The Post Public Schools will open Tuesday, Sept. 4, for the 1956-57 term with a full school day scheduled, Supt. R. K. Green said Wednesday.

Pre-registration of sophomore students was under way at the high school Wednesday, with freshmen scheduled to register Thursday. Registration of seniors and juniors was completed Monday and Tuesday.

A general faculty meeting is scheduled for 9:30 a. m. Friday in the grade school auditorium. A teachers' workshop will be held Friday and Saturday mornings and Monday.

Registration at the junior high school and elementary school will be held on the first day, according to principals Ellis M. Mills and Jack Lancaster.

Buses will run on their regular schedules Tuesday, Supt. Green said.

The faculty for the new term was completed Tuesday night when the board of trustees employed W. O. Coltrane of Lubbock to teach high school English. He has a master's degree from Texas Tech and has had three years' teaching experience—two years at Springlake and a year at Lubbock.

Green announced Wednesday that Mrs. Carole Denson has resigned as music teacher in the elementary school. He said the vacancy created by her resignation will not be filled, but that George Willson, newly-employed choral music teacher for the high school and junior high school, will fill the position.

## WATERMELON FEAST

A watermelon feast for golfers and their families will be held Friday evening at the Cuprock Golf Course, manager D. H. Bartlett has announced.

BEST ONE YET—Floy Richardson, president of Post Stampede Cowboys, is displaying the first place trophy the riding group won last week in the parade opening the Fisher County Fair and Rodeo at Roby. Richardson says the trophy probably is the most impressive one the Cowboys have ever won. They've also placed first this season in parades at O'Donnell and Snyder.—(Staff Photo).

WELL, IT'S ALL over, including the shouting, until the November election.

FIRST REMINDING our readers that the views expressed in this column are not necessarily those of the newspaper, we wish to make the observation that Saturday's vote indicates that Texas will get back on the Democratic side of the ledger—where it belongs—in the November election.

THE RAPIDITY WITH which this county's election returns came in Saturday night probably set some kind of a record. Complete returns from all ten voting boxes were posted well before 9 o'clock.

MAYBE WHAT MADE it seem so fast to us was listening to T. R. Greenfield, Polly Duran and Ray Smith recollect how long it used to take some of them to get in with the returns from the outlying precincts—back before the era of good roads.

DIRECTORS OF THE Chamber of Commerce are enthused—and have every right to be—over response to their Hospitality Days program. When nearly 90 business firms side in with you on something of that sort it augurs success.

A FRIEND OF ours who makes a hobby of collecting such things has called our attention to the following headlines:

"Jury Gets Drunk Driving Case Here"—Austin, Tex.

"Night School to Hear Pest Talk"—Oakland, Calif.

"County Officials to Talk Rubbish"—Los Angeles, Calif.

"High School Girls Learn to Fill Out Their Forms"—New York.

"Pocatello Mattress Factory Plays Important Role in City's Growth"—Pocatello, Idaho.

THE INTERSCHOLASTIC League's distracting habit of annually shifting school athletic terms from one district or classification to another keeps most of us bumbled. So, for the edification of local sports fans, we're passing on here the information that the Post Antelopes will operate in District 2-AA during the coming season. Also in the district will be Abernathy, Floydada, Lockney, Slaton, Spur and Tahoka.

SOUTHLAND'S SIX-MAN football team will operate in District 2, along with Bula, Cotton Center, Pettit, Spade, Smyer, Three Way, Union and Wellman.

SUCCESS IS easy. All you have to do is to select a thing that can't be done, convince the world that it can, and do it. After that, all that is necessary is to sell it to someone who isn't buying, invest the money you don't get in something that will never pay off, and sit back and wait for the checks that never come in.

LITTLE LEAGUERS here will be interested to learn that a team from this area of the United States, Roswell, N. M., has won the national Little League championship. The Roswell team competed in the district tournament at Lubbock, defeating Albany, Tex., for the championship there. Incidentally, the Albany team spent one night between games at a Post motel. They were unable to find rooms in Lubbock, where the state

Roger W. Babson Writes This Week:

Soviet Leaders Think Chances Are Better To Spread Communism Through Diplomacy

BABSON PARK, Mass.—Readers are naturally interested in what I think may cause the next stock market decline. I have heretofore discussed the domestic political situation, which should be very much upset by President Eisenhower's physical condition; also the fact that many purchasers on installments are getting physically and mentally tired with "keeping up with Lizzy." Therefore, this week I will confine myself to the international situation.

Communism On The Decline I think that the Russian leaders, who are primarily interested in holding their own jobs, believe that they now have a better chance of spreading Communism through diplomacy than through threatened violence. The first step in such a campaign was the discrediting of Stalin. The second step has been apologizing to Tito for various things they have done. The real reason for their change is that Communism is contrary to human nature. These Russian leaders now believe it must be brought about slowly and cannot be forced.

The real conflict will be between the East and the West. The Russian leaders are trying to consolidate the eastern half of the world, including China, India, and the East Indies, and forget Europe and North and South America.

What Washington Knows This situation has been carefully discussed behind closed doors in Senate Committee rooms. These select committees have been told things that the Public do not yet know. The White House and our leading statesmen are correct in following this policy until they find the answer; then it will be told to the people.

This news could greatly affect general business. Certainly our several hundred thousand soldiers in Europe could be withdrawn and defense appropriations would be reduced. This would harm some industries and localities, while other industries would be helped.

To summarize my thoughts, I herewith give two brief forecasts.

(1) Both political parties will make an effort to keep this inside information secret until after Nov. 5 of this year.

WISHING IS NOT ENOUGH

More and more Americans are becoming school-conscious with each successive year, and the trend is as apparent here as it is in any other American community.

There are a number of reasons for increased interest on the part of patrons, one of them being a nationwide awakening to the realization of the important role education plays in our democracy.

Wishing for good schools is not enough. Communities have good schools when the people want them enough to take an interest in them, to work for them and to cooperate with them.

As never before, patrons are being urged to visit the schools for a closer look at democracy in action, and it is estimated that more than 20 million Americans will visit the institutions of learning this year.

In addition to visiting the schools, there are numerous other ways in which the patrons can help them to fill the needs of education and to achieve the highest order of success. One of these methods is by active participation in the local Parent-Teacher Association. Another is by supporting with our interest and attendance all school activities open to the public. This does not include only the athletic contests, but also school plays and other activities.

With another school year at hand, this is an opportune time to dedicate ourselves to taking an interest in them, working for them and cooperating with them. Time and effort along these lines will pay untold benefits in the years to come.

If we are to continue to maintain the balance between the states and federal government that has made possible the development of our country and the protection of our individual rights, the authority and rights of the various states must be preserved and the trend of ever increasing power of the federal government must be reversed.—Gainesville, Tex., Daily Register.

The American people from the Boston Tea Party through the 18th Amendment have failed to cooperate with any law that they did not personally understand and accept. This American attitude sometimes leads them into actions that are dangerous to the lives of others as well as their own. This is often true in their attitude toward traffic safety. . . . The dangers of driving too fast, particularly during the heavy traffic summer months, must be told and retold.—Reynoldsville, Pa., Star.

coaches' school was being held the same week.

BY THE TIME this column appears in print, high school pre-registration will be nearing completion, and teachers and pupils will be looking ahead to the Sept. 4 opening date. National sponsors of American Education Week, Nov. 11-17, are looking even farther ahead. They've already picked the theme for '57—a year's observance—"Schools for a Strong America."

THERE'S A BIG weekend coming up for us. At 3 o'clock Sunday afternoon, we're to give our daughter in marriage, which will be an entirely new experience for us. We're looking forward to it with some misgivings, since we won't be able to let off tension by pacing the floor as we did some twenty years ago while awaiting her arrival.

WITH TWO SONS and a host of friends and relatives on hand, we'll have more company, however, than we did in those anxious moments just before she was born. Anyway, we're sorta anxious to learn how it feels to be a father-in-law.

Getting Out On The Limb

By EDDIE the editor

SUDDEN THOUGHT: Imagination is what makes some politicians think they are statesmen.

Here is a classified ad that caught my eye: WANTED—A home for a 3-months-old puppy; house broken except when very happy.

A WOMAN'S MAGAZINE of vast circulation has long used this slogan: "Never underestimate the power of a woman." This is used as an inducement to advertisers, and points up in catchy style the fact that woman is a potent factor indeed in economic life, as well as all the other phases of human existence.

However, no one knows exactly how potent a factor she is. Some of the estimates, as Fortune observes, have been extravagant—"including the assertion that she controls 85 per cent of all consumer buying." Fortune's own estimate is that the proper figure is in the neighborhood of 60 per cent. What this means can be deduced from one statistic—last year total consumer expenditures in this country reached \$252 billion.

In some fields, obviously enough, the distaff purchaser is extremely dominant—food, personal care (including cosmetics), household equipment, clothing. In other fields she is also a very big factor—either as a direct purchaser or as an influence on purchases made by the husband and other members of the family. So an inevitable development has been increasing attention on the part of business to try to find out just what inducements cause a woman to spend her money most freely. Much has been learned—much more, apparently, is still somewhat shrouded in mystery. Today efforts to unravel that mystery are being intensified. Writing in the August issue of Fortune, Gilbert Burck discusses what is going on—under the apt title, "What Makes Women Buy?"

The food industry, he continues, has gone especially deep into the subject of milady's likes and dislikes, as have the soap and cigarette people. Studies indicate that women want to be told they've done a good job. Hence, he writes, "From this stems a basic principle: to sell the housewife anything . . . do not lecture her on how wonderful your product is, or how it will eliminate her drudgery; tell her—or imply—that using it will not merely make life easier but will surely bring her recognition and approval."

Other merchandisers think women are more emotional and venturesome in their purchasing habits than are men, and gear their sales inducements accordingly. A food chain is cited which has been successfully emphasizing unusual and exotic items—along with innovations in store arrangements and color schemes.

This doesn't mean women are disinterested in questions of function and economy. But, it seems, they like their purchasing to do something for their self-esteem. A leading researcher regards the woman as "an independent, often individualistic, creative, driven by a creative urge that manifests itself even in the imaginative way she uses ready-to-serve foods, considering herself knowledgeable and mature, rejoicing in the fact that she is harder to fool, preferring to save happiness rather than dollars," and disposed to buy the better and more expensive item if she can afford it.

Many a peaceful revolution has taken place in this country in the last 50 years or so. Not the least of them has been in woman's role in influencing our economy.

Two heads are better than one, but very conspicuous.

A Russian diplomat whose career had steadily fallen since the revolution, was finally sentenced to die before the firing squad. In the international tradition he was offered one last cigarette before being shot. As the sergeant held out the cigarette, the old diplomat eyed it for some time, and then in a soft voice, whispered, "Don't you have a king-size?"

A GLANCE AT the Post Antelopes' 1956 football schedule and a check with the sports editor discloses that this season the Antelopes will go up against Jack-rabbits, Chiefs, Mustangs, Eagles, Tigers, Longhorns, Bulldogs (twice) and Whirlwinds, and then wind up their season against a herd of their own kind—more Antelopes.

Science claims that some plants derive benefit from the use of artificial light. And the electric light plant is one of them.

A vacationing friend writes: "It's so warm here in Wisconsin, everyone sleeps under one blanket. Let me tell you, it's a wonderful way to make friends."

Maybe money doesn't make you happy, but it does keep you in comfort through your misery!

"As soon as I realized it was a crumbed business," said the absent-minded politician, "I got out of it—but not much."

THE AMERICAN WAY

A Costly Procedure

Our Contemporaries Are Saying . . .

Always Something

A Tyler banker speaking at the convention (West Texas Press Association) on how to make a small town grow told about the small town in Oklahoma that had a chance to secure a railroad.

The town fathers met to decide whether they wanted the railroad or not. After much discussion, the city dads agreed that they didn't ship much out nor ship much in, and since none of them were going any place, the town really didn't need a railroad.

A young attorney, who had recently hung out his shingle in the town, jumped to his feet and protested.

"I believe this town needs that railroad and should let them put the line through here," he protested.

"Lissen, young feller. We've told you that we don't ship anything out and only very little in, so why do we need a railroad?"

"We could always sue 'em,"

was the young attorney's reply.

"—'Drifting Sands' in The Andrews County News.

Those Tennesseans!

Due to excellent TV and radio coverage, this is the closest I have ever come to a national convention. The most amazing thing to me was the big stick wielded by the State of Tennessee. With only 32 votes, the Volunteers seemed to be on hand at every turn.

It Pays To Try

Men who make numerous mistakes have a method of sinking them into the foundations of achievement. Those who never try will forever remain immune to the pain of failure.—"Trail Dust" in Matador Tribune.

Kaufauer swung the deal for Stevenson; Clement made the keynote address; Gore and Kaufauer are both out for vice president, and Kaufauer finally cops second place. In addition, Tennessee was foremost in all the proceedings and maneuvers; in fact, just about stole the show. At least they seem to have named both the presidential and vice presidential nominees. Even Davy Crockett couldn't have done a more thorough job—"Hereford Bull" in The Hereford Brand.

Self-Protection

The day after the election always brings to mind the story about a losing candidate who came to town the following day with six-shooters strapped to his side, advocating that a man with such few friends had a right to protect himself.—The Monahans News.

Convention Note

National conventions must be a lot of fun, and we can see why it takes four years to get convalesced for the next one.—"It Sez Here" in The Rails Banner.

**New Synthetics Are Threat To Cotton's No. 1 Spot As Fiber**

By JOHN C. WHITE  
Commissioner of Agriculture  
Only thirty years ago, cotton was king of our farmers' domain. It was the nation's No. 1 cash crop.

Today, cotton has been exiled to the third niche in national farm economy, below meat and dairy income. And unless much work is done on cotton's behalf, the famous mainstay of plantation days is in for an even tougher ride on the world's market.

One major threat to cotton's

No. 1 spot on the domestic fiber market is the marked acceptance of new synthetics which are gradually eating their way into all areas of the fabric trade. Last year alone, synthetics took 3 per cent of the market from cotton, bringing rayon, acetate and nylon up to 27.8 per cent of the total. Cotton's take was 65.7 per cent of the market—still No. 1, but 10 per cent below its standing a decade ago.

At the June meeting of the American Cotton Congress in Lubbock, a top economist for the National Cotton Council said competition is beating out cotton on three counts: research, promotion and price.

Total cotton research money spent last year by all public and private agencies was \$14 million dollars. Synthetic fiber producers are spending at least \$80 million a year for research alone.

Similarly, cotton producers, through the National Cotton Council, spent only a half-million for promotion in 1955 compared with \$12 million given over to promote synthetics. Since most synthetics are much cheaper to produce, many are underselling cotton.

This would indicate that cotton's problem is largely financial, since there is no question as to quality and usefulness. Some say cotton producers, the farmers themselves, should insure cotton's future to the tune of \$1 to \$1.50 on each bale produced, spending the total on research and promotion.

Everyone concerned agrees that money spent now could mean a market saved some time in the future.

Much work has already been done in the right direction, and there's little doubt the cotton industry will respond in a big way to maintain its role at the top of the fiber market.

**Insects Continue To Cause Damage To Area's Cotton**

Scattered light showers fell during the past week, it is reported in the current Cotton Insect Situation release. The accompanying low temperatures, followed by the rather rapidly rising temperatures, caused cotton to wilt in many cases, although soil moisture seemed ample. Shedding was common where plants were heavily fruited. This shed was rarely caused by insect damage. Some late planted cotton developed damaging insect infestations.

Boilworms were reported in medium to heavy infestations in scattered fields in Floyd, Gaines, Lubbock and Yoakum counties. Egg counts are generally low. Small worms were found feeding on all parts of the plant as well as in the plant terminal. In checking for infestations, squares and bolls, as well as plant terminals, should be examined.

Lygus bugs continued to cause damage to cotton in some fields in Bailey, Gaines, Hockley, Lamb and Lubbock counties.

Cabbage loopers occurred in sufficient infestations to cause ragging of leaves in many cotton fields throughout the area. While damage was generally heavier on late or succulent cotton, many dryland plantings had heavy infestations. Although disease continues to kill large loopers, an increasing number of newly hatched worms appeared in many fields.

Leafworms appeared in large numbers during the week, but no heavy infestations were reported.

Spider mites were found in spotted infestations in widely scattered fields in Cochran, Crosby and Lubbock counties. Generally only parts of fields were involved.

**RODEO QUEEN** — Miss Mary Ann Roberts of Ralls has been chosen Queen of the 5th Annual Jaycee Rodeo to be staged at Ralls next Thursday, Friday and Saturday, Sept. 6, 7 and 8. Goat Mayo, veteran rodeo producer, is in charge of the amateur rodeo. Prize money totals \$2,500. A mile-long parade at 4 p. m. Thursday kicks off the rodeo, with performances scheduled for 8 o'clock each night. Tommy Hancock's orchestra will play for the dances.

**Firemen's Families Benefit From Fund**

Olin Culberson, secretary of the State Firemen's and Fire Marshals' Association, announces that contributions totaling \$2,015 have been received for the families of firemen killed in the July 29 oil tank explosion at the Shamrock refinery near Dumas.

Seven Dumas and five Sunray firemen were among the 19 men who died in the disaster.

Earlier this month, the Post Volunteer Fire Department made a contribution to the fund.

**'SLOW DOWN AND LIVE' PROGRAM UNDER WAY**  
**Officer Advises Motorists To Fit Their Driving To Traffic Pattern**

Remember the old maxim, "Cut your pattern to your cloth?" Sheriff Carl Rains gave it a new twist today when he advised motorists to fit their driving to the traffic pattern.

He offered this advice in the interest of the Share the Road program sponsored by Texas Safety Association and the Department of Public Safety and the National Safety Council. This program is being conducted in cooperation with the Slow Down and Live program of the National Conference of State Safety Coordinators.

"Many of us do a good deal of driving during the summer months," he said. "Sometimes we have to change from quiet rural roads to superhighways to congested city streets—all in the same trip, and at such times our safety depends on how quickly we can adapt to changing traffic conditions."

Getting into step with the new traffic pattern immediately is of prime importance," he said. "This calls for great adaptability and driving skill."

"The driver who is skillful and versatile develops what might be called a 'sixth sense,'" Sheriff Rains said. "He gets the 'feel' of the new traffic pattern immediately and he adapts his own pace

to it without delay.

"Once he has fitted his own car into this pattern he avoids doing anything that will endanger his own safety or the safety of the drivers around him. He takes only his own share of the road, and in the proper place. He drives at a safe distance from the car ahead. He keeps in his proper lane, passing only when he has ample time and space. He signals all turns and lane changes.

"The wise driver sees himself in true relation to the whole traffic picture. He adapts his driving to the driving of the others around him. Courteously and realistically, he shares the road with them."

**Chairman Reports On 1956 Bond Purchases**

During July the sale of Series "E" United States Savings Bonds in Texas increased 18 per cent, T. R. Greenfield, Garza County Savings Bond chairman, announced today. Texans purchased \$13,700,543 in Series "E" and \$3,021,000 in Series "H" bonds, Greenfield continued.

The sales in Garza County for July were \$4,350. In Texas, sales for the first seven months were \$115,029,901, and the sales in Garza County for the same period were \$83,497.

The chairman also stated that of the Series "E" bonds that have matured, over 70 per cent are still being held for the additional option period of nine years and eight months.

Greenfield also reminded those people who hold matured "F" and "G" bonds that they should exchange these matured "F" and "G" bonds for Series "E" or the new "H", "J" and "K" bonds in order to earn additional interest.

As of Aug. 1, Garza County had reached 52.2 per cent of its 1956 quota of \$160,000, the chairman concluded.

**October Draft Call Largest Since 1955**

AUSTIN (Sp4.) — Texas' draft quota of 847 men in October is the largest draft call since December, 1955, the State Selective Service has announced.

The national quota is 17,000, all for the Army.

The office also said about half the state's local boards will be asked in October for 1,416 men to take pre-induction physicals and mental examinations for future calls.

What do you think of...  
 when you see a Church?

Have you looked at a church lately?  
 To almost everyone, the sight of a slender steeple raised to the sky evokes certain emotions—awe; perhaps, nostalgia, maybe—the sense that by not going to church lately, you've been missing something!  
 Next time you see a church, take a good look . . . and let yourself really feel what you see. If that makes you decide not only to look at the outside but also to go inside, that will be all to the good. For no matter how lovely a home you may live in, it can't compare with God's House. If you open the door, you'll find that, no matter how long you've been away, the welcome is warmer and more wonderful than you'll find anywhere else.

**THE CHURCH FOR ALL . . . ALL FOR THE CHURCH**  
 The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

### Plans Under Way For Pony League

Everyone interested in organization of a Pony Baseball League for the 1957 season is invited to a meeting at 7:30 p. m. Thursday, Sept. 6, in the high school study hall.

Directors will be elected, with four spots left open for sponsors and their representatives.

Plans are to organize two Pony League teams here and to form a league with Tahoka, which also plans to organize two teams. The organization was discussed last week in Tahoka at a meeting attended by Leo M. Acker, Phil S. Bouchier and Shelley Camp of Post and by a group of Tahoka men.

The lights at Little League Park here were installed so that they could also be used for Pony League play, and the present fence will be moved back. A portable fence will be available for Little League games.

Another meeting between Post and Tahoka representatives in regard to organization of the Pony League is set for Sept. 17.

### Damage Is Heavy In Sunday Blaze

Extensive smoke and water damage resulted Sunday morning from a fire in the C. W. Brown residence in the 600 block of West Fifth Street.

Firemen, who answered the alarm shortly before 11 o'clock, said the fire apparently started in a bathroom closet, but that the cause was not determined.

The Brown family was en route to Odessa to visit relatives when the fire occurred. They learned of the blaze after reaching Odessa and returned home immediately.

Firemen said damage from the fire was confined to the bathroom and bathroom closet area, but that much of the interior and furnishings was heavily damaged by water and smoke.

**Mr. and Mrs. Ray McClellan** and children and Frances Craig left Saturday to spend a few days in Waco. The McClellans also plan to visit relatives in Marble Springs. Frances has enrolled in Baylor University.
