#### Students' Opinions of the Cold War and Its Effects

Every day when a person wakes up, he is faced with the terror of the Cold War or maybe even World War III. The youth especially should be concerned with these problems because in several years, these people will make up the population of the United States as well as of the entire world. After asking several Crowell students the question, "What is your opinion on the Cold War, and how do you think it might influence your future?" I came up with the following opinions:

Jerry Toie: Cold War in today's modern world is like the income tax in that we don't like it, but we have to tolerate it. Indeed, the Cold War has boldly taken up a leading position in the problems of nations the world over. The international political and military actions of our country and of other countries are governed, to a great extent, by the myriad aspects of the Cold War—a war for the mind of man. We not only have to tolerate the Cold War, but we also have to plan and to prepare to fight it, for it will undoubtedly affect our future lives. The effect it will have cannot be specifically stated, for no one knows what the future will hold. However, I do believe that the Cold War will be the determining factor in whether we remain free or whether we will be crushed under the boot of some foreign power. Therefore, I believe it is the duty of the American young people to stay informed on the Cold War so that they may be better prepared to defend their freedom.

that the Cold War may lead to World War III, but this is not probable. Both the Communists and the Democracies know the great losses that they would have to suffer in such a war. Because of this, the Cold War is a "war with words."

If the Cold War does not develop into a "real" war, I think that it will give a greater love and respect for democracy and God. If there is a war, only time will tell the consequences.

#### Wildcat Staff Party

The members of the Wildcat Staff were entertained with a party at the Community Center on Thursday, March 23, at 7 p. m. Hostesses were Lynda Harris, Jeanette Moody, Patricia Cates.

In keeping with the Easter motif, the table decorations were centered around a large bunny, surrounded by eggs nestled in multi-colored grass. The buffet style meal consisted of sandwiches, pickles, potato chips, cake and punch.

After playing several games, the staff members presented a beautiful pole lamp, accented with frosted globes, to Mrs. Manard, their sponsor.

The members of the staff and their guests wish to thank the hostesses and their parents for the delightful party. Mrs. Manard especially wishes to express her appreciation to the staff for the beautiful gift which she received.

#### Southern Assembly Presents Fred Lowery

On Friday, March 23, at 8:45 a. m., another Southern Assembly program was presented. It featured the world famous whistling artist, Fred Lowery. Mr. Lowery has appeared on various occasions with Bob Hope, Steve Allen, Ed Sullivan, Jackie Gleason, Bing Crosby, and other notables. He formerly was on the "Early Bird" show with WFAA radio. For many years he has recorded records, including two million sales of his "Indian Love Call." He has recorded recently Decca albums of many popular and religious songs.

Perhaps some of you adults who have heard him often but have not had the privilege of seeing him do not know that he is almost totally blind, having only slight vision in one eye. He became interested in whistling as a profession at the age of seventeen while he was in the School for the Blind at Austin, Texas.

His unique ability to whistle in "duet fashion" is superb. He presented beautifully the whistling accompaniment to several records including "Indian Love Call," "Tammie," "Heartaches," "The Stars and Stripes Forever," "William Tell Overture," theme from Lone Ranger, and his final selection, "Rock of Ages," which was truly as he had introduced it, "a bit of heaven's music."

Mr. Lowery was accompanied by his wife, a native of Jacksonville, Texas. The student body and faculty were privileged to have had the opportunity to hear the famous Fred Lowery.

#### Sports in Short

Sports fans, we of Crowell High School must revolt! In the interest of the social standing of all Crowell High Wildcats and Wildcat fans, we must fight! Disease is spreading swiftly across our country! Even our own newspaper has been "inflicted." I am speaking about the headlines that report the drilling of new oil wells. I cringe every time I see the words "Two Wildcats Drilled" or "Wildcat Staked Out." These words send a tremor up my spine. I sometimes wonder, will I be the next Wildcat to be "drilled"? Beware, Wildcats! The oil industry is after us!

Well, our track team did some

traveling last week as they invaded the Knox City meet Wednesday and then moved in on the Chillicothe meet Friday. The "all stars" turned in a good performance. This week there's a meet at Munday on Saturday. (How about that!) Let's go to Munday and mourn the Moguls.

#### Callaway and Harris to Represent School

Six students tried out last Thursday to determine the two to represent our school in the Interscholastic League Ready Writing Contest to be held April 6 at Henrietta.

The subjects, taken from the list used in the contest last year, were (1) Is there such a thing as personality of the group? (2) The effects of competitive sports in my school. (3) The custom of "going steady." (4) How much independence should a teen-ager have?

Themes were judged on originality, organization, technicality in style and expression.

Those who tried out were Bill Fitzgerald, Judy Trawek (juniors), and Lynda Harris, Alta Nell Bartley, Jerry Toie, Wendell Callaway (seniors).

Selected to represent our school are Wendell Callaway and Lynda Harris, with Judy Trawek and Jerry Toie tied as alternates.

#### Senior Personalities

Winston Nickel is the first senior personality this week. Winston moved to Thalia from Victoria this year. He was a member of the football team here this year.

His favorite color is blue; food, anything; singer, Elvis Presley; actor, Rock Hudson; actress, Elizabeth Taylor. Winston's favorite subject is 7th period class; his hardest subject is study hall; his easiest is geometry.

Winston's pet peeve is red headed girls. He likes to fish, hunt, play football, work math problems, and study physiology.

His parents have been the chief influences on Winston's life. He wants to become a teacher and to teach the 7th period class. We hope Winston has the very best of luck.

#### Library News

The Library Club met Thursday, March 22, in the study hall, for a regular meeting. Judy Sandlin gave the devotional from Romans, and Patricia Brown gave an excellent report on etiquette taken from books by Vanderbilt and Sprackling. LaRue Gidney, Nelda Chappell, and Saunna Martin served delicious refreshments to twelve members and the sponsor.

#### Variety in Review Presented

On Friday, March 23, the Crowell Band, under direction of Earl Hesse, presented the annual Variety in Review. The proceeds, about \$250.00, will go for band expenses.

Ronnie Bradford acted as mas-

tor of ceremonies, with his occasional jokes and the assistance of Scherry Goodwin, Kenneth Carroll, Jimmy Hudgens, James Cordeur, he carried on in regular "Hessean" style.

Special features were presented by three high school girls, Betty Ann Welch sang "Embraceable You"; Sue Sanders, the stage band vocalist, sang "Surry with the Fringe on Top." A piano solo, "Theme from Apartment," was played by Gayle Smith.

All of the Crowell bands participated in this program. The stage band presented the first half, and the junior band and variety band the last half.

A special thanks goes to Jesse Brown, David Powers, Ray Aydelott, Edward Kajs and Arthur Aranda for keeping us in the "light of things" during the program.

#### No Accident

Henry Hazlitt writes, in a week: "It is no accident that of our most serious unemployment is in the coal and steel industries in which hourly wages have \$3.10 and \$3.26 an hour respectively, compared with an average of \$2.34 an hour in manufacturing. And these job-destroying wage rates are the result, in part of the special legal powers immunities that government conferred on the unions."

Special message to students and part-time workers from the Internal Revenue Service.

Refund payments of federal income taxes withheld from wages are paid only upon the filing of a proper federal income tax return.

Murray C. King, Administrative Officer of the IRS in Vernon, reminded Foard County taxpayers.

"While everyone whose income was \$500 or more during 1961 must file a return (\$1,200 for those 65 and over)," the IRS rep-

resentative stressed, "we find frequent cases of people apparently believing that because their tax withheld was greater than their tax owed, they will automatically get a proper refund."

"Somewhat the same belief is held by students or other young people who worked during a portion of the year and whose taxes were withheld from their salaries or wages. To get a refund, they, too, must file a return, even if such income was under \$500."

"For all filers," the IRS representative said, "the filing deadline this year is Monday, April 16, because April 15 falls on a Sunday; but those taxpayers entitled to a refund would do well to file as soon as possible."

Among the highest of honors that can be achieved by a member of the Boy Scouts of America, is to win the organization's God and Country Award. It is earned by relatively few Scouts. Sunday of last week, however, O. B. Herring, pastor, First Methodist Church in Memphis, had the distinction of

### Grass Fires Are Dangerous to Land and Wildlife

Destructive grass fires now are being reported over portions of Texas, according to H. D. Dodgen, executive secretary of the Game and Fish Commission.

One of these fires destroyed approximately 2,000 acres of grass on the Gene Howe Wildlife Management Area in the Panhandle area of Texas, on March 3. The fire got its start off the area when an overheated exhaust pipe of a pickup truck ignited some of the dry grass on a neighboring ranch. The fire spread, destroying not only the 2,000 acres of grass but also 15 miles of fence, which included 8.3 miles of boundary fence.

"Aside from the heavy economic loss in grass fires, the loss of wildlife is very heavy, particularly at this time of the year," said Dodgen. "Many landowners now are building fire roads along fences bordering on highways. Grass fires frequently are started by persons who toss cigarettes from cars on to the grass along the right-of-way. Other fires are caused by careless campers, who may toss aside a cigarette or match. The grass is dry and the wind is high. As a result, we come up with scorched earth which is profitable to no one."

## Tag on Planting Seed Carries Valuable Information

Top crop yields are dependent upon several factors but among the most important is the selection of planting seed. Joe Burkett, County Agent, places major emphasis on the selection of an adaptable variety or hybrid of the best possible quality.

He points out the Texas Seed Act requires that all seed sold in Texas must meet certain standards. The one exception is the farmer who sells seed to his neighbor; hence, the seed does not enter the channels of trade. All other sellers of seed must have a Texas Teted Seed Label attached to the seed container.

This seed label must list the kind of crop, the variety if it is known, germination, number of noxious weed seed per pound, percentage of pure seed, inert matter and weed seed.

The information carried on the seed analysis tag is important. No farmer, Burkett believes, would knowingly buy weed seed, especially the noxious kinds, in planting seed. Neither would he buy seed containing other crop seed and inert matter when high-germinating, weed-free seed of high purity are available at very little extra cost.

The percentage of weed seed shown is frequently important,

Neither would he buy seed containing other crop seed and inert matter when high-germinating, weed-free seed of high purity are available at very little extra cost.

The percentage of weed seed shown is frequently important,

points out Burkett, but the farmer may not realize it from reading the tag. For example, if the tag states there is .11 per cent (eleven hundredths) weed seed in some grass or forage crop, this could mean several thousand seed because weed seed are frequently small and weigh very little, says Burkett.

He not only suggests that farmers read the analysis tag but that they understand the information it carries. Additional information on the adaptability of both varieties and hybrids can be obtained at his office.

## Look for "Showers of Values" on April Plantings List

Food shoppers will enjoy heavy "showers" of values on seven important springtime foods this April, predicts the Texas Agricultural Extension Service.

That's a fairly safe prediction. It's based on available stocks in storage, seasonal trends and expected demand, as determined by the U. S. Department of Agriculture, in cooperation with producers and the food trade.

The April list of plentiful foods is headed by ready-to-cook turkey. Marketings of live turkeys this time of year are light. Turkey prices have been the lowest since 1941 so consumption has

been unusually heavy. But these facts, supplies are plentiful. So "Turkey for Easter" may be economical as well as nutritionally appropriate.

April also holds promise of abundance of milk and spring production increases. Prices already have dropped considerably since the winter. And with milk plentiful, there are huge supplies of the family of dairy foods.

Texas homemakers want to take advantage of plentiful potatoes, canned peaches, honey and vegetables and oils, this April.

Potatoes have been and low priced all winter. A 1961 pack of canned potatoes both cling and freestone—record large. Honey production totaled 274 million pounds, a record. And first-of-its-kind stocks of salad and cooking oils reached an all-time high of 1 million pounds.

The American National Cross last year issued certificates, a peacetime course to persons completing the

**March 31 Final Date for Feed Grain Signing**

Corn and grain sorghum producers must decide soon whether or not they will participate in the 1962 Feed Grain program, reminds Joe Burkett, County Agent.

March 31 is the deadline date for declaring intent to comply and notice must be given in writing to the county ASCS before that date.

Burkett points out that non-cooperators may plant all the corn or grain sorghum acreage they wish and the grain produced may be either fed or marketed. If it is sold it will bring only the market price since no government support price can be obtained. They can get support prices for oats, however, if this grain is placed under loan.

Growers who do comply must divert at least 20 per cent of their feed grain base into conservation use. For this land they will receive payment equal to 50 per cent of normal production. In addition, as cooperators they will be eligible for price support on the normal production from reduced acreage.

Producers who need assistance in figuring the possible effects of the program on their net farm income can get help from the county agent. County agents have copies of budget forms which can be used to figure alternatives and how the decisions may affect net profit from grain.

Other factors may also influence decisions in some areas of the state. These include soil moisture conditions at planting time, availability of acreage of other cash crops, amount of production capital available, need for home produced grain in conducting the livestock portion of the business and the outlook for grain prices in the months ahead.

If further information is needed, contact the office manager of the county ASCS, and notify the office of your decision before the deadline, advises Burkett.

**State Committee Lists School Board Member Qualifications**

The Texas State Committee on Public Education released Sunday a guide for electing public school board members.

Several thousand school board members will be elected across the state April 7, the committee said.

Fifty teachers, school administrators and business and professional men comprise the citizens group.

The committee defined a good school board member as:

- A strong believer in public education and its importance to the individual, community, state and nation.
- Sincerely interested in children, never forgetting that they are the reason for public schools and for his trusteeship.
- Aware of the differences between policy and administrative or classroom procedure.

The show was filmed on location at the Lions Club Camp for the Blind in Kerrville, Texas, near Austin. Several members of the school's staff are shown in scenes of its training of the school's real-life director, Dr. Frank Robinson.

Barbara Barrie is featured as Celia. Both Coleman and Dallas Mitchell are also in the cast.

All Lions of Texas, including Lions from Crowell, own and operate this camp.

The American National Red Cross last year collected, processed, and distributed 2,508,000 pints of whole blood, all from volunteer donors.

**STATE CAPITAL Highlights AND Sidelights by Vern Sanford**

Austin, Tex.—Capital newspapermen quizzed candidates for lieutenant governor at a Sigma Delta Chi dinner and found wide variety in the answers.

At a prior meeting the professional journalism society had quizzed the gubernatorial candidates.

Big news of the session was the unanimous opposition to legalizing pari-mutuel betting on horse races. Texas voters will have an opportunity to express their own views on this subject at the May 5 primaries.

Rep. V. E. "Red" Berry of San Antonio got this issue listed on both the Democratic and Republican primary ballots by presenting both political party headquarters with petitions signed by more than 200,000 persons. Petition asked the legislature to give the people an opportunity to vote on pari-mutuel betting.

Further questions to the candidates at the newsmen's dinner revealed diverse opinions on repeal of the poll tax as a prerequisite for voting. Four favored repeal; two opposed it. Senator Preston Smith and Bill Hayes were the opponents.

Candidates present at the meeting were Senators Preston Smith, Jarrard Secrest, Crawford Martin and Robert Baker, all democrats, and Bill Hayes and Kellis Dibrell, republicans. Speaker James A. Turman, the seventh candidate, was absent.

Former Lt. Gov. Ben Ramsey moderated the discussion. He closed the session with a comment that most people underestimate the importance of the job of lieutenant governor. Because all state policy is made by the Legislature, the lieutenant governor is of prime importance. He presides over the Senate, names the Senate committees, and decides which committees will handle bills. Thus he has almost absolute control over the course of legislation — which is state policymaking.

**POLL LISTS HIGH** — It seems like there's a record number of candidates running for state and national office this year. There also appears to be a record number of potential voters.

A recent count showed 2,373,857 Texans paid poll taxes or filed for exemptions this year. That's 218,212 more eligible voters than last year.

With 15 county totals still due at the State Comptroller's office, including some big cities, the list may exceed the record-setting 2,594,251 who paid to go to the polls in the 1960 presidential election.

All poll tax payers who show up at the May 5 primaries will answer the big question: Do they want to keep the poll tax as a voting requirement?

Their answers on primary tickets of both parties should be a representative decision on the long-battled subject.

**ATTORNEY GENERAL RULES** — Angelina County Attorney Dan Brazil asked Attorney General Will Wilson whether a precinct chairman who is elected in a May primary can take office immediately.

He was told that even though a man becomes precinct chairman without a run-off, he must wait until the Saturday after his county run-off election before he assumes his new duties.

Attorney general also ruled that the "banking escheat" law calls for bankers to advertise for missing depositors in May of this year.

He also interpreted the criminal code to read that a justice of the peace cannot collect a \$4 trial fee if the case at hand is dismissed.

**EGG STANDARDS UPGRADED** — Benefits of the crackdown on egg grade violations in 1958 were reaped by Texas housewives. Number of below-quality or inedible eggs reported for the last quarter of 1961 was only 1.2 per cent.

Agriculture Commissioner John White said the incidence is "the lowest in history for Texas and probably as low a level as ever attained by any state."

When the Egg Law became effective in 1958, violations were uncovered at the rate of 16 per cent. State Department of Agriculture spent \$39,902 in fiscal 1961 to see that the law was enforced.

At a meeting of the Texas Egg Advisory board, White commended the state's egg industry for its cooperation in the egg "clean-up."

Board includes G. F. Siebel of Burton, Marvin Gilbreath of Weimar, Jack Dubose of Gonzales, T. D. Craddock of Hamilton, Tom Boothe of San Antonio, D. W. Reneau of Seguin and F. Z. Beamblossom of Texas A&M.

**A HALF MILLION MILES TO SCHOOL** — Texas Education Agency clocked school bus mileage in the state's 1,483 districts. They found that 8,240 bus drivers drive almost a half-million miles daily to take 420,000 children to school.

Some West Texas school buses travel as far as 229 miles a day.

**TEXAS DAY AT THE FAIR** — Seattle World's Fair officials have invited Governor Daniel to come to the fair on April 27. Billed as "Texas Day," the state will be saluted in a special program in which college, high school and other units can take part.

Schools that are interested in sending representatives should contact the governor's office. The Choralettes of Lamar High School in Houston already have been booked to sing April 26-29.

**Record Expenditures**

According to the Association of American Railroads, the federal, state and local governments will make record expenditures this year — averaging more than \$271 for every family in the nation — to promote the railroads' competitors. The money will go for the domestic waterways, highways, airports and airways, and air mail subsidy payments. The total cost will be about \$13.8 billion, of which \$4.6 billion will be spent by the federal government, and \$9.1 billion by state and local governments. In 1960, the Association adds, the self-supporting railroads spent more than \$1.4 billion on their rights-of-way for construction, maintenance and tax payments.

a deal consummated by helpful presidents Preston Tisch (left) of Loew's Hotels, and Howard B. Johnson of the Howard Johnson Company, the latter concern will take midtown Manhattan's Howard Johnson Motor Hotel, the 12-story, 300-room inn, now under construction by Loew's on the west front of Eighth Avenue between Fifty-first and Fifty-second Streets, will be ready for its first guests on May 1.

The new motor, a model of modernity in every sense of the word, will be Howard Johnson's 107th nationally but first in New York City. It provide motorists with a final stop-off following a New York-bound trek via other of the Howard Johnson motor inns along the way, and, according to Mr. Johnson, will feature the same fine service found in the company's other motels, plus some additional luxury touches.

Loew's Hotels, which currently operates the Summit of New York and has the 2000-room Americana, plus another Park Avenue hotel and a motor inn of its own under construction in Manhattan, is optimistic about the hotel picture in Gotham.

"New York needs new hotels," said Mr. Tisch, "and we're building them. We welcome competition."

## An Open Letter to The People of Texas

The Texas Rehabilitation Center, operated by the Gonzales Warm Springs Foundation, is in danger of closing. This would be a tragedy. The facilities, the treatment program of this place are needed now more than ever, and yet a lot of people don't realize this. I've heard it said, "Well, polio, is on the decline, is the place needed anymore?" Is it needed! May I tell you a story? Statistics could easily show this need, but I somehow feel the subjective description of one person's rehabilitation will give a much better picture.

The story is my own. Nine years ago, I like some of you, didn't even know TRC existed! I probably wouldn't have given it much thought even if I had known—polio and other cripples were foreign to my world. Then there was a car wreck. A broken neck. Paralysis. For three months I lay in St. Mary's Hospital here in Port Arthur. Slowly I moved my arms and hands again, but even today, there has been no movement in any muscles from my armpits down. Need I describe the desolation of those first few weeks, months?

Little did I know then the excitement that lay ahead. Yes, excitement! To my surprise, I found it very exciting relearning things, simple movements that had always been taken for granted. I started learning these things here but my therapist suggested I go to TRC where I'd get daily care which of course would make for speedier progress.

At TRC the new excitement didn't start right away; I was too lonely and afraid—I'd never been away from home very much before. But, with the help of my physical therapist, I began to realize the challenge that lay ahead.

I found myself determined to learn all I could with the muscles I had left. First came the mastering of eating utensils, then came muscle-building exercises. Then I learned to get in and out of bed alone, to put most of my clothes on, and to type again. Really, the list is endless!

Besides the physical, TRC also treats the whole person. My outlook on my condition changed completely while I was there. The doctors, nurses, therapists, and the ward ladies all helped me realize that I was a person and that a person's inner make-up is much more important than his physical make-up. With this realization came new self-respect and renewed faith in the goodness of life.

To round out its program TRC also included religion. On Sunday mornings, Mass was held for us Catholics in the wheel chair chapel and then, later in the morning Protestant services were held in the same room.

Now the Texas Rehabilitation Center may have to close. Please don't let that happen. If you do, where would you go to learn a new life if something happened to you? And don't think it can't happen, because it can. I found that out. Yes, polio is on the decline, but accidents of all types are not. Rehabilitation is needed now more than ever. Give us your support and I and all TRC will say, "Thank you and God bless you!" TRC's address is Box 58, Gonzales.

Joan Letulle, Port Arthur, Texas. TRC Patient, 1954.

Crowell, Texas, March 22

Mrs. Sam Kuehn. Young homemakers ever mindful of their budget find that spending means—sometimes.

By sensible shopping, you can be able to stretch dollars, you can earn from 20 to 30 percent on money without it, lending it or doing more than spending it.

Try these suggestions to shop and save: Try to wait for sales what you want, and look gains just before each season. Plan your wardrobe and plan it ahead.

Learn to distinguish "leader" sales, which are made, low-cost offers of merchandise; and "bait" sales, which promote store sales just to get you in.

Merchandise offered cannot be returned, so do sale garments. Stick to lines in clothes, so they're out of style.

When buying cosmetics buy your brand of the soap, shampoo and the giant size to save pennies trips to the store.

Buy stationery when sale, taking advantage of count price.

Save on postage stamps chasing them at the post rather than costly postage chimes. Keep a supply of cent postcards.

Revolutionary Sub

According to the March, 1962, issue of U. S. Naval Institute Proceedings, "A revolutionary, deep-diving aluminum research submarine designed to explore the ocean depths almost three miles down, is under construction with launching scheduled for 1963. With only about 2 per cent of the ocean's bottom topography adequately recorded, there is a pressing need for a research submarine that will provide operational familiarity with the under-sea environment at great depths. 'Aluminaut,' as the undersea vessel is called, should be able to do this for the craft is designed to operate at a depth of 15,000 feet (and is expected to provide valuable information for combat submarines designed to operate at great depths."

Two Minutes With the Bible

"The Cross and the Christian"

Nothing will prove so helpful to a Christian in overcoming sin as an appreciation of Christ's death for sin at Calvary. The Bible teaches that:

1. The cross stands between the believer and his sins; the wrong things he does, or is prone to do in thought, word and deed.

2. The cross stands between the believer and his sin. It is not only men's sins that keep them out of heaven, but their sin; not merely what they have done, but what they are and would do; not merely their deeds, but their nature. But Christ's death took care of this too.

3. The cross stands between the believer and his sinning.

Resident trappers licenses are required for persons who catch furbearing animals and sell pelts. This license costs \$1.00. Fur buyers are required to buy a \$25 license. Fur dealer reports are required from "any person, firm, or corporation except the trapper selling his own catch, who orders or buys pelts of furbearing animals."

The open season for taking pelts of furbearing animals is during the months of December and January, except muskrats, and that season extends from November 15 to March 15. A number of counties, however, have local laws affecting trappers, and a person engaging in trapping should familiarize himself with the laws pertaining to his particular county, according to Phillips.

600,000 People Bitten by Dogs Last Year  
Some 600,000 people were bitten by dogs last year. Today's Health, the American Medical Association's magazine of general circulation, provides a few, simple precautionary rules: Don't give a dog to a small child—under six—unless you are prepared to be constantly on the scene when the two are together. Never allow a child to tease or abuse the dog, and see that he learns about training and care. Let the dog alone when he is eating. Remember that a dog, stimulated by running and
