works in collaboration Thursday, April 15 Is Deadline On partment of A. & M. Crop Insurance

Cotton crop insurance hit a new high in Texas this week as Northwest Texas farmers started signing applications on their 1943

Operating under deadlines according to planting seasons throughout the state, the Federal Crop Insurance campaign closes out Thursday, April 15.

From the state AAA office, Donald L. Cothran, state crop insurance supervisor, predicted that the total of 1943 applications would patch. Articles featured exceed the number signed last form a part of the con- year, when Texas led the nation program The Dispatch in total applications. Already, the follow in being a part state office has been notified that 28,649 applications have been signed by farmers.

The total number of cotton farms represented on the applications will be tabulated as soon as Gardens can help in final results are received, Cothran said and explained that under lems and every person the program all farms operated by one cotton farmer are insured under one contract.

Cotton crop contracts are written in all cotton counties under tees or their representatives. Either 50 or 75 percent of the farm's normal yield may be insured Southland War against unavoidable hazards such s hail, rain, drouth, boll weevil

Explaining the program to lastninute signers, Cothran pointed planted and protects the crop until it is weighed in at the gin. Premiums are due in the fall, or and a half months. bout cotton picking time, he said.

He urged cotton farmers in the orthern and western parts of the state to make applications with county AAA committees before which no applications will be

Raise a VICTORY GARDEN

Victory Gardens are the paramount topic of conversation in any social or civic gathering. Polite conversation has switched from people and places to beans and beets.

War needs thus call for the help of every good gardener and make it prudent for all who can to raise some of their own food. Victory gardeners can help in many ways to meet the wartime food production problem, and they are being urged to do this not only for their own welfare but also as a patriotic service. Home food production will add to the war effort both on the fighting front and on the home front.

The national aim this year is for 6,000,000 farm gardens and twice as many other Victory Gardens. Greater production is also expected from those who raised gardens for the first time in 1942 and thus have the benefit this year of their own experience,

The Victory Garden program calls for four types of gardens -farm gardens, home gardens in cities and towns, school gardens, and community gardens.

Three requirements of a good garden spot are emphasizedsunshine, good soil, and moisture in the soil.

Everyone who has a piece of land that meets these requirements should plan a Victory Garden. Gardens, it is emphasized, should not be planted in areas where there is not enough sunshine or where the soil will not produce crops to justify the use of seed, fertilizer and labor.

A good rule for knowing good soil is: "If the weeds grow rank, the soil is usually fertile." This rule holds good if the soil is not

Victory gardeners will make better progress in their spring drives for the food-for-freedom campaign if they start with a carefully thought out garden plan.

Careful preparations are thus urged upon all Victory gardeners, especially those who are not experienced. Many difficulties can be avoided if rules are followed. Study carefully advice given by garden experts in this issue of the Dispatch.

If They Are In Your Home

Typographical errors many times are so ridiculous that they are funny even though no fun is intended. With newspapers printng over 500,000,000 words daily n the United States it is easy to see that mistakes are bound to

Examples of current errors that were picked up from the press are passed on to the readers of the Dispatch. Maybe you will enjoy them too. One read "The conflich was dreadful and the enemy was repulsed with laughter."

A linotype operator touched he "t" instead of the "n" and the following resulted: "Following the business session, the club members were entertained by Mrs Edgeworth's little sot, Richard, at the piano."

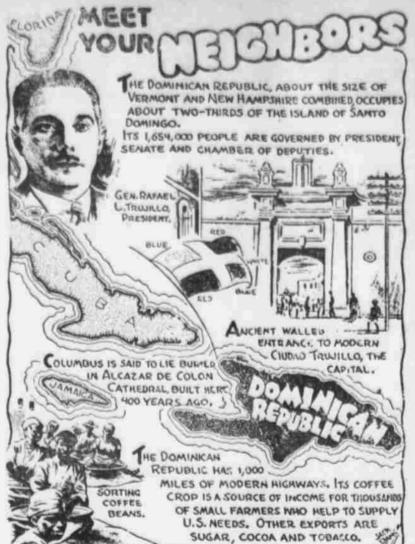

Considerable embarrassment resulted when the last letter of the word "sing" did not appear in an announcement reading: "Miss Blank is scheduled to sin by the waters of Minnetonka. She will be dressed in Indian costume and special lighting will be used for the performance."

Lack of space caused this write up to appear this way: "Miss Blank will present a program of Christmas music, Mrs. Bobbs will beat the piano."

A most amusing one was a headline when the "a" was left out of "Humgary" and read as fillows: "Count Zog To Wed Hungry

So when we make an error don't judge us too harshly. You might do the same thing if you were in our place.

Canning Supplies

the supplies you will need. When planting twice as much as ever you shop this year for containers alleges and closures, you will meet some new war models, and you will find those who want to plan a large changes in those you are used to, is the information The Dispatch was given when making inquiries on canning supplies from Post merchants who stock such merchandise.

The food we can is most important this year so do not gamble with damaged equipment

2-Piece "Self-Sealing" Caps-Have you used this type-an old friend? There's a screw-on metaoand to be removed as soon as the food in the jar has cooled, and a disk-type lid. The disks have a sealing composition around the im, and this adheres to the jar during the canning process. It reates an air-tight seal. Jar rubers aren't needed.

Today's patriotic homemaker won't mind that the new screw ends and metal tops are a bit less hiny, realizing that the tin has one to war. The metal disks are ter-coated by an electric method 50 hills Put a shovel of rotted that saves two-thirds of the tin formerly used.

Just take care of the bands so Stone Mountain. One oz. seed will you can use them again and again. Carefully dry and store the band-Field Peas- Blackeye, Cream, even wipe it with a cloth dipped Crowder or Purple Hull. A large in melted paraffin to retard any

Glass Disk Tops- These, too, are used with screw-on bands Pinto Beans- In the western Unlike the self-sealing metal ones part of Texas Pinto beans can be they use a jar rubber. It's a small yield 100 pounds or more if need- glass disk and the jar top. The ed. About 20 but dried beans can present outlook is that there'll be

Zinc Lids- When you can't buy the zinc lids you've been used to in the stores, it's because nothing can take the place of zinc in the munitions our fighters need. It's alright to use your old zinc lids over again if you follow the precautions below for war-model jar rubbers.

Jar Rubbers- Your jar rings this year will be war models and lipless and contain a minimum amount of crude rubber. They may be black and smell a bit queer They must not be stretched for testing, for they haven't the usual nan-back. Turn lids slowly in sealing so rubbers won't skid. Give them a fair chance and they-'ll do their work well.

"Lightening" Type Jars- The jars with glass lids attached by steel springs are an excellent bet. There'll probably be an adequate supply of them all season long.

They require jar rubbers, of course Glass Jars- Glass is non-critical material. And we can't afford to use less than the highest quality for the food Mrs. America is canthose made within the last two or

weight yet much stronger because

Garden Hints

Inquiries relative to gardens are pouring into the office of County Agent Wallace Kimbrough. Many persons who have never planted a garden before are eager to do so now but do not have the remotest

idea of how or what to plant. Garden plots on this page are ecommended for study. One is or a garden 20 by 40 feet, one is for a small garden 10 by 20 feet, and the other is for a farm garden plot 100 by 100 feet. The charts give in related facts and figures the other information a person should have in order to carry mere planning down to ground

A list of vegetables that can be grown successfully in this intmediate area has been prepared for those persons who are in need of such information. All of these, depending on seasonal rains, will need additional irrigation for the best results. Out of a long list of vegetables that can be raised in this territory the following are recommended as desirable.

English Peas- Inoculate seed and plant 2 inches deep in heavily manured soil. For West Texas plant Little Marvel or Thomas Laxton. Moisture is essential. Unless there is ample moisture from rainfall or irrigation, do not plant

Cabbage- Plenty of manure makes a good cabbage crop. Grow from seed in hotbed 4-6 weeks before setting in garden, or get plants from seed stores. Set plants 2 in. apart, using Wakefield or Copenhagen Market wariety.

Beets- When 2-3 inches high, thin to a spacing of 3 inches apart. Fill in skips in rows by transplanting from thinned plants. Use merchants who carry garden im-Detroit Dark Red or Crosby's plements suggest that you take Egyptian varieties.

not make a good stand, don't dig those who are in need. up the whole row but replant the skips with more seed. Use Cantenay or Danver's Half Long variety.

Lettuce- To make lettuce head, use the New York or Los Angeles heading varieties; plant early, and thin plants to 6 inches apart when all tools, especially the fine cutinches high, Plant Black Seeded Simpson leaf lettuce in April for

Mustard- Plant several times in the spring; not much at one edge all tools and frequently, Foltime; it is tenderest and best at low the original bevel angle to 4 weeks after planting. Use Tendergreen or Southern Curled Store in a dry place, not just away

stores are usually the Bermuda or dirt in slowing up the work of Grano varieties. Sweet Spanish is your tools. A dirty, rusty spade is better keeper but hotter than not just a tool to be ashamed of

s best for early "new" potatoes; Katabdin is the best baking potato and the best for storage. Plant pieces half as large as a hen egg: when danger of heavy frost is plant 14 in apart in 3 to 4 ft. rows.

A FARM GARDEN

Plant this part in late winter:

English peas-1 pt. Cabbage-100 plants. Beets-2 oz. Carrots-1 oz. Lettuce (heading) 1/4 oz. Mustard-1 oz. Spinach-1 oz.

Onions-600 plants (2 rows)

Irish potatoes-5 rows (40 lbs. seed will yield 400 lbs. potatoes).

Plant this part when danger of frost is over:

Green Beans-3 pints (3 rows) Lima Beans-2 pints (2 rows) Lettuce (leaf) 1/4 oz. Radish, 1/8 oz. 20 ft. Parsley, 1/a oz. 10 ft. Mustard, 3 cz. 70 ft. Pepper—12 plants Eggplant-25 plants

Cucumbers-1 oz.

Yellow Squash-1/2 oz. Fordhook-1/2 oz.

Okra—1 oz.

Tomatoes-100 plants (3 rows)

Sweet Corn-% lb. (3 rows)

TAKE CARE OF YOUR GARDEN TOOLS

No Priorities For Garden Tools, your tools can be hung up if you So Take Care of Those You Have Is Suggestion Of Dealers

imited because we must have nicked. fighting tools. In order that you may preserve what you have Post care of your tools in order that the Carrots- If first planting does few on hand may be bought by

Keep them clean, if you want to get the most out of them. That doesn't mean just kick clods from between the tines of the fork or pull weeds out. It means wipe or pull or scrape all dirt from ting tools, after each use. An oily rag should always be handy.

Keep them sharp: This is where the file comes in. Use it to

Ignition key in your pocket-ACID locked in your engine

YOU CAN'T "pull the cork" to clear I out every cylinder after pocketing that key. A chemical mixture always lingers inside. The corner druggist would tell you that the cylinders hold the acid products of combustion...the makings of corrosion,

You didn't have all that worry heretofore, when the worst acid was chased out by fast and frequent driving that thoroughly heated the engine. Now however, when you're counting every coupon, how soon will it be till you drive enough to make the engine stay real warm? Meanwhile, with acid in your engine, as it stands for long stretches, you'd better take the precaution of having its insides OIL-PLATED by changing to Conoco Nth motor oil this Spring.

OIL-PLATING is really a close cousin of platings you see every day retarding corrosion. Conoco Nth oil-at a popular priceincludes the costly synthetic that makes oil-

PLATING come between

acids and inner engine surfaces. Unlike any mere liquid lubricant, ready to drain down to the crankcase promptly, OIL-PLATING tends to stay at its topmost point in your inactive engine, keeping up strong interference against acid attack on inner parts that can't always be replaced these days. The simple key to OIL-PLATING is Conoco Nth oil for your needed Spring changeat Your Mileage Merchant's Conoco station today. Continental Oil Co.

13 billion dollars must be raised!

THE GOVERNMENT of the United States is asking us to lend it 13 billion dollars in the next few weeks. We can do it. And we must do it. Every American must realize the truth:

In this, our toughest war, we've made a good start. We've trained a lot of men—made a lot of weapons—built a lot of ships.

But it's only a start. No man or woman among us would contend for a single instant that we're doing enough now to win this war!

We've Got to Build More!

We broke all records building 8 million tons of shipping last year. But grim-faced Army and Navy men will tell you that the 18 MILLION tons we're building this year still won't be enough!

We've Got to Fight More!

From now till this war is won, America must be on the offensive. In ever-increasing numbers, your sons, brothers, husbands must go into actual battle. Our losses have already begun to mount—and they will not grow less.

And We've Got to Buy More War Bonds!

Sure we're all buying War Bonds now. But we've got to help pay for our increased fighting and building... We've got to match, as best we can, the sacrifice of those Americans who are toiling and sweating on a dozen battlefronts—with the bloodiest yet to come. The blunt fact is this: to keep our war machine going, we've got to dig up 13 billion extra dollars this month. 13 billion dollars over and above our regular War Bond buying!

In the next few weeks you may be visited by one of the thousands of volunteers who are contributing their time and effort to this Drive. But don't wait for him. Make up your mind now that before this drive is over, you're going to march right down to your nearest bank, Post Office, or place where they sell War Bonds, and do your duty. And don't ever forget this: in doing your duty, you're doing yourself one of the biggest favors of your life!

For United States War Bonds are the greatest investment in the world—bar none. They're investments tailored to fit your particular situation. And they give you the chance of a lifetime to order and get the kind of world you want to live in after this war. Every cent you put in War Bonds now will help to guarantee plenty of peacetime jobs making peace-living for every one of us.

For your Country's sake—for your own sake
—invest all you can!

There Are 7 Different Types of U. S.
Government Securities — Choose
The Ones Best Suited For You:

United States War Savings Bonds-Series E: The perfect investment for individual and family savings. Gives you back \$4 for every \$3 when the Bond matures. Designed especially for the smaller investor. Dated 1st day of month in which payment is received. Interest: 2.9% a year if held to maturity. Denominations: \$25, \$50, \$100, \$500, \$1000. Redemption: any time 60 days after issue date. Price: 75% of maturity value.

2½% Treasury Bonds of 1964-1969: Readily marketable, acceptable as bank collateral, these Bonds are ideal investments for trust funds, estates and individuals. A special feature provides that they may be redeemed at par and accrued interest for the purpose of satisfying Federal estate taxes. Dated April 15, 1943; due June 15, 1969. Denominations: \$500, \$1000, \$5000, \$10,000, \$100,000—also \$1,000,000 if registered. Redemption: Not callable till June 15, 1964; thereafter at par and accrued interest on any interest date at 4 months' notice. Subject to Federal taxes only. Price: par and accrued interest.

Other Securities: Series "C" Tax Notes; 7/8 % Certificates of Indebtedness; 2% Treasury Bonds of 1950-1952; United States Savings Bonds Series "F"; United States Savings Bonds Series "G."

"Stand By For Action" At Garza

high seas, the exploits of a gallant convoy duty under fire in the Pacific, provide thrills galore imid which comedy is mingled, in 'Stand By For Action," which thows Saturday night 11:30, Sunday and Monday at the Garza. The cture presents Robert Taylor, In the city and school election Charles Laughton and Brian Donheld Saturday in Southland, R. O. levy as naval heroes, amid fights Pennell, Herbert Dunn, Sampson attack on a battleship under a smoke screen:

Taylor plays a young lieutenant assigned with an older officer, played by Donlevy, to a recommissioned destroyer. They are asigned to guard a convoy, and Graeber. amid amazing adventures, includng the rescue of twenty babies in drifting lifeboats (which forces all hands to turn smateur nurse- FOR SALE- House in North Post, the plays are going to be good so maids) bring their charge safely to port. Laughton plays an American admiral, and his address to the men on the destroyer, with its tribute to John Paul Jones, is an Mrs. Tessa Smith. inspiring moment in the thrill- FOR SALE- Five room house in packed production.

ABOUT THAT GARDEN-

(Continued From Front Page) sttack and keep at it, especially after a rainstorm, when previous applications will have been wash-

ed off. It's easier in the long run. To Avoid Resowing: The larger, fleshier seeds-lima bean, pole bean, pumpkin, and so on-should be put in with care. Put in bean seeds one by one about two inches apart in the drill, with the eye downward, and you'll get much better germination than if you just scatter broadside.

Stagger Your Planting: There are many tricks to making every mch count. Four 18-foot rows of carrots will supply more bunches than you can shake a stick at, and I. Big Spring, Texas. Liberal reif you stagger their maturing by ward. ground is mellow and works easly, and other rows, 15, 30, and 45 days later, you should have enough inghouse Market. for the whole summer.

Use all the space in each row. If your early beets, for example, come up irregularly, transplant lettuce, cabbage or cauliflower into the open spaces. A mixed row looks trimmer than one half bald -and produces more.

Sweet corn is a space consumer. Make the most of your space by putting lettuce, spinach and eral housekeeping work, reasonradishes between the hills during the early weeks.

what he calls a fat man's garden, buy 1941 and 1942 high grade cothas space economy down to a ton contracts. S. L. Browning science. When he puts in his onion sets, he sows onion seed between the spaces so that even those two-inch distances shall be used. He thins the row out by eatng the seedlings when they're orse knough

ECOND WAR LOAN-

(Continued From Front Page) tise. Marshall Mason is director the War Bond committee. The celding of the two committees is natural development to provide leadership in a drive of such magnitude

If the people of Garza county, and every county and town in the nation, are to meet their full measure of responsibility, they must loan their government every cent not needed for essentials of living-and we have to revise downward our ideas about what are essentials. If our boys can give their lives, we can and will give our money

In the next three weeks Garza citizens will be visited by a member of the War Finance committee so don't quibble about giving. Don't shilly-shally and debate. Dig down into your pockets and root those dollars out of the dark and invest them in this Second War Loan.

Read the page ad in this issue that explains the series of bonds to be offered. The ad was sponsored by Post merchants.

RAISE FOOD FOR VICTORY-

(Continued From Front Page) or their own welfare but as a patriotic service. With this thought in mind Post merchants have entered into the theme of the garden edition with well planned promotional ada stressing Victory Gardens. Many of these merchants do not have garden merchandise to sell and those who do are unable to get large supplies to sell due to the demands on the War Frontbut as always these merchants are cooperating in a program that they feel will benefit the town and the surrounding communities. Read their ads. These merchants stand ready to serve.

Victory Gardens are secessity—so plant the seeds of Victory in your own back yard.

Hoe And Sow VICTORY

The one big thing you can do to help your self and everyone else get enough food is to plant a Victory Garden . . . The present food shortage is no laughing matter, as the people of Greece can tell you. But we are lucky; there are no invading troops in America to trample and destroy our gardens before they have reached maturity.

Be wise! Plant a Victory Garden for your own use in order that our farmers' crops may be used to feed our troops and allies.

There's Something

About A

GARDEN

There's something about a garden that puts the turbulent world in its place. A garden seems to smooth the wrinkles right out of your mind and make muddled, mundane problems unimportant in comparison with small green leaves, unfolding stickily, or the mystery that's buried in the heart of a furled bud.

There's something about a garden-but it's not just a matter of soil and seeds. There's more to it than ever appears on the surface. A garden is an integral portion of home, and like every part of home, it doesn't just come about. It is made. It requires the work of hands and hearts and heads. It requires a special set of facts-a gratifying fund of information best acquired the hard way, by experience.

There's something about a garden that's satisfying as few other things in life are satisfying-something that makes as simple a matter as laying waste the weeds and digging out the crab grass a kind of spiritual victory. Something, too, that rejuvenates both mind and muscle. Did you ever notice how people who love and work with gardens never seem to grow old and crochety?

There's something about a garden, all right.
