## **GMH** Approves Personnel Policy

by Rodney Marshall

The Garza Memorial Hospital Board of Directors met in regular session Thursday, July 14, and passed a revised personnel policy for the hospital.

"The administration has done a very good job in revising the policy," stated Jack Alexander, president of the board.

But they removed Policy 6 concerning the physician recruitment section.

"We could jeopardize our tax status so I think it would be better to remove the policy and deal with each situation as it arises," said Alexander.

The directors passed the recommendation.

Approval of the Home Health Care quarterly reports was also approved.

The directors received information concerning the Home Health service

Publisher's Note

call the reporting selective be-

the poeple your article most hurts.

What goes on in our government meetings is not private, it is public and the people have the right to know.

The fact that very few citizens attend the public meetings makes it even more important that we report the information...we are the eyes and ears of most of the people...we represent those who can not or will not attend for themselves, they have the right to expect their hometown newspaper to keep them informed.

And that is precisely what we

that I earn, which is always paid on do. In the specific case referred to by this letter, any insecurity felt by clients or employees was not created by this newspaper. The responsibility for insecurity rests squarely upon the management.

In the six years that we have does not live here. He would be a been attending city council meetstranger to most of our townspoe- ings, never before has a delinquent ple. But it is those poeple who water account been brought to the attention of the council in a public meeting.

> Had this particular business been a service station or a newspaper, the city staff would have shut off the water without any fanfare, as they are charged to do by the city ordinance.

> The fact that this overdue issue was brought to the attention of the city council should be evidence enough of the seriousness of the situation and it is not the responsibility of this newspaper to set the agenda or the discussion at govemment meetings.

As to the letter writer's charge that certain "respected and important" citizens are protected from adverse publicity in "the hometown newspaper," we ask, how do you define "respected and important"?

We believe all our citizens are to be respected and are important and we also believe that we have demonstrated more than once that no matter who it is, if an elected official is found guilty of misdeeds this newspaper will as a matter of policy present this information to its readers.

We are offended by the charge that we discriminate...it simply is not true.

We ask that specific cases where we have erred on this issue please be brought to our attention.

It is a fact of human history that frequently the bearer of news is held accountable for the content...we accept this as part of our calling.

We pledge to our readers that The Post Dispatch will continue to follow the traditional ethical and professional standards they expect from their newspaper.
