NUMBER 38

farmer who diversifies his crops to worry about his bank

## Of Talk About Road Bond Issue

14.—During the past few weeks there has been quite a bit of talk about the petition which is being circulated in Lynn County calling for a road bond election. Some members of the Commission and others have had the impression that the petition was being sponsored by the Chamber of Commerce, but the Secretary of the Chamber of Commerce has attended the meeting of the Organization of the first of March of this year, and in the matter of a road bond or of highways in Lynn County has been discussed in a meeting of the Chamber of Commerce.

It is not given credit for what it does at other times it gets credit for the information it does not know what action, if any, is being taken by the Chamber of Commerce will take on the subject so far they have not even discussed it.

R. C. Williams, Secretary.

## Peas Important In Enriching Lighter Soil

Station.—In many sections, particularly where lighter soil, crop yields are very much and profitably increased by peas for turning under hundreds of demonstrations are being made. In general farming this practice is usually returning to the land, time by time, the peas are exclusively planted in the summer. In such regions they are drilled in between the corn in the crop is knee high, or in the third row in the two-skip-one plan, or sowed after what as a catch crop, peas are often used to graze the stock after the corn or grain crop is gathered, with profit to the stock and the land.

Two-row-and-skip-one method in the wide row," explained Miller, agronomist in the State Service, "is being widely practiced in many parts of Texas. Every third row is left open. Green sorghums are drilled in the season if moisture is abundant. In other sections, cowpeas are planted in open rows. Demonstrations are being made in other counties of the State to larger yields the year after this practice.

in Texas, on the other hand, peas are most favored for planting with corn, although soy beans are also widely planted. In this practice, Franklin county is among those using peas very successfully in this practice during the entire corn and bean crop in the fall.

growing of cowpeas exclusively on the land for the sole purpose of using it is used most extensively in South Texas where increasing prevalence in certain sections. This system was almost first established in Dimmit several years ago following a recent demonstration which showed that old onion land planted during the summer boost yields the next year. In county the practice is coming to the front, with 1800 harvested last year. W. R. Harsted 93 sacks of Irish from old cowpea land this year only 8 sacks on old corn says it paid, for he made more acre more on the enrich-

## SELLS BASKETS

day of last week members of the best busy selling baskets and other novelties made by themselves. We were glad to have taken some of the baskets and have obtained great results. They will more than pay for themselves in a few days. Watch for the new articles for sale with the help of your moral and help you will enjoy the day.

## O'Donnell Nine Cops Another Victory Sun.

The A-Bar baseball team of Lamesa came up Sunday afternoon for an engagement with the local nine and suffered defeat to the tune of 18 to 8. The feature of the game was the heavy hitting of Roy Lines who in five trips to the plate batted out three home runs and one single. His other trip he was thrown out, short to first. Left Young worked on the mound for the locals and turned in a nice game.

## Summer Boy Scout Camp at Post, Texas

The fourth annual Boy Scout summer camp will be held at Camp Post, Post, Texas, in two periods, July 1st to 10th and July 10th to 19th. From all prospects this will be the biggest and best Scout Camp ever held in the South Plains and an attendance of 200 Scouts is anticipated.

This camp will hold to the strict requirements laid down by the National Camping Department, Boy Scouts of America, as to health and safety of the Scouts and every known precaution will be taken to safeguard the boys.

Every boy will be taught to swim and given every opportunity to pass Scout tests and the Red Cross Life Saving test. Boys will also be given the opportunity to make their own bows and arrows, firebuilding sets, bead work and leather work projects. A regular camp program will be followed every day including drill, scout work, swimming, life saving, hikes, games, camp fire programs, and three big meals.

The camp will be ably supervised with one adult leader for every ten Scouts. H. B. Yates who had charge of the 1927 camp will be the camp director. L. G. H. Williams, Council President, and K. N. Clapp, Scout Commissioner, and many of the Scoutmasters will be on the camp all of the time. The camp has telephone connections with Post, Texas.

The camp fee will be \$10.00 for the ten day period. Scouts are urged to make applications through their Scoutmasters or direct to Scout Headquarters, Lubbock, Texas.

## Modern Dry Cleaners Opened Last Monday

Our new tailoring establishment the Modern Dry Cleaners, opened for business Monday morning. While we have always had splendid service from our facilities, there is ample business to justify two tailor shops. Messrs Noel Sikes and Ralph Beach, both well-known to O'Donnell people, are partners in the concern, and promise to give satisfaction to everybody.

They plan to make a specialty of ladies' work and have special equipment for this class of tailoring. A small cleaning machine with a special motor will be devoted exclusively to light dresses and other ladies' wear. Other equipment in the shop is equal to this.

The new firm plans no reduction in prices or any other schemes to draw trade, feeling that such tactics would not be for the best interests of their business, and ask a portion of the tailoring business. Their phone number is 31, and they are located in the Warren building. Give the boys a trial.

## G. S. Dowell, Accepts Position Secy. C. of C.

Mr. G. S. Dowell, the recently elected secretary of the O'Donnell Chapter of Commerce, and wife of Quintanque, were in the city yesterday for the purpose of catching a train to move week, making arrangements to move the family to here. They are expected to return today (Thursday) and will occupy the B. J. Boyd residence temporarily.

Mr. Dowell will begin his new duties as full time secretary next Saturday. There is plenty of work here for the new secretary and the business men are 100 per cent behind him which will doubt bring telling results. Mr. Dowell is practically a stranger to the people of this territory but comes here with a splendid recommendation. He will probably have something to say to the readers of the Index in our next issue.

## O'Donnell Gets Another New Business

Work will begin on another new business building first of next week which will be 25x100 feet.

The new building will be erected adjoining the Singleton Hardware Co., on the west, and will be built by that progressive firm. It will be an exact duplication of the two buildings now occupied by Singleton Hdw. and Johnson Barber Shop and the Postoffice. Work will be started first of next week and will be rushed the building ready for occupancy by as rapidly as possible in order to have the middle of August according to a statement by Hal Singleton, Sr.

The new building when completed will be occupied by Mr. L. D. Tucker, of Roswell, New Mexico, a former business man of O'Donnell. Mr. Tucker is now closing out his business at Roswell and will probably by in O'Donnell some time next week to complete final arrangements preparatory to moving to this city.

According to information given the Index this week, Mr. Tucker expects to move his family back to O'Donnell where he will make his headquarters in the future. He owns considerable property in O'Donnell and surrounding territory and will make O'Donnell the center of his business activities. As soon as the new building is completed he will open a first class dry goods store, which will no doubt be a valuable asset to the business life of this city.

Mr. Tucker and family have a host of friends here who will join in extending him a hearty welcome upon their return to O'Donnell.

Rev. and Mrs. Joe Wilson, accompanied by Mrs. R. O. Stark, went to Plainview Monday afternoon. They will spend several days with relatives there.

## Local Fire Boys Attending Convention

Local delegates to the State Fireman's Convention to be held in Galveston on June 11-12-13, left Sunday morning for that city. Those in the party were Chief Clyde Ash, Cecil Hubbard, R. C. and Cliff Willis, Ollie Harris, Cass Minton, Fire Marshal, J. D. Fairley. Grady Gant accompanied the boys as far as Post where they caught the train for the convention city.

No doubt the boys will have much to say about the beauty and hospitality of Galveston, as a bathing beauty parade of young ladies from all over the world was staged during their visit. The boys are expected to have one of the most enjoyable times, since firemen's conventions have been held in the state, judging from the enthusiasm displayed as the train pulled out of Post, according to Mr. Grady Gant's opinion.

## Old Maids on the Trail Better Look Out, Men

You have laughed and you have chuckled at shows, but the funniest one you ever saw is due to be put on within the next few days by the Womans Missionary Society of the Methodist church. The Old Maids' Club, an organization with the purpose of catching a husband for each member, holds its first meeting for your entertainment. The characters have been temporarily selected, but some changes may be made, and will be composed of such ladies as Mrs. J. P. Bowlin, Mrs. Mack Garner, Mrs. Boss Johnson, Mrs. D. M. Estes, Mrs. J. W. Gates and others.

The date has not been definitely set, but will be announced later. Remember to save up lots of good breath, because you'll need it for laughing.

## W. H. ELLIS BACK AT OLD JOB AS OPERATOR

W. H. Ellis, former operator at the Santa Fe Station, who for the past few months has been operating at Tulla and Lubbock, arrived Sunday afternoon and again back on his former job. He states that his coming back is permanent and his many friends will rejoice to learn that he is back to stay.

Mrs. Grady Gant and children left Friday for Mineral Wells, for a two weeks visit with her parents.

## Chevrolet Breaks Record in Car Production

DETROIT, June 10.—May was the biggest month in the history of the Chevrolet Motor Company. Production for the month totaled 161,214 cars and trucks, breaking all records.

Under pressure of the greatest demand in Chevrolet history, its 16 giant factories in May experienced the busiest period the company has ever enjoyed. Factory wheels turned with all the speed consistent with Chevrolet's precision manufacturing methods to accommodate the demand for cars that poured in from Maine to California and from Washington to Florida.

May was the third consecutive month to set a new all-time monthly production mark. It far surpassed the March record of 147,273 units, and topped the April achievement of 157,522 units.

To accomplish this record performance Chevrolet plants averaged 7,000 cars and trucks daily; an average of 777 cars and trucks were built every hour; an average of 13 every minute—and one was built every 4.6 seconds!

From present indications the same relatively high level of production will be maintained in June to keep pace with the demand, which officials report, continues unabated. Dealer stocks are still below normal due to the necessity of filling orders as fast as cars are received. Unfilled orders are over 300 per cent ahead of this same period last year. It was announced definitely that June production would break all records for the month.

The sixteen plants that contributed to the record May performance are located in the following cities: Detroit, Flint, Mich., Bay City, Mich., Saginaw, Mich., Toledo, Ohio, Atlanta, Ga., Buffalo, N. Y., Tarryton, N. Y., Norwood, O., Kansas City, Mo., St. Louis, Mo., Janesville, Wisc., and Oakland, Cal.

## Methodist Church Nearing Completion

The remodeling of the Methodist church, which will bring the local church up in the class of modern churches, is progressing rapidly. A story in another part of the paper tells how the classes took their Sunday school rooms last Sunday, with the other classes to follow next Sunday, and the remainder of the building is just as up-to-date as the Sunday School department.

The main auditorium will be considerably larger, the Methodists being optimistic folk, with a beautiful altar and choir loft. Memorial windows of Florentine glass will be in the auditorium and the class rooms, many of the classes donating windows for their room. Celotex is being used for the ceiling, and the beamed effect is very attractive. New light fixtures will add much to the beauty of the interior also. A porch on the front and stucco for the exterior will lend charm to the building. The church will not be in a class with city churches, the little home town church will compare more than favorably with the churches of towns of similar size.

## Real Summer Weather Is Felt Here This Week

Real summer weather, the kind that makes you long for the mountain breezes or the cool, clear running waters of Texas' best fishing streams, has been in evidence here the past few days. Old Sol has been bearing down, giving the folks here some of the warmest weather of the season. It followed on the heels of the recent rains and is just what the farmers of the South Plains are looking for, so they state. Cotton and feed is growing by leaps and bounds. Planting season is about over with a good stand over most of the territory. Prospects are very flattering for a bountiful harvest this fall.

TRES VUNCANIZED at Foster's.

## Hogs Are Voted Out in Tuesday's Election

Very little interest was manifested in the city election held Tuesday of this week as was indicated by the light vote polled. The total votes polled was 106, 67 of which were in favor of putting the hogs out of town, while 39 voted to keep them in the city limits.

The results of Tuesday's election indicate a majority of the people want to keep O'Donnell clean so far as hog pens are concerned. The majority was almost two to one.

## Junior M. S. Discusses Camp Plans

The Junior Missionary Society of the Methodist Church met last Wednesday at the home of Kathryn Vealey.

Stories by some of the members formed the set program, but most of the afternoon was devoted to a business meeting during which plans for going to the summer camp were discussed, as well as the proposition of buying one of the memorial windows for the new church. A large number of the members were present, but the meeting was hastily terminated by the approach of the cloud.

## Auto Races at Abilene July 4th is Big Event

ABILENE, Texas, June 10.—The feature of the Automobile Race program to be held on the West Texas Fair Speedway in this city on Independence day, July 4, will be a 15 mile event in which a guaranteed purse of \$650 will be given the winner, and smaller amounts to the next three to finish.

There will be four other competitive events on the card in addition to the time trials which will start at 1:30 p. m. The fair association is putting up a total of \$2,500 as prizes for the various winners and will in addition divide a percent of the receipts among the contestants.

The race meet here on Independence Day will be conducted under the sanction of the contest board of the American Automobile Association. D. H. Jeffers, veteran race official will have charge of the program as official AAA representative and starter.

In order for drivers and cars to enter this race, very stringent regulations must be met, Jefferys says, seeing all the contestants trying to win. There will be no piece-up machines or inexperienced pilots allowed on the track.

Each of the five races will start eight cars. The first contest on the program will be for ten laps of the five-eighths mile dirt track. This will be open to the eight cars making the fastest time in the time trials will pay \$250 to the winner.

In the second event, also a ten-lap grind, the cars winning the first three places in the first race will be cut out and the next eight high cars in the qualifying round will be started. First money will be \$175.

The other two events will be five mile races.

The entry list for the Independence Day class is open and a large number of starters is expected.

## Picnic Saturday Night Enjoyed by Guests

A number of the very young set were hosts, guests and otherwise the big noises at an informal (decidedly informal) picnic last Saturday evening.

Chaperoned by Mr. and Mrs. Harvey Jordan, the youngsters drove out a few miles on the Tahoka Highway and spread a beautiful picnic lunch of sandwiches, wienies, buns, cakes, fruit and marshmallows, with lemonade the liquid refreshment. Games and stories were part of the active phase of the evening, with attention to the cats taking up the rest of the time. Those present were Misses Alice Joy Bowlin, Wynona Huff, Lois Nelson, Kathryn Vealey, Messrs Bill Bob Shumake, Curtis McMillan, Wilbur Shumake, and Mr. and Mrs. Harvey Jordan.

James Millwee spent the week-end with his mother, Mrs. Belle Knight and sister, Miss Christine Millwee.

## O'Donnell Needs A Public Play Ground

(An Editorial)  
That O'Donnell needs a park or play grounds, is more evident since the closing of school.

A public play grounds with swimming pool, gymnasium and other forms of amusement would furnish the coming generation with plenty of amusement that would keep them from committing petty misdemeanors. The city authorities are forever confronted with the problem of what to do with the younger set. Daily complaints are made to the city dads that children are doing this and that which is a violation of city and state laws. Such petty misdemeanors will continue and in all probability will increase unless they are furnished some form of amusement or a suitable place to spend their idle hours. The problem of what to do with the mischievous lads of the city has been discussed both pro and con, but as yet no solution has been found.

The editor in conversation with City Marshal D. H. McDaniel, was asked what has been thought of a park or play ground for the children of O'Donnell, which of course would have to be under the supervision of a caretaker employed by the city. Our opinion is, that it would be one of the greatest movements that could be made at this time towards eliminating the numerous complaints that are made to the city officials daily regarding law violations by the mischievous lads of town.

Youth is full of energy that must be spent in one way or another, and if they are not furnished some form of amusement that is healthful and legitimate, then they will seek their own means of pastime which in most cases is not what you would like for your boy or girl to do. Anyhow, there is food for thought.

If you know of a better solution than the above to cope with the present situation, then present it to the city authorities.

## Chinese Red Cowpeas Successfully Grown

Chinese red cowpeas, used extensively in South Texas as a dairy feed, have been successfully grown for 3 years by R. I. Rains who lives 19 miles east of O'Donnell in the edge of Borden County. The first year he got a yield of two tons on one acre planted in late May and harvested in August. The fact that this variety of cowpea is upright in growth and has few runners makes it possible to cut it for hay, and as a dairy feed Mrs. Raine says it is a wonder.

Last year Mr. Rains planted these peas down every third row of maize and after the maize was harvested in the fall stock grazed the field and then peas and stalks were plowed under. "You can sure tell the difference where this peas were," he declared the other day. This year he has planted two and three fourths acres in rows for row feeding and is drilling peas down every third row of maize on his entire crop.

"I believe Chinese red cowpeas offer a mighty good prospect for a good dairy feed in this country," J. R. Burkett of O'Donnell stated the other day in telling the county agent his experiences with this crop. Last year he planted a small patch in three foot rows and let the cows graze it for lack of facilities for cutting and curing it for hay. The cows liked it and gave more milk while grazing there. This year he has drilled these peas in with Sudan grass and the joint crop is up to a good stand.

Chinese red cowpeas, according to R. E. Shaver, are a drought resistant pea improved years ago by the Texas State Department of Agriculture and developed by Texas Experiment Stations. They were found by Kieberg county dairy demonstrators a few years ago to be an excellent legume hay crop for dairy cows and that county is said to be growing them extensively now. They mature in about 65 days and are easily handled for hay. They have not been recommended for this section, but where tried they seem to have done well and are worth watching.

G. Glen of Big Springs was a visitor in the homes of R. O. Miles and F. O. Allen over the week-end. Mrs. F. O. Allen and Mrs. R. O. Miles and children accompanied him home for a week's visit.

**To Get Strong Pigs, Balance Sow's Ration**

College Station—"The feed a sow gets during the gestation period has lots to do with the strength and size of pigs at birth," K. R. Eudaly, Swine Specialist in the Extension Service, says. "This has been repeatedly shown experimentally, and it is also a fact often observed on farms."  
"Take Edwin Deaver, a club boy in Lamb county, for instance. He fed his gilt protein supplement and grain during her pregnancy. Another boy in the same club fed his gilt only slop and corn. Both gils farrowed the same day this spring, but Edwin got nine strong, healthy pigs without losing a one, while the other lad got eight weak, runty pigs from his gilt. Four died from lack of vitality the first day. The gils were much alike and had the same attention except for feed."

"A pregnant sow should be given freedom to exercise and have a green pasture or Sudan or other good grass or legume crop to graze. There should be plenty of fresh water and shade provided in the summer, and her ration should be balanced. A good way is to feed her one pound of protein supplement a day together with a few ears of corn or heads of grain sorghum."

**Congressman Jones Speaks Over Radio**

The purpose of the debarment plan is to make the tariff effective on products of the farm and ranch, just as it is now effective on manufactured articles. It would do this by taking a part of the money collected on foreign goods brought into this country and with that fund pay an export premium on surplus crops shipped out of this country.  
Its immediate effect would be to increase the price of all wheat in America 20 cents per bushel, which would mean millions by way of increased prices to the wheat growers of the United States. It would mean millions in increased prices to the cotton growers of the South.  
This has been the effect in every country that has tried it. The whole domestic price level of the commodity immediately rises the amount of

Tonsor Barber Shop  
NAYMON EVERETT, Prop.

the debarment.  
As an independent proposition no one would advocate it. But as a part of a system no one can deny its logic and justice. It is merely restoring to the surplus farmer what is now taken away from him by force of law in the form of increased prices on tariff laden articles.  
Let any farmer compare the prices he now pays for his farm wagon, his tools, his clothing, his furniture and his supplies generally with the prices he paid for the same commodities in 1914. Much of this increase in the price of the supplies which he must use is due to the tariff system.

The railway rate on steel from Chicago to San Francisco when intended for export is 40 cents per hundred. When intended for domestic use the rate is \$1.00 per hundred. This difference is a direct export bounty on steel for the purpose of stimulating world trade. Just why is an export premium on steel sound and an export premium on wheat and cotton unsound? Just why is one a subsidy and the other good business? What peculiar charm is there about steel? Is it somebody's pet? Understand, I do not say that an export premium on steel in the form of reduced rates as a stimulus to trade is unwise. The rate structure of this country is a tremendously intricate one. But, if it is justified on steel, why is it not justified on cotton or wheat?

The farm problem is the nation's problem. For years we have through chambers of commerce, through the trade journals, through booster talks, encouraged the building of cities. But important as this is, we may become over-industrialized. We cannot crowd all our population into the smoke laden cities. Our great surplus crops constitute our raw material supply and margin of safety. Without them our smoketacks would rust in idleness. The one cannot permanently prosper without the other.

Other speakers were Secretary of Agriculture Arthur M. Hyde, Senator Capper of Kansas, and L. J. Taber of the National Grange.

**J. D. BOREN NOW PASTOR OF CHURCH OF CHRIST, LAMESA**  
LAMESA—J. D. Boren, former a pastor of the Church of Christ at Big Springs, for the past three years, has accepted the work

at the Church of Christ at Lamesa. He succeeded J. T. Barr, who is now pastor of the Church of Christ at Midland, Texas.

Messrs Tom Brewer, Vernon Martin and J. P. Aylor attended a meeting of the directors of the Lynn County Fair held in Tahoka, Monday night. Plans for a bigger and better fair was discussed. That should remind us that so far practically nothing has been done toward O'Donnell's Community Fair. The matter should be taken up as soon as possible. The first attempt at a Community Fair last fall make a splendid showing considering the time spent in preparation for the same. Some who visited the booths and exhibited at the O'Donnell Fair last fall pronounced it as good as some of the County Fairs. It can be made better than some of the county fairs this fall if a little time and energy is spent preparing for it. Why put it off?

### Field Was Host to Letter Carriers

June 14.—Our neighboring field was host to the Letter Carriers and Postal Workers of the 18th Congress on the 30th of last month. This was the first meeting of the organization having been held during the past few days business session was morning session being held at Theatre and the afternoon in the District Court. Brownfield Chamber of Commerce and the local American were host to the Postal during the day. The boys of Terry County served lunch for the Chamber of Commerce while the American League entertained the visitors and enough to stay over night of the War Trophy received by that post.

The Office force and the Chamber of Commerce of Tahoka to extend an invitation to the organization to meet in our city in a graciously accepted invitation over the invitation of Littlefield.

Attending the meeting from here: Messrs D. A. Park, M. Reid, M. O. Canady, J. W. E. Suddarth, who program and Robert J. Post office, Judge G. C. Williams and G. H. Chairman of the Convention of the Chamber of Com-

To him there is no fate. Because his youth is willing, And his heart is thrilling.

We watch him as he grows How the fates he o'er throws; How the child grows to manhood; How he came—is understood.

As through the dark of night The unknown bird takes flight, And leaps into the place Without a sign of chase.

When his life is ending, All things together blending, He ponders o'er his past, Whence he came so fast.

"When I was but a boy, Dreaming was my greatest joy, Now it has all come true, Because I made it be true."

Ah, the beloved dreamer! He makes life glow and glisten, How sweet to be "dubed" dreamer, If you make the world listen.

—Foy Heathington.

### ABILENE BLAST VICTIMS RELATIVES OF LOCAL PEOPLE

Mr. and Mrs. Gene Lawler, of Abilene, who with their one-year old daughter Doris were killed last week when gas exploded in an apartment which they were inspecting, were cousins of C. O. Lawler of this place. Mr. Lawler was unable to tell us more than the bare details noted in

the Abilene papers, but that little is enough to send a thrill of horror through every reader.

The young couple and their baby went into the apartment just after dusk with the idea of renting the place. The father struck a match in the kitchen so that they might see, and escaping gas exploded, hurling the baby from her mother's arms through a window. The baby died in less than two hours, the father followed her the next day, and the young mother died almost twenty-four hours after the tragedy, the last hours of her life spent in calling for her husband and baby.

After funeral services at Abilene, the bodies were taken to Dallas their former home, for interment.

Mr. and Mrs. M. J. Whitsett left Tuesday for a three weeks vacation to be spent touring South Texas. They will be in Fort Worth the latter part of next week where they will

### Model "A" Ford Wins War Emergency Prize

Under conditions more difficult than those which confronted Jeffere's immotral "taxicab army" in its frantic dash to the Marne in 1914, Model A Fords swept to victory in a specially arranged contest based on war emergencies staged by the military first aid section of the General Finnish Automobile Association.

Competing against fourteen different makes of automobiles manufactured in the United States and one Italian-made car, the sturdy Fords captured 18 out of 29 prizes. Ten of the fourteen "honor prizes" went to the Fords. Every Ford which entered the contest finished the 400 kilometer route. One was driven by a woman.

The purpose of the Finnish Automobile Association is to promote all-around driving training of its members in order that they may be able to take an active part in war maneuvers in a sudden emergency. Drivers received instructions regarding the route, parking places, and average speed required two minutes before the start of the race. No restrictions were placed on the size of the car or cylinder volume, which brought the Fords into competition with the more expensive and larger cars.

The race started from Helsingfors, and the cars were started at intervals of a few minutes in different directions. "Control Stations" were located at various points along the course to check the speed and other requirements. Reports of the outcome of the competition have just been received in this country.

### Crop Indications Are Reported Very Good

Dallas, June 10.—Indications of another unusual year for Texas crops especially cotton, appear in the May report of crop conditions compiled by the Department of Public Relations of the Southland Life Insurance Company.

Although certain Western and Panhandle counties report generally improved conditions, rains over North, East, Central and South Central Texas have seriously retarded cotton and placed an entirely different aspect on conditions as compared to last

month. Extreme western and southern sections show best chances for cotton, owing to more favorable weather. Grain crops generally are reported as doing well.

In those sections where cotton has been worst retarded, chipping is badly needed because grass and weeds are spreading during wet weather. Many farmers facing replanting intended planting in some other crop.

Insects, reported in a number of counties in South and Southeast Texas, seem to have spread less than at this time last year, the reports say. Immediate fair and warm weather is needed to arrest further development.

Despite the rather doubtful outlook for reasonable-cotton crops, there exists a general spirit of optimism over the final outcome of crops in general. Business conditions in over three-fourths of the reports received are shown as being better than 80 per cent normal, due probably to farmers having safeguarded themselves by diversification, particularly in dairy products. The opening of new creameries and milk plants over the state appears to have given great impetus to dairying.

### NEW MOORE SLASH L.

The Ladies Home Demonstration Club held their regular meeting Monday afternoon at 2:30 p. m. All the officers were present with quite a number of members and also some visitors.

Miss Greenwade was there and showed us some beautiful fancy work, teaching us how to do same. She also showed us how to make the inset pockets, that, I think everyone appreciated. The work is certainly

interesting. There was some good reports made this week on poultry, eggs and cream.

I will give it just as it was given in, cream \$53, eggs \$21, baby chicks 1026, turkeys 424. We hope to be able to give as good or better report from secretary, Mrs. Val Perry, moved away, so Mrs. W. L. Taylor was elected Secretary. The reporter was absent a few meetings so am a little behind with some reports, but hope to be able to attend each meeting here after for fear I might miss something worth while. Our regular meeting days are first and third Monday in each month. New members invited.

Reporter.

### S. S. CLASSES TAKE PLACES IN NEW CHURCH BUILDING

Work on the remodeled Methodist many of the Sunday School classes church is progressing so rapidly that took their regular rooms last Sunday. Other rooms which were used for storage rooms for building material that day will be occupied next Sunday. The class rooms have been assigned and each of the classes are making plans for the equipment of the rooms.

The primary and beginners' classes will have small chairs and tables for the comfort of the little fellows, while pictures, charts and other articles will add to the interest of the lessons.

The Comrades class, composed of the young people, is tentatively discussing window seats on three sides of their room, with space for the teacher's desk in the front of the room. Other classes and organiza-

tions are planning flower beds, grass, pot plants and other aids to beauty. The entire building will be very attractive. The pastor and building committee in particular and the membership of the church as a whole is to be congratulated.

Mr. and Mrs. C. L. Davis returned last Friday from a three weeks tour of South Texas. Mr. Davis stated the only disappointment he experienced was when they found all the fishing streams too high for fishing, caused by the heavy rains. However
