How are You going to vote?

Tomorrow week, July 22, is the day for the election to see whether or not we are to have our school building enlarged. This question is before you now. Some are working against the issue with the argument that it is a waste of money to put more money into a wooden building, but if bonds were issued to erect a stone or brick house, or even a brick extension to the old building they would be heartily in favor of issuing the bonds but they further insist that bonds cannot be issued for enough money to put up a stone structure, so they are going to vote and work against the enlargement of the school building. Their cry is wait until we are able to put up an extensive school house, but what are we to do in the meanwhile. Every body knows that the school room has been deficient for the past two or three years. It is impossible for your children to reap the best results where they are crowded two or three on a seat, and sixty to a room which ought not to have over thirty. It is an injustice to both the children and the teachers.

The Crowell school ought to have at least six rooms and the same number of teachers, and then it would be crowded.

So let all the people get to gether on this important question and vote for the bond to be issued, and then work in concert for the upbuilding of the school. Give the teachers and trustees our entire co-operation and we can, will, and ought to have the most successful term of school in the history of Crowell.

Another Government scandal is about to come to the surface in the Agricultural Department concerning the cotton reports. President Roosevelt has taken the matter in hand and will not wait for the Southern Cotton Growers Association to prefer charges against Secretary Wilson and his substitutes, but will institute an independent prosecution himself.

J. M. Strong spent a few days at Paducah last week looking after his gin there. He reports the cotton acreage one third larger in Cottle than last year, and the stand at least three times as good. Mr. Strong says we may safely expect 4,000 bales from Cottle and Foard this fall. The farmers are all happy and proud of their crops. Corn, that is in roasting ears now, is the finest Mr. Strong had ever seen, and last week's rains have helped to make it better still.—Quannah Tribune-Chief.

H. W. Norwood, merchant at Davidson, bought a residence near L. P. Bonner's last week and will locate. The Hornet gladly welcomes him and his estimable family to our city.—The Vernon Hornet.

Misses Ellen and Leona Young were trading in Quannah Wednesday and Thursday.

Had you heard that Tim Smith had told Tom Jones that Will Shoemaker said that his uncle, Jim Brown, told Ben Snyder that his wife's brother, Jake, a few days ago met a man in the road who started to go to the Panhandle, but camped one night with a stranger who told him he started to the same country about ten years ago, but heard that three years before that time no rain fell for four months and the farmers made no corn, and—well, no difference what else he said. The question now in the minds of people is, what opportunities does FOARD COUNTY now offer to farmers or Stock-raisers, or for the combination of the two lines of business.

1st. No county in Texas can show better crops than are now growing here. 2nd. Rich land and good people. 3rd. The Antelope Pasture of 35,000 acres now owned by

G. C. Hemming, Colorado Springs, Colo.

is now on the market in any quantities wanted, at from \$4 to \$8 per acre with small cash payments, long time and low interest. Buy before the railroad gets here, prices will advance. Citizens of Foard County can do their friends and kinfolks a kindness if they will notify them of the chances that are now at hand. The man who has only a small amount of money can be supplied with the land he needs. If a man wants to farm and raise stock a fine location can be secured. For more definite information, see

A NEW RAILROAD OUT OF ABILENE.

As a result of the visit of Major J. D. Beardsley, the gentleman who is considering the Mineral Wells electric line, there is likely to be a new short line of railway north through Anson, Stamford and Haskell to Seymour or Vernon or Quannah—Haskell Free Press.

It is not often an editor meddles with the business of a merchant by telling him how to conduct his business, but we have been so struck with what the merchants are doing in the neighboring towns that we only make a few suggestions. At this time of year, which is considered the dull season, the merchants of Quannah, Childress, Wichita and other towns begin to reduce their stocks while their goods are seasonable. They run a sale for a week or more and by a reduction from the original price unload their shelves, make room for winter goods and instead of having their money tied up in goods for a year, at least, they have it to use toward buying new goods and in interest of their business.

Many of these merchants use from a half to a full page in their town paper in telling their prices, etc. Any merchant can see that it is better to sell off goods before they are showprow or soiled by frequent handling. He runs the risk of having them on his hands indefinitely or has to almost give them away to get rid of them. We have progressive, up-to-date merchants, but they are a little behind when it comes to the mid-summer sales. We are sure a trial of this would be of benefit both to the merchant and his customer. We would be glad to see our merchants fall in line with those of neighboring towns.—Vernon Hornet.

Just exactly our sentiments, Brother Kendrick.

The mutinous Russian battle ship, Kniaz Podemkine, has surrendered and Admiral Kruger has the ship in hand now. There was enough food and ammunition on board for a considerable time, but the mutineers became discouraged when they were not joined by other ships. All the sailors wished to surrender except the leader, who had killed ten officers with his own hands, and he wanted to blow up the ship.

Mr. Jim Witherpoon is repainting and repairing his house and place generally this week. Mr. Witherpoon has one of the prettiest and neatest little homes in town and intends to keep it that way.

Mr. Smith and another gentleman whose name we failed to learn passed through Crowell Thursday enroute to New Mexico. These gentlemen are traveling for their health both have pulmonary tuberculosis.

Mrs. Hutchison, Miss Fannie Womack, Will and Edger Womack left for Vernon this morning where Miss Fannie will take the train for Westford and Will for Brownwood.

Colonel H. M. McCrory and wife and Miss Minnie Kinsey were shopping here the first of the week.

ment of the school fund by the county superintendent or county judge of any scholastic year, but not afterwards; and no child shall be transferred more than once; provided, the party making application for transfer shall state in said application that it is the bona fide intention of said applicant to send child to the school to which transfer is asked. Upon the transfer of any child its portion of the school funds shall follow and be paid over to the district or independent district to which such child is transferred; provided, no transfers shall be made after August first, after the enrollment was made."

Note that "the party making application for transfer shall state in said application that it is the bona fide intention of the applicant to send the child to the school to which transfer is asked," and that no transfers shall be made after August first of each year.

EXAMINATIONS.
"The county board of examiners of each county shall, if necessary, hold an examination on the first Friday and the Saturday following of months of May, July, August, September and December of each year. Said board of examiners shall use the questions prescribed by the State Superintendent of Public Instruction, and shall conduct the examination in accordance with the rules and regulations prescribed by the county superintendent and State Superintendent of Public Instruction."

No county examination will be held in July this year for the reason that the law does not become effective until July 14, 1905.

The printers have promised to deliver to the State Department of Education a new edition of the School Laws of Texas by August 1, 1905, a supply of which will be sent immediately to all county superintendents and ex-officio county superintendents without requisition. Teachers and trustees desiring copies of the school laws should apply to their county superintendent for them after August 1, 1905.

Please give publicity to this letter through your county papers.

Plague of Mice.

In the town of Merriwa, in North Wales, a plague of mice is disturbing the people. Recently 10,000 mice were killed in four nights in one store. Upward of 500 were captured while a cricket nest was being unrolled. Four or five bushels of oats in a bag were appropriated by the mice in a night. A local well ceased to yield water and on examination it was found to contain a solid mass of dead mice, several feet deep. Food, water and bedding are overrun, contaminated and injured. The townspeople are fighting the terrible little visitors night and day, but at last accounts they had made little impression upon the swarms of vermin.

Would Simplify Weddings.

Rev. Charles E. Guthrie, pastor of Park Place Methodist Episcopal church, Baltimore, announces that in future he will refuse to read the marriage service at rehearsing parties. Moreover, he discourages the idea of fashionable weddings in churches, which make rehearsals necessary, holding that such affairs make too much of the dramatic effect and dress display and too little of the solemnity of the obligation that is being assumed. Mr. Guthrie believes that an important contributing cause to the divorce evil lies in the fading out of the religious idea regarding marriage.

South Sea Wireless Telegraph.

The International Telegraph Construction Company has submitted a plan to the postmaster general of Australia for the erection of wireless telegraph stations linking New Zealand and Australia direct, and also via Tasmania or Lord Howe and Norfolk islands, and establishing communication with Queensland, New Zealand and Port Moresby and Samara, in Papua, and also between Samara and Herbertshohe, in German Papua, joining the cable routes to the east at Yap Island.

Poison Mixed With Flour.

According to a recent issue of a Chinese newspaper, upward of forty deaths have taken place lately in the vicinity of Amoy through morphine poisoning. The drug, which is subject to a heavy duty, had been smuggled into the port and stowed amid a shipment of flour. By some mischance some of the packages were broken open and the drug thus became mixed with the flour. When the flour was landed, instead of being destroyed, it was sold to customers, the result being that most of the persons who used it were poisoned.

Japan's Tobacco Law.

Viscount Hayashi of Japan has informed the Scottish Antitobacco society that the Japanese police confiscate "smoking instruments" of any value under 20 years, as well as his supply of the weed. Parents and guardians who knowingly permit the offense are liable to a fine of 50 cents and dealers who furnish a minor with a "smoking" may be fined \$5. The law was passed in 1900.

Crown Prince's "Will"

Previous to his marriage the other day the German crown prince had shown a will of his own in the affairs of the heart. On two occasions he gave evidence of infatuation for American girls, one of them an opera singer who won celebrity at the Royal opera house in Berlin. Both of these affairs were gall and wormwood to his father, the kaiser. Even worse, the young man positively refused to fall in love with the first royal partner picked for him, Princess Thyra, of Denmark. The emperor peremptorily ordered him to betroth himself to the girl. "Not for the whole German empire," sturdily replied the youngster. "Be silent, sir, it is my royal will." "Your royal will shall not bargain my heart to a woman I do not love." That ended the Danish project.

Buying Up America.

Foreign landlordism is reaching out its tentacles in the direction of America. A syndicate headed by the Earl of Verulam and the Earl of Lankershim owns a vast tract of land in Wisconsin. Alexander Grant, of London, has 35,000 acres in Kansas. The English Land Company owns 50,000 acres in Arkansas. Mr. Ellenhufer of Halifax, has 60,000 acres in West Virginia. A Scotch concern, Syndicate No. 1, bought 90,000 acres in Florida. The Holland syndicate owns 5,000,000 acres of grazing lands in the West, and the German syndicate 2,000,000. It is said that 20,000,000 acres of good American land are owned by foreign landlords (English and Scotch). That is an area larger than the state of South Carolina, and nearly as large as Maine.

Richard Wagner's Revolt.

Richard Wagner, the composer, was an ardent republican in 1849. In the archives of Dresden there has been unearthed a document setting forth a case of high treason against the musician. He was accused of having written to a friend a letter proposing to turn Saxony into a republic. "But whom shall we make president?" he asked. "I see nobody competent for the office except our present sovereign, Frederick Augustus II." Frederick Augustus does not seem to have appreciated the humor of the suggestion that he should himself be elected and content himself with the dignity of a republican president. For this flash of unconscious fun, Wagner had to bolt to Switzerland.

Some Short Names.

Many years ago there was a shop kept in Brussels by Therese O. and her husband. O. being with her two children at Molenbeek, a suburb of the Belgian capital.

In 1866 among the Belgian recruits was a young man named Norval who could not write and signed his name with a cross. In the department of Somme, in France, there is a village called Y, in the Zuyder Zee there is a bay called Y and Amsterdam has the River Y. In the Chinese province of Honan there is a city called U, and in France there is a river and in Sweden a town rejoicing in the name of A.

Shoddy British Aristocracy.

The noblemen of England have queer ways of changing their names. The original cognomen of the Duke of Northumberland was Smithson and the assumed name was the family Percy; the Marquis of Lansdowne was Petty and afterward Fitzmaurice; the Marquis of Inglesay was Bayley, then Paget; Marquis Cowningham was a Burton; Lord Ventny was a Moleyns; Marquis of Tullibardine was a Murray, etc.

Woman Won Political Place.

Miss Estella Reel, who has recently been appointed national superintendent of Indian schools for the first time, is the first woman to be appointed to an office by President Roosevelt, and the only one to be given a place of importance. She is probably the only woman holding office under the national government who carved her way to it by her own practical efforts.

TEXAS AT THE WORLD'S FAIR

How the Great Southwestern Empire Amazed the World.

No State of the American Union offers as many advantages to the commercial fruit grower as does the State of Texas. It is a fact well established that there is no section of our country where all the required conditions can be found. But it is not many days since that Texas comes nearer to supplying these conditions than any of the States.

When a prospective fruit grower starts out to select a locality in which to grow the commercial fruits there are a few requisites of soil, topography and climatic conditions which he most desires to find. Every variety of fruit grower requires a soil peculiarly adapted to it in giving texture, color and flavor. It requires more. It must have a certain amount of sunshine and humidity. If the soil and environments lack any of the essentials to perfect development there is an absence of some of the characteristics of the variety. For example: To produce a certain amount of its greatest perfection a certain amount of moisture is required. An excess of moisture robs it of color and solidity and produces a condition which brings early decay, thus destroying its market value. An excess of sunshine and heat on the other hand prevents proper development of fiber and pit, increasing it of its most valuable characteristic, its flavor.

The indiscriminate fruit grower must appreciate a fact well established, that the same variety of fruit grown in different sections differs very materially in shape, color, texture and flavor. These differences are attributable to climatic influences, to topography, to moisture, to sunshine and rain fall, to the soil with its varying fertility, the component part of its make up. This fact was thoroughly established by the exhibits at the Louisiana Purchase Exposition at St. Louis in 1893. The same varieties of fruit grown in different sections differs very materially in shape, color, texture and flavor, a variation as far apart as the difference between the sections are apart which supplied the exhibits. These exhibits were an object lesson of great value, and thoroughly established the fact that one section of our country is better adapted to the development of certain varieties than other sections.

The contest in this wonderful exposition among the fruit growing States was keen. Each State vied with the other to excel in quantity and quality of the fruit shown. Every State entering this sharpest competition ever offered before presented her best and most valuable products. The fruits arrived from every nook and corner of the universe and came nearer showing the real resources of the several States than any other exhibit of the Exposition. In this contest it was demonstrated that the commercial varieties of peaches came to maturity earlier in Texas than any State of the Union. The records of the Exposition show that the first peaches, the first plums, the first pears, the first grapes and the first apples of the fair season received at the Exposition came from Texas. And all practical fruit growers know that the grower who gets the best prices for his fruit is the one who gets in the market first. It is, therefore, very important in selecting a locality or an orchard, to consider the climatic conditions as compared with those of other sections engaged in the same industry.

It was not by any accidental magnanimity of the seasons that enabled the Texas growers to get their fruits on the Exposition tables days ahead of any other section of our country. It was but the natural conditions of environments, of locality, of topography, of climatic influence—conditions which are a part of the wealth of the State. The great fruit growing States entering the contest for supremacy did not reckon with Texas, but thought to please, uttering oblivious of her existence, and her claims to pre-eminence, to power and influence. They knew little of her natural advantages as Texas had never before attempted to exploit her abundant productive capabilities. But her present season, her mild climate, her fertile soil told a story of her greatness and incomparable advantages which amazed the world. The country knew little of her people; of their hospitality, of their culture and their refinement. They had an

idea that our civilization was crude and our methods of doing things cumbersome and awkward and consequently were not prepared to meet such progressiveness as characterized all Texas endeavors at St. Louis. But the gallant demeanor of our people soon dissipated preconceived ideas entertained. The awakening was instantaneous and Texas efforts and Texas fresh fruits were the center of attraction long before the other States began to receive theirs.

Failing into consideration all the conditions under which Texas labored her achievements along horticultural lines were marvelous and of wonderful usefulness to our country. She entered the great contest without guide and entered the great trackless forest without signboard, without equipment of any character, without funds, without experience and without organization. But in spite of all these hindrances she crept steadily along from the foot to the front rank of the fruit growing States of the Union, leaving behind in her race for supremacy the boasting and proud States of Iowa, Michigan, Arkansas, Montana, Illinois, Indiana, West Virginia, Minnesota, Wisconsin, Louisiana, Virginia, Tennessee and dozens of other States of less prowess and outranked by Missouri, California and New York only in number of premiums awarded.

There were exhibited by Texas forty kinds of fruits representing four hundred and ninety-one distinct varieties as classified by the Committee on Nomenclature of the American Pomological Society. In kinds of fruits Texas led all the States. Missouri followed Texas in kind, but in varieties Texas stands second, Missouri leading with six hundred varieties. Texas exhibited three thousand and sixteen plates of grapes and two thousand, one hundred and sixty-four (1,614) plates of pears against Missouri's one thousand plates each. Texas is especially a peach growing State and led all other States in number of varieties exhibited, entering sixty-nine varieties with a total of four thousand, two hundred and twenty plates. Michigan received her first shipment September 15; Illinois, August 8; Arkansas, July 14th; Connecticut, September 26th; Idaho, September 19th; Missouri, July 29th; New York, September 29th; Oregon, September 10th; Virginia, September 21st; West Virginia, August 28th. All other varieties of fruits received in the Texas exhibit led in order of arrival in about the same ratio; giving to Texas a pre-eminence not attained by any State of the American Union.—Sam H. Dixon.

Another View of the Holt Case.

The question, "can man get justice by his right of trial by jury?" can be answered that he can not in the case of young Dave Holt who was recently tried in Eastland County and sentenced to two years in the penitentiary for swearing falsely to the county court clerk in order to obtain license to marry a fair maiden who was not of legal age. A jury has put this young man in prison who lied to obtain the one who was to be his life companion and blighted and wounded the life of a happy woman, and cast a shadow upon the life of the two which the sunshine of a whole life can never erase. No falsehood ever records in the county clerk will do the harm to society that the verdict of a jury separating and blighted future of a happy couple whose only crime was to lie to make a fair maiden a devoted wife and a young man a worthy husband.

Many a woman who has played false to a young woman and murdered her peace, her conscience and her womanhood and escaped unpunished, but in this case a falsehood was told to make a happy home and it has been put asunder by the wrongful verdict of a jury.—Merck Mall.

THE MONTHLY TRIAL HEADACHE, DIZZINESS, BEARING-DOWN PAINS.

A Woman Tells How she Has Become Well and Strong after Years of Sickness Due to Irregular Exertions.

The fact that one woman is bright-eyed, rosy-cheeked, strong and cheerful, while another is pale, weak and depressed, is due more often than otherwise to the irregularity in the one case and the irregularity in the other of the functions that are peculiar to the sex. When these are disturbed everything goes wrong; pain and discomfort are felt all over the body; the sensations are often terrifying.

"For four years," said Mrs. Davis recently, "I suffered indescribable misery from sick headaches every month, accompanied by fainting spells, shortness of breath and severe pain in my left side. There were also bearing-down pains, at times so acute that I could not stand up, and my head was full of ringing sounds. It seemed as if everything was going to hit me in the eyes. I was compelled to lie down with closed eyes for hours to get a little relief. When I attempted to arise everything would whirl around and it would grow so dark that I could scarcely see my object."

"Five doctors in all treated me, but I got no lasting benefit. Besides I used a lot of advertised remedies. The only medicine, however, that had the desired effect was Dr. Williams' Pink Pills and they are truly a godsend to women. I did not have much faith in them when I began to use them. I found myself, however, so much better after using two boxes that I began to believe in them. They checked right away the decline into which I was going. My troubles kept lessening and finally disappeared altogether."

"How long did it take for a cure?" "After I had used several boxes my health was all right. I had taken on flesh and was strong and hearty. I feel today in spirits more like a girl of sixteen than a woman of my years."

Mrs. C. H. Davis' address is Carmel, Maine, R. F. D. No. 2. Dr. Williams' Pink Pills are confidently offered to women for the cure of anemia, chlorosis, painful and irregular periods, and all forms of weakness. They are sold by every druggist.

A Truant School. New York city is to have a truant school—somewhat late in order. The buildings will be located after the St. Charles Home for Boys near Chicago, on the cottage plan, and will be placed on the Garretson farm, Jamaica, L. I.

Profits of the Packers. There has been a great deal of dissatisfaction because the Gardner report shows that the profits of the packing industry only amount to about two per cent of the volume of business transacted. There is no doubt, however, that the report is correct. The census reports compiled by the government in 1906, before the agitation regarding the "beef trust" began, throw considerable light on this question. It appears from the census that the packing industry is conducted on a smaller margin of gross profit than any other industry in America. The gross margin of profit of 571 flour and grain mills in Illinois. In the census year, was nearly seven per cent on the volume of business. The gross margin of fifty-one wholesale slaughtering and meat packing establishments in Illinois was only about one-third as large, or a little more than two per cent on the volume of business.

The millers have not been accused of being in a "trust," and combinations would seem impossible in a business where there are several thousand mills in the United States competing actively for the flour trade, but it appears that the gross profits of the millers are larger than the gross profits of the packers. It may turn out that the agitation regarding the packing industry will show the same result as the deal found in shearing the pig: "All squeal and no wool."—*American Homestead.*

Superstitious Musicians. Sarasate the great Spanish violinist, has, like most musicians, a belief in talismans. His particular mascot is in the form of a tiny replica in silver of the famous Guarnerius violin on which Paganini used to play. Sarasate would not dare to play at a concert unless this little violin were somewhere about his person.

French Consul to Be Pardoned. Paul Bernouille, the old French irreconcilable, duelist and journalist, who was banished from France for ten years, is to be included in the general amnesty which will be granted on the occasion of the French national festival July 14, the anniversary of the fall of the Bastille. Bernouille has spent his exile in Spain, and it appears to us partly at the solicitation of King Alfonso that he will now be pardoned.

The "Widow Stowe." The house in which Harriet Beecher Stowe lived for a number of years in Hartford is now being torn down to make room for the advancing factories. It is recalled that Mrs. Stowe's husband, who was at the time professor in Andover, stopped over in Hartford to inspect the house which his wife was having built. To make sure that he was before the right house he asked the workmen, and to his amazement he was told that he was right and that it was the house being built for "Widow Stowe."

E. E. Hale's Advice. Edward Everett Hale thinks that everybody should sleep ten hours a day, going to bed at 9 o'clock. He never engages in brain work after 4 in the afternoon, and spends a great deal of time in the open air, caring little for weather conditions. "Never work," he says, "when you feel fagged out, because you cannot do good work while in that state. Above everything, do not worry."

Spring is trying to come in. Yesterday she shook the snow from her slippers and spread her scapular cloak on a housecleaning vine.

Amazing. It is amazing how many mothers will give their children medicines containing violent and dangerous drugs for bowel and stomach disorders, when better results, with absolute safety, can be obtained by the use of a pure, pleasant, harmless remedy like Dr. Caldwell's (lanative) Syrup Pepsin. Try it at once. Sold by all druggists at 50c and \$1.00. Money back if it fails.

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Watson* in Use For over 30 Years. The Kind You Have Always Bought.

Don't stay away from church on account of your clothes. The Lord is too busy to notice the handiwork of tailors and dressmakers.

It Fixes You. "New is the Summer of our discontent, made bearable by the use of Simmons' Sarsaparilla. It knocks that 'want to rest' feeling out, by eliminating impurities from the rich blood and enormous appetites."

When Dryden wrote, in his "Maiden Queen," "I am resolved to grow and look young till 40," he little thought of the use that would be made of it by a modern physician.

Every housekeeper should know that if they will buy Defiance Cold Water Starch for laundry use they will save not only time, but because each package contains 16 oz.—one full pound—while all other Cold Water Starches are put up in 3/4-pound packages, and the price is the same, 10 cents. Then again because Defiance Starch is free from all injurious chemicals. If your grocer tries to sell you a 12-oz. package it is because he has a stock on hand which he wishes to dispose of before he puts in Defiance. He knows that Defiance Starch has printed on every package in large letters and figures "16 OZ." Demand Defiance and save much time and money and the annoyance of the iron sticking. Defiance never sticks.

Love, though a game of chance, never wholly defrauds, for if one loses a few silver pieces of motion, one gets back the gold of experience.

Conviction Follows Trial

When buying loose coffee or anything your grocer happens to have in his bin, how do you know what you are getting? Some queer stories about coffee that is sold in bulk, could be told, if the people who handle it (grocers), cared to speak out.

Could any amount of mere talk have persuaded millions of housekeepers to use

Lion Coffee, the leader of all package coffees for over a quarter of a century, if they had not found it superior to all other brands in **Purity, Strength, Flavor and Uniformity?**

This popular success of LION COFFEE can be due only to inherent merit. There is no stronger proof of merit than continued and increasing popularity.

Every man should subscribe to his local paper, because from it he secures a class of news and useful information that he can get nowhere else. He should, however, also subscribe to a first class general news paper. Such a newspaper is

THE SEMI-WEEKLY NEWS.
Thousands of its readers proclaim it the best general newspaper in the world. Its secret of success is that it gives the farmer and his family just what they want in the way of a family newspaper. It furnishes all the news of the world twice a week. It has a splendid page where the farmers write their practical experiences on the farm. It is like attending an immense farmers' institute. It has pages specially gotten up for the wives, for the boys and for the girls. It gives the latest market reports. In short, it gives a combination of news and instructive reading matter that can be secured in no other way.

Crowell, Texas, July 10, 1905. A few words to the good people of this town and country for their kindness to me in time of need. Little did I think of seeing you all work so intently for me as you did that night. It made me have a tender feeling for you all. I hope, as you pass through the rugged journey of life, that blessings may be showered around you, and that your pathway may be scattered with brilliant flowers, and those that have children I hope it will be God's will to spare their lives to be a pleasure to their parents in raising, and to comfort them in their old days. May God bless you through life, stand by you in death and save you all in Heaven, is my prayer. M. C. Bicks.

Russia's feelings are wounded
 that Japan has not suspended
 hostilities since the agreement
 for the conference of peace
 plenipotentiaries.

Russia sadly realizes the fact
 that she cannot cope success-
 fully with Japan and is only
 hoping for something to turn up
 that will turn the tide or at
 least stop the terrible advance-
 ments of the wiry little Japs.
 Like a drowning man, she is
 grasping at straws, and that was
 the last straw in sight. Had the
 hostilities been suspended upon
 the agreements to the peace
 conference, Japan would not be
 in possession of the Sakhalin
 Islands and several other vic-
 tories that have been a breeze
 since then. Japan, on the other
 hand, is just as alert to the situ-
 ation as is her enemy, nor is
 she continuing this war for any
 body's benefit but Japan's, and
 further than that she knows she
 knows she has got things going
 her way and by the time the
 peace ambassadors are ready to
 negotiate she will be able to obtain
 almost any terms that she may
 wish.

A "Daily House" Performance.
 The Annual minstrel entertain-
 ment was given in one of New York
 insane asylums the other night,
 and the auditorium was crowded. Most
 of the performers were lunatics
 segmented by attendants. Their
 performance was good. Among the
 stars was Owen Goughgan, of New
 York, who is an inmate. The song-
 ery was printed by inmates, and a
 burlesque on the "Mikado," written
 by one of the insane convicts, was
 the afterpiece.

Callisthenes

Are a benefit to healthy women. But to
 women who are suffering from disease
 peculiar to their sex they are an injury.
 When there is weak back or bearing-
 down pains, sick or other indications
 of womanly weakness, exercise can
 only aggravate the condition. The
 womanly disease must be first restored
 to normal strength can be developed
 by exercise.

Dr. Pierce's Favorite Prescription
 makes weak women strong and sick
 women well. It does this by healing the
 womanly disease which undermines the
 general health. It stops the drains that
 weaken women, heals inflammation and
 cures female weakness.

When I first com-
 menced using Doctor
 Pierce's Favorite Prescription
 writes Mrs. George A. Strong, of
 Saratoga Co., N. Y.: "I was suffering from
 female weakness, a disagreeable
 drainage, bearing-down pains, weak
 and sick women well. I began to
 feel better. I took four bottles of Dr. Pierce's
 Favorite Prescription, two of Golden Medical
 Discovery, one of Pleasant Pellets, also
 used and had of Dr. Pierce's Golden Medical
 Discovery, one of Pleasant Pellets. I can't think
 you enough for your kind advice and the good
 your medicine has done me."

Dr. Pierce's Pleasant Pellets promote
 regularity of the bowels, and assist the
 action of "Favorite Prescription." No
 other laxative should be used with Dr.
 Pierce's Medicines.

A few things to be considered in the selection of a college: Character of work done, healthfulness of location, moral and religious surroundings and the expenses. We have no saloons, and the local option laws are enforced. We have six churches, numerous Sunday schools and young people's organizations. We are in the most healthful portion of Texas. Expenses are very moderate. Write for catalogue. Fall term opens August 30.
