NUMBER 52

Donnell Free Community Fair Opens Friday

Houses Burglarized Early Sunday Morning With \$100 Loss

...er who diversifies to worry about his bank
... which consisted principally amounted to approximately. The homes entered Haney, Boss Johnson, J. J. F. Campbell, and the heaviest loser was who suffered a loss of money alone. The other of from 50 cents to \$20 a thieves took very little

... except money and in every instance this was taken from the trouser pockets of the silent sleepers who knew nothing of their loss until time to dress for the day Sunday morning. Some of the victims believe they were dragged as in most cases such could be done from the outside of the windows while the victims were asleep. Officers were promptly notified and made a thorough search for evidence, but so far have no clue on which to work towards capturing the guilty party or parties.

Local Eagles Lose Lubbock Eleven

...ell Eagles lost their of the season to the school Pioneers on at week, played on the of \$2 to 0 indicates rather an affair, but the O'Donnell played splendid football material they have considering they have had to Lubbock aggregation was strong for the locals and plus several pounds. This is an account of the published in the Lubbock. By their initial bow under monitor, the Lubbock Pioneers opened the season for the Frank me yesterday by sound- O'Donnell to the tune

Rules Should Be Enforced Regarding Outdoor Toilets

A number of complaints have been made by local residents regarding the care given the sanitation of outdoor toilets. We understand there is a city ordinance regulating these outdoor houses and for the health and welfare of the citizens, should by all means be enforced. Some residents complain that some of these outdoor toilets are allowed to remain open at the rear making a breeding place for flies and also allowing soiled paper to scatter over the neighborhood. By all means this should be stopped. If the citizens who use these outdoor toilets do not care enough about the health of the city to comply with the rules and regulations regarding same, then the city should see to it that the ordinance is strictly enforced. Below is a letter received by the Index explaining of the unsanitary condition of outdoor toilets in his neighborhood. It is self explanatory:

O'Donnell, Texas, Sept. 16, 1929.
Editor O'Donnell Index,
O'Donnell, Texas,
Mr. Editor:
May I ask through the columns of your paper, is there no way whereby residents of our town who use outdoor toilets may be required to use more care about their sanitation? As making them more fly proof and preventing soiled papers etc., from scattering over town thus creating a menace to the whole town of the ever dreaded Typhoid and other diseases. Yours truly,
A Disgruntled Taxpayer.
The above letter is not the only complaint received by the Index regarding the use of outdoor toilets, and we believe it is time the City Council exercise its proper authority regarding the use of same.

Hens Pay Well For Medical Attention

Albany—That it pays to combat disease in the poultry yard has been brought out in the demonstration flock of Mrs. Theron Fincher of Shackelford county. Some head-counted in her flock of 60 White Leghorns in May reduced the June production to 16 eggs per hen, but production and vaccination and the killing of all infected birds brought the production back to nearly 20 eggs per hen in July. Her profits above feed cost rose from \$5.75 in May to \$26.37 in July. This is a remarkable increase in hot weather, according to A. C. Magee, county agent.

YOUNG PEOPLES CLASS OF METHODIST CHURCH

The Young Peoples Class of the Methodist Church elected new officers last Sunday morning. They are as follows:
President—Hester Gate.
Vice-Pres.—Fay Slaughter.
Sec.—Treasurer—Randall Gibson.
This class had the largest attendance last Sunday. Mr. Edwards class had the largest collection. Oh well, they should, they are all grown men.

INDICATIONS POINT TO LARGER DISPLAY OF EXHIBITS WITH MANY ADDED ATTRACTIONS; RECORD ATTENDANCE EXPECTED

At the time of going to press we are informed that all preparations for the opening of the O'Donnell Free Community Fair is completed. Workmen have been busy most of the week building booths in the Curtis Buildings just across the street from the Chevrolet Garage, which will be used as an exhibit hall. Indications point to a much larger display of exhibits this year than last year. The Fair management is looking forward to a much bigger and better fair and so far reservations for exhibits have far exceeded their expectations. A few weeks ago it looked as tho the exhibits would be a much poorer quality than that of last year, but the recent rains have aided materially in raising the quality of the agricultural exhibits.

From an entertainment standpoint this year's fair will be far ahead of last year. The Harris Combined Shows will be on the midway with five rides and twenty-five concessions to furnish entertainment for all who love carnival attractions. The entertainment committee of the free fair is preparing a program for the two days which will also add materially to the entertainment of the fair visitors. The program is not yet quite complete for publication, but will be ready in time for the opening of the Fair Friday morning. O'Donnell is expecting to entertain one of the largest crowds in the history of the town during its second annual Free Community Fair.

Draw District Court Jurors

The fall term of the district court will meet in Tahoka on Monday, Sept. 23rd, when a grand jury will be empaneled and the docket of a four weeks term will be taken up. A venire of sixteen men has been summoned for grand jury service, and is as follows: W. S. Anglin, John A. Anderson, N. M. Bray, J. M. Christopher, G. M. Duckett, I. M. Draper, E. J. Emanuel, Ed Cook, J. J. Gary, Jim Izard, John Heck, D. W. Gaigant, L. C. Johnson, Clyde Shaw, C. H. Mansell, and J. E. Richardson. Petit juries have been drawn for the second, third and fourth weeks of the term as follows.
Second Week
Jim Wetzel, E. L. Curtis, S. D. Martin, A. H. Ash, Robert Burdett, George Hurt, E. R. Blakney, J. A. Cornett, Robert H. King, J. M. Line, J. D. Martin, H. C. Fountain, Jim Burleson, J. Y. Thompson, D. M. Estes, Lynn West, R. J. Townzen, Alfred Krauses, J. M. Trussell, J. W. Clements, C. R. Cargyle, John Evans, Jesse Brigrance, C. O. Carmack, R. B. Miliken, J. H. Koregoy, D. C. Davis, August Fitcher, J. H. Sollenback, C. L. Terry, C. T. Tankersley, Jeff Musick, A. C. Fairley, J. Anson Couchman, N. M. Wyatt, J. J. Hodnett.

Crops Aided by Rains In Lynn County

TAHOKA, Sept. 14.—Three inches of rain which has fallen over Lynn county the past week has materially benefited crops over a majority of the county. Conservative estimates believe the drouth-breaker will add around 15 per cent to the cotton production and 25 or 30 per cent to the feed crop. Crops over the eastern part of Lynn county will not be helped to a very great extent by the rains, but those in the northern, western and southwestern portions will be helped to a large degree. Approximately 25,000 or 30,000 bales will be ginned, according to a majority of business men who keep close tab on conditions. Had the rains come a month earlier, Lynn county would have raised the largest crop in her history, no doubt. For the most part crops are very spotted. A few localities will produce practically nothing, while others have prospects for as much as a half a bale to the acre and are almost ready to harvest excellent feedstuff. Due to the shortness of the feed crop, many farmers are preparing to sow winter wheat, barley, etc., for winter pasturage of their stock.

Son of W. A. Snow Injured Last Thursday

Details of the accident are lacking, but we understand the son of W. A. Snow, who was riding a horse while wolf hunting, was painfully injured on Thursday last week. For some unknown reason the horse stumbled and fell on its rider painfully injuring the Snow boy. The boy was given medical attention at once and at the time of going to press is getting along nicely. The horse's neck was broken in the fall.

HENS BEAT COTTON CROP THIS YEAR

Marshall—Described as an example of growing rather than going into the poultry business, Mrs. H. A. Russell of the Maple Springs home demonstration club is able to show a net income of \$134.79 from a flock of 177 White Leghorns for the four months ending July. In spite of paying out \$237.95 for feed, supplies and equipment during this period, the hens will make more than the cotton crop, she says. July production in this flock averaged 19 eggs per hen which is four eggs above the standard set by the Extension Service calendar. The net profit for the month was \$40.48, and it came as a result of furnishing plenty of fresh water, good feedings and keeping the birds free from lice, Miss Margie Peach, home agent explains. Sodium fluoride was used to dust the hens for lice.

Local Parties Spend Night In Arizona Jailhouse Past Week

That old superstition regarding '13' as a government inspection station was strengthened last week when a party of local citizens were forced to spend a very unpleasant night in a Flagstaff, Arizona, jail house. It was on Friday the 13th day of September while they were touring the thirteenth state since leaving O'Donnell, just thirteen weeks after their departure from O'Donnell and to clap the climax they were forced to spend thirteen hours in the above mentioned jailhouses, while thirteen officers were busy capturing the real criminals who were charged with robbing a filling station on the highway a few miles from Flagstaff. Messrs Bug Pugh, Lester Etter, Clarence Curtis and Tom Sturdevant were the victims of the above unpleasant experience. They returned to O'Donnell late Monday evening and in speaking of the likes and dislikes of the tour related the above story.

If the officers had not been successful in capturing the real criminals the boys would have probably had to spend thirteen weeks in the jailhouse, of Arizona, because they were among strangers and were not allowed to prove where they were at 9 o'clock on the morning the filling station was robbed. The party was as a government inspection station at 8:30 o'clock at the time which was exactly seventy miles from the scene of the robbery. After leaving the bridge where the government station was located they had covered some 30 miles of the distance toward the station by 9:30 when they were met by the officers. They were not allowed to prove their whereabouts at 8:30 o'clock which would have been sufficient to clear them of any suspicion. However, the boys are none the worse for the experience. All agree that the officers were all very neat with the exception of one long, tall, hungry looking gent who didn't seem to know his law. The boys stated that after all they had the laugh on the officers as three quarts of Canadian Club which they were bringing back as souvenirs were not found by the officers when they searched the car for guns and loot. This they had been hauling all the way from Saksatchewan, Canada. States visited on the tour were: Oklahoma, Kansas, Colorado, Nebraska, South Dakota, North Dakota, Saksatchewan, Canada, Nevada, Wyoming, Utah, Idaho, Montana, Arizona, New Mexico and Texas, and the boys all agreed that Texas was the best state of any they visited.

Trades Day Tuesday Attracts Large Crowd

Tuesday was a very busy day in O'Donnell, folks from every section of the trade territory for miles around came to town and spent the day shopping and enjoying the program arranged especially for the day. The big attraction of the day was the distribution of forty prizes to the visitors who registered upon coming to town. Approximately six hundred visitors registered before the prizes were awarded. Besides the program arranged by the arrangement committee for the entertainment of the visitors, carnival attractions were available. The Harris Combined Shows were entertaining many of those who found time to play.

Stock Being Collected For Dairy Products

LAMESA—Stock for the West Texas Dairy Products Company is being collected here at this time. A. J. Thwait working with the local Milk Plant Committee is closing up papers for the new corporation which is to be capitalized at \$235,000. The plant will manufacture powdered milk, powdered Commercial milks and sweet creamery butter. Whole milk will be trucked in from a radius of 50 miles distance from Lamesa where the plant will be located. Farmers will receive a net profit over and about what they are now getting for this product and will at the same time save the freight that moves it to the factories away from here at present. It is further planned as soon as the plant gets under way to add trailers to the milk truck and bring in to the cold storage and dressing plant that will be built poultry and produce that the farmers desire to sell. At the same time any merchandise as groceries, ice and the like giving him a complete delivery system and accommodations now given the city dweller. The plant is planned to be in operation some time next March or April.

LOCAL PASTOR PROMINENT IN DISTRICT AFFAIRS

Rev. J. Wood Parker, Moderator for the Abilene Presbytery district fell Tuesday to attend the two day session of that body in Snyder, which began Tuesday and will continue thru Thursday. He is to be assisted by the Snyder pastor, Rev. E. C. Lambert, of the First Presbyterian Church and Rev. Fred S. Rogers, clerk.

All Stars Again Defeat High School Eleven

The O'Donnell All-Stars again locked horns with the O'Donnell High School Eagles on Wednesday afternoon of last week and battled an extra quarter before the side over. The All-Stars finally put over one touch down and kicked goal for the extra point gaining the decision by a 7-0 count.

BOY SCOUT NEWS

At a meeting of the Sub-Committee of the Boy Scout Executive Board held in the Scout Office, City Hall, Lubbock, Wednesday afternoon, September 11th, Thomas A. White, District Manager of the Bell Telephone Company, was appointed temporary treasurer to fill out the term of F. A. Norman who recently resigned. Rev. L. G. H. Williams, president of the Council, and K. N. Clapp, Commissioner, agreed to carry on the work of the Scout Executive after H. B. Yates, who was employed as executive for a three month period, leaves on the 14th of September. Mr. and Mrs. H. P. St. Clair and family visited in Tahoka last Sunday.

LEES SHINES

O'Donnell fallback, was outstanding performer of the evening, kicking, passing the majority of the ball the losers. Training will start to Merrill Park for the first game of the season here the Ralls Jackrabbits.

HOLS HAS HOT PEPPER—THANKS

... of the Index is very Mr. J. W. Nichols for a sweet green pepper which our desk Tuesday morning was raised in Mr. ... as fine as any anywhere. Mr. Nichols all kinds of pepper and kinds of vegetables in some of which will be on the fair Friday and Saturday.

TRADES UNCANICIZED at Foster's

FOREIGN COTTON THREATENS SOUTH'S STAPLE CROP

"One American manufacturer uses 80 per cent Egyptian cotton because he cannot get as fine or as long cotton in this country. The fact is, blinking the facts as they exist, American cotton supremacy is not only threatened but is slowly being undermined," writes Arthur Coleman in the current issue of HOLLAND'S The Magazine of the South.

Amazing as it may sound to Southern people who look upon cotton, the bulwark of our very existence, as a matter of course and a never ending source of revenue, much of the cotton now grown is absolutely useless in the manufacture of anything made in this country except the shoddest of material. Nearly fifteen per cent of the 1928 crop was untenderable on contract because of short staple, and more of this class is grown each year.

Mr. Coleman says, "For many years American short-cotton has been shipped to Japan and Europe where it is used in the manufacture of underwear, blankets, cheap rope, twine and other commodities. In those countries it is forced to compete in price with cotton from China and India. Cotton grown with the cheapest of cheap native labor 'Coolie' cotton, it has come to be called. In order to compete with this cheap cotton, American cotton must be cheaper.

Particularly it must be cheaper than Indian cotton, for India raises a short cotton that is the best for the uses to which it is put to be had. There are mills in America where domestic short cotton could not supplant Indian cotton if the American cotton was given away. India's cotton is stronger and better than American short cotton. China's cotton is better. This is not my opinion. It is a statement of a cotton goods manufacturer who operates one of the largest concerns of its kind in the country and whose product is nationally recognized as one of the best."

Mr. Coleman points out how and why short staple, untenderable, cotton is becoming more popular with Southern farmers; how this affects the price of all cotton; what this means to Southern business and many other facts about cotton which most Southerners who have seen cotton all their lives know little about.

WEDDINGS AND OBITUARY NOTICES

Some of our exchanges are copying a wedding notice from a South Carolina paper in which the editor says he undertook to tell the truth about the bride and groom, not very flattering to each.

Probably the notice was a pictitious one and it is seized upon by many publishers as a sample of the style of notice that should be written but never is regarding young people who marry.

Ministers and newspaper men are both supposed to "lie like a gentleman" when some good for nothing citizen dies or when the less than nothing daughter or son weds. We all do it.

But is it really wrong. We have often thought of the commandment: "Thou shalt not bear false witness against thy neighbor," or words to that effect, and it is generally construed that one must not tell an untruth. But if one's witness against his neighbor is favorable to him and injures no one, is it not a real act of brotherly love, even if not strictly true?

Take the case of the neighborly call. A woman whom your wife considers a bore and whom she would rather not see, calls when your better half is busy. She receives the caller with a smile, says she is glad to see her, urges her to prolong her call and when she leaves asks her to come again. Not a word of it is true, but is it not really better than to greet the visitor with a frown and say, "I am busy today and do not care to talk to you; I wish you would stay away."

We would like for one of our good ministers to make this the topic of a sermon some day. So in the matter of the wedding or the obituary notice, what is the harm in stretching the truth a little in giving the subject a good send off upon the matrimonial sea or across the River Styx? It makes their friends feel good and hurts nobody.—Chillicothe Valley News.

EIFFEL TOWER CONSTANTLY MOVING IN SUN'S COURSE

PARIS, Sept. 14.—Probably none of the 13,268,936 people including many Americans, who have mounted the Eiffel Tower since it was opened to the public in 1889, were aware that the giant structure wobbled beneath them, twisting and turning like a thing of life.

The tower is heliostropic. In the warmer weather it suffers more from this structural malady than in the cold months, but all the

year round it moves continuously.

In oppressive weather, the tower moves with the sun. During twenty-four hours in the hottest time of its eclipse from east to west amounts near the twist as the summit makes to 17 centimetres, roughly the widths of three average size newspaper columns.

Since the tower rears its head 1,000 feet in the air it may be understood why passers-by and even conscientious sight-seers who mount to the top to look down on Paris are unaware of the wobble. As a matter of fact, scientists themselves have just discovered it.

For years a story has been generally believed by Parisians that the Eiffel Tower daily adds something to its height because of the atmosphere, but this is denied by M. Lherault, one of the tower officials. "That yarn was probably invented by newspapermen" he declares.

"The tower is fixed firmly in the earth on foundations from nine to fifteen meters deep. Measurements made by scientists at the top of its 300-meter shaft have detected a torsion in hot weather, only the metal on the sunnier side being affected, while the result that the

structure at the top (but not below the second landing) bends outward an infinitely small degree every day. The eclipse develops to its longest point at the hottest hour. As the day cools the twist vanishes."

The attraction which the tower still exercises for visitors is as strong as ever. In the tourist season the crowds who wait their turn to be whizzed up to its dizzy heights number thousands, mainly Americans. But the record for visitors set up in the year of the tower's opening 1889, has never been equalled and probably never will.

In the twelve months of that year 1,968,234 panted their way up the endless stairs to the top.

TEXAS GAS HELPS SAVE AUTOISTS BILLION AND A HALF A YEAR

Carbon black, of which Texas with its enormous gas supply is one of the largest producers, is credited with saving automobilists of the world a billion and a half dollars each year. Carbon black is responsible for the fact that the automobile tire of today goes 15,000 miles as compared with less than 5,000 miles before the

World War.

The other major use for carbon black is in printing inks.

BIG INCOME FROM LITTLE GARDEN

Center—In addition to canning enough vegetables for winter use and serving fresh vegetables twice daily all summer, Miss Nona Ross, home demonstration club woman here has sold \$50.40 worth from a garden plot 40x60 feet in size. This does not include her Irish potato patch. She planted one bucket of potatoes and gathered eight, and then planted the plot to sweet potatoes, making a good crop. She is still gathering butterbeans, okra, bell peppers and peas, from her garden and has a fall garden coming on.

In 1840 the average weight of fleece sheared from American sheep was less than 2 pounds. By 1900 it had increased to nearly 5 1-2 pounds. Today it is approaching 8 pounds. There is still room for improvement. Much of this difference has come from progressive weeding out of low producers and by breeding from the heavily fleeced sheep.

FALL OPENING

The best Store that O'Donnell has ever had, none better in the county

The earth is just where it was a year ago, according to astronomers, but it is not true of O'Donnell.

The opening of our Store marks a distinct advance in the development of our city.

We have been hard at work putting a way and arranging our new Stocks, but at last we are about through.

We regret that we were unable to have a formal opening as we had planned, but we just couldn't get ready.

Come in, look our stock over, you will be proud of it.

It is being talked around town that you can get what you want at Tuckers and it is the best that's made, but it is high.

The first part of that statement is correct, we do have a wide variety to select from, and most anything you need, it all comes from the best manufacturers, and it is good, it must be good or we make it good, every item sold under a money-back guarantee. The last part is all wrong, we are not high. **THERE IS NOT A STORE ON THE SOUTH PLAINS THAT HAS AS LOW PRICES AS WE DO.**

We buy direct from the Mills and manufacturers for Cash, save the middle man's profit and handling expense then we make a very small profit for ourselves, and sell it for cash.

ON AN AVERAGE THROUGH THE STORE OUR PRICES ARE 25 PER CENT LOWER.

Tucker Dry Goods Co.

25 to 30 cars are going on

United States. Electricity should be
used on all of them. The farmers,
constituting one-fourth of the coun-
try's population, use only one-fifth-
second of the electrical energy con-
sumed in the United States. The
average per capita consumption on all
farms is only 49.
More attention is being given to
supplying farmers with electricity at
a cheaper price than ever before.
Farmers are using electricity for
more purposes each year. They are
beginning to realize the part that
electricity can play in developing bet-
ter conditions on the farms. The
rapid development of rural electrifi-
cation is highly desirable.

A STEP AHEAD

The telephone industry must al-
ways be a step ahead of our civiliza-
tion. Fulfilling the needs of the
present, it must be ready and pre-
pared to meet the still greater demands
of the future.
In all phases of modern life, whether
in closing a gigantic business deal,
or in ordering a pound of meat from
the butcher, the telephone performs a
necessary service. It has been a
major factor in adding to the com-
fort and prosperity of the nation, and
in assisting our domestic and indus-
trial development.

IMPROVING ON OLD METHODS

Mass production, the guiding prin-
ciple of modern industry, has given
us better automobiles, electric ser-
vice, clothes and many other com-
modities and products. Now in its
latest development, it is being ap-
plied through consolidation of present
well known companies, to the manu-
facture and sale of the most basic hu-
man necessity—food.
This is a logical advance over the
outworn methods of the past. The
large concern can maintain research
departments, it can more easily raise
capital, it can afford a higher type
of management, it can cut overhead
and transportation costs—in every
phase of operation it is more econ-
omical and efficient than the smaller
company.

EL DORADO will put on a public-
ity campaign in the near future. The
outside world will be told of the ad-
vantages of the town, and what the
town has to offer in the way of op-
portunities. The coming of the rail-
road has been one of the greatest as-
sets the town boasts.

**What's Doing in
West Texas**

MEMPHIS'S newest \$20,000 build-
ing is being erected by T. T. Harrison
on the lot east of the Pounds
Hotel and will be the future home of
Kuhn Motor Company. The building
will be 50 by 140 feet and will have
show room in front. Three offices,
a large rest room, and storage space
is included.

HEREFORD has shipped three
carloads of butter to the eastern mar-
kets withi none months time. The
Farmers Creamery has provided a
ready market, and interest in dairyl-
ing is very much on the increase.
Cream is being received regularly
from a radius of up to 60 miles.

MORAN impresses strangers as a
"church town" because of its many
beautiful churches. Close to \$70,-
000.00 is invested in buildings. A
good attendance is reported at the
churches, and the influence of mem-
bers is favorable on the growth of
the town.

ALVORD is watching the close of
its watermelon season with satisfac-
tion. More melons have been shipped
from the town this season than at
any other time since 1924 when 213
cars were exported. Two hundred
cars had been billed up to a recent
date by the Fort Worth & Denver
freight.

SONORA is soon to be covered by
a special edition of the Devils River
News, which will be published on
October 9, when several hundred peo-
ple from Florida, Louisiana, Missis-
sippi, Alabama, and Texas will com-
pose a motorcade through the town.
News of Sonora and Sutton county
will be played up.

CLARENDON showed a gain in
cream production from eighty ten
gallon cans the first week to 136
cans the last week of August even
though it was one of the hottest and
driest of the summer months.

FRIONA's committee investigating
the feasibility of installing a water
works system is making progress. The
committee has secured all available
information it can regarding the nec-
essary steps to be taken and as to
reliable engineers and contractors,
and work will no doubt be started
soon.

JUNCTION and the surrounding
communities of London, Teacup, Ivy,
Segovia, Evergreen, Roosevelt, Cop-
peras and Noxville will soon have

live Four-H clubs if the plan of coun-
ty Agent R. E. O'Homann works out.
\$225 in prizes has been offered by
the Chamber of Commerce to stimu-
late interest.

The STAMFORD offices of the
West Texas Chamber of Commerce
were recently visited by the com-
mittee composed of R. L. Penick, of
Stamford, O. P. Thraane, Snyder, and
Walter Cline, Wichita Falls, who
drew up a preliminary report of
changes in the constitution and by-
laws of the WTCC to be read at the
Convention.

CARLSBAD, N. M., is expecting a
great number of Panhandle and the
North Plains delegates to the WTCC
convention to pass through their
city on the way to El Paso in Octo-
ber. The Carlsbad Cavern will be two
items of much interest to the visitors.

JAUREZ, exico, will play a great
part in entertaining WTCC conven-
tion goers. The convention proper
will end with a Spanish fiesta on the
streets of the unique and picturesque
old city.

Mrs. I. M. Wright left this week
week for Dallas for a month's visit
with her daughter, Mrs. Scott of that
city.

**Drive a
Chevrolet Six!**

—so Delightful to Drive!
The Chevrolet Six delivers its power
with that smooth, even, velvety
flow which characterizes the truly
fine automobile. At every speed, you
travel without the slightest annoy-
ance from vibration. Equally de-
lightful are its comfort and hand-
ling ease. Four long semi-elliptic
shock absorber springs provide the
road balance found in the finest cars.
And the steering gear is equipped
throughout with friction-free ball
bearings.
—so Economical to Own!
Many people still do not appreciate
how little it costs to own a Chevro-
let Six. You can actually secure a
Chevrolet Six for practically the
same cash and monthly payments
you would expect to make for any
low-priced car. Furthermore, it is
unusually economical to operate—
better than 20 miles to the gallon
of gasoline, with unusually low oil
consumption. Come in for a demon-
stration today!
—so Durable and Dependable!
The Chevrolet Six is built to the
world's highest standards. Its design
represents more than four years'
development and testing. Materials
are carefully selected. Highly skilled
workmen perform every manufac-
turing operation. And inspection is
rigorous and continuous. The result
is quality so high that you can
confidently look forward to thou-
sands upon thousands of care-free,
dependable miles!

Entered as second class matter
September 28, 1923, at the post
office at O'Donnell, Texas, under the
Act of March 3, 1879.

General rains of the past week over this entire West Texas have benefited the late feed and cotton more than most people believe it was possible. Some of the feed that folks believed was entirely burned up has made a wonderful change during the past few days. With favorable conditions for the next two or three weeks there will more than enough feed harvested in this territory to supply the local demand. Cotton also has been materially benefited. Some fields in the territory had never ceased blooming. Where this is the case it will add greatly to the yield as well as to the quality of the fleecy staple. Most of the farmers are highly elated over the present prospects compared to the outlook just before the rains.

By the time this paper reaches its readers most of the exhibits for the O'Donnell Free Community Fair will have been placed on display at the Fair Grounds. Some have already arrived and are being displayed, and it is surprising to most folks when it comes to quality. Some of as fine agricultural products as can be found anywhere is being placed for display. Yes sirree, all grown right here in the O'Donnell trade territory. Be sure and attend the Fair Friday and Saturday of this week.

HELPING TO BUILD TEXAS

In 1927-28 the Texas Valley shipped 1,628 cars of citrus fruit. In the 1928-29 season the shipment totaled 2,316 cars, according to the Donna News. The gain was more than 50 per cent.

Completion of the Orient extension thru Brewster and Presidio Counties recently authorized by the Interstate Commerce Commission will complete connection of the Orient's United States lines with those in Mexico. It will serve 3,700 miles of territory and open up what is believed to be a most valuable mineral area now undeveloped largely because of the difficulties of transportation to railheads, now around 70 miles over mountainous roads. The new line will reduce rail distances between Mexico and several important sections of the United States.

Van Alstyne Grayson County, is to have a wash dress goods factory. The Beaumont Hampshire Fig Co. cannery expects to handle 750,000 pounds of figs during its four months season, the product of 800 acres in figs in Jefferson County.

Marble from Marble Mountain near Marfa, was used in constructing the beautiful Jewish synagogue in Los Angeles, Cal. Texas black marble is said to be the finest in America and the equal of the best in Europe. The Marble Mountain Co. has recently installed the largest marble saw in America in its quarry.

Willacy County Irrigation District No. 1 is building at a cost of \$7,500,000 one of the biggest irrigation plants in the Southwest, capable of irrigating 129,000 acres of land. The system will include 525 miles of concrete-lined canals and laterals, with the main canal 130 feet wide at the top, 90 feet at the bottom and 14 feet deep, carrying 250 acre feet of water in an hour.

The Brownsville Herald reports \$12,000,000 worth of new construction in the Valley during the first six months of 1929.

The first printers' ink factory in the South is to be established at Houston by the Howard Flint Ink Co. of Detroit, Pittsburgh and Indianapolis. Proximity to the largest available supply of carbon black in the United States is a reason for the location.

WORMING AND FEEDING REDUCES TURKEY LOSSES

Brady—Worming turkeys and putting them on a good balanced ration has reduced mortality to less than

five percent, and increased average weights from two to four pounds per bird in McCulloch county flocks totaling 18,000 turkeys. This marked improvement over last year has come as a result of demonstrations conducted by James D. Previt, county agent, who states that the "luck method" of raising turkeys here always draws a mortality of at least 50 per cent and sometimes takes the entire flock.

The liquid iodine method of injecting a solution directly into the gizzard has been employed at a cost of four cents for half grown birds and eight cents for grown turkeys. Rations in these demonstrations were balanced by using home grown grains in combination with a mash composed of equal parts of corn meal, ground oats, wheat shorts or middlings, pure wheat bran and meat scraps. The mash is fed wet as the turkeys come off the roosts in the mornings.

KNOW TEXAS

Texas 491 ice plants with a daily capacity of 21,129 tons.

Texas eliminated 25 grade crossings in 1928, standing fourth among the states in this important safety work.

The one vote against Texas' annexation to the United States was that of Robert Bache of Houston, kinsman of Benjamin Franklin.

Dismantling of several plants in California and building of several in Texas during 1928 put Texas first in number of oil refineries in the United States.

In Randolph Field, San Antonio, Texas, is to have the largest and most modern airport and flying school in the world. Plans have been accepted by the War Department for its construction.

HIGH SCHOOL NEWS

The Senior class has had several meetings in which officers were elected and some plans for the future were made.

The officers elected were: President—Jeanette Thomas. Vice President—Sumner Clayton. Sec.-Treasurer—Eva Tune.

Reporter—Inez Edwards. Sponsor—Miss Smith. The Chosen colors are—Yellow and Orchid.

Motto—"By the ropes of the past we shall ring the bells of the future." The class has been divided into groups which are to give one entertainment each month, besides the ones given by individuals.

There has been one meeting in regards to invitations and cards, and another for the purpose of discussing a booth for the Community Fair. We have also decided to sell candy each Thursday.

There are Forty Seniors and as this is the largest Senior Class in the history of O'Donnell High School our intentions are to make it the best one.

With such a large and active group of workers, and so many plans already begun, we are expecting to have a very successful school year.

GRAMMAR SCHOOL NEWS

Seventh Grade, Mrs. Gooch's room. Mrs. Wilson was elected our room mother. She visited our room last Friday for the first time telling us a very interesting story about the "Over Coming," and before leaving presented us with a beautiful flower.

Low Third, Miss Harville. Mrs. Roberts was elected our room mother and made us a visit Tuesday morning. This was not her first visit however, on a previous visit she presented our room with a pretty flower vase which we like very much.

Mrs. Irvin Street and sister, Mrs. Shaw, both Grammar School teachers were called away Tuesday of this week on account of the death of their aunt who lives in Merkel.

Banking rows of late cherry with earth not only balances the crop, but produces celery of superior quality and protects it from early frosts. Celery can often be left in the field two or three weeks after the first frosts if the earth is drawn well up to the tops of the plants. Paper or boards should be used for blanching and early or summer crop because banking with soil causes decay of the plants in warm weather.

Silage made from containing moisture enough for proper preservation is more palatable to stock than that made from corn so mature as to need the addition of water. Usually corn should be harvested for the silo about a week or ten days before it would be cut for shocking. At this time the lower leaves on the stalk are turning brown and the green corn fodder contains about 70 per cent of moisture, which is enough for silage.

been so seriously affected by general drought. West Central and East Central Texas report cotton below normal with grain and feed poor to good. East Central Texas reports a rather serious insect infestation. South Texas reports cotton generally poor except in the extreme South where above normal to excellent crops are reported. Spotted districts report too much rain while others complain of drought. Reports from East Texas generally are classed from fair to good but also complain of insect infestation. The same report applies to North Texas. Cotton ginning in South Texas is nearing an end and is in full blast in Central Texas and parts of North, East and West Central Texas. Comparatively few counties report root rot which did most damage last year. One of the most hopeful aspects of the entire situation has been brought about by recent rains which most certainly will aid forage and fall crops. Business conditions in general are from fair to excellent. Apparently the general belief is that the cotton price will offset what is regarded a short crop.

13,000 cubic feet of water will keep down vegetable growths.

Wounds in potatoes are the most frequent source of storage rot, and careful handling during harvest and storage will decrease loss from this source. Cooling freshly harvested potatoes too rapidly may cause the wound rot, because of the slowing down of wound repair. If wounds are properly healed before potatoes are placed in storage, and if suffi-

cient ventilation is provided to keep them dry during storage, very low temperature is necessary to prevent loss by storage rot. Well-fattened beef animals weighing from 700 to 1200 pounds are in increasing demand at livestock markets. Calves selected for fattening should be of the type that is wide, deep bodied, smooth, thick fleshed, and well grown, with short legs, and of good quality as shown by fineness of hair, medium bone, smoothness of flesh, refinement about the head, and a lack of paunchiness. Uniformity in size, weight, and color are also advantages in marketing.

Hondo—The Medina County Wolf Club organized by the county agent reports that bounties were paid on 215 wolves, 100 wolf pups and 30 wild cats during the first six months of the year.

Ponds and sluggish streams that are used for the ice supply on the farm should be cleared of any decayed vegetable matter before cold weather appears. Such objectionable matter as algae and green spawn can be destroyed by copper sulphate. The crystals should be put in a cloth bag hung on the end of a pole and trailed through the water until they are dissolved. One or two treatments during the summer at the rate of one pound of copper sulphate to about

All Modern Improvements

Jim and Sally knew what they were doing when they bought the old Jones house. It was hopelessly out of date as far as looks and comfort went, but it was staunchly built and had a good sized lot, and they got it for a song.

Jim's salary wasn't very big, so they didn't try to do everything at once. They began with the furnace. They read the heater advertisements. They chose just the equipment they wanted and had it installed. Then they started reading up on bath rooms and plumbing. The following year they studied woodwork advertising, and replaced the old gingerbread porch with a pretty colonial doorway. Of course the house needed painting after that and they found a dream of a color scheme suggested in an advertisement. Later came new flooring, fresh wall paper, attractive lighting fixtures, shrubbery for the lawn. Jim and Sally have one of the prettiest houses in town. "Where did you get such wonderful ideas?" their friends ask, and Sally smiles.

"We simply knew what we wanted before we bought it," she replies. "Anyone can, who reads the advertisements."

MANY FOOTBALL GAMES WILL BE FEATURE OF PANHANDLE SOUTH PLAINS FAIR

LUBBOCK, Texas, Sept. 15.—12 of the best high school football teams in the South Plains Fair, September 30 to October 5, as a free attraction. No charge will be made for the football games and as everyone in the fair grounds will be admitted to the games free, a record breaking crowd is expected each of the six afternoons.

Paul Wright, Slaton coach will bring his Slaton High School Team here Saturday, October 5 for a game with T. P. Hayes Plainview High School Tullips. The two teams have played here at the fair on several times in the past and each game has proven to be a spectacular contest.

On Friday, October 4, the bi-district champs of 1928, Harry Taylor's Post High School Antelope will be here for a game with Coach Elvis E. Gibbreath's Past O'Donnell High School squad.

W. W. Niehaus, former Texas Tech star will bring his Tahoka High School Team here Thursday, October 3, for a battle with the Littlefield High School Team. Littlefield and Tahoka have been rivals on the Fair Park Gridiron in past years and every game has been a stirring contest for honors.

Crosbyton, capital of Crosbyton County on the east of Lubbock and Levelland, capital of Hockley County on the west of Lubbock will lock horns here Wednesday, October 2, when H. E. Lewis, coach will bring his Levelland squad in to the fair to play Finish Vaughn's Crosbyton 11. Ralls and Brownfield, another set of rivals are matched on Tuesday, October 1, the second day of the fair. Marlin Hayhurst, another Tech star, coach of the Brownfield High School squad will put his team up against G. F. "Forgy" Lovorn's Ralls Jack Rabbits.

The first day, September 30, will be featured a game between Coach Henry E. Frank's Lubbock High School second team and Jack Agee's Lorenzo High School Team.

EVERY DAY A BIG DAY AT THE WEST TEXAS FAIR

ABILENE, September 17.—Every day of the West Texas Fair, to be held in this city next week, will be a big day. T. C. Campbell, president of the exposition says.

Special entertainment features are being arranged for each of the six days, in addition to the regular program that will be offered all during the week.

Monday, opening day, will be "School Day." Every child of public school age will be admitted to the fair grounds without admission on that day. Two high school football games will be played. At 10:30 a. M. Rhy and Merkel will play on the fair gridiron; and 2:30 in the afternoon, the Abilene Eagles, state high school champions in 1928, will meet the Sweetwater Mustangs.

A rodeo, horse show, pony races and a polo game will be the offering for Tuesday afternoon. This program will attract some of the best riders and ropers in the southwest and a big assortment of ring stock and fast polo horses will be shown.

Wednesday will be the automobile race day. Indications are that this race will be one of the most warmly contested affairs ever staged here. Already more high-powered cars and

daring drivers have entered than have been here for the past three years.

On Thursday, which will be "Ex-Service Men's Day" a military maneuver program, an artillery sham battle, polo game and pony race will be given. A big parade will be staged in the morning and the former soldiers, sailors and marines will be given a barbecue at noon.

McMurry College of Abilene and Randolph College of Cisco will play football at the fair Friday afternoon and Simmons University of Abilene will meet the Texas University team on Saturday afternoon.

Each night during the fair the "Winter Garden Follies" will be presented in front of the grandstand free of charge. Harley Sadler's Co., will give two shows each day in the auditorium and the Lachman-Carson shows will be on the midway with a big assortment of fun-provoking affairs.

The famous Cowboy Band will play each day of the fair and the exhibits of all kinds will be open and full of interest.

EDUCATION IN OIL

The past decade has witnessed the adoption by many colleges and universities of oil education as an important feature of their curricula. It is perfectly natural that any industry as vast as the petroleum industry, with its marked influence on the world at large and upon a considerable portion of its population, should command attention educationally.

Our schools have wisely decided to provide the student, in most instances, solely with a background; only where conditions are ideal for it to do they undertake to teach him the practical phases of the business. In offering the student instruction in the basic principles of petroleum and permitting him to gain his actual experience in the field itself, our educational institutions intelligently realize their mission and serve the industry well.

WOMEN INTOLERANT OF CAR NOISES

Generally speaking, women are more susceptible to noise than men. Nowhere is this better illustrated than in the automobile. In the days when the motor car was largely a masculine operation and enjoyment, very little attention was paid to the elimination of squeaks, rattles, grinding noises, vibration and the crashing, clanking sounds that emanated from the chassis and bodies of our early gasoline vehicles. Now all that is changed and much of the credit for the silence of the modern automobile must be given to the millions

of women who have become car owners and drivers.

One of the newest and most interesting methods of noise elimination, adopted by several manufacturers, has been the use of ball bearing spring shackles which allow the springs to operate on smooth running ball bearings free from annoying squeaks and rattles common to older cars. Thus it was being waged on noise and again woman has been the incentive for progress.

VOTERS NEXT YEAR TO PASS ON AMENDMENT TO INCREASE SALARIES OF LEGISLATORS

AUSTIN, Sept. 14.—The \$300 salary of each legislator for an average regular session would be raised to \$1,200 if Texas voters next year approve a proposed constitutional amendment submitted by the legislature this year.

This is one of the four constitutional amendments to be voted on at the general election next year. It would increase the total salary item for a regular session from the present \$54,600 to \$218,400.

The proposed amendment increases from 60 to 120 days the duration of a regular session at which members would get full pay, and increases the compensation from \$5 to \$10 a day. The session could continue indefinitely at \$5 per day compensation, as it may at present for \$2 pay.

Voters who defeated the proposed nine-member supreme court amendment in July will pass on another amendment in 1930, affecting superior court. This would require the court to stay in session at all times, abolishing the three-month summer vacation now provided.

Another amendment would permit the University of Texas to invest its permanent funds in a wide range of bonds and securities, including pledges to the university itself.

self, and dormitory or other building pledges. Adoption of this amendment would permit the university quickly to complete an ultimate building program of nearly \$12,000,000 out of its own funds.

The fourth amendment to be voted on would permit counties in West Texas to tax lands owned by the University within their boundaries. Similar authority to tax lands owned by other county school funds has been granted. Leaders and spokesmen of the university joined in submitting this amendment.

An attempt to submit a second amendment to raise the governor's salary failed in the legislature this year, along with the higher bond issue amendment and others.

ETHYL to stop knocks

CONOCO gasoline to give you extra miles

the greatest combination you can put in your car

THE amazing way in which Ethyl stops knocks and gives a steady flow of power, no matter how old or how full of carbon the motor may be, is one of the marvels of modern engineering skill. By adding "Ethyl" to a gasoline especially refined to give you extra miles in every gallon used, Conoco Ethyl offers you a motor fuel different from anything else you can put in your car.

Driving economy plus the greatest of driving comforts—no need to worry about every little extra load on your motor, no need to throw her into second on every hill, no need of frequent carbon removal.

Conoco Ethyl is another example of the extra value in gasoline and motor oil which the greater Continental Oil Company is offering to motorists.

Stop at the new red triangle Conoco sign and fill up with Conoco Ethyl today. Enjoy the greatest driving pleasure you have ever known.

PREPARES FOR CONVENTION OF W. T. C. OF C.

Headquarters Are Established for Work Field in Your Territory

Sept. 14.—Opening of headquarters for the Chamber of Commerce of El Paso Chamber of Commerce has been announced by E. Heid, chairman of the Chamber of Commerce, at a general arrangement meeting. H. J. Adair of the West who is in charge of the convention which will remain in El Paso October 24, 25, and 26. The convention work of the chamber will be carried out in accordance with the plan recently adopted by the advisory board of the chamber. A. M. Bourland of El Paso, L. B. Campbell of Biggs, of the West have been assigned to organization work. Camp and B. M. Whitaker will immediately visit the El Paso towns for the purpose of persuading delegations to the El Paso.

will call on all West in the El Paso trade as a representative of the El Paso Chamber of Commerce. He will be accompanied by Mayor R. E. El Paso, and H. L. Adair of the El Paso Chamber of Commerce to the Mayors of Chambers of Commerce he visits.

that daily reports will be made to the El Paso so that constant contact is maintained with the El Paso organization work.

Circulars giving the details of the convention plan in full will be mailed out within a few days to all members of the West Texas Chamber of Commerce. Plans this year call for a definite, constructive business meeting. An elaborate entertainment program also has been prepared.

HEAVY TRUCKS ARE MENACE TO TRAFFIC AND ROADS

Commenting on the statement of the Plainview Herald that "the heavy truck has become somewhat a menace of traffic," State Press in the Dallas News adds some pertinent comment of his own to a question of no little interest to Texas taxpayers, saying: "Truck weights must be controlled by law and reduced to conform with the best interests of the public roads. It is practicable to build trucks that will ruin any road. The Appian Way more than 2,000 years old, withstood all the loads that horned oxen and draught horses could drag over it. But the Appian Way wouldn't last five years were it subjected to the uses of freight haulers employing the ponderous vans now coming into service."

"There is a limit to the strength of roads possible to be built with tax money. But there is no limit to the weight that commercial trucks will put upon them unless severely restrained. The fact that oversized goods vans are a menace to the minor vehicles on the highway is something to be considered.

"Our point is that to allow any commercial interest to ruin roads built with the hard-earned money of taxpayers is opposed to intelligent public policy. The railroads have had to spend multiplied millions in rebuilding their tracks and bridges to accommodate the monster locomotive of today. Are taxpayers to perform a like service for the freight trucks?"

ORCHARDISTS INTERESTED IN UNIQUE INSECT EXPERIMENT

Because the codling moth—insect that causes a loss of \$1,750,000 a year to the California apple crop—shuns light and chooses the dark hours between sunset and 9 o'clock to deposit its eggs, Professor W. B. Herms of the University of California is conducting an experiment with lighting that will be watched with interest by orchardists over the country. Taking 15 trees in an orchard, Mr. Herms suspended six 500-watt electric lamps over the trees and had them burned nightly. At the end of the test where as 21 per cent of the fruit outside the lighted area were infested, in the experimental area only 14.5 per cent had been attacked by the worms.

CAMOUFLAGE AS WE WILL, IT'S THE PUBLIC WHO PAYS

Mark L. Requa, noted engineer and director of the Hoover for President campaign in California, is also a student of taxation. In a recent statement regarding the California tax situation, Requa said:

"The problem of taxation is one that concerns the public, for, camouflage it as we will, the fact remains that it is the public that pays the tax bill. It has heretofore been a favorite pastime to conceal the fact that taxes are paid in the last analysis by the public. The result has been all kinds of indirect taxation with which the public in theory was not concerned. One example will suffice: You pay a telephone or an electric light bill of \$10; of this somewhere around 12 per cent is the tax item the corporation pays. In other words \$1.20

out of the \$10 finds its way into the coffers, of the tax collectors. The consumer, of course, pays it. The public utility corporation is simply a convenient collection agency patiently extracting the tax money from the pocket of the citizens."

The last cutting of alfalfa in sections of the country where winter killing occurs should be made early enough to allow a growth of 6 to 8 inches for protection in the winter.

as it cooks! ~ as it cools!

A S HEAT beats in on your home electric service stands ready to serve you with cooling breezes—via the electric fan.

Electricity, having cooled the kitchen and breakfast-room with breezes from an electric fan, is ready to cook an electric breakfast for your family, quickly, delightfully and economically. It can cook either by means of an electric range, or by an electric grille, toaster, percolator or other convenient appliances.

Then from the electric refrigerator you take pure milk, butter and other perishable things, fresh and clean. And from the refrigerator you also get the ice for your drinks. So, electricity, cooks, as it cools, as it freezes.

No servant of the home has such a wide range of servability as electricity. Washing, ironing, cooking, refrigeration, fanning, lighting, entertainment—all are brought most effectively to you through the medium of electric service.

Dependable and economical electric service as supplied by this Company, coupled with the efficient and economically operating electric appliances sold by this Company, are the greatest servants of your home.

Use them to the fullest and realize a comfort and convenience

QUADRUPLES DAIRY INCOME IN ONE YEAR

Big Spring—By better feeding and finding a market for her sweet cream, Mrs. W. C. Rogers at R-Bar has increased her butter receipts from four cows from an average of \$30.40 at this time a year ago to a present average of \$126.66 per month. The monthly feed bill runs \$44, according to Mrs. Louie B. Allgood, home demonstration agent, and the ration consists of bran, ground milo maize and cottonseed meal, to which green cut maize has been added to make up for the dry pasture.

Work has started on a 230-mile steel gas pipe line by the Magnolia Gas Co., from Bruni, Webb county to San Antonio and New Braunfels. It will have a daily capacity of 125,000,000 cubic feet.

Haskell County Road District No. 7 voted road bonds by a majority of 211 to 65 and a paved road through the southwest part of the county toward Spur will be built.

Beville is to have a combination milk and sweet cream butter plant to cost \$200,000 according to announcement there. It will handle the output of 7,500 cows and 2,500 cows are necessary before the plant will be installed.

MANY FOOTBALL GAMES WILL BE FEATURE OF PANHAN. DLE SOUTH PLAINS FAIR

LUBBOCK, Texas, Sept. 15—12 of the best high school football teams in the South Plains Fair, September 30 to October 5, as a free attraction. No charge will be made for the football games and as everyone inside the fair grounds will be admitted to the games free, a record breaking crowd is expected each of the six afternoons.

Paul Wright, Slaton coach will bring his Slaton High School Team here Saturday, October 5 for a game with T. P. Hayes Plainview High School Bulldogs. The two teams have played here at the fair several times in the past and each game has proven to be a spectacular contest. On Friday, October 4, the bi-district champs of 1925, Harry Taylor's Post High School Antelopes will be here for a game with Coach Elvie E. Gilbreath's Fast O'Donnell High School squad.

W. W. Nichlaus, former Texas Tech star will bring his Tahoka High School Team here Thursday, October 3, for a battle with the Littlefield High School Team. Littlefield and Tahoka have been rivals on the Fair Park Gridiron in past years and every game has been a stirring contest for honors.

Corsbyton, capital of Crosbyton County on the east of Lubbock and Levelland, capital of Hockley County

ty on the west of Lubbock horns here Wednesday when H. E. Lewis, coach of his Levelland squad will play Finish Vaughn's Corsbyton Ralls and Brownfield. On October 1, the second day of the fair, Marlin Hayburn, star, coach of the Brown School squad will put his team against G. F. "Foggy" Ralls Jack Rabbits.

The first day, September 15, will be featured a game between Henry E. Frank's Lubbock School second team and Aggie's Lorenzo High School.

The whole tomato industry, for selecting seed for the prevalent belief that variety of tomato may be selecting seed from one to ripen is erroneous. Department of Agriculture any one plant all fruits transmit the tendency to the way to get earliness plants that produce ripe. Likewise, in selecting strains of tomatoes, it is to choose plants bearing crop of smooth fruits and select smooth fruits at picking from the vine.
