OUR HOSPITAL . . .

If Dr. Glenn Kahler were alive today, he would be the key figure in Sunday's formal opening of the Garza Memorial Hospital, Although he cannot be present physically, it is surely not presumptuous to believe that his spirit will not dwell in the hearts of all Garza county folks, in the hearts of those who gave their time and talents with him to the idea and in the hearts of those who present the program Sunday, Dr. Kahler spearheaded an undertaking that has resulted in the acquisition of a hospital that would be a credit to counties of much larger population. Through vision and unity of purpose, the doctors of the town, members of the Commissioners' Court. and the hospital Board of Trustees have worked together diligently to build an institution that will serve the sick and injured. The hospital was conceived by unselfish people; was planned by men and women of genuine good will. May it be a blessing through the years to countless men, women and children.

To all individuals and groups who were charged with the greater responsibilities to the people of Garza County in planning and providing funds for building the hospital and to those individuals who have had a part in helping to complete the project with furnishings, we want to say Congratulations.

No one who visits the hospital Sunday afternoon will deny that the end-product is not full payment for those who labored and planned so strenuously for more than two years to give the county the finest and best equipped hospital possible. You will be doing yourself a disservice if you do not attend the formal opening and dedication program Sunday afternoon at two o'clock of one of the finest institutions in the state.

CHORAL CLUB ...

The movement in Post High school to promote group singing is a most commendable one. Nothing so inspires or gives one such a warm feeling of pride as watching and listening to a group of teen-agers perform well en masse. The benefits, too, of such a cooperative project are many for the students, A director of such a program has a tremendous job. He needs not only ability, but perseverance and patience. We feel that in Mr. John Christopher, the school officials have such a director. We are sure that before many rehearsal periods have gone by the townspeople of Post and Garza county will be hearing some excellent choral singing. It is the purpose of the school leaders to develop and encourage group singing as well as instill in the student a desire to learn and appreciate good music.

At the present time the choir consists of sixty-five members who are enthusiastic and serious about the club and what it can mean to them in their school activity program. No special requirements are needed to join the club except to have a desire to want to sing and sing well in a group. Plans are underway for the procurement of robes, insignia, and other items which go to make up an adequately furnished choral organization. The director plans for the group to be able by the end of the first semester to present programs and concerts in various schools and churches in

We believe that projects of this nature are just as important to the student and to the town as athletic activities and we hope the townspeople will lend as much support to this phase of the school program as they do to the athletic program.

Texans In WASHINGTON

Associated Press Washington Service

tom, Jr., a native Texan, is the State Department's top negotiator in working out problems on shipment of a half hillion dollars worth of between U, S, and Latin-American business U. S. goods to Venezuela yearly. and agriculture interests.

A native of Brownwood, the 40-year old Texan claims Corsicana as his legal residence. His wife is the former Billy Ruth Young of Corsicana

Rubottom had considerable experience in hearing other people's problems before he entered the Foreign Service in 1947. He served as assident Dean of Student Life at the University of Texas from 1937 to 1941. He is a gradu-

ate of Southern Methodist University in Dallas. He got his first real taste of diplomatic life during service as a naval commander in World War Two. He was stationed in Manzanillo, Mex., and then in Asuncion, Paraguay as naval attache.

Rubottom negotiated the 1951 migrant Farm Labor Agreement with Mexico.

Before that pact became effective there were many long hours of discussions and bargaining, American farm operators, understandably, wanted help at reasonable terms were demands by the Mexican officials want ing to safeguard their nationals,

The lastest accomplishment of Rubottom, who holds the title of Director of the Office of Middle American Affairs, was the negotiation of the U. S.-Venezuela Trade Agreement,

Designed to stimulate Western Hemisphere trade, it becomes effective Oct. 11 and author-

WASHINGTON, (P)-Roy Richard Rubot- izes a sharp reduction in oil imported into this country. In return, agreement is reached

> Under the new agreement, there is a 512 cent-per-barrel duty on oil with an API (American Petroleum Institute) rating of less than 25 degress and 10 % cents on crude with higher

The old rate has been 1012 cents on all imports amounting to less than 5 per cent of the total U.S. crude production, and 21 cents on imports exceeding that amount,

The agreement has come in for sharp criticism from the Independent Petroleum Association of America (IPPA), which contends large importing companies will rocket the savings and thus be given an unfair advantage over U. S. producers.

Rubottom knows something of the petroleum industry's problems first hand. He was salesman for an oil company from 1935 to 1937. Following discharge from the Navy, he served as vice president of the State National Bank of Corsicana in 1946 and 1947.

Appointed a Foreign Service Officer in and with as little red tape as possible. There 1947, He served as second secretary and consulat Bogota, Columbia, until assigned to the State Department here in 1949, He was put in charge of Mexican Affairs in 1950,

The Rubottoms live with their two children-Eleanor Ann. S. and Frank Richards, 6. in Suburban Silver Spring, Md., where he mows his lawn weekends and does other odd jobs about the place.

ROGER W. BABSON WRITES THIS WEEK

Three-Fourths Of Surface Is Undiscovered World Of Riches, Sea Offers Opportunities

week in Gloucester, for this summer season, let me speak of the wealth of the sea. So many pessimistic articles are being written as to the waste of our land resources, let me call attention to the fact that three quarters of the earth's surface-namely, the oceansare an undiscovered world of riches. The sea offers great opportunities to students, wageworkers and investors. Owing to good harbors and other advantages, I believe Gloucester, Newburyport and other seaports have a great

Minerals In The Ocean

Today there are few plants taking magnesium, iodine and bromine from the sea; but these are only a few of the available minerals. In addition, there are great quantities of aluminum, boron, calcium, chlorine, copper, fluorine, lithium, potassium, selinium sulphur and zinc, not to mention sodium chloride. There is even gold! The sea contains enough of these minerals to last a thousand years and I visualize these seaports becoming great cemnters of these new industries.

When I was a boy, the cod, haddock and mackerel business was at its height, while rosefish (now known as ocean perch) was thrown away. To illustrate how times change, the catching, filleting and freezing of ocean perch is now Gloucester's leading industry. Gloucester, however, is handicapped by the fish moving out further from the coast, They may later be attracted back by artificial lighting or the use of fertilizers.

New Kinds Of Fish

The next great development will be the catching and processing of "waste fish", such as pogies, squid, skate, etc. These are now used for fish oil and chicken food, but they have excellent nutritional qualities. Later we will be gathering, processing and canning planktonic organisms. This industry has a great future. Seaweed product will also be processed and

The sea is very rich, due to the drainage accumulations from the land for millions of years; but it is now rapidly increasing in food

GLOUCESTER, Mass. As this is my last values While the farms of the West are gradually getting poorer through erosion and culfivation, the sea is constantly becoming richer. Every rain throughout the great agricultural West washes minerals, vitamins and other food products from the soil into the rivers and finally into the sea. A large portion of fertilizer being put on the soils finally goes into the ocean, while the rich sewrage of our large cities is mamking the sea a great storehouse. for future foods. Readers who are interested in these new possibilities should talk with Dr. Henry B. Bigelow of the Oceanographic Institution at Woods Hole, Massachusetts, or the Scripts Institution at La Jolla. California.

Lessons Of History

During the early days of Gloucester, the chief industry was the cutting of timber, the sawing of boards, and the building of small vessels. Most of Massachusetts was then heavily wooded. By 1800 the timber of Cape Ann had largely been cut and shipbuilding moved to Essex. The next industry was the granite industry. Most of the Federal buildings of Boston. New York, Philadelphia and other large cities were built of Cape Ann granite. The "waste" was made into paving stones, which paved the streets of these cities. But concrete and asphalt came along and killed the granite busi-

Athough the fishing business had always existed in a small way, yet it was not fully developed until the granite business began to peter out. Later came the "summer people." Unfortunately, due (1) to the fish changing their habits of abode, (2) to unreasonable labor demands, and (3) in increasing foreign importations, the fishing business, as now conducted. may be on the decline. But I am not worried as to the future. I believe that with the establishment of the new School for Fisheries the wealth of the sea will continue to make Gloucester and other seaports prosperous. Instead of filleting plants, Gloucester will have chemical works, pharmaceutical factories and will can the small planktonic organisms heretofore neg-

Getting Out On The Limb

by EDDIE the editor

SUDDEN THOUGHT: The best way to be satisfied with your lot is to build a house on it.

Levi Noble, the restaurant man,

passed along a bit of good listening the other day when he told me about how nice the Floydada football team and rooters were the other night when they stopped in at his popular eating place after blasting the tar out of our Antelopes on the football field. Levi said that in all his years of serving the public he had never had the pleasure of catering to such fine folk as were the Floydada delegation . . of which made me feel good, too. I will always remember the time way back in 1927 or '28, when Post ran a special train to Floydada. When we arrived there the whole town was at the station to greet us and transport us to and from the game. They beat the whey out of us again that year, but they sure were nice in doing it. We all talked about that bang-up good game for years, and how nice the folk were to . . I like those Floyd coun-

THE WOMEN, God Love 'Em-Woman driver explaining auto crash to traffic cop: " then I very clearly signaled that I'd changed my mind."

Since I've quit smoking, I have read such horrible things about the bad effects caused by smoking. I think I'll just give up

Wendell Huddleston, the cub reporter down here on the Dispatch, came back from an executive meeting of the P-TA out at Ryla Lott's the other day with a note-book crammed full of figures and a muddled head over what can be done to take care of the increased enrollment which continues to pile up each year in Post schools.

The boy with the note book pointed out to me that since 1944 our school enrollment has been on a steady climb. He gave me figures he picked up from Superintendent D. C. Arthur which showed that in 1944 there were 639 enrolled, while in 1950 the record high figure stood at 1026. This year's enrollment, I believe read in last week's Dispatch, s 960 odd, the odd being those little boys who pick a fight with my dog every day at noon when they pass my house.

Wendell said that he got it from the Superintendent that according to some sort of a government estimate, Gallop poll, or some other authentic source, the Post school enrollment within the next eight years will increase to between 1300 and 1400 kids, which makes all of us wonder where we will put all the youngsters. now that all the closets have desks in them taking care of this year's overflow.

The professor went on to explain to our scribe that classes. are being shifted now, so that one group of kids is outside the building at all times, so that sufficient breathing space is provided for those who remain in the buildings, and that plans had not been made to provide building a lean-to to take care of the "outsiders" during rainy, weather should it ever rain again. Classes are being held in the auditorium and the fine library has been cleared of books to make room for additional classes. Library material is now scattered around the study hall and unity is hard to achieve. I hear

I'm told that the high school is so crowded that state minimum requirements can't be met. The school has a faculty capable of teaching subjects needed, but not enough space is available.

Now it seemed to be the consensus of opinion among those attending the P-TA chatter session that a junior high school building will not be needed in eight years from now, when there are 1400 kids in our schools, for the simple reason that it is needed now to adequately take care of the 960 students we now have.

Our reporter said that somebody said that a complete physical education program was needed and, somebody else said that manual arts must be added to keep kids busy with something to do with their hands so that they wouldn't be using their tongues so much, because only "head work" courses caused too many kids to drop out of school; and somebody else opined that we had some of the finest teachers available and must increase facilities to hold them . cause teachers had to be happy; and another piped up with the thought that the public must rea-

lize the need for the present and also the need for the future and the Post system must add more courses for students to succeed in higher education and that courses cannot be added if space is not provided.

And there were three other lines at the bottom of his notes that even he could not make out anyway I get the general idea that something has to be done about our schools.

We have problems!

Our Contemporaries Are Saying:

Weather Not To Blame

You can't blame it on the weather! In 84 per cent of the 32,500 fatal motor vehicle accidents last year, the weather was clear or merly cloudy. It was rainy snowy or foggy in only one out of six fatal accidents, According to statistics, rain was the condition reported most frequently under bad weather conditions. Unfavorable weather conditions were reported more frequently for all accidents (including property damage only) than for fatal accidents. Rainy, snowy or foggy weather was reported for 21 per cent of all accidents and clear or cloudy weather for 79 per cent, -Colorado City Record

C-L-I-N-T, Texas

Have you heard that super high pressure salesman who sells hair tonic, reducing candy and vitamin pills over the radio? Never have found out who he is, but he is the glibbest, most convincing spieler you ever heard. It is actually a little frightening to listen to him, for he is absolutely logical in all he says, and yet there is no logic in the final analysis of his spiel. He's a spellhinder Sort of a huckster-hitler type. Next time you hear that compelling voice that can hold you spellbound for a solid halfhour, that's the man we mean. Mostly over those borberline radio stations just in Mexico. Those Mexican stations usually devote part of their air time to Mexican music and Spanish annoucements, but the most of it is given over to selling quacks and nostrums, old time religion, and books on how to play a mouth organ in three easy lessons, all intermingled with the ubiquitous hill-billy music. Whenever the listener is urged to take advantage of some outlandish offer, he is asked to send his name and address on a post card to Clint, Texas. Now Clint is in El Paso county, and the Texas Almanac says it has a population of 250, and there are 20 business firms there. Most of them reading postcards.

-The Littlefield County Wide

. . . Some Outlook

Sligo Swiggins says: "Well sir, between the elections and hot weather there's enough trouble to drive folks plumb batty. One fellow I know who hadn't kissed his wife in years shot another feller who did. Everybody is yelling about their lawns, grass and flowers burning up. Then they git out there in the evening and water the stuff like it was worth a fortune and just as soon as it starts growing good they go to cussing again about having to mow the stuff. It don't make sense. One feller told me his garden done pretty good though. Some of his potatoes were as big as marbles and some was as big as peas. Course, he got a few small ones, too, I reckon most hot summers are too long, but I can tell you right now the way to have a short summer is to have a note coming due in the fall." -The Kaufman Herald

Talking Back To The CO.

We never heard of a sergeant who nursed the idea of marrying his commanding officer. Switching command like that doesn't make Army sense at all, but that's just what happened to Mitchell Nayfa, who is opening The Hub here next week. Nayfa spent four years in the Army Medical Corps. Like all soldiers, T/Sgt. Nayfa had a commanding officer, But unlike soldiers, T/Sgt. Nayfa fell in love with his. In fact, he married the CO, and they are living happily hereafter. The

You, Too, Can Have Health...

What is health? Why, you say, Health is a state of wellbeing. True enough, but lets dig deeper than that, Why are some people-you yourself-perhaps-so often tired and despondent; fatigued by the least effort; never able to find joy in your daily work, or to get a thrill out of living? For tunately chiropractic has the answer to that question. The secret of getting well lies in maintaining NORMAL NERVE

Nature wants you to be well. It is her plan that all human beings should enjoy life to its fullest measure, And so, if you would find health seek it along nature's road, Consult nature's helper, the modern chiropractor. Let him get at and correct the cause of your disease. The healing power of nature will do the rest. You can be well again!

Morrison Chiropractic Clinic

"YOUR HEALTH FIRST"

Yes, you could actually pull up an easy chair in front of the washer, for once the clothes are in your automatic washer, the rest of the work is simply a matter of pushing a switch. There's no backbreak, no bend, no wringing or rinsing - your automatic washer handles all those tasks.

Let Reddy make washday as simple as sittle g in an easy chair. Buy your automatic clothes washer now and you, too, will say - "What a way to wash clothes."

Organization Of Four Brownie Court Troops Planned For Post Miss Outlaw and Stephen Boone COUNT TOOPS Flatified FOT FOST A group of mothers of second, ed to 16 girls there may be a Married In Saturday Ceremony

In a double ring service read at 8 o'clock Saturday evening, in the First Methodist church, Miss Alma Louise Outlaw, daughter of came the bride of Stephen A. Boone, jr., son of Mr. and Mrs. Stephen A, Boone of Snyder.

Mrs. Glenn Norman, organist, "Ah, Sweet Mystery Of

The Rev. Joe E. Boyd, pastor, read the ceremony. Vows were exchanged before an altar decorated with arrangements of yellow gladioli tied with blue ribbon, foliage and white tapers in candelabra. The pews were marked with white tapers and matching satin ribbon.

Miss Joyce Evans and Miss Mary Jane Barr of Grapevine were candle lighters, Miss Evans wore a pink formal and Miss Barr was dressed in blue, They wore yellow wrist corsages tied with blue ribbon.

Bride Wears White

Given in marriage by her father, the bride wore a ballerina length gown of white Duchess satin and nylon tulle. It was fashioned with a sheer dropshouldered yoke outlined with satin applique, fitted satin bodice, long sleeves, a deep pointed front waistline and an immense skirt of nylon tulle. The skirt had claborate appliqued satin extending below the hipline. The bride's fingertip illusion veil was attached to a tiara of nylon and net. She carried an orchid tied with white velvet ribbon and loops, surrounded by a garland of stepha-

Mrs. Joe W. Evans was her sister's matron of honor, She was attired in a strapless ballerina dress of blue taffeta, with net overskirt and matching stole. She carried a cascade arrangement of blue chrysthemums tied with yelow ribbon.

Bridesmaids were Miss Grace June Marshall and Miss Billie Ford of Dallas, They were yellow net and taffeta frocks fashioned like that of the matron's. Their oouquets were yellow mums and

EARL ROGERS' FEED STORE

FREE IN THE MERCHANTS BLDG. DAILY "MILES PER GALLON" is something everyone talks about—and Buick owners take pride in telling us that they're doing OK on On The Midway

this score. But the kind of miles is important too. The real pay-off you get when you own a Buick is in what happens while you're turning gas into power.

Every drop of gas sets off a tiny tornado of compacted energy in Buick's Fireball 8

You swoop from a standing start to any speed the law or good sense permits with effortless smoothness, thanks to Dynaflow Drive.*

You soar over the road with magnificent levelness-buoyed by big soft coil springs on every wheel-coddled by a dozen other features which make up Buick's million dollar ride.

The ear holds direction like an airliner on the beam. You snug into turns with sure-footed

poise - ease your grip on the steering wheel and feel the car seek a straight course again like a compass points to the pole.

This is travel as you've always hoped to find it-relaxed, carefree, luxurious, happy-while you leave the miles behind.

Yes indeed - life's different in a Buick. How different you should find out firsthand.

How about letting us give you a sample-any day you say?

Equipment, accersories, trim and models are subject to change without notice. *Standard on Roadmaster, optional at extra cost on other Series.
