VICTORY DAY GETS LITTLE THOUGHT HERE

Yesterday marked the passing of the first anniversary of "Victory Day," one of the greatest dates in the history of this nation, but here in Post the occasion slipped by with but slight notice. Had it not been for the few flags placed in front of business houses the memorable occasion would have passed without thought.

Post, like so many of the other towns and cities, forgets too easily and too quickly. To honor the memory of all those who gave their lives on far-flung battlefields with some measure of tribute is the very least we could do. We should take pride in devoting a part of our time and thoughts to those who served our country so nobly. As a town we are too indifferent to so many events that have a deep meaning in our lives.

A MODIFIED OPA

The recently enacted OPA bill is a compromise between those who believe the Office should be indefinitely continued in its old form, and those who believe that the time for governmental tinkering with the law of supply and demand is over. It is obviously designed as a sort of transitional measure, to bridge the change from a government-dominated war economy to a free enterprise peacetime economy.

The most important new feature is its establishment of a three-man "decontrol" board with powers superior to those of the OPA administrator. The job of this board will be to remove controls from commodities when supply is in sufficient quantity so that the free market will be of immense aid in getting this country back to its traditional ways of doing business.

In the meantime, the consumers of the nation must realize that the basic solution to inflation lies not in law, but in vastly stimulated production and distribution. So long as the supply of available goods is below demand, we will continue to have black markets. So long as labor troubles, governmental interference, or anything else blocks the production machine, an out-of-line price problem will continue to be a major factor in our national life.

The distributive machine is doing a fine job, and it is ready to do still better when goods again become plentiful. Retailers in all lines of merchandise, paced by the big chain systems, have consistently worked against price increases. They cannot, of course, prevent price increases made necessary by higher wage, supply and tax costs. But they are a constant guarantee of the lowest price for what you buy, consistent with the economic conditions of the time.

MOTHER NEEDS A VACATION

Editor's Note—From the pen of one of America's famous writers comes this bit of advice. It is one of the best bits of print we've read in many a moon. Give mom a break this year.

"This is the holiday time of the year when everybody gets a vacation except Mom. Father's employer gives him two weeks off. The kids are out of school. The adolescents go to camp. Everyone relaxes and takes it easy, for it is generally recognized that all work and no play makes Jack a dull boy and that even a short rest and a little change sends us back to our jobs refreshed and full of pep and energy.

The only exception to this rule is Mother, who is popularly believed to be so constructed that she never tires or gets fed up on domesticity and who is so devoted to her home and family that she simply would die of heartbreak if she were separated from them for even a few days. Naturally no one would be guilty of this inhuman cruelty, so while Dad goes fishing and the youngsters amuse themselves in their own ways, Mom keeps on doing her daily stint on the treadmill.

Mom needs a vacation worse than anybody else in the family and it is coming to her."

WHAT OUR CONTEMPORARIES ARE SAYING: THE CANDIDATES' COURAGE

From The Wellington Leader

I have a feeling for any man or woman who has the courage to run for a public office. Some people delight in taking the opportunity of saying what they have been wanting to say for a long time when any person runs for an office. There is a certain sadism in the way they treat candidates. None of this is for me. I treat every candidate with respect. They are trying to fulfill an important obligation under our democratic and republican form of government.

EDITOR WOULDN'T TRADE TIGHT SLACKS FOR BREEZY PLAY SUITS

From The Slaton Slatonite

The popularity of sausage tight slacks must be waning and I am sorry to see that play suits and shorts are taking their place. The slacks left just a little bit to one's imagination by the shorts give very little reign for one's fancy.

There is not that temptation to get a wide board and slip up on some tight fitting slack and to me most of the play suits give the wearers a rather raw appearance and I want to get them a sheet or something to cover up with.

BUSINESS ALREADY IS SETTLING DOWN

From The Hamlin Herald

Indications from the daily press and from local merchants is that business is already settling down in most retail lines to simpler buying. As stocks of critical goods become more available, people realize that much of their raving and ranting for those goods were superficial.

Reminds us of that old saw, "After you get what you want you don't want it." Especially is that attitude prevalent in the larger cities. We have always contended that folks in the smaller towns are more level-headed, less constrained to become riotous, and more prone to buy what they need rather than what they want.

Such a stable buying in towns like Hamlin will help stem tendency of the American people to cause inflation. Folks who operate on that principle will be less apt to "get hurt" by any occurrence of a so-called depression.

And, after all, careful buying is good for the merchant as well as the purchaser. He can gauge his purchases on the same principles.

As an author we have never written anything that will live. But, when it comes to a question of whether our writings shall live, or we shall live, we'll sacrifice our writings.

The city commission of Crosbyton last week authorized the purchase of 3 hospital units which are located at the Hereford prisoner-of-war camp to be moved and rebuilt into home for World War II vets. Plans are being made as to ways of securing the units and financing the construction of the homes after they are placed in Crosbyton. The hospital units will be cut into 12 houses, each being 25x37 1-2 feet, affording comfortable 5-room houses for the veterans.

Plans for this year's central West Texas fair to be held at Haskell are well under way. Directors have voted that, Thursday, October 10 should be veteran's and school children's day, Friday as Old Settler's Day and Saturday an all event day to crown fair activities. A carnival and other entertainment have been obtained for the entire week but emphasis on the fair exhibits will be limited to the last three days of that week. Extensive improvements will be made at the fair grounds.

The Seagraves schools announced last week that three new departments will be opened this year in their schools. They include vocational agriculture, music and the shop. Several improvements will also be made as remodeling of the cafeteria, reroofing the agriculture building and laying a new floor in the gymnasium. The repairs are expected to be finished before the opening of the school term.

CROSBYTON AIDING VETS IN GETTING HOUSES

Purchase of three hospital units from the Hereford prisoner-of-war camp to be moved to Crosbyton for use in building homes for veterans, has been authorized by the city commission, it was announced last week in the Crosbyton Review.

The city is handling the project on a non-profit basis and has set aside \$7,500 to purchase the units. Present plans are for cutting up the units into five room houses of 25x37 feet, and the cost to the veteran upon completion probably will be from \$2,000 to \$3,000, with very little cash outlay necessary for the purchase.

Allan Shivers Is People's Favorite

Senator Allan Shivers, in thanking the voters of Texas for the heavy lead they gave him in the July primary to make him the favorite

candidate for lieutenant governor, also warned citizens that attempts will be made by "scheming minority pressure groups" to defeat him in the August 24 runoff.

The Jefferson County legislator, lawyer and farmer, pointed with pride to the overwhelming support which he received in his present home county and in the county where he was routed to manhood. Shivers, a World War II combat war veteran (the only veteran in this race), polled approximately 75 per cent of the votes in Jefferson County, his present home, and was a 25 to 1 favorite over his runoff opponent in Tyler County, where he spent his youth. Senator Shivers led his runoff opponent by approximately 100,000 votes in Texas.

"I am deeply grateful for the confidence the people of Texas have shown in me and the progressive program or Texas which I advocate," Shivers said. "I shall strive even harder to work for the welfare of Texas."

"Because I represent the masses of the people, there will be those in the runoff campaign who will conspire to defeat me," Shivers predicted. "I will not be swayed by these radical, minority groups—the C.I.O. noisemakers in particular. My opponent is welcome to the support which they are giving him. I will continue to fight for the right and welfare and progress of our people who make up the backbone of Texas." —Pol. Adv.

THANK YOU
for waiting for delivery of your
NEW CHEVROLET

We are doing our best to see that you
get your new car as quickly as possible

Remember—Our CAR SERVICE is your best CAR SAVER. Keep your present car "alive" until you get delivery of your new Chevrolet by bringing it to us for skilled service now and at regular intervals.

We want to thank our customers and prospective customers for your friendly patience while awaiting your new Chevrolet.

We know it is a hardship to wait for needed transportation; but we believe you will understand that we, and Chevrolet, are as eager to deliver cars as you are to obtain them. Unfortunately, production so far this year is far under expectations. Chevrolet Motor Division sums up the situation thus:

"Even though our rate of production normally exceeds that of any other manufacturer, we have been able to build, up to July 1, only 12.4 per cent as many cars as we had built up to that date in 1941. Production is still far below normal, because of frequent shortages of essential materials and parts. Strike after strike at the plants of our suppliers has seriously impeded our progress toward full production, and the cumulative effect severely hampers every manufacturing and assembly plant. In June we were able to build only 29.2 per cent as many cars as we produced in the same month in 1941."

While production is restricted, so—in preparation—are shipments of cars to us. As production increases, we are assured of getting our proportionate share of the total—and as quickly as cars are received, we will speed deliveries to our customers.

In all thy ways, acknowledge his name. He shall direct thy way. —Prov. 3:6

Prayer
Give us this day some work to do for others, some kindly word to speak, some helpful unselfish deed to do in Thy name. Be with us in all our trials and every hour of this day, and may we so live that Thy will be done and Thy Kingdom come within our hearts.

Orchids go to cute little Mary Williams for her loyalty and dependability. She is reporter for the Junior Girl's Auxiliary of the Baptist church and is almost always on time with her written reports of the meeting. This column certainly do with a dozen faithful reporters. More than we like to remember church women have said, "We'll report the meeting"—then just do it.

While we are passing out orders we want to give a hand. Mrs. Willard Kirkpatrick of the First Baptist church and Mrs. J. Parker of the First Methodist church are very helpful in providing church news of their particular groups and many times in The Dispatch and give leads to other stories of civic interest addition to church news. The ladies, too, are very helpful in giving in news.

From Doyle Kelsey, minister of Church of Christ, we give you following weekly report:
We are making a special effort to increase the interest in our 8-week service. We are now giving the missionary tours of a apostle Paul, and we give to anyone a cordial invitation to attend this service and all the other services. You can rest assured that you will be perfectly comfortable in our air-conditioned building.

By Smith, superintendent of the First Baptist church Sunday school reports that attendance records for the vacation months are going well up to par. Last Sunday there were 247 in Sunday school.

The marriage of a former Post girl, Miss Betty McElroy, of Wichita Falls and Leland D. Ethel of Los Angeles, California was an event of July 9 at the Pico Wedding Manor in Los Angeles according to word received here. Rev. Albert S. Mason officiated during the double ring ceremony for which the bride was attired in a gray suit with accessories of fuchsia and black. Her flowers were orchids carried atop a white Bible.

Best man for the groom was his brother, Earl Ethel. The traditional wedding marches were played and during the ceremony, background music included "I Love You Truly," "Always," "Because" and "Clair de Lune."

A floral setting featured gladioli flanked by tapers burning in candelabra. Mrs. Ethel is a graduate of Wichita Falls High school, attended Hardin Junior college of Wichita Falls and West Texas State Teachers college in Canyon.

WATCH YOUR HEALTH

Hardening of the arteries which causes high blood pressure and heart and brain strokes is not due to old age but to repeated infections—teeth, tonsils, gums, sinuses, gall bladder—which after healing leave scars or hard tissue and the loss of some of the elastic tissue of the blood vessels. Worry, mental overwork may also cause persistent tightening of the blood vessels and loss of some of the elasticity in walls of blood vessels. Calmness of spirit will prevent high blood pressure.

Swing of Southwest Farm Markets

Cotton reached another peak and wool strengthened during the first ten days of August, but most other southwest farm products reacted slightly from the recent high price trends, according to USDA's Production and Marketing Administration.

Cotton climbed \$10 a bale to the highest point in 23 years. Most of the gain followed the Crop Reporting Board's low estimate of only 9,200,000 bales for the 1946 crop. Strength developed in the Southwest on indications of drought damage and a good demand for limited offerings. First bales ginned in several north Texas counties brought record prices.

Livestock marketings continued liberal and prices were very irregular. Demand was the principal factor. Fort Worth and San Antonio reported steady to strong steer prices, but calves were sharply lower and some other classes were weak. Houston, with the largest cattle receipts of the season, had lower prices on nearly all classes. Oklahoma City, on the other hand, reported a strong to higher market on both cattle and lambs, though ewes declined there and in Texas. Poor quality lambs also declined at Texas markets. On hogs, there was some reaction from the recent high level, but good and choice butchers closed the week around \$23 to \$24 a hundred throughout the Southwest.

More liberal supplies of other meats reduced demand for poultry, but offerings continued liberal as farmers continued to cull out their flocks. Markets generally developed irregularities and slight eases but most southwest buyers paid fairly steady prices. Eggs strengthened under good demand, shrinking receipts and moderate export shipments.

Grains eased slightly with most weakness on sorghums. Uncertainty regarding price control regulations after August 30 restricted trade in all grain. Prospects for record-breaking crops of corn and wheat also tempered the demand body is 80 per cent as restful as sleep itself.

LATEST ON DDT GIVEN BY EXTENSION SERVICE SPECIALIST

DDT is still a very new story particularly in connection with feed and food crops.

For household and livestock insects, DDT is the best insecticide that has been found, says C. A. King, Jr., entomologist for the Texas A and M College Extension Service. But in general, entomologists are going slowly on recommendations until they know more about how the insecticide reacts on different plants under different climatic conditions.

For houseflies, mosquitoes, fleas, roaches, bedbugs, and lice, DDT is deadly, say Extension entomologists. When DDT fails to control these insects, such as houseflies, the trouble may not be that too low a percentage of the insecticide is being in the spray. A five percent mixture should be used to kill houseflies, and the spray must be applied thoroughly on the walls of the house.

Several precautions must be practiced by DDT users. When spraying vegetable and truck crops, such as cabbage or sugar beets the crop residue should not be fed to livestock. For stored grain insects, a three percent dust may be used, if the grain is not to be used for food. In spite of extensive investigation, the use of DDT on fruits is not yet recommended. It should never be used on animals in an oil solution.

With DDT, as with any other insecticide, the effect on the insect is only half the story. It can be poisonous and harmful to animals and human beings, and it does kill some useful insects, at the same time allowing other pests, such as the red spider, certain aphids, and mites to increase.

Entomologists don't know yet just exactly where DDT is going to fit into the insect control picture.

somewhat, though some anxiety developed over the continued drought in southwest areas. Early rice, about ready to market in the Louisiana-Texas area, is expected to meet a good demand with old stocks practically exhausted.

Mr. and Mrs. W. S. Duckworth and Mr. and Mrs. Allen Cash are vacationing in Hudson.

Miss Hazel Louise Cash spent last week end in Abilene as a guest in the Gardner home.

TEXAS RANKS SECOND IN 4-H ENROLLMENT

Texas ranks second only to Alabama in the number of boys and girls engaged in 4-H Club work, according to nation-wide figures just released by the United States Department of Agriculture.

The census was based on club enrollment figures for 1945. Texas had 100,820 club members last year, while Alabama was in first place with 115,751. Mississippi's 100,239 members placed a close third.

During 1945, 20.7 percent of all Texas rural-farm youth were engaged in 4-H club projects. This percentage was based on the 1940 population census, however, so the figure could be much higher or lower now. Texas club membership in 1945 dropped slightly from the 1944 figure, which was 103,294.

A report from USDAY received by the Texas A and M College Extension Service stated that Congress, when it appointed, since July 1945, some 1390 new county extension agents, expressed the intent that these new agents would spend much of their time in bringing more boys and girls into 4-H Club work.
