the mesquite grow vigorously and produce a dense foliage. At the time of spraying, the foliage should be dark green. Hoffman says that this year the mesquite foliage is in the best condition in several years, and good results should be obtained from aerial control provided the moisture situation remains favorable.

Also, if rain falls during the spraying season, it is advisable to wait until the new leaf tip growth has turned dark green. This usually takes about two weeks.

The chemical control of mesquite is for aerial control of mesquite is 1/2 pound of 2,4,5-H, 1 gallon of diesel oil, and enough water to make 4 gallons of mixture. This four gallons of chemical mixture should be applied to one acre in a manner that insures complete coverage of the foliage.

Hoffman says a miracle should not be expected. The total root kill under ideal conditions is 25 to 35 per cent. The initial control will last from 5 to 7 years before spraying of the regrowth is necessary.

After the spraying, the pasture should be deferred to allow the grass to re-establish. Graze it during the winter, defer it the second growing season, then use it properly. The extra grass is what pays for the brush control practice.

If it rains in the mesquite country within the next two weeks, it may be advisable to spray every acre of mesquite in Texas, says Hoffman. For more information on aerial control of mesquite, contact the local county agent.

Costs Are Ignored in Campaign Promises

Mouth-to-Mouth Respiration Is Easy to Learn

A person can live three weeks without food, three days without water, but only three minutes without air.

Would you know what to do if a member of your family or neighbor became unconscious and stopped breathing and there was no doctor around?

In just a few minutes anyone can learn the technique known as mouth to mouth breathing. This method has been known to man since Biblical times but has recently been proven much more popular than any other method of artificial respiration.

This technique may be used to revive all unconscious and non-breathing victims of drowning, electric shock, smoke or gas inhalation, drug or chemical poisoning, injuries to head, chest, neck and abdomen, convulsions, cardiac arrest, and other causes.

Mouth to mouth rescue breathing starts with clearing the mouth of any foreign objects such as tobacco, food, seaweed, toys, loose teeth or other small objects.

Then, with one hand grasp the victim's chin, placing the other hand on top of the head and with a rotating motion tilt the head backward. A roll of clothing or blanket placed under the victim's shoulders will help keep the neck in favorable position.

Insert the thumb of one hand between the victim's jaws. Grasp the lower teeth and pull the jaw forward. Never let the victim's chin sag or let his head return to normal, relaxed position. Stop air leakage through the nose by pinching the nostrils closed with the thumb and index finger of the other hand.

Next, take a deep breath and place your mouth over the victim's mouth as firmly as possible

in order to prevent air leakage. Keeping the mouth open wide, breathe deeply into the victim's lungs.

As soon as you see the victim's chest rise you have delivered adequate breath. You must then remove your mouth so that the victim may exhale naturally. Repeat rescue breathing about once every three or four seconds, about 12 to 20 times a minute, until the victim breathes naturally or until a doctor arrives. If the victim is an infant or small child, breathe gently using only small puffs from the cheeks and throat.

Last Year, 11,348 Texans Died of Cancer

Last year 11,348 Texans died from the effects of malignant neoplasms, the statistical designation for all forms of cancer. For many years now, cancer has been the second ranking cause of death in Texas — and in the rest of the United States.

The only disease that ranks ahead of cancer, is heart disease and its associated vascular conditions.

Latest evaluations of the effectiveness of cancer treatment indicates that one out of every three persons discovered with the disease is cured.

But, using the conservative estimates which characterize the medical profession, half of all cancer victims could be saved if the disease were discovered early enough.

Cancer can attack almost any part of the human body. Experts in the cancer research field say that for nearly every different body tissue there is probably a separate type of cancer cell.

The leading body sites of death-dealing cancer, listed in order, are: digestive organs and the peritoneum, respiratory system (male), breast (female), genital organs (male), genital organs (female),

GLAMOUR AT SANTA ROSA—Miss Linda Loftis, the 1961 Miss Texas and third ranking contestant in the 1961 Miss America Pageant, will likely reign supreme over the championship cowboys, wild Brahma bulls and bucking horses when she makes her personal appearances at Santa Rosa Roundup Rodeo in Vernon, Texas, June 22 and 23. urinary organs, leukemia, and the buccal cavity (mouth) and pharynx in the male.

Men fall victim to the disease more often than women. Explanations of why this situation is true range from men smoking more to men visiting doctors less often than women.

How effective is modern diagnosis? As a case in point—an explanation of the famous "Pap" test for uterine cancer is conclusive evidence of its value.

The "Pap" test is simple, inexpensive, painless, and absolutely reliable. It involves the physician taking a uterine smear which is carefully analyzed by a pathologist. Uterine cancer could be almost completely eliminated if adult women have a "Pap" test at least once a year during a thorough physical examination.

There's no doubt about it, a yearly physical examination could save thousands of lives every year. (A feature from the Division of Public Health Education, Texas State Department of Health.)

Public to Build Salk Institute

Through their contributions to the Salk Institute Building Fund, the American people—who formed a partnership with science to bring about the Salk polio vaccine—will again share in a great scientific venture to help man make the best of his gift of life.

"...FOR LIFE, HEALTH AND HUMANITY"

You CAN BUILD THE SALK INSTITUTE FOR BIOLOGICAL STUDIES

When there is a job to be done—whether it's a war to be won or a disease to be conquered—the American people have an amazing way of marshaling their efforts to produce maximum results in minimum time.

Such an effort is under way this month in the nationwide campaign—June 1 through 15—for public support for the construction of the Salk Institute for Biological Studies.

Millions of posters in public places, mailers in home letterboxes, coin collectors and canisters on counters everywhere proclaim, "You Can Build the Salk Institute for Biological Studies... for Life, Health and Humanity."

Youngsters who, as "Polio Pioneers" helped prove the effectiveness of the vaccine developed by Dr. Jonas Salk, are expressing their gratitude for their protection from crippling polio with contributions in school envelopes.

People everywhere are proudly wearing tiny microscopes in their lapels, symbolic of their gifts to provide building blocks for a great new laboratory of life.

Millions of Americans, who won a great victory over one dread disease—paralytic polio—in partnership with Dr. Salk and other scientists, welcome this opportunity to become

shareholders in a new scientific venture which promises even greater benefits for them and for their children.

As he worked on the polio vaccine, Dr. Salk became more and more aware of the need for a better way to gain greater scientific understanding of the basic processes of life and their relation to health and disease.

In talking with men of science all over the world, he found that others shared his recognition of the need for a place where scientists could work together seeking answers to basic biological questions from many viewpoints, with fullest latitude for research, discussion and exchange of ideas.

Dr. Salk's planning will culminate in 1963 with the opening of the Salk Institute for Biological Studies, which he will direct, in San Diego, Calif. The land has been given by the people of San Diego. The entire nation will contribute to the construction of the Institute through a campaign sponsored by The Na-

tional Foundation—March of Dimes—just as the American people totally supported Dr. Salk's polio research. The Institute will serve as an international "crossroads" for new ideas and discoveries. Eminent scholars from such diverse sciences as biology, genetics, chemistry, physics, mathematics and philosophy will join Dr. Salk there as Senior Fellows. Visiting scientists will come from all parts of the world, and promising young men and women will be invited as Student Fellows to work with and learn from the established leaders. Construction and equipment of the Salk Institute will cost approximately \$15 million. Through their generous support of the Salk Institute Building Fund, the American people, who took such a vital part through the March of Dimes in bringing about the momentous medical discovery that was the Salk vaccine, will bring to reality a great international scientific center, dedicated to helping man make the best of his gift of life.

Miss Janie Bowers Honored with Bridal Shower Saturday

Miss Janie Bowers, bride-elect of Joe Gayle Baker, was honored with a bridal shower Saturday afternoon, May 26, at the home of Mrs. Ray Hysinger.

Guests were greeted by Mrs. Hysinger who presented them to the receiving line composed of the honoree, Mrs. James Bowers, her mother, and Mrs. J. C. Baker, mother of the prospective bridegroom. Miss Bowers wore a two-piece brown cotton check dress featuring a Liz Taylor jacket. Her corsage was of white carnations, a gift of the hostesses.

The refreshment table was laid with a white maderia cutwork cloth over blue satin. A three-tiered milk glass epergne filled with white roses accented with lace fern and white larkspur with clusters of blue grapes at the base, centered the table. Mrs. V. A. Johnson and Mrs. Henry V. Borchart served fruit punch, dainty cookies, nuts and mints. All appointments were of milk glass.

Miss Beth Baker, sister of the groom-to-be, presided at the registration.

LITTLE LEAGUE NEWS

by MARION CROWELL

When Buddy Myers threw out Bob Bird at first on the night of Tuesday, May 22, it was news. It was news because it broke up an amazing hitting streak by hitting Mike Bird and left him hitting .875 wherein—up to that point—he was hitting a whop-ping 1,000! The time before, he blasted the old agate over the Ferguson Drug Store sign in center field to make him seven-foot-seven up to that time. Bob and Bruce McRae are the only twelve-year-olds on the VFW roster this season. It behooves them to do most of the power hitting for the Vets . . . and they do!

Blessed with good speed and a lot of natural ability, Rocky Wisdom (the little guy the Yankees "red-shirted" last season) is really making his presence felt this season. Wisdom was hitting .700 at last figure releases.

Add to the Home Run Club the following new names: Steve Gray, whose line drive over the Crowell State Bank sign establishes him as a power hitter in addition to being a sweet glove, man and pitcher; Lynn Rader who slugged one over the Boardhardt Chevrolet sign Saturday night, May 26, to win a game for his Braves. (You remember him from last year's Haskell tournament); and Carl Chappell who banged one over the Womack Butane sign in right-center. I believe every car at the park, whether a booster for Foard County Mill or Rotary, blew its horn when Carl parked the horsehide. Carl is coming along nicely.

Joe Ray Burkett was a disgruntled young man in his last appearance at bat Saturday night. He hit a long fly ball that looked sure to float right out of the park. But Marvin Ray drifted back about the fence, gathered the old horsehide into his ever-lovin' arms, and Joe Ray's blow was just another long out. Joe Ray has been hitting some screaming liners for foul balls. It just remains for him to quit being too far "out front" on his hitting for him to fatten up his batting average.

Pete Matthews is back. And Saturday night he made his presence felt with a sensational catch that robbed Gary Tole of a base hit . . . Foard County's Mill's Cardinals apparently don't exactly thrive on stormy weather conditions. Ordinarily downright stingy with their errors, they committed three in one inning to set the stage for Rotary's victory. . . With one notable exception, most of our games thus far have been close enough that one big home run would have decided (or did decide!) the ball game. Man, man, what a race this should be this year!

WHODUNNIT?—I was up at Little League field one afternoon, and it looked like the backstop screen had caught about all the paper trash in Crowell. A few days later it was all gone. I looked in the barrel, and it was full of paper. I dunno who did it, but someone did a very commendable thing by picking up all that paper and putting it in the barrel. Someone took enough pride in L. L. appearance that they worked to improve it. A tip of my hat to you!

And add to that, the Appreciation Dept.: to Mrs. Bertha Burkett and Anna Eavenson for passing the hat last Tuesday night, and to William Simmons for the invocation.

June 30, 1962, Is Important Date for the Disabled

June 30, 1962, is an important date for the disabled. Protection against severe disability is a relatively new feature of the social security program. Fifty million working people under social security now have this protection against complete loss of earnings. Anyone who has been disabled for more than a year may lose all of his rights to cash disability benefits if he does not apply for benefits before June 30. One out of every three disability applicants risks the loss of some disability insurance benefits because he waits more than 18 months before applying.

Please advise those people you know who have been disabled more than six months to check with their social security office right away.

The local social security office in Wichita Falls will provide assistance in filing a claim to help disabled persons obtain their rights.

Withholding and Social Security Taxes Due June 15

If you are an employer and liable for income tax withheld and social security taxes in excess of \$100 for the month of May, you deposit such taxes with a depositary, District Director, Ellis Campbell Jr., of the Internal Revenue Service in Dallas, reminded the serve Banks.

Accenting importance of compliance with the deposit deadline of June 15, 1962, the IRS representative added that a Form 941 should be used for this purpose.

Deposits may be made in local authorized banks, or Federal Reserve Banks.

Employers needing a free copy of Circular E, "Employer's Tax Guide," may get it from the IRS. The circular has information on employment taxes, plus tables and percentage methods for their computation.

Concerned with Leniency Toward Hardened Criminals

"J. Edgar Hoover is concerned with the leniency shown by judges towards the hardened, habitual criminals. Out of 167 criminals on the FBI's 10 most wanted list, 140 have received lenient sentences. Suspended sentences, paroles and probations are meted out to murderers, rapists and depraved thugs as though they were mere badgers," Hoover says. "Our legal machinery in some areas has become since departed from its primary purpose—the protection of society."—Hawley, Minn., Herald.

First Symptom of Inflation

"The first symptom of inflation is a series of unbalanced national budgets. That has been the U.S. history ever since the end of the war, and the end is not in sight. President Kennedy forecast a surplus of \$500 million for 1963. Right now it looks more like a deficit of several billion. This must be made up by government loans. That means more money must be pumped into circulation."—Baltimore, Ind., Daily Times-Mail.

June 15 Last Day to Pay Second Quarter of Estimated Tax

Taxpayers paying estimated federal income tax are, according to District Director Ellis Campbell Jr. of Internal Revenue Service in Dallas, required to pay their second installment of tax due on 1962 estimated income by Friday, June 15, 1962.

If the income expected to be earned during 1962 has changed, taxpayers should file an amended declaration of estimated tax. A blank form for use as an amended return is printed on the back of the bill which taxpayers receive for an installment of estimated tax, the IRS representative explained.

GEORGE MOFFETT

Senator, 23rd District
CHILLICOTHE, TEXAS

May 30, 1962

My belief is that Senator Preston Smith of Lubbock will make an outstanding Lieutenant Governor.

Preston has served many years in the Texas Legislature; first, in the House of Representatives and then in the Senate. His broad, experienced, well-balanced judgment and known desire to be fair to all, are ideal qualifications for the office.

I hope the people will choose Senator Smith for the important office of Lieutenant Governor on June 2.

Sincerely yours,

To Compete in State-Wide Farm and Ranch Management Contest

A Cottle County 4-H Club team will compete in the statewide Farm and Ranch Management Contest as a highlight of the annual 4-H Club Roundup at Texas A&M College on June 6.

A team composed of Herky Killingsworth, 18, and Sharon Hand, 15, both of Paducah, won first place in District Three competition. The team is coached by Mrs. C. A. Killingsworth, Herky's mother. She is the former Miss Mozelle Lilly of Crowell, and the daughter of Mrs. Amos 4thly and the late Mr. Lilly.

The state contest, which will attract 23 teams from throughout the 12 state 4-H districts, is sponsored by the Production Credit Associations of the Texas. Representatives of the agricultural credit organizations will present awards to winners of the state competition as well as to district representatives, following the statewide contest at College Station.

Soil Stewardship Week Now Being Observed

John D. Wells of Plano, president of the Association of Texas Soil Conservation Districts, and members of the Association's Soil Stewardship Committee received this week a proclamation from Governor Price Daniel designating the week, May 27 through June 3, 1962, as Soil Stewardship Week in Texas.

Joe Burkett, County Agent, says observance of Soil Stewardship Week is an outgrowth of a custom originating near Vienne, France, in the year 470 A. D. when the local bishop called for prayer and penance on the 3 days preceding Ascension Day.

Sixteen years ago, a renewed interest in this observance was fostered in the southern part of the United States by the publishers of "Farm and Ranch" magazine. They suggested that religious leaders set aside one Sunday each year to remind their congregations of man's obligations to his Creator as stewards of the soil. The fifth Sunday after Easter was suggested.

Burkett said that all 50 states and Puerto Rico will participate in observance of Soil Stewardship Week this year. The observance is now sponsored nationwide by the National Association of Soil Conservation Districts.

Symptoms of suds lock was one point discussed at the workshop. Have you ever created a suds lock? This is a condition in which an excess of suds prevents the washer from operating properly. It is brought about by using too much soap or detergent, or by using a sudsing washing product, when a non-sudsing product is recommended.

Symptoms of suds-lock are suds frothing out around the lid and through the seams of your washer and failure of the washer to go through its cycles (wash, rinse, spin) properly. It can be corrected only by unplugging the washer, mopping up the mess—and using the proper washing product in the correct amount.

Basic requirements of detergent for average soil are 3/8 cup for tumble action washers and 3/4 for agitator washers. For heavily soiled clothes or extremely hard water, use more detergent.
