

Movie Chatter

Did you know that Gordon Hart, who plays an army officer in LAND BEYOND THE LAW, starring Dick Foran, at the Plaza Fri. nite and Saturday matinee was a minister in Walla Walla Wash. before becoming an actor? He is now under contract to Warner Bros. To you who are fans of the musical western, this should prove very entertaining.

Victor McLaglen, star of the Informer, Walter Connolly well known player of stage and screen, and Peter Lorre, are starred in the powerfully dramatic, NANCY STEELE IS MISSING, showing Saturday nite. June Lang is featured in the strong supporting cast, which includes Shirely Deane and Jane Darwell.

Once in a generation a personality emerges who wins the affection of the entire movie public; of the girls and boys, the young matrons and their spouses, of the older people, too. Such a winsome personality is little thirteen year old Deanna Durbin who first sang her way into the hearts of the people and now has captivated them completely in Universal's Three SMART GIRLS, showing Saturday nite previous, Sunday and Monday. The grand cast includes Binnie Barnes, Ray Milland, Alice Brady, and Mischa Auer.

MAMMA STEPS OUT, Tuesday, in Anita Loos' wittiest, nuttiest, screen scream, of a newly rich American family on the continent. Mamma gets culture (with a dash of romance), daughter gets a crooner, papa gets spanked and you will get plenty of laughs.

The bill for Wednesday and Thursday rings you the James Fenimore Cooper story, THE LAST OF THE MOHICANS, the screen version adheres very closely to the original story, so we need say no more.

Free Help-Ur-Self Washing

All next week we will give one Free Help-Ur-Self Washing to all who have not yet tried our Help-Ur-Self Laundry. I will call for you and take you back home. J. T. LOPER, Mgr.

CANNINGS MAKES THE DIFFERENCE

In the office of the Home Demonstration Agent are two quarts of canned dewberries. One is dull in color, unattractive in appearance and the berries are mushy in consistency. The other jar is a sparkling red color, every berry whole and appetizing in appearance. And yet the berries came from the same vines. The difference lies in the method of canning used. The less attractive jar was canned the old fashioned way, berries put in a sauce pan, covered with water and allowed to come to a boil and then were dipped into a jar and sealed. The better looking berries were packed into a jar raw, a sugar syrup made of two cups water and one cup sugar, poured over the berries and the jar was then placed in cold water to cover the neck and gently boiled for twenty minutes.

Mrs. Johnny Mae Ramsey, Home Food Supply Demonstrator for the Union H. D. S. Club can ned the two jars of berries and asked that they be exhibited to show the difference that the method of canning any fruit or vegetable could make in the finished product.

USES FOR THE FOUNDATION PATTERN

Mrs. J. H. Weeks, Wardrobe Cooperator for the Zion Hill Home Demonstration Club is pleased with the results of using a foundation pattern. "I had heard from other club members who used patterns before our club was organized how useful they were but I did not know that they could be used so completely," Mrs. Week said.

To change my plain fitting sleeve to one with fullness at the shoulder I made 5 slashes from the top of the sleeve to the cuff and spread the strips to give the amount of fullness desired. From the slashed and spread pattern, which I pinned to pattern. Other changes in the plain fitting pattern can be made equally as easy," Mrs. Weeks said.

DUDLEY WIDE AWAKE CLUB

Our club was given the name of 'Wide Awake Club' by our ward robe Demonstrator, Mrs. L. M. Howie, April 27, in the home of Mrs. T. H. Patterson.

"We need to be wide awake to do justice to our work, says Mrs. Nathun Joyner.

Business was discussed and Mrs. Phalby Bailey was appointed Chair man of our program committee.

We had twelve members attending the meeting, one new member, Mrs. Phally Bailey.

Miss Vida Moore will be present at the all day meeting in the home of Mrs. Zeola Culpepper to cut out foundation patterns, May 11.

DENTON H. D. CLUB

Beating fudge while hot turns it to sugar said Miss Vida Moore home demonstration agent to the Denton 4 H Club Friday morning April 23 in the home of Mrs. Bailey Johnson, where Miss Moore demonstrated candy making such as two tablespoons cocoa to every cup of sugar, two tablespoon karo syrup to every cup of sugar, and one half cup milk to each cup sugar mix dry ingredients well before adding milk, place over fire, boil until forms a firm ball in cold water remove from fire cool and beat until creamy.

There were two visitors. Mrs. Paul Hoppie of Abilene, and Edith Robinson, of Dallas.

SEWING BOX EQUIPPED

"It is much easier to sew and to want to sew if you have all the equipment together," Odell Edwards, president of the Dudley 4 H Club, told members of the club at the regular meeting Tues. Odell has a sewing box which contains scissors, pins, thread, a thimble, which she is gradually learning to use, tape measure, needles, a gauge for measuring the width of hems and a wrist pincushion.

As the club is a newly organized one he members are just learning to use the equipment at the first article made, a cup towel At the last meeting 12 of 14 members had sewing boxes completely equipped.

USING 500 FEET SUBIRRIGATION TILING

"After having seen what sub irrigation does for a garden I want to lay as much as I possibly can in my garden," Mrs. Rip Kennedy, Home Food Supply Co operator, told members of the Zion Hill Demonstration club Mon. The Kennedys have enough water to use for subirrigation and are laying 500 feet this week. Watering the underground way takes about one third the amount of water required for the surface irrigation, insures moisture when needed, one thorough application of water being equal to a two inch rain and causes the plant to be stronger as the root system grows deep to get the moisture from the soil.

WANTED—Lady to do general housework. Phone 145 or write Box 546, Baird.

County Agent's Column

By Ross B. Jenkins, County Agt. 4-H PIG CLUB TO MEET SAT. MAY 1.

The 4-H Boys who intend to grow pigs this year as their 4-H project will meet with the county agent 2:00 p. m. Saturday afternoon to draw up plans and discuss details of that program. A pig club boy is required to accomplish a definite number of steps in the development of his program.

Every boy must select a credible pig and grow it out. All boys that intend to receive credit for the year's work will grow a Hampshire gilt; will be able to show her in september at the first annual pig show to be held at Baird. Each boy will build a hog pasture and plant in it sudan or peas, he will build an A-shaped hog house, he will build a water trough and a slop trough. This work is to be done during the Spring and Summer. In the Fall he will plant oats, barley, wheat or rape for pasturage. He will build a self-feeder. His gilt will be bred in November. He will feed the required gestation ration. He will farrow the litter then raise the litter to weaning time. In addition to that the club boy will grow a sufficient amount of surplus grain feed to feed out the litter.

Some boys are feeding grade pigs at this time but will soon sell them out in order that they may purchase the pig according to the other members of the club. Until, at least, 20 boys are growing Hampshires no other breed will be grown but as soon as 20 boys desire any other type of hog that one will be voted upon and grown but if necessary to have this number in each club in order that a registered boar may be kept for each type grown.

FALLOW LAND IN LIEU OF SOIL CONSERVING CROPS

Many farmers do not have lands so situated where the planting of sudan grass or other crops can be of much value to them and have asked if some other plan might not be found whereby they could comply with the 1937 program without the planting of an excessive amount of soil conserving crops. A recent ruling from the State Board now enables a farmer to plant grain sorghums in strips with fallow strips in between of not less than ten feet in width and receive credit for the fallow strips in place of sudan, peas, or other soil conserving crops. Many farmers are planning to plant two rows of maize then skip four three feet rows which will be slightly over ten feet between the growing crop and there by take advantage of the fallow strip. This strip will be kept clean of vegetation during the year but as some have pointed out these two rows will make far more grain than any other feed planted otherwise.

Some farmers have misunderstood the classification of saccharine and non-saccharine sorghums. If maize, hegari, feterita, ajax, or Jerusalem wheat is used as a soil conserving crop it must be planted solid or broadcast but if saccharine sorghums which include amber, red top, and orange are planted they may be grown in rows. All of the crop of any of the above mentioned, however, be left on the ground and plowed under. They cannot be grazed,

headed, nor cut for forage. Sudan grass may be planted in rows or broadcast and it may be grazed or left on the land. It cannot be cut for hay, neither may the seed be taken and still qualify as a soil conserving crop.

HERE AND THERE

Mr. Everett H. Williams, range inspector for Callahan County, began work on inspecting the various ranches in the sign up on Monday. Mr. Williams expects to be able to finish all the ranches within the next 60 days. There are now 88 ranches signed in the county which total 238,522 acres. This includes all but five of the major ranches in the county and all but 12 of the ranches of one section or over. Mr. Williams expects these owners to be signed up in a short time, some of whom already have told him they would sign up.

COUNTY COMMITTEE IN SESSION

The Callahan County Committee composed of Steve Foster, Chairman, Lester Farmer, and Chas. D. Straley are in session this week and will be probably for the next two weeks making the necessary adjustments and placing the new 1937 signers in line for application for a grant. Mr. Foster expects better than 700 farmers to be included in the sign up by the time the deadline is reached, May 15th.

FARMS ARE TO BE MAPPED

All farms that have been signed on a work sheet for 1937 will be measured by the government starting May 1st. The men who will carry out this program are John White, C. E. Bagwell, Clifton Thomas, and B. P. Pillans who will be responsible for drawings and making the maps and this work will be done under the supervision of James C. Asbury, who is the supervisor for the county. These maps will be plane table measured according to the army style and will be very ac

curate and of great value to the farmers. Mr. Asbury acquired the necessary information relative to this work while in the army. All the men attended school at Breck enridge Wednesday and Thursday of this week in which minute details were given on how the work is to be done.

PECANS BUDDED AT QUINCY LOVEN'S

"On Tuesday afternoon beginning at 2:00 o'clock some eight farmers met at the home of Quincy Loven, visited his pecan orchard that he planted some seven years ago a round his new home and learned to bud pecans. Mr. Loven gave each farmer a minimum of ten Burkett buds that they may work on to stocks of their own. The county agent pointed out that there are many thousand little pecan trees in Callahan County that may be budded to become valuable producers of papershell nuts in a short time. He also said that many of the native groves should be worked to improve varieties where now small thick shelled nuts are produced.

MISS MILDRED YEAGER IMPROVING

Miss Mildred Yeager, editor of The Putnam News, who was seriously injured in a car wreck several weeks ago, is reported improving. Miss Yeager is a patient in the Graham hospital at Cisco.
