OLD FOLKS SAY DR. CALDWELL WAS RIGHT

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice. He treated constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin. The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs? A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles, or write "Syrup Pepsin," Dept. BB, Monticello, Illinois, for free trial bottle.

attended the show at Crowell Friday night. Emmett James, who has been ill, is much improved. W. N. Woodard's bridge gang has been stationed here since Tuesday of last week repairing the bridge on Pease River. Mrs. Frank Hukill of Crowell spent several days last week with Mr. and Mrs. C. L. Cavin before going to her new home at Pampa. Tom Whitson and Charles Bell of Ft. Worth visited their brother, Arthur Bell, and family last week. Their father, J. R. Bell, returned home with them to spend the winter. L. D. Fox and little granddaughter, Thelma Jo Hairston, of Crowell were here Wednesday. Mrs. Dora Gregg and children of West Rayland spent Saturday with Mr. and Mrs. E. D. Edwards. Mr. and Mrs. Payne Neill of Vernon visited A. W. Crisp and family Sunday.

Found at 71 Very Medicine He Required

Venerable Citizen of San Antonio Tells What Konjola Did in His Stubbard Case

"It was nine years ago that I began having trouble with constipation, indigestion, bloating and poor appetite," said Mr. William Davis, 71, of 732 Kayton Avenue, Dallas. "I took several kinds of medicine but nothing did me the good that Konjola

MR. WILLIAM DAVIS

did. I had to take laxatives daily and gas and indigestion followed practically every meal. At times the pain was so severe that I could scarcely bear it. My entire system was run down. "I read so much about Konjola that I decided to give it a trial. I noticed an improvement within three days and in three weeks I felt better than I had in years. I am telling all my friends about Konjola and expect to take it until I am free of all ailments." Konjola has done as much for thousands when taken regularly over a six to eight week period. It is truly a master medicine for ailments of the stomach, liver, kidneys and bowels, and rheumatism, neuritis, and nervousness. Konjola is sold in Crowell, Texas, at Ferguson Bros. drug store, and by all the best druggists in all towns throughout this entire section.

He will give free consultation and examination. Services and medicines at reasonable cost in those cases in need of treatment. Remember the date, and bear in mind that his treatment is different.

Married women should come with their husbands, and children with their parents.

Rea Bros., Laboratory, Minneapolis, Minn. 18p

Hadn't Seen a Well Day for 15 Years, Says Farmer

Abilene Man Says Argotane Has Done Him a World of Good—Gains Daily

"It sounds like it would be enough to say that Argotane relieved me of troubles that have made me miserable for fifteen years, but that's not all this medicine is doing for me, for I can just feel myself gain in health and strength every day and I feel like a different man."

The above remarkable statement was made on January 7, by L. G. Calcote, a well-known farmer on rural route 4, Abilene, Texas.

"I've been a farmer for thirty years," he continued, "and for fifteen years of that time I've hardly known what it was to have a well day. In fact, for the past four years, I haven't been able to do any work at all, my nerves and system have been so torn up, I was very sore across my back, as well as weak and run-down. I never had any sharp pains exactly but there was a dull aching feeling in my stomach and back practically all the time that made me miserable, and no medicine I took gave me any relief."

"That's what makes it seem so wonderful to be feeling like I am today. I have only taken two bottles of Argotane and I can tell you, truthfully, a great many of my old troubles are disappearing. I can eat a good hearty meal, sleep like a log, and the soreness in my stomach and back has left me. All I could say wouldn't tell half the gratitude I feel toward Argotane."

Genuine Argotane may be bought in Crowell at the Reeder Drug Co.

Two-Times Winner

Little Beverly Farr won a blue ribbon as the most perfect baby in her birthplace, Ogden, Utah. Then her folks moved to California and this year she won the Oakland perfect baby prize.

News' classified ads get results.

Outstanding features of the new Chevrolet 6-cylinder truck

NEW DUAL WHEELS

6-CYLINDER 50-HORSEPOWER MOTOR

NEW FULLY ENCLOSED BRAKES

NEW RUGGED REAR AXLE

To every man who buys trucks, there are certain features in the new 1½-ton Chevrolet that recommend it especially for modern hauling.

The rear axle is larger, heavier and more durable. The rear brakes are larger, and all four brakes are completely enclosed. Chevrolet's 50-horsepower valve-in-head six-cylinder engine combines modern performance with unexcelled economy. Dual wheels, along with six truck-type cord tires, are optional equipment at slight extra cost. In addition, the new heavy-duty truck clutch, the 4-speed transmission and the heavier, stronger frame are factors of outstanding importance to the modern truck user.

Come in today and arrange for a demonstration of the new Chevrolet!

OVERPRODUCTION

The business stringency from which the United States has been suffering for the past year, and from which recovery is now slowly setting in, is not confined to this country. All over the world similar depression exists, with very much more serious consequences to the masses of the people than we have experienced so far.

There is not much consolation for the man out of a job in the knowledge that there are more men out of jobs somewhere else. But it is something to understand that the condition which we are facing in America has not been wholly caused by anything which we could have prevented. In every nation of the world the people are blaming their respective governments for the stagnation of industry. In several South American countries the resentment has expressed itself in revolutions which have thrown the old government out. In Europe political conditions are critical in Germany, England, France and Spain, from the same causes.

Economists who have delved deeply into the present world situation blame it largely on the overproduction of raw materials of all kinds all over the globe. And that over production is a direct result of the war. Although the war was over twelve years ago, its effects are still being felt, as they will be felt for a generation to come.

During the war every form of production of raw materials was immensely stimulated in the countries outside of the war zone. Immediately after the war there was a tremendous demand for copper, tea, rubber, coffee, sugar, cotton, wheat, corn, beef, silver, wool, and so on through the whole list of raw materials. The prices which were paid further stimulated production. Statesmen who foresaw a glut of these things, beyond the ability of the industrial world to utilize them, began to counsel caution, but producers who had been reaping the big profits of high prices were only human, and continued to produce in the hope that prices would keep up.

Of course, prices began to fall. Worse than that, producers of some commodities found themselves with hardly any market at all. In many other lines, prices fell below the cost of production. We have had only a slight touch of this world situation, in the falling price of wheat to the grower, in the low price the planter gets for cotton. We have been going on at the over-stimulated pace set in war times, when "marginal" lands which it does not pay to cultivate in peace time, were put into crops which cannot now be profitably marketed.

This overproduction is the underlying cause of all the world's economic troubles, in the opinion of some authorities. It certainly has a great deal to do with it.

It's more charitable to judge some folks by what they don't say than by what they say.

PROBLEMS OF EMPIRE

Texas in area and natural resources often has been called, and rightly, an empire. It is the coming empire State, and within a generation will be admittedly a leading Commonwealth in the Union.

But this coming leadership demands that those who control the destiny of the State should have vision and foresight sufficient to plan in a large way a program as a guide for action in later years. Topsy "just grewed," but scientific growth is based on intelligent surveys of situations and wise judgments.

Texas has enormous natural wealth, but the wealth from the production of it enriches outsiders; little remains within the State. It has much capital in its financial centers, but comparatively little of it is invested in Texas industries. The purchasing power of its almost six millions of population is huge in amount, but the goods purchased mostly come from outside the State.

Through ignorance the fertile lands of Texas are declining in fertility because of erosion and a one-crop system; its magnificent forests have been shamelessly wasted and practically no attempts made to reforest cut-down areas suited only to timber. Texas is an empire of natural wealth, but its economic leaders accumulate wealth for themselves with small forethought for the future generations of Texans.

The best wealth of Texas consists of the energy and brain capacity of its people. Among these is much dormant talent that should have opportunity for expression in action. But more than half the population are so poor that their standards of living are necessarily low. In consequence, their children are worked prematurely, and, obtaining merely the rudiments of education, they become stunted in body and mind—the greatest waste of a wasteful State.

What Texas needs is a definite program set for the younger generation to accomplish in the next twenty-five years. The resources of Texas should enrich Texas and Texans. Its farming population should own their lands, not be tenants in a condition quite like serfdom. Its empty forest lands should be reforested and exempted from taxation for the period of growth. Small industries should be established in every village and town of the State to supply work and to put on sale Texan-made goods. "Made in Texas" should be a guaranty of excellence in material and manufacture. Above all, the younger generation should be free to acquire a generous education, combined with a training for vocations on the farm and in the future industries of Texas.

Texas needs local Chambers of Commerce, civic improvement societies, and city planning. It needs a new Constitution, a reorganized government, wise legislators who can think in terms of an empire State. It should place obligations on its professions to give to its people health, good laws, spiritual insight. It should aim to develop that broad intelligence that appreciates the value of the artistic in connection with vigorous applications of the many varieties of science to the problems of the State.

Talk Texas, think Texas, help make Texas famous for its comfortable homes and its wide-awake intelligent citizens.—Dallas Morning News, Oct. 14, 1930.

Weeds that attack crops cost California \$25,000,000 a year.

—A John Knott Cartoon, courtesy of The Dallas News.

YOU'VE GOT TO GIVE THEM TIME

A woman whose son is in his second year at college writes that her boy is well mannered and intelligent but does not seem to have any objective.

"His father and I urge him to decide what he wants to do in life," she says, "but he tells us that he can not make up his mind." For the encouragement of this mother I can cite two interesting cases.

A certain man now stands near the top of his profession, with an income of considerably in excess of a hundred thousand dollars a year. He worked hard in college, but his health was poor; he was frequently despondent, and at his graduation he felt that he was not trained for anything.

He took the first job offered, and made surprisingly good progress. Just about the time that his parents thought he was well established, he suddenly chucked the job and started around the world. After a year's travel, which used up all his savings, he started in another position. The company failed, and he was out again. A third time he started in a different line, but it did not interest him. He could not get to first base.

On his fourth attempt, when he was almost thirty years old, he finally found work that gripped him. Also, he became engaged to be married. He jumped into high speed and has been successful ever since.

I know another man whose ability was clearly recognized by the heads of the big company where he worked, but somehow they could not see to fit into the place where he would be really productive. Four or five times they shifted him into different departments. They were just about to turn him into the street when he struck the one thing for which he was really fitted. Today he is vice president of the whole concern.

When I buy an automobile the salesman tells me that it has been perfectly manufactured for its work, and carefully inspected and tuned up. At the same time, he says that I must be patient with it. For the first two thousand miles I must run it slowly, and bring it in often and have it adjusted.

We expect this in an automobile. But in a youngster we have the notion that the factory—which is the school or college—ought to turn him out all ready for a championship race at high speed.

It takes a lot of wisdom and patience to be the father of a boy who is starting in life. Boys must have a chance to get adjusted. You've got to give them time.

NAVY DAY

October 27th is Navy Day, the one day in the year which has been set apart to better acquaint the American people with their Navy, its wonderful history, its peacetime missions, and its ships and men. It is particularly fitting that the birthday of President Theodore Roosevelt has been designated for annual commemoration as Navy Day, for it was during his administration that the Navy received that impetus which resulted in the United States taking its proper position in the front rank of nations.

In order to fittingly celebrate the occasion, the entire United States Fleet is divided, and ships, singly and in groups, are sent to all seaports. Flags are flown from every masthead. Parades of bluejackets march the streets ashore. Holiday is declared. All ships are thrown open for inspection by their shareholders, the American people, and the Navy is "at home."

The country wide celebration of Navy Day is under the auspices of that group of patriotic citizens, the Navy League of the United States who, with President Roosevelt, believe "The United States Navy is the surest guarantor of peace, which this country possesses." But the Navy is not only an instrument of war; it is a powerful influence for peace; it is a pioneer in many industrial developments; and its effect on our national life, both international and domestic, is so great that even estimation fails.

October 27th is an appropriate date for Navy Day for another reason—for on that date in 1775, the first resolution to authorize American warships was introduced in Continental Congress. Since that time the United States Fleet has had many changes; it has decreased at times and has expanded at times; public opinion and disarmament conferences have resulted in fleet reduction; wars have resulted in large building programs—but withal, we now have

a Navy of which we may well be proud, and we shall retain the firm conviction that regardless of the task set before it, in peace or in war, the Navy will merit the simple praise, well expressed in two words, "Well done."

Feeder-Breeder Ass'n.

(Continued from Page 1) the feeder, according to Mr. Rennels. Through the National Finance Credit Corporation, which has been recently organized, it is possible for the farmer who has his own feed for a car or two of cattle, to purchase that amount of cattle and have them delivered to his railroad station.

Due to the extreme shortage of feed in this county, it may not be practical for use in a general way, however, with the wheat pasture in prospect, there are some that may be able to take advantage of the arrangement. It may be possible to use wheat as a basis for feeding cattle when wheat is as low as it is at present, according to Mr. Rennels.

Once upon a time there was a man who didn't think his car was the best one on the road.

BATH ROOM HEATERS \$2.25 \$3.75 PHONE US ABOUT THEM Second Hand Coal Heaters Banquet Range M. S. Henry & Co.

THEY ASK FOR FAIRNESS Production from the Valley grapefruit trees, however, will not approximate that in Florida until the young trees have reached maturity. Goodyear Supertwist Machine Is Installed M. F. Crowell, local dealer of the Goodyear Tire & Rubber Company, has installed an unusual piece of apparatus known as the Supertwist machine. This device was designed for the purpose of demonstrating the reactions of tire fabrics when subjected to severe and unusual strains, such as frequently occur to an automobile tire in actual service. For the purpose of the demonstration, a strand of Goodyear Supertwist fabric and a strand of standard fabric are strung in place across the machine's framework. By means of a crank, the two strands are stretched with equal pressure until the breaking point is approached. When the pull is released, the Supertwist fabric springs to its original position much in the same manner as a rubber ball which is released from compression in small space—the principle of supertwist being to absorb road shock rather than resist such shock. Tests with the machine also prove that Supertwist, the fabric used in the manufacture of Goodyear tires, will stretch up to 60 per cent farther than standard fabric. Mr. Crowell invites local motorists to come to his station and witness a demonstration on this novel machine.

Texas Soon to Lead World with Grapefruit Harlingen, Texas, Oct. 23. (UP). Within another year the Lower Rio Grande Valley will have more grapefruit trees growing within its boundaries than any other region in the world. Florida now is credited with the largest number of grapefruit trees but official records show that planting there has been at a standstill, except for replacements for the past few years. Florida officials report 5,180,000 bearing grapefruit trees and 400,000 non-bearing trees most of which are replacements. Of the 6,000,101 citrus trees of all varieties counted in a census by federal inspectors in the valley in April 1, 4,201,650 are grapefruit. Reliable figures on proposed plantings during the present year indicate that approximately 1,500,000 additional citrus trees will be set out, 1,250,000 of which will be grapefruit. During the fall of 1931 sufficient additional plantings will be made to bring the total number of trees over the six million mark.

ARE YOU LOOKING AHEAD?

Are you intent on succeeding in life? Do you have a definite goal toward which you are working? Ten years from now will you be able to say, with a clear conscience, that you have done your best to save and have something?

Or will you still be among those that spend all they earn as they get it, with no thought of the future and saving for an estate and an opportunity?

THE BANK OF CROWELL

Locals

C. C. McLaughlin made a business trip to Hereford this week.

Mr. and Mrs. Grover Cole were visitors in Breckenridge last week.

Miss Mabel McMurry visited her mother in Seymour over the week-end.

E. A. Rogers of Sweetwater was a visitor at his farm near Crowell Wednesday.

Rev. Gerlich, Catholic priest of Brown, was a visitor in Crowell Monday.

J. W. Bell returned this week from Fort Worth, where he shipped a car of cattle.

Lost in Crowell Wednesday night were two tires from a Buick automobile.—J. F. Long.

Mrs. R. L. Leonard of Memphis, Tenn., came in Wednesday for a visit with her sister, Mrs. C. R. Ferguson, and husband, Mr. and Mrs. Ferguson met her in Vernon.

Miss Barbara Cryer, Crowell school teacher, who has been ill for the past two weeks, was taken to the Texas City hospital last Thursday night. Her condition is reported as unchanged.

Mr. and Mrs. Will Riney and small daughter, Jamie Lou, left Monday morning for their home at Pilot Point after a week's visit with Mrs. Riney's sister, Mrs. C. W. Thompson, and family.

Harland Hallmark and family left Wednesday for Hedley where they will make their home on a farm. Mr. Hallmark has been in the employ of the West Texas Utilities Company for the past five years until recently.

Mr. and Mrs. H. S. Cummings and son, Jimmy, of Nacogdoches, and their daughter, Mrs. H. L. Coffman, and husband of Stratford are here this week visiting in the home of Mrs. J. C. Davis, daughter of Mr. and Mrs. Cummings.

J. E. Atchison, county judge, returned Sunday from a business trip to Dallas, Fort Worth and Wichita Falls in the interest of the county. He returned by way of Abilene where Mrs. Atchison, who has for the past month been visiting her daughters, Pansy and Violet, students in Abilene Christian College, joined him on his return.

N. J. Roberts was a business visitor in Vernon Thursday.

Mack Boswell returned Monday from a visit to the Dallas Fair.

Clarence Self was a business visitor in Wichita Falls this week.

C. W. Andrews of Vernon spent Sunday with his parents, Mr. and Mrs. L. G. Andrews.

Rev. and Mrs. B. J. Osborn left Wednesday for Wellington to visit their daughter and family.

Mr. and Mrs. J. E. Harwell and children and Miss Frankie Kirkpatrick visited in Dallas this week.

A. H. Culbertson of Fort Worth, one of the owners of the local gas company, was a business visitor here Wednesday. It was necessary for him to leave suddenly as the result of a message that his uncle, who raised him from infancy, was dying in Minnesota.

Frank Moore made a trip to the Dallas Fair the past week-end. He was accompanied home by his brother, J. R. Moore, of Dallas who will visit here for several days.

W. J. Gover returned home Thursday of last week from Palacio where he had been for two weeks looking after his farm near that city.

ROTARY LUNCHEON

Short talks and vocal numbers featured the Rotary luncheon Wednesday which was in charge of J. R. Beverly. Talks on various subjects were made by Eli Smith, George Self, John Ray and M. S. Henry. Vocal solos were given by Que Miller, John Rasor and Eli Smith, who also joined in singing a song together.

TRAINING SCHOOL TO BE HELD AT BAPTIST CHURCH 5 NIGHTS

A Sunday School training school will be held at the Baptist church, beginning Monday evening at 6:30 o'clock. The school is to continue for five consecutive nights.

The courses to be taught and the teachers of each are: "Intermediate Sunday School Manual," Ernest King; "The Psychology of Teaching," I. T. Graves; and "Our Lord's and Ours," Rev. W. W. Smith.

Chrysanthemums were introduced into Europe in the seventeenth century.

Card of Thanks

We wish to extend our sincere thanks and appreciation to all who ministered to us in any way in our hour of sadness. Especially are we grateful to Dr. Clark for his faithful service. The memory of the loving words and the beautiful flowers will always be remembered. May God's richest blessings be upon each one.

Mrs. P. P. Cooper.
Mr. and Mrs. Roy Cooper.
Mr. and Mrs. O. M. Gentry.
Mr. and Mrs. Gordon Cooper.
Mr. and Mrs. Sewell Roy.

TEXON TALES

Well, just like I said before, all I know is just what I hear around the postoffice and everywhere. I don't read the papers no more. I used to read them alright but all I ever found was about farm relief, drouth aid and a few robberies. They wore out the farm relief and drouth aid until it has got as wet as Paris. If it rains too much we will just have to blame it on Hoover or prohibition, either or both. I just as soon have too much mud as too much sand if not sooner. It is just a matter of opinion and all you have to do is just wait and you will get the kind of weather you want. It's about that way with everything. If you look for something and wont look for nothing else why you aint got nothing to do but find what you are looking for. Some people pride themselves on snap judgment of their first impressions of people they meet. If you keep up with any guy long enough you are mighty liable to find him doing things sooner or later that will hear out any kind of an opinion you have of him, good or bad. The worst of us are capable of worse things and the best of us better things as well as vice versa, etc. The crook is always figuring everybody is a crook and they most always turn out that way to him just to not disappoint him maybe but at the same time you take a good sport and he thinks everybody is a pretty good fellow and they are so far as he is concerned and that is all that counts to him. Now, you take the fellow who talks hard times and thinks hard times and fears hard times and everything all the time why he would be disappointed if we didn't have a little hard times. Some of us have got to have our struggles. One bird says he doesn't mind hard times as that is all he has seen for the last forty years. Well, it just goes to show that what is worst wrong with most of us is just in our own noodes. Just take the weather for example and remember you are most liable to find what you look for the hardest and look for the right kinds of things and that is the only way to do.

TEXON TATTLER.

West Texas Utilities Co. Has Big Program of Construction Work

Abilene, Texas, Oct. 16.—An unusually large program of construction work has been planned by the West Texas Utilities Company during the past week, according to an announcement from the general office of the company here. The building program will include extensions and improvements on existing lines, improvement of substation equipment and distribution systems and considerable activity in oilfield development.

A new distribution system will be built at Texline, while at Lela, Santa Anna, Knox City, Albany, Dalhart and Dumas, extensions and improvements will be carried forward. At Memphis, an extension will be made to furnish power to the Memphis Cotton Oil Company.

Extensions planned for San Angelo will be lines to serve the Montgomery Dairy and equipment to furnish electric service to the new Mountain View residential addition. A 2300 volt primary line will be installed to connect new commercial and residential customers in North San Angelo.

At Santa Anna, new single phase lines will be built to serve additional customers, and at Vernon, Ballinger, Rankin, and Shamrock, lines will be extended in order to connect new customers and improve service to present users. At Carey, an extension will be made to supply power to the Jones Gin.

Substations at Big Lake, Robert Lee, Bronte and Merton will be improved through the addition of new automatic switching equipment.

Indicating considerable activity in oilfield development, new lines have been built in the South Vernon, Pecos County, McCamey and Albany fields. The Grayback Development Company and the Waggoner Company in the South Vernon territories have required additional service for pumping and drilling. A substation will be built to serve the Waggoner Company's refining operations. In Pecos County, the Mazda Savoy Oil Company will be given additional service of the pumping of two new wells, and a three phase line will be strung to furnish power to the Shell Pipe Line Company. The West Texas Petroleum Company in the McCamey Field will be served by a secondary line, furnishing power for the drilling and pumping of two wells. At Albany, a 4000 volt primary line will be built to serve pumping demands within the city limits.

City and municipal improvements planned include the installation of new street lighting units at Quanah and Memphis.

THE HIGHEST COURT

Worthy merchandise is the only kind that can successfully stand trial at the highest court in the land—the court of public opinion. All others are soon condemned and sentenced to oblivion.

The merchant who advertises, deliberately places his merchandise on trial. He invites your critical inspection. He makes publicly certain claims upon the fulfillment of which depends his commercial success. If would not dare to advertise. For advertising would put him to a test he could not meet, and thus hasten the end of his business career.

Advertising protects you against fraud and inferiority. It saves you money by presenting for your consideration only the best products.

Well-informed buyers seek news of good merchandise in the advertising columns and are guided by the advice they find there.

What the Normal Man Should Weigh

Ages 45 to 49

According to Leonard Williams, M. D., a gifted writer on Obesity—a man's normal weight at ages 45 to 49—

5 Ft. 7 Inches	156 Pounds
5 Ft. 8 "	161 "
5 Ft. 9 "	167 "
5 Ft. 10 "	172 "
5 Ft. 11 "	178 "
6 Ft. 0 "	184 "
6 Ft. 1 "	191 "
6 Ft. 2 "	198 "

These weights include ordinary indoor clothing. Get on the scales and see if you are overweight and how much.

The Modern way to take off fat is known as the "Kruschen Method" and is well worth a four weeks trial. Cut out pies, cakes pastry and ice cream for 4 weeks—go light on potatoes, butter, cheese, cream and sugar—eat moderately of lean meat, chicken, fish, salads, green vegetables and fruit—take one half teaspoon of Kruschen Salts in a glass of hot water every morning before breakfast—don't miss a morning.

An 85 cent bottle of Kruschen lasts 4 weeks—get it at Ferguson Bros. drug store or any drug store in the world.

Chevrolet Purchases Martin Parry Body Co.

Detroit, Mich., Oct. 23.—Purchase of the Martin-Parry Body Corp. Indianapolis plant by the Chevrolet Motor Company, for production of certain types of commercial bodies used by Chevrolet, was announced here today by W. S. Knudson, president and general manager of the Chevrolet Motor Company.

While the plant operated this year on curtailed schedules, the Chevrolet organization expects to put it into immediate full-time operation.

Included in the purchase are forty acres of land, 550,000 square feet of factory space, an additional 150,000 square feet of lumber storage space under roof, railway right-of-way, as well as 21 branches operated in various parts of the country.

J. A. Jamieson, now Comptroller of Chevrolet, will go to Indianapolis as general manager of the new development, to be known as the Chevrolet Commercial Body division of the Chevrolet Motor Company, while the organization of the personnel in the organization will be taken over intact. Employment at capacity will total 600 men.

Despite the sale of its main production unit, the Martin-Parry Corporation will maintain its identity and continue to operate at York, Pa., and South Kearney, N. J., it was stated.

The plant purchase agreement takes effect October 15, and immediately thereafter Chevrolet will begin active operations, Mr. Knudsen said. The branches will be taken over November 1, and provisions are already being made to extend the number to more than 50 to assure adequate national facilities for exhibiting and distributing the new products of the company.

The Old Curiosity Shop, in London, made famous by Charles Dickens, is being repaired without changing its general appearance.

Texans May Inspect Modern Man of War

Houston, Texas, Oct. 23, (UP).—Visitors and Houstonians will have opportunity to board and inspect a modern man of war during the port celebration to be held here Oct. 25 to Nov. 1. The U. S. S. Houston, Uncle Sam's newest fighting vessel, will arrive in Port October 25 and remain here for a week.

Three years were required in the construction of this new cruiser, which cost more than \$17,000,000. The vessel has a length of 601 feet, and including fuel and fresh water weighs 13,000 tons. The ship can attain a maximum speed of 35 knots an hour.

SOUR STOMACH

JUST a tasteless dose of Phillips Milk of Magnesia in water. That is an alkaline, effective, yet harmless. It has been the standard antacid for 50 years. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

But don't depend on crude methods, try the best way yet evolved in all the years of searching. That is Phillips Milk of Magnesia.

Be sure to get the genuine Phillips Milk of Magnesia, the kind that the physicians prescribe.

"Milk of Magnesia" has been the U. S. Registered Trade Mark of The Charles H. Phillips Chemical Company and its predecessor Charles H. Phillips since 1875.

HIGH SCHOOL NEWS

LELLA BEN ALLEE, Editor EVELYN SLOAN, Ass't. Editor

Sophomores Provide Interesting Program at Assembly Period

The Sophomores entertained the high school students with a very thrilling program Monday morning. The program opened with Peggy Thompson playing a farce xlophone accompanied at the piano by Faye Callaway. After the curtain went down on this scene, Jo Ronark gave a reading entitled, "Between Two Loves." It was followed by a farce scene of the thrilling adventure of Captain John Smith.

Musings of the Owl

Hi-ho-hum, life is just one football victory after another. Says Wayland Griffith: "Blondes are my weakness." Says Dessa Bousouer: "Sex we."

Personally there is one boy in this high school that the Owl could become very fond of—Now watch Harold Hinds get conceited.

That Crowell pep squad certainly pleased the Owl at the Paducah game. Thanks to some good leadership and coaching.

The owl is supposed to be a wise old bird, but day after day as we learn more, we realize that we know less.

Now that wise crack, if you will pardon the slang, was not original with the Owl, Miss Winnie taught us that.

Page Ripley, the author of this column, "Believe It or Not," has a good insight on things. We like his style. In last week's issue of The High School News, there was a very creditable insertion called, "Slang." We do not know the author of this work, but doubt if we should have to make many guesses to be right.

Says the Owl, besides our health our personality is our most valuable asset in life, therefore we should cultivate our personality as well as our minds.

About the school ground we see physical education boys marching in squads of eight, and doing squads left and right. To some of us this is a pleasure, and to others it is just punishment. But cheer up boys, you know Caesar had a three weeks date with Cleopatra and then left her fat to do "squads left and right."

Oh well, folks are a funny creature. Let an unknown person hand them a hundred thousand dollars and they will spend eighty thousand of that in an effort to find out who gave it to them.

Ta hoot-Ta hoot-Ta hoo. THE OWL.

FIRE DRILL!

Fire! Fire! Was the word shouted when the fire gong was sounded

Monday morning at the high school. Whiz!—and the building was cleared. It took only one minute and five seconds for the building to be emptied. The school ambition is to be able to clear the building in one minute.

WE HAVE WITH US

1. The friend who drops in while you are studying for a quiz and asks you one million, twenty-two and a half questions.
2. The book worm who announces to everyone she meets that she made three A's this six weeks.
3. The gazook whose knowledge of football is nil, explaining just how he "could have done to have scored."
4. The girl who always states she did not make good on a test, when she knows she did.
5. A Mr. Knowall who thinks he doesn't have to study.
6. The best football team in the west. Why, even Wilson and Mason have nothing on Guy and Rags.
7. The boy who asks every girl for a date, who thinks this is a good policy to keep them all in a good humor with him.

Many Numbers Given by Primary Pupils at Program October 15

The assembly period for the grammar grades at the high school auditorium Wednesday morning, October 15th, was featured by a program given by the Primary department. Children from each room furnished numbers consisting of songs, readings, story dramatizations, health plays, a circus, and music by the Tiny Tot harmonica band directed by Mrs. S. T. Crews.

This was the first graders' initial appearance as stage performers and they presented their numbers commendably. The children from each of the other grades gave their parts in an entertaining manner.

Quite a large number of parents and friends attended the assembly. Visitors are always welcome to these assembly periods which are held each Wednesday morning at 8:50 o'clock for the grammar grades, and each Monday at the same hour for high school.

Once each month the period is used for a sing-song and once each month the program is planned entirely by a pupil committee. The other programs are given by children from one room under the direction of the room teacher.

CLEVER ENOUGH

Well, well, Mr. Owl, you are quite clever. We wonder if you are a high school student. You seem to know the "inside" of things as one would, and yet, you could be a member of the faculty. I believe we accused everyone in the faculty except Henry Black, and he would not admit it, I'm sure.

Possibly you are an outsider, securing your information from some

high school student. To say the least, you are some prowler, and it is interesting to us since we do not know you. Maybe you will be found out some day. Who knows?

BELIEVE IT OR NOT

After three weeks of suspense, Mr. Graves called assembly. Travis Fox made a talk against smoking in physical education. Coach Graves forgot to demand silence in study hall Monday. Cecil Short is studying to be valedictorian this year. Mitchell Allee got to play in the football game Friday.

WANT COLUMN

- Wanted—Some old love letters—pay good price.—Jo Griffith.
- Wanted—Someone to teach me the art of chewing gum.—Allyne Lanier.
- Wanted—A Russian Ballet dancing teacher. See or call John Todd.
- Wanted—A second-hand grading machine. See Winnie Self.
- Wanted—A good student to get my lessons. Will pay good wages.—Crews Cooper.
- Wanted—A good looking girl with curly hair.—Venson Hall.
- Wanted—Someone to correspond with as I get lonesome.—Anabel Carter.

WE GOT THIS PRETTY STRAIGHT—

Mitchell told Otis, that he heard, Orville tell J. M. that Lorraine Carter made a hundred in Latin I the other day.

That Kathryn C. writes to a college boy every other day but never receives an answer.

That the sore on Ragsdale's lip looks like a fever blister.

That Bertha W. has a definite purpose for taking Home Ec. Ernest P. looks interested.

That the Latin II class isn't half so brilliant as it should be.

That Anabel C. has an ambition to speak in assembly on "How to win and hold love."

That when the fire bell rang Monday that most of the biology students day Coach grabbed the football. have gone bugs.

A Senior stood on the railroad track, the "doodlebug" was coming fast. The train got off the railroad

track, to let the Senior pass. (It must have been Cotton Griffith.)

THE FACULTY

As I was strolling through the Woods one day, I lost my Ball. Searching eagerly, I discovered it had rolled into a Burrow. I soon became interested in a Black-bird sitting on a Hill. I tried in vain to catch it, when a young lady by the name of Schlagal appeared. She informed me that two brothers by the name of Graves wanted to speak to me, and that they were waiting at the Todd Inn.

A Black cloud appeared; lightning flashed, and suddenly the rain began to Patterson. Losing Self control I became a big Cryer. Scanning the horizon, I saw a White light in the distance. When I reached the Brown house, a servant by the name of Ellis King let me in. My escape was over. Another day was gone.

A HIGH SCHOOL EDUCATION IMPROVES LIVING STANDARDS

High school education of citizens improves the standard of living in a community, because in high school a person learns to think more clearly and in a broader sense. Some people do not understand about our government, and, because of this fact, are cheated out of a great deal of money by dishonest politicians.

Records show that high school graduates, on the average, earn twice as much as uneducated laborers throughout the working period of life. These records also show that the high school graduate earns approximately fifteen dollars every day he goes to high school. Therefore, by acquiring a high school education, a community can make more money, will be more progressive, and the standard of living will be improved.

WE WONDER WHY—

All of our six weeks exams come on the same day.

Everyone laughs when Mr. Graves tells a joke.

Someone doesn't oil the pencil sharpener.

Mary Gafford is all smiles this week.

Mr. Black stays in Miss Ball's room all the time when he isn't having a

class. Ragsdale sits in front of the library the seventh period. Evelyn doesn't like stripped down Fords anymore.

To help hold him down in the water a diver wears a belt weighing 100 pounds.

The world's best vineyards are on the slopes of volcanoes.

Crowell Service Station

"You Can't Afford to Miss Electric Range Conveniences"

"Hundreds of progressive and enthusiastic housewives have told me about the many electric range advantages, and I feel sure that now we've adopted this new, convenient and more economical system of rates, even more of you will profit by the superiorities of electric cookery, and at the same time lower the average rate for any other additional service used."

"You see, an electric range uses about 125 kilowatt-hours a month, and under the new rate system, practically all of this current would come on the lowest rate."

"In the average five-room house, normal use of electric service, without an electric range, water heater or refrigerator, will consume most of the 45 kilowatt-hours of the initial and second rates, after which all service—electric lighting, refrigeration, heating, cooking or any other use, will be figured on the 3c basis, when you use an electric range or water heater—4c when service does not include heating or cooking."

"Under the new one-meter rate an electric range will be appreciated more than ever, and is no longer a luxury."

"I have some more important messages for you, so meet me here next week."

And Remember—You Can Make Your Own Average Rate

Initial rate 12c

2nd rate 7c

MRS. R. M. MAGEE SURPRISED ON BIRTHDAY LAST THURSDAY

Mrs. R. M. Magee was surprised on her birthday last Thursday by members of her Sunday School class of the Methodist church with a covered dish dinner at her home. Gathering at the home of Mrs. B. F. Ringgold the group proceeded without notice to Mrs. Magee's home at about 10 o'clock in the morning.

The happy occasion was made an all-day affair and was enjoyed by the following: Mesdames J. T. Gribble, B. F. Ringgold, J. M. Allee, W. L. Ricks, Georgia Pittillo, W. H. Pate, Joe Johnson, B. J. Osborn, Maggie Banister, J. W. Bell and Mrs. H. L. Cummings of Nacodoches.

P. T. A. HOLDS MEETING

On Tuesday afternoon, Oct. 21, the Crowell P. T. A. met in regular session in the high school auditorium. Mrs. A. D. Campbell, president, occupied the chair and called for minutes of the previous meeting and also for minutes of an executive board meeting which had been held since the last regular meeting. The reports of other officers and committee chairmen were heard. The subject of the afternoon's lesson was "Recreation," and Miss Lottie Woods was leader in the absence of Mrs. H. K. Edwards. Miss Woods made an interesting talk on the subject and Supt. I. T. Graves talked on school play, explaining the different activities of the pupils of our own school.

Then followed a general discussion of "Use of Leisure Time at Home."

"The hostesses for the afternoon were the mothers and teachers of the second grade and pumpkin pie was served to about 45 mothers and teachers. The refreshment plates were adorned with Halloween favors which were made by the second grade pupils.

It was found, upon counting, that the second grade had the largest number of mothers present in the primary department and the sophomores in the high school. Each received a pretty pot plant to be kept by them until earned by other rooms. These plants were given by Mrs. N. J. Roberts.

The next meeting will be on November 18th and it is hoped that everyone interested in the school and its progress will be present.

ADELPHIAN CLUB

American pottery was featured in the program of the Adelpian Club at its meeting Wednesday, Oct. 15, at the home of Mrs. J. T. Rasor, with Mrs. M. S. Henry leader. Mrs. Henry was assisted in the discussion by Mesdames T. S. Haney, H. E. Ferguson and J. A. Johnson. Mrs. Haney gave the "History of American Pottery," Mrs. Ferguson the "Story of Jug Town" and Mrs. Johnson the life and accomplishments of Lenox, the master potter of American China.

Type written topics on American pottery were passed to each member, who in turn read and told her topic.

Refreshments of chicken sandwiches, hot tea and caramel pie were served to club members.—Reporter.

Water spouts are tornadoes that occur at sea or over big lakes.

P. P. COOPER

(Continued from Page 1)

ell in 1901 and Mr. Cooper died in the house in which he had lived since moving here.

He is survived by his wife, two sons, Roy Cooper of Burkburnett, and Gordon Cooper of this city; two daughters, Mrs. O. M. Gentry and Mrs. Sewell Roy, both of Crowell, and one sister, Mrs. L. A. Campbell of Athens, Texas. Four grandchildren and one step-grandchild also survive.

Funeral services were held Monday afternoon at the Methodist Church with Rev. J. E. Billington, pastor of the Paducah Baptist Church and formerly pastor here, officiating, assisted by Rev. B. J. Osborn, pastor of the local Methodist Church. Although a strong believer and reader of the Bible, Mr. Cooper had not united with any church. He was an Odd Fellow.

The pall bearers were of his own selection. They were J. H. Olds, Ben Easley, H. C. Roark, J. T. Gribble, Lee Ribble and C. W. Beidleman. The flower girls were: Misses Irene Patton, Ila Lovelady, Mildred Cogdell, Winnie Thomson, Frankie Pennington, Georgia Ribble, Lella Patton, Shirley Joe Powell, Mary Frances Bruce, Mrs. O. D. Beauchamp and Bruce, Mrs. O. D. Beauchamp, Mrs. Virgil Smith and Mrs. Otis Baldwin. Bobby and James Milton Cooper, little grandsons, also assisted with the flowers. Mrs. Adolphus Wright sang a special number.

There was an exceptionally large number of old-timers at the funeral and the loss from their ranks of a man whom they had learned to love and admire through long years of association is a distinct one. Mr. Cooper's wholesome character and general kind nature endeared him to all with whom he came in contact.

Just a few weeks ago he had the privilege of attending the old-timers meeting, which was sponsored by the Columbian Club at the Methodist Church and this meeting proved to be one of the most enjoyable events for him in many years, according to members of his family.

Following the services at the church, which was crowded with Mr. Cooper's many friends, the body was laid to rest in the Crowell Cemetery by the side of his two children.

Out-of-town friends and relatives present at the funeral were:

Mr. and Mrs. Roy Cooper and son, Gerald Burk, W. R. Kenner, Mr. and Mrs. Will Teal, all of Burkburnett; Mr. and Mrs. Steve Mills and daughter, Neva, of Truscott; Mr. and Mrs. Tim Kenner of Gilliland, all relatives of Mr. and Mrs. Cooper, and the following friends: Mr. and Mrs. Dow Hudlow of Tell, Texas; Mrs. Lee Shirley of Vernon; Mr. and Mrs. Delmar Powell of Medicine Mound; Mr. and Mrs. Carl Owen and son of Vernon, G. W. Owen of Vernon.

PADUCAH LOSES

(Continued from Page 1)

Ricks came into the game during that quarter. Fox playing one-half of the time at left half, with Mullins out, put over the touchdown in that period.

Coach Grady Graves was elated over the large number of spectators that came out to see the game, which may be accounted for as the result of local business firms closing their doors. Many fans from Paducah also accompanied their team, which made an excellent record until last Friday.

Coach Dickson of Paducah and Coach Graves were so well pleased with the sportsmanship that each team showed that they arranged for another game to be played between these teams on Thanksgiving in Paducah.

THE LINE-UP

CROWELL	PADUCAH
Crowell	Evans
J. Todd	White
Gibson	Stallings

Cooper	Cabiness

Officials: Anton Koch of Quanah, formerly of Rice Institute, referee; Ernest Patton, umpire; Spears, head linesman.

55 Commercial Failures In Texas for September

Austin, Texas, Oct. 16.—During September, commercial failures in Texas numbered 55 as compared with 78 in August and 29 in September, 1929, according to the Bureau of Business Research at the University of Texas. Total for the first nine months of the year was 446 as compared with 374 to September 30, 1929. Liabilities for September were \$1,009,000, compared with \$875,000 in August and \$128,000 in September, 1929. The total for the first nine months of the year was \$9,818,000 as compared with \$6,383,000 for the first three-quarters of last year.

No bank failures were reported during September, but the total for the first nine months of the year was seven, as compared to two during the same period of 1929.

A clam distributor at North Weymouth finds no trouble in getting customers to remember his name. His business sign reads: "Dam the Clam Man."

PALACIOS CELEBRATES

Nowhere has the value of permanently paved highways been better demonstrated than at Palacios. Here, before this little coast city has been a sort of inaccessible sportsman's Paradise: better fishing, better hunting were nowhere to be found. But sometimes you couldn't get there, and sometimes you could, and, of course, there were always the possibility that if you got in, you couldn't get out.

Then Palacios lifted itself out of the mud—by its own bootstraps, as it were. Henceforth, rain or shine, the world can travel to Palacios quickly, conveniently, over wide, concrete pavements.

This out-of-the-mud project required a large investment, to be sure, but already dividends are being earned. Three months ago there were too many vacant houses in Palacios. Today they talk of a residential building program.

Friday Palacios staged a mammoth celebration. East and South Bays teemed with speedy water craft. Forty-four daring drivers staged the season's greatest regatta in front of a pavilion that was populated with thousands of out-of-town visitors, and thousands more lined the shore. Twenty thousand pounds of beef and pork were barbecued, and more than ten thousand men, women and children made it disappear like dew before the sun.

Commercial fishers for shrimp and oysters have enjoyed a remarkably prosperous season. Sportsmen are descending upon the city in increasing hordes, and the prosperous countryside can go to town any time it pleases, regardless of the weather. Palacios has demonstrated that progress is the foundation upon which prosperity builds.—Editorials of the Month.

3-Day Electrification Conference at A. & M.

College Station, Texas, Oct. 23. (UP).—Use of electricity on the farm and in the farm home will hold the attention of a three-day rural electrification conference at the A. & M. College of Texas Oct. 30-Nov. 1. The conference will be the first of its sort ever held in Texas. It will be conducted under the direction of the agricultural engineering department of the college in co-operation with the Texas committee on the relation of electricity to agriculture.

Display of farm electrical equipment will be a feature of the conference. Indications are that about 5000 square feet of display space in the college farm machinery laboratory will be used for showing the latest models of appliances suitable for use on the farm and in the farm home. P. T. Montforth, of the agricultural engineering department, who is chairman of arrangements for the conference, has announced. Ranges, refrigerators, washing machines, vacuum cleaners, farm equipment, feed grinders, milking machines and other equipment will be shown.

Dean F. C. Bolton of the school of engineering, vice chairman of the Texas committee, will preside at the opening session Thursday morning, Oct. 30. Prof. Dan Scoates, head of the agricultural engineering department will preside at the Thursday afternoon session. President T. O. Walton of the college will speak at the banquet the evening of Oct. 31.

SADLY MISTAKEN

A French magazine writer predicts that the century-long policy of an unfortified frontier between the United States and Canada is about to break down.

Soon, he believes, both nations will have troops and fortifications at strategic points along the boundary. The reason? Inability to get together on the business of liquor smugglers. This, he holds, is irritating both na-

tions and will end the old policy of peace and unpreparedness.

We don't know where this French writer got his information, but we know right well that he's mistaken. That unfortified frontier is one of the finest things on the North American continent. It would take a lot more than a dispute about rum running to cause abandonment of that magnificent policy.

Elephants do not have very keen sight or hearing.
