#### Your Child's Health

Every conscientious parent is obligated to care for his child's health. Because it is seldom that children are subjected to so-called nervous diseases, it doesn't enter the mind of the parent to employ the Chiropractor in cases where children are ill. As a matter of fact, children respond more readily than adults to Chiropractic care, and that response is not limited to those diseases wherein there is a spinal curvature, or some other chronic condition which is generally assoclated with abnormalities in the

Chiropractic is just as effective in cases of indigestion, constipation, diarrhea, fever, colic, croup, polio, and the various acute diseases to which children are subject.

The Chiropractor realizes that a child will be healthy only when they are free of nerve interference caused by spinal misalignments.
