

**EGLES WIN IN LOCAL  
TORNAMENT**

The Eagles of O'Donnell High School defeated Denver City high school 42 to 22 to win top prize in O'Donnell's first annual invitational tournament. Gano is the coach.

Complete Results of the O'Donnell Tournament

Friday Night, Thursday  
Post B defeated O'Donnell 18 to 16  
Post defeated Crosbyton 31 to 15

Friday Night Jan. 30th  
Denver City defeated O'Donnell 41 to 4  
O'Donnell defeated Seagraves 41 to 15  
O'Donnell defeated Denver City 55 to 13

Saturday afternoon Jan 31st  
Crosbyton defeated O'Donnell 28 to 17  
Denver City defeated Post 27 to 24th which by the way was the 1st game of the tournament

Seagraves defeated Post B 28 to 18  
Saturday night Jan. 31  
Post defeated Denver City B 42 to 26 for third place trophy

Crosbyton defeated Seagraves to 18 for consolation  
O'Donnell defeated Denver City to 22 for Championship

Final results: 1st, O'Donnell, 2nd place Denver City; 3rd place Post; Consolation: Crosbyton

Individual high scorers of the tournament:

Buddy Brock, O'Donnell	46
Malouf, Post	36
Ken Pearson, O'Donnell	35
Joe Palmer O'Donnell	26

**THE OLD TIMER WRITES**

We have it on good authority that a pair of robin red breast's built a home and reared a brood of young right here in O'Donnell, the last season. This locality is pretty south for nesting robins and are complimented by their good vision of the boys of our town. By Scouts are taught the difference between destructive and beneficial birds. English sparrows are usually considered as pests, but blue wells, they are lovely birds. Let's hang up a few pieces of stale bread for their eating these mornings.

**Attend Church Meet At Brownfield**

Rev and Mrs C C Cathoun and family, Mrs. Lorene Buchanan, Mrs. Elizabeth Reynolds, Mrs. O. McClendon, Mrs. Mary Smith, Wendell O. L. Jr and Laverne Mcendon, Ann Gilliam and Jo Sanders attended the monthly fellowship meeting of the Church of the Nazarene at Brownfield last Sunday. O'Donnell was awarded the banner. The next meeting will be at Denver City Sunday March 7th

**We Now Have ---  
The Best Shop Made  
BOOT**

In Texas  
ALL SIZES  
If we don't have your size, we will take your order  
For those good  
M. L. LEDDY BOOTS

# O'Donnell Index-Press

25th year; no. 18

O'DONNELL, LYNN COUNTY, TEXAS, Thursday, Feb. 5, 1948

\$1.50 PER YEAR

**Hodge Announces For Sheriff Race**

The Index has been authorized to announce the candidacy of A C Hodge of Tahoka for Sheriff of Lynn County subject to the action of the Democratic primaries in July.

Mr. Hodge needs no introduction to the majority of the residents having lived in this county for over 32 of his 41 years of life. He has had a wide variety of experience in law enforcement. He is married and has a family. His experience in meeting and dealing with the public is varied as he was associated with the Burleson Grain Co. for a number of years.

Mr. Hodge advises the Index that he will make a vigorous campaign toward seeking this highly important county office and he will make every effort to meet the newer residents and renew his acquaintance with the older residents.

**Funeral Services Held For Mrs. F. M. Page; Victim Of Home Accident**

Funeral services were held at the First Baptist Church Thursday, January 29th for Mrs. F. M. Page, age 52, with Rev. J. M. Hale officiating. Burial was in the O'Donnell Cemetery.

Mrs. Page was killed instantly Tuesday afternoon at her home 5 1-2 miles northwest of O'Donnell. She and her husband were thawing out a pressure pump near the house with a pear burner when the burner fueled with kerosene exploded. It was thought by Mr. Page that the tank of the burner sucked back fire from the spray attachment of the burner causing the forceful explosion. A portion of the tank struck Mrs. Page in the forehead cutting away a portion of the skull. Death, of course, was instantaneous. Mr. Page extinguished her coat which was afire and pulled the body away from the pump house before rushing to the slaughter, who are neighbors, for assistance.

Mrs. Lydia Lattie Page, wife of F. M. Page, was born August 9, 1895 the daughter of Mr and Mrs Bill Eaker at Mason; she was the elder of 14 children to bless this home.

She began cooking and taking care of the forthcoming children by the time she was 8 years of age. Because of this, most of the children have looked toward "Sis" as a second mother because she took care of the children while Mrs. Eaker helped the father to make a living.

Her childhood and adolescent days were spent in Mason and in Coleman county. Shortly after her 18th birthday on Sept. 14, 1913 she became the wife of Francis Marion Page, son of Mr and Mrs. J. A. Page of Coleman. Mr. Page was also 18.

After their marriage the two farmed until 1918 in Coleman County; they then moved to Dallas County where they picked cotton and worked in the harvest fields. In the fall of 1919 they moved to Oklahoma where Mr Page worked as a section hand on the railroad. In August of 1919 they returned to Montague County and picked cotton until March 1920. Then thence to Clayton, N M and there they made two crops before moving to Post where they picked cotton in the fall of 1923. They moved 9 miles east of Tahoka and farmed on the halves. In February of 1924 they moved to O'Donnell and have live here since that time owning their farm.

Survivors are the husband, a son Ira Lee Page of Quail, a daughter Mrs. Nellie B. Stokes nee Ioma Ollie Page of Seagraves and a son Carl Franklin Page who is attending Hardin Simmons University.

Also surviving are the mother, Mrs. W. A. Eaker of O'Donnell; sisters: Mrs. Myrtle Kelly of LaPryor, Mrs. Willie Dillard of Montague, Mrs. Emma Sherill of Ft. Worth, Mrs. Halley Davis of Montague, Mrs. Linnie Davis of Houslin, Mrs. Gertrude Rains of O'Donnell; brothers: Mike of Seminole, Holly of Seagraves, Melvin of LaPryor, and Arch, John and Joe of O'Donnell. Another brother Herman died in 1938.

Her father died in January of 1944.

She was a member of the Baptist church for 33 years and also a member of the Eastern Star.

Pall bearers were Chas. Cathey, Cliff Lambert, Elzie Davis, Rochell Pelts and J W Gardinhire; honorary were Roy Everitt, E O Slaughter, Joe Schooler, L. C. Vance, John Anderson, Sherman Inman, W. L. Gardinhire, Joe Mc Laurin and Shack Blocker.

By way of personal tribute The Country Editor has never met a lady nicer than our late friend. We met her shortly after our arrival four years ago, and we became fast friends immediately. She had a treasured personality -- an infectious grin that would spread from ear to ear and light her face. Never too busy for small talk, oft we'd visit on the streets, talking as proud parents will of their kids. We would be hard put to think of a more likely candidate for a good neighbor. Literally scores of acts of kindness are recalled by her friends. In our book Mrs. Page was tops.

Our sincere sympathy to the loved ones.

**Lubbock's Editor's Talk Is Well Received and Enjoyed**

In spite of the extremely bad weather Monday nite, a comfortably filled auditorium heard an extremely interesting report on Europe by Chas. Guy, editor of the Lubbock Avalanche. The talk was made possible by the local PTA. Mr. Guy spoke for about an hour and half on what he saw in post-war Europe and then he conducted an informal question and answer forum. Those attending said it was an especially entertaining and educational talk.

Mrs. F M Smith of Odessa is visiting her parents, Mr and Mrs Bill Hancock

Mrs Snellgrove recently returned from a Lamesa hospital and she is greatly improved.

Mr and Mrs. Louis Thomas and children were week end visitors of their parents, Mr and Mrs J T Middleton, Sr.

Mrs. B M Haymes is in a Lubbock hospital for treatment. Mr and Mrs. L E Robinson left Sunday for the Fat Stock Show and will also visit at Ponder and Dallas before returning home

Mr and Mrs. James Crumley visited relatives at Lamesa Sunday

We are glad to report that Mrs. A E Wiese is home from a Lamesa hospital feeling much better.

Mrs. H J Castleberry is on the sick list this week

We are sorry to learn that F G Wheeler of near Lamesa and formerly from near O'Donnell, is on the sick list. The doctors have advised Mr. Wheeler to remain in bed for the next few months.

Mrs. Bart Burk is visiting relatives in Mentone

Mrs. Cletus Cox was taken to a Lamesa hospital last Friday; she may undergo surgery.

Rev and Mrs McDonald formerly pastor of the First Baptist Church, attended services here Sunday and visited Mr and Mrs J T Middleton, Sr.

Mr and Mrs. H A Simpson and family and Mr and Mrs Dall Stubbelfield and Mr and Mrs. Randolph Lindy went to Morton Sunday to help their mother, Mrs. W A Simpson celebrate her birthday.

Mr and Mrs. Jimmie Hash visited in Lubbock Sunday

Mrs. W E Vermillion is visiting her sister, Mrs. Laquire at Decatur. Mrs. Laquire recently underwent surgery

**Nitewatchman Is Painfully Injured**

Last Thursday afternoon J T Northcutt, the City's able nitewatchman, was rushed to a Lamesa hospital suffering from a severe fracture of the jaw as well as severe and multiple head wounds received at the hands of a local man. Deputy Sheriff arrested the man said to have been involved and he was jail at Tahoka. The trouble was said to have come up over the sale of household goods.

Mr. Northcutt has made the city an able nitewatchman and his friends regret to hear of his injuries.

**CAR OVERTURNS**

Last Friday the car in which Bob Golightly was driving overturned in the vicinity of the North Y. Mr. Golightly was taken to a Lamesa hospital but he had no important injuries, doctors said. The car was moderately damaged.

Roger Line recently underwent an appendix operation at a Lamesa hospital. He is now nearly completely recovered.

Mrs. O H Shepard is confined to bed in the Methodist hospital at Ft. Worth with a fractured leg. The Index did not learn the details but presume she fell on the ice while visiting near Possum Kingdom dam

**ROPING CLUB PLANS AN INTERESTING YEAR**

The O'Donnell Roping Club met Jan. 24th at the Legion Hall and elected committeemen for the year. They are J. T. Middleton, Jr., F E Schooler and Blondie Barnett and Ralph Beach as Secretary. Dues are now payable and are being accepted. Anyone wishing to join the club should see one of the committeemen or Ralph Beach. The Club is planning an active year at the roping pens as well as several rodeos this summer. You are invited to join and participate

**THEY ALSO NEED TO LEARN CHRIST'S WAY. BRING THE CHILDREN TO CHURCH SCHOOL**

THE BIBLE. The most important TEXT BOOK in the world. Note what some of our great Americans have said about the BIBLE.

THOMAS JEFFERSON: I have always said, and will always say, that the studious perusal of the sacred volume will make better homes, better citizens, better fathers and better husbands.

DANIEL WEBSTER: It we abide by the principles taught in the Bible our country will go on prospering, but if we and our posterity neglect its instructions and authority -- no man can tell how sudden a Catastrophe may overwhelm us and bury us and our glory in profound obscurity.

WOODROW WILSON: A man has deprived himself of the best there is in the world who has deprived himself of a knowledge of THE BIBLE.

Give yourself and your children the BEST

THE CHURCHES OF O'DONNELL

The First Baptist Church; The First Methodist Church; Assembly of God; The Nazarene Church; The Calvary Baptist Church; The Church of Christ

**To Build New Gin Near O'Donnell**

A. L. Dempsey this week announced thru the advertising columns of the Index the purchase of a gin site from Mrs. Gleghorn of O'Donnell by the Dempsey Gin Co. of Duncan, Okla. The property lies south of Draw and East of Harmony. The gin will be installed and ready for the cotton season of 1948. The men are brothers of Mr. Dempsey who owns gins at T Bar and at New Moore.

FOR SALE: Complete house keeping outfit. See Cynthia Fay Smith

**PTA TO MEET**

The O'Donnell PTA will meet Tuesday at 3:45 at the High School Auditorium with the sophomore class giving the program. All members and prospective members are invited.

**CARD OF THANKS**

To the hundreds of friends who came to our home and comforted and aided us in the time of our sorrow and to those who attended the funeral and gave the beautiful floral offerings, we thank you from the depths of our hearts. It is said that when the Lord measures a man, He puts the tape measure around his heart and not around his waist. The Lord would have needed large tape measures here this week. Thank you again and God bless you.

The F M Page Family

Mr and Mrs Otis Harris and children are attending the Fat Stock show at Ft. Worth this week.

Mr and Mrs Oscar Telchik and girls left Friday for Ft. Worth to attend the Stock show

Shack Blocker left for Sulphur Springs Thursday to be with Mrs Blocker, who is still at the bedside of her mother, Mrs. Davis; at last report she was slightly better.

Mr and Mrs. Leonard Shepperd are the proud parents of a fine baby girl born at Lamesa Jan. 24th. She weighed 7 lb 12 oz and has been named Nelda Willene

Mrs. Irene Pierce of Euice, N M are visiting Mr and Mrs. W R Shepperd.

**School Consolidation Vote Is Soon Coming**

This Saturday, Feb 7th, there will be an election at O'Donnell, Wells, and T Bar Communities on the proposal to consolidate the three school districts. The election will be held in the schools of each community. At present the students are attending the O'Donnell school under a contract basis.

FOR SALE Singer Sewing machine; peddle type; good condition. Mrs. Alby Coakrell

Mr and Mrs. J T Middleton Sr. and Mr and Mrs. J. T. Middleton, Jr and daughter, Sherry will leave Thursday for Ft. Worth to attend the Fat Stock show.

WANTED: To buy a good used Piano. Lester Richburg, Rt 1 Stp

Mr and Mrs. Archie Crow flew up from Abilene Sunday and spent the day with Mrs. Crew's cousin, Mr. and Mrs. Glenn Gibson

Mr and Mrs. P P Brewer spent last week at Elda, N M visiting their son and family, Mr and Mrs Bert Brewer.

Miss Billy Frank Gibbs of Deaton has returned home for the spring. Johnny Saleh of Texas U. spent the semester holidays at home

Next week: a CAT tale

Mr and Mrs Ray Connelly have moved to Victoria and R M Mc Hurin has taken over management of the market at B and O.

Mrs. Vaughnie Gibson is visiting in Paducah.

Virgil Wright of Ft. Worth spent Sunday with his sister and family, Mr and Mrs. John Ellis

Mr and Mrs. Jake Penn of Lubbock visited her aunt, Mrs. J W Riggs Monday

**Contract For Paving Is Ready For Letting; Some 11 Blocks Sure To Be Paved**

Paving agreements on seven blocks, that is the 3 square blocks and the four to the Santa Fe station have been completed with the bid ready for letting Wednesday nite. Some 14 more blocks in the residential area, are being worked up. Credit for the progress goes to John Earles and Jake Gates who are using lots of personal contacts on the project. Work will start immediately with shooting to be done with warm weather. Paved streets for Big O. A dream come true. Hot Dog!!!! Who's the Ard that says O'Donnell won't pull together.

**VALENTINE CANDY King's & Pangburn's WIESE DRUG STORE**

Introducing, JOBE

WE BELIEVE --- We have the BEST parts man that can be had. He is trained to give you the service that you deserve --- and the service that you want you to have. Come in and tell him your needs regardless of what kind of tractor or car you have, he either has it or will get it for you PROMPTLY. What we are trying to say is this --- Come in and meet JOBE. Five will get you tea, that you will LIKE to deal with him. --- We have also added two more mechanics to our staff -- the best. WE ARE IN a position to do any kind of mechanical work regardless of what it is -- from brother's bicycle to M's washing machine to John Santa Fe's Locomotive -- more especially --- ANY CAR or ANY TRACTOR that runs on wheels. Our work is guaranteed to YOUR Satisfaction; if it is not right, tell us -- we will make it right. ASK ONE OF OUR CUSTOMERS WHAT HE THINKS OF O'DONNELL IMPLEMENT CO. -- A. K. WILLIAMS

# Lincoln—His Spirit Is with the Ages

## Martyr, Emancipator, Myth, Abe Is 'Builded Forever'

By BAUKHAGE  
News Analyst and Commentator.

Like everything else in this political year, preparations for Lincoln's birthday in 1948 are chiefly a matter of scrambling through the Great Emancipator's writings to find a text for a highly-partisan outburst. But February 12 is the occasion for more than a barrage of political speeches.

To me Lincoln is real because he and my childhood conception of my grandfather are strangely blended. Both, like Merlin's Camelot, are builded forever because, to me, they never were builded at all—they were myth rather than fact—a myth not of my own making, but handed down through two generations.

My mother, as a little child, "saw Lincoln" (like a man "sleeping," she thought) as he lay in state in Chicago. My grandmother stood beside her swathed in the heavy mourning veil of the day which she felt perhaps was as much for Lincoln then as it was for her soldier-husband who had given his life in the same cause. To my mother, staring at that coffin in Chicago, there always remained a confused impression of mourning for the man she thought was not dead, but sleeping, and the father she never had seen. Perhaps that feeling was imparted to me.

My mother described the scene to me. It was clearly etched in her memory like the rest of the strange begonia which she took westward with her widowed mother from a little town in New York state (as a bride, my grandmother had pioneered the West with her young New York state farm-born husband).

Of course, the memories were blurred and blended, undoubtedly, with later repetition of the event, but the picture was clear, and I only wish I could repeat it in my mother's own words. The train trip west, the arrival in the great city, the crowd about her as she advanced slowly with her mother into the great hall. Then the coffin which she did not know was a coffin for there was no such word in her tiny vocabulary.

Her mother let go the little girl's hand to move back her own heavy veil. Then the little girl remembered being lifted in the strong hands of the guard. About him she could recall only a blue tunic, shiny brass buttons and the smell of tobacco. Then the face of the "sleeping" man, and her mother's quiet tears.

(The body of the martyred President, as you know, was taken from the East Room of the White House to the capitol where it lay in state. Then it was carried across the country, pausing for homage in several cities until it reached Springfield, Lincoln's home.)

I repeated my mother's story after her death, as best I could on the air—and there were sequels.

Letters—one from a lady in New England for whom the broadcast had awakened memories . . . her father had been one of the Union soldiers chosen to stand guard at the catafalque in Chicago. It might well have been he who lifted my mother.

The soldiers who had been chosen for that honored duty were permitted to divide the gold-fringed drape that covered the coffin, she wrote me, and she assigned to me a fragment which I cherish.

There were many other letters. One from the niece of one of Lincoln's cabinet members, William Pitt Fessenden; another enclosing the announcement shown in the cut.

Those were two sequels to the story of the little girl and her weeping mother. I think the everlasting sequel can be read again and again in the story of America, as the story of Lincoln is projected far on into history. I think I have seen it projected in the crowds who come to Washington, avid with guidebook and camera to collect "souvenirs."

Only this week, the garrulous cab driver who carried me from Union station was full of a story of "South Americans" who spent endless hours (according to his timing) at the Lincoln Memorial. The memorial remains a shrine for all visitors, native and foreign, a place where flippant chatter is stilled before that almost living replica warmed to life out of cold marble by the inspired hand of Daniel Chester French.

It lives as the spirit of Abraham Lincoln lives.

To the little child beside the catafalque, except for her mother's tears there was no mourning in that moment. Only something solemn, something important, something that touched old and young alike because it had in it the cosmic rhythm of the epic, and, as well, the simple, soul-touching melody of the folk song.

And I wonder if there was not some intangible, some eternal quality of what Lincoln did, or what his character has etched into the his-

Baukhage

**PROGRAMME**  
OF  
**Funeral Ceremonies!**  
IN HONOR OF  
**PREST LINCOLN**  
To be held in the  
**ROTUNDA OF THE CAPITOL**  
Thursday, May 4th, 1865, at 3 o'clock P. M.

story of America, that gives Americans the assurance that his spirit, especially in these times when evil gods make their black magic to be-muse the minds of men, is not dead, but sleeps, waiting only the clarion call of the people whom he loved to wake it into action.

### Free Speech, Russian Style

The Russians celebrated Christmas with a public criticism of Russian factories by the commercial director of Mostorg, the Soviets' largest department store. The director complained that the factories were producing inferior products. He wanted more and better goods, more washing machines, vacuum cleaners, refrigerators and decent furniture.

Are you surprised that such criticism is permitted? If you are, you don't understand the Soviet system. Criticism is allowed as a sound method of correcting faults — although it doesn't necessarily displace the "cure," which means banishment temporarily or permanently to Siberia, just as in the good old days.

I am reminded of columnist Lowell Mellett's story about the scope of Russian criticism. On his trip to Russia, he was shown around by a very clever female guide. Mellett asked her about freedom of the press, and she said, "Oh, yes, they had a free press, the press continually criticized things, including government enterprises."

Well, would they be allowed to criticize Stalin, Mellett wanted to know.

"Why!" the girl was surprised. "What has that got to do with it? You couldn't criticize him because there is nothing about him to criticize!"

Secretary Marshall wants the European recovery plan to be run by a single administrator, not an eight-man board as has been suggested. If the old saw that the best-working committee is a committee of three with two members out of town is correct, perhaps Marshall is right.

January saw three presidential messages presented to congress. Each document had many a passage born only to waste its fragrance on the desert air of an unsympathetic majority.

Too bad the Republicans don't care for Mr. Truman's budget. The budget message was printed up so nicely, bound so neatly, and it is unique—unique in that it is the biggest peacetime budget ever presented to any congress.

### HAPPY HOLIDAYS

## This Won't Happen Again Until 1976

You like to have holidays fall on weekends? Then 1948 should be a year of great promise.

Most of the major holidays this year will fall on Saturdays and Sundays, which is either good or bad, depending on how you feel about getting time off down at the old mill.

Sundays, whereon fall Washington's birthday, Memorial Day and Independence Day, aren't too bad because the government and most other employers observe the Mondays following as legal holidays and so extend holiday benefits to their employees.

But for the working man it's a rough shake when a holiday falls on a Saturday, for it doesn't bring an alternate day off. And this year

TRUMAN ENLISTS . . . Clifford Edgar Truman, 17, of East Chicago, Ind., third cousin of President Harry S. Truman, has enlisted in the navy. He is being sworn in by Lt. (j.g.) Robert Rizzone for his three-year hitch, and will study aviation radio after his basic training.

### NEWS REVIEW

## Nazi-Soviet Pact Told; Too Much Aid: Hoover

The celebrated "cold war" has been enriched by another U. S. propaganda strike, probably the heaviest yet, against Russia.

It took the form of official state department publication of captured German foreign office records revealing the extent and nature of Nazi-Soviet relations from 1939 to 1941, the period covered by the non-aggression pact between the two nations which ended when Hitler attacked Russia on June 22, 1941.

In the light of the U. S.-Russian wartime alliance, the Nazi documents, published in book form, tell a sordid story of secret agreements, global gambling with nations for stakes and the feverish fetish of political expediency which gripped the minds of German and Russian leaders before and during the war.

High point of the hitherto secret dossier was the revelation that in 1940 Adolf Hitler and V. M. Molotov of Russia agreed that Britain and the U. S. must be excluded from Europe, Asia and Africa.

The book told also how, in 1940, Stalin had offered to join the German-Italian-Japanese axis if Hitler would give Russia a free hand in Finland, a military base near the Dardanelles and a dominant voice in the oil-rich Middle East. Then the documents show how Hitler, disdainful even to answer Stalin's proposition, ordered his armies to prepare "to crush Soviet Russia in a quick campaign."

One of the major factors which precipitated the German attack on Russia was the Soviet demand for dominant control of the Balkans. Hitler, who was as aware as any man of the political, economic and strategic value of the pivotal Balkan area, turned thumbs down on that Russian desire also.

Sum and substance of the state department's spectacular publication of the Nazi documents was little more than an emphatic indication of an already well-known fact: That Russia, with aggressive consistency, has been hungering for years for leadership in the Balkans, for new pre-eminence in the Dardanelles, for expansion in Central Asia and for a free hand in Finland and Poland.

Value of the publication of these documents at this time is questionable, despite the flagrantly apparent anti-Russian propaganda they can and will inspire. State department's action obviously was aimed at rallying public support behind the Marshall plan, soon to come up for congressional action, but it also would serve to aggravate and inflame the already dangerously touchy "cold war."

### Rubber Bill

Legislation to establish a permanent, government-regulated American rubber industry with a 675,000-ton annual capacity and a required annual production of at least 225,000 tons a year has been introduced by Rep. Paul Shafer (Rep., Mich.).

The bill refers throughout to the product in question as "American-made rubber." The word "synthetic," as the term for factory-made rubber, is not mentioned.

### FOREIGN AID:

#### Hoover Plan

Herbert Hoover, former U. S. president, has urged congress not to commit this nation—even "morally"—to a four-year European recovery program, and advised a reduction of the 6.8-billion-dollar outlay proposed to carry the Marshall plan through its first 15 months.

In the 4,000-word statement which he filed with the senate foreign relations committee Hoover expressed his opposition views to the administration's foreign aid plans.

Of greater significance, however, was the fact that Hoover's own opinions amounted to a documentary of the entire right-wing, conservative element of thinking which rejects an "internationalist" foreign policy on the grounds that U. S. resources should be concentrated at home.

Decrying even a "moral commitment" for the four-year period contemplated in the state department's proposals, he asserted the U. S. should keep itself entirely free "to end our efforts without recrimination."

He expressed, too, the fear that a lavish outpouring of aid would weaken the American economy to the extent that all world recovery would be defeated.

The volume of exports and funds proposed in the Marshall plan, he opined, might aggravate the already serious inflation, draining our national resources and continuing high tax rates, "all of which might bring depression and thus destroy the strength of the one remaining source of aid to a world of chaos."

Hoover recommended further that the Marshall plan, if it is adopted, be run by a bipartisan commission, and suggested that up to three billion dollars in food, coal, fertilizers and cotton be labeled frankly as "gifts" because unsecured loans "will not and cannot be repaid."

### REFUSAL:

#### Prediction

About all the average U. S. citizen knows about Gen. Dwight D. Eisenhower is that he either will or will not get into the campaign for the Republican presidential nomination this year.

But Roy A. Roberts, president of the Kansas City Star and leading promoter of pro-Eisenhower sentiment, now says he definitely will not.

Roberts' prediction was that the general soon would remove himself from all consideration along those lines. Said Roberts:

"I'll venture a guess that before June the general may take himself completely out of the political picture. I am sure the message will come when he lays aside his military uniform February 15."

He emphasized, though, that he was not speaking for Eisenhower. With Alf Landon, 1936 Republican presidential nominee, Roberts had been doing most of the political drum-beating for Eisenhower.

**FIVE-STAR WINNER . . .** The five-point program of the Tupelo, Miss., Rural Community Development council forms the theme of this community booth, which won first place over 18 entries at the 1947 Mississippi-Alabama fair. Dairying, cotton, truck farming, poultry and forestry are the points emphasized by the council in its plea for diversified farming.

### SMALL TOWNS, U.S.A.

## Mississippi Project Sets Pattern in Rural Planning

By EARLE HITCH  
Released by WNU Features.

Country life must be made hopeful, healthy and happy if rural regions are to continue as the main source of our national strength. One of the major phases in the revamping of that rural pattern of living is the expansion of rural occupations. For the first time since the factory system put an end to handicrafts in the home and village shops, economic development is taking a turn favorable to the rural environment.

For more than a century it has been otherwise. Rural enterprise, limited to farming, followed a dwindling retail trade, followed the path of non-resistance. Outside of the fertile farm belts and the mill towns of the upper South, country income has been declining as the land wore out and the people left for jobs in the city. Now, there are reasons to believe, that trend can be halted. Invention and discovery offer the earning opportunities for which the country has been waiting.

Spinning and churning are gone; likewise, old-fashioned tanning and butchering, milling and hoeing. But those lost occupations, sorely missed in the small farm communities, can be replaced. There is now and better work to be done, both on the land and in the local mills and plants. The community which wishes to increase the earning capacities of its population can do so.

Wasted land can be restored and used for new kinds of small-farm tillage. New production systems, plus the extension of rural power lines, give country manufacture an edge it never has had before. These things, of course, cannot be brought about on a community-wide scale without careful planning and determined leadership. They are most effective when they are undertaken with a long range program for community development.

Rural economic problems are still too much neglected. Only a few intelligent and patient attempts have been made to find durable solutions. Consequently the plans that are succeeding are important not only as local programs, but also as patterns for other places, for there are vast areas of rural America which need some kind of economic rescue.

The most successful plans have to be adapted to particular conditions. Consumer tastes, market locations and the job of organizing public support have to be taken into consideration along with restoring the land and finding out what can be produced by the farmers and the other labor supply. This will take business backing and business management. It never has been sufficient to make a plan and count on it to work by popular voluntary support.

**Ambitious Tupelo Project.** Tupelo, Miss., has one of the most energetic and far-reaching plans in the country. It is a plan not for Tupelo primarily, but for the large rural area of which Tupelo is the center. The project is especially valuable from the fact that it is not limited to dealing with present rural problems, but also is looking ahead to problems that probably must be faced in the future.

The Tupelo program is no sudden outburst of enthusiasm. It has been several years in maturing, and it is the more effective now for having made progress with caution. It has not started to go anywhere until its supporters believe it is in their power to help it get there.

Chief factor in success of the Tupelo plan is the kind of sponsorship it has. The leadership and the full influence of the Tupelo Daily Journal and its publisher, George McLean, are supporting the project. The Daily Journal has guaranteed the funds necessary for the first three years' activities. The Chamber of Commerce, of which McLean now is president, is doing its part by financing a special program in horticulture, which is allied with the plan in general.

In previous years banks and business men have helped introduce dairying and better dairy breeds. Tupelo business men realize that business will thrive and their town will grow to the extent that the entire community prospers. They are convinced that there should be more earning opportunities on the farms and in the rural neighborhoods. They are helping not only to build up a better farming industry, but also to promote new town industries that will make assured markets for things produced on the better farms.

The plan that has been developed covers five counties and is the biggest rural community development plan in the United States, in the number of people it affects and the extent of its program. It already is demonstrating how small farming resources can be improved when energy and imagination are applied.

The next article will give details that were followed in establishing the Tupelo plan.

been several years in maturing, and it is the more effective now for having made progress with caution. It has not started to go anywhere until its supporters believe it is in their power to help it get there.

Chief aims are to encourage new types of farming, especially types that will aid in soil enrichment and at the same time yield better income to the small hill farmers. Poultry and fruit growing are being emphasized, and dairying has been backed for a number of years. To aid in getting this work started and to keep it going, several specialists have been hired with funds contributed by the program's backers.

Community Backing. Chief factor in success of the Tupelo plan is the kind of sponsorship it has. The leadership and the full influence of the Tupelo Daily Journal and its publisher, George McLean, are supporting the project. The Daily Journal has guaranteed the funds necessary for the first three years' activities. The Chamber of Commerce, of which McLean now is president, is doing its part by financing a special program in horticulture, which is allied with the plan in general.

In previous years banks and business men have helped introduce dairying and better dairy breeds. Tupelo business men realize that business will thrive and their town will grow to the extent that the entire community prospers. They are convinced that there should be more earning opportunities on the farms and in the rural neighborhoods. They are helping not only to build up a better farming industry, but also to promote new town industries that will make assured markets for things produced on the better farms.

### Women Uphold Law On Idaho's Frontier

BURLEY, IDA.—Women still uphold the law in Idaho. When the only woman deputy sheriff in the state resigned to get married, Sheriff Saul Clark promptly appointed another woman to take her place.

Marjorie Philbrook resigned as deputy sheriff to marry Cleve Johnson, state highway patrolman, so the sheriff gave her job to Mrs. Barbara Lindsay.

### Seedy Party

SHENANDOAH, IOWA.—When a local seed company provided its employees with a watermelon treat, it was strictly a matter of business. The company wanted the seeds.

### Chapel to Mark Bravery of Chaplains

PHILADELPHIA.—The bravery of four wartime chaplains, two Protestants, a Roman Catholic and a Jew, who gave up their life belts on a sinking troopship and were last seen standing together, arm in arm, their heads bowed in prayer, will be commemorated in a chapel being built here under sponsorship of the Philadelphia interfaith sponsoring committee.

The shrine, which will be known as the "Chapel of the Four Chaplains," will be open 24 hours a day and will provide facilities for the worship of Protestant, Jewish and Roman Catholic faiths. Approximately \$150,000 has been raised for the chapel.

The chaplains were among 1,100 troops aboard the Dorchester, a troopship en route to Europe, when it was torpedoed and sunk in the North Atlantic on February 3, 1943.

## FOUR FLIGHTS UP TO HEAVEN

By FREDERICK LAING

THE landlady was smiling at them like the wolf in Red Ridinghood. "You look kinda young to be a married couple." "Oh we aren't married yet," Peggy blurted out. She felt Bill's fingers tighten on her arm. "So you better show us that apartment before she changes her mind," he added. She glanced up at him with a nervous little smile, feeling ashamed, wishing she hadn't let him read her thoughts. The landlady laughed and Peggy laughed louder than she'd wanted to. "We want two rooms," Bill said, "two rooms and a decent kitchen. And not facing on the street, please. Too many trucks in Greenwich Village to suit me." "I adore the Village," Peggy said quickly. The trouble was, the words seemed to jump out before she knew what she was going to say. Bill stared up at a long crack in the ceiling. "Sure, we adore the Village."

She pinched him when the landlady wasn't looking and he gave her hair a tug, and everything was all right again. They followed the landlady up the stairs. She had just the thing for them, she said. "A couple of kids like you won't mind walking up four flights." "Oh, no," Peggy answered. Then she glanced at Bill. "Well, would we?" Bill looked up at the ceiling again. "Oh, no." She knew what he was thinking. And it was true. She didn't want to live in a place that had elevators. Bad enough to have him come home talking about them every night. Bad enough to have to answer the neighbors' questions with, "My husband? Oh he... er, sells elevators." She could see them lifting their eyebrows. "Elevators? Pardon me for smiling, Mrs. Bill, but I never knew any one had to sell elevators. I always thought they... just happened."

No, definitely not a place with elevators. She didn't want to be reminded of her husband's business every time she went in and out of the house. The landlady's short, bowed legs were leading them up the stairs briskly, showing them how easy it was to climb four flights. "You'll find it nice and quiet here, I'm sure. The gentleman who has it now has been there three years. And he's a writer." "A writer?" Peggy had kind of a funny feeling all of a sudden. Like she'd gone up in an elevator too fast. A writer. That was what she'd always thought she'd marry some day. Or maybe an artist. Somebody like that.

**Peggy Is Intrigued**  
They were walking up the last flight now and some one upstairs opened a door. Don't let him be any better looking than Bill, she begged. As it happened, he wasn't. He was just a pale young man with glasses. He stood there in his slacks and blue shirt and he looked... well, on second glance he looked... different. Nobody would ever take him for a life guard. That's what she'd thought Bill was that first time, when they'd met on the beach. "Come right in," the young man waved something at them. It turned out to be a monkey wrench, of all things. "Don't mind me, I'm just the plumber." Peggy laughed. It was so unexpected, it made her feel good. "The plumber," she said, as their eyes met, "Imagine." "Some plumber," the landlady said. "That's gratitude," he said, look-

ing at Peggy. "I do her a favor and she makes fun of my plumbing." "I think it's nice if a man knows how to fix the plumbing," Peggy said. She glanced from the thin hands to the thin, pale face. "I really do." He looked pleased. "I'm a painter, too," he told her. "Look, I painted this china closet. What do you think of the shade?" It made her feel so flattered to have a writer showing off for her benefit. "It's a lovely color," she told him. And then she could feel Bill's eyes on her. "Isn't it, Bill?" "Yeah," Bill said dryly, "blue." Peggy winced. Well, that proved he wasn't color blind. "It's the same shade as your hat," this writer was saying. She blushed. "Think of a man's noticing that." "Yeah," Bill said. The way he said it, it wasn't exactly a compliment.

"I think it's nice if a man knows how to fix the plumbing," Peggy said. She glanced from the thin hands to the thin, pale face. "I really do." "If you want to see the apartment," the landlady began sharply. Then she pulled a smile over her false teeth. "This here's the kitchen." Bill said, "You mean the apartment opens into the kitchen?" Behind his glasses, the young man's light blue eyes were looking amused. "Oh you'll get used to it. And it'll give your friends something to talk about." "He's some little talker himself, isn't he?" the landlady said. "I think he's wonderful," Peggy said, laughing. He certainly knew how to make a person feel perfectly at ease.

Then she got a look at Bill's face. She began to feel miserable. If only he wouldn't look like that. Like a... She tried to push the thought out of her mind but it came right back again. Like a disappointed salesman. I'm sure you'll make a mistake if you don't buy our elevators, Mr. Kotch. The landlady led them into the living room, and when Peggy saw it, her heart sat up and begged. Her eyes drank in the bookcase that covered a whole wall, the original paintings on unframed canvas, the oversized fireplace with three painted masks above it. And there was a table with a typewriter and a lot of papers piled-up in careless stacks. What darling taste you have. She almost said it, but she thought about Bill just in the nick of time. "The bedroom's in there," the landlady said. She let Peggy and Bill go into the bedroom by themselves. Bill's head almost bumped

the top of the doorway as they went in together. "This is a dog house," he said. Peggy was in such a daze she thought he said, "Doll's house," at first. "Isn't it," she said excitedly. And then, seeing his expression, "What?" "A dog house," he said. "Look, I can almost touch the ceiling. Listen Peggy, I've learned something about buildings in the elevator business. Do you know how old this house is? Why, it was a dump when they built the Brooklyn bridge." Peggy gasped. "He heard you!" Suddenly all the thrill was gone and her heart felt like lead. Her eyes were blinking as she turned and went back into the living room. Bill followed behind her, stooping with an exaggerated wariness as he went through the doorway. Her fingers were twisting the engagement ring nervously around

and around. One thing sure, she wasn't going to marry an elevator salesman. Or any other kind of a salesman, for that matter. "Listen, honey," Bill said gloomily. "If you really like the place." It didn't matter. Nothing mattered now, really. Just to get out. To get away. To get out of everything as painlessly as possible. "I guess you have to be a writer or something to appreciate it," she told him, forcing out the words. She glanced at the pale young man and managed to smile. "A writer or an artist."

"OH I don't know," the young man protested with a shrug. "What kind of stuff do you write?" Bill asked grudgingly. "Huh?" the young man said. The landlady laughed. "Him? He's no writer. He's my son." And she added proudly, "he sells vacuum cleaners."

Run out of the room. Run down the stairs, she told herself. But Bill's arm went around her shoulders, steadying her, and his arm felt strong and tender. "My man is a salesman, too," she said. And she held her head up. "He sells elevators."

**New Chemical Weapons To Combat Weed Pests**  
Farmers and householders waging war on crab grass and other troublesome weeds and grasses can look for help from two new weapons. The weed-killing chemicals bear the jaw-breaking names of sodium isopropyl xanthate and allyl mixed chlorophenyl carbonate. They have been tested by federal and state agricultural experiment stations "with excellent results against many weeds and grasses not economically or satisfactorily controlled by other chemicals of practices," the announcement said. They are being used in active experimental programs but are not yet available commercially. The second-named herbicide is the one that combats crab grass, as well as barnyard, orchard and blue grass, cattails and similar plants. It has a hormone-like action which attacks the root structure of the weed and arrests growth immediately by preventing seed development, even though no effect is apparent on the surface for the first week or longer. It is also used effectively in combination with 2,4-D against some broad-leaved weeds not affected by 2,4-D used alone. The sodium isopropyl xanthate is described as a "complete killer" which should be applied directly to crop plants. It shows promise for pre-emergence treatment, in spray or dust form, and has been used with success in the chemical weeding of growing crops.

## Hog Mange Causes Average Loss of \$2

### New Insecticide Proves Effective in Control

Common mange of hogs is another widespread disease that has yielded to the results of animal health research. The U. S. department of agriculture says the average losses from mange probably amount to \$2 a head. This figure covers the loss from stunted growth, delay in fattening, occasional deaths and dockage when many hogs are marketed.

The effective weapon against mange is benzene hexachloride, frequently referred to as "666." In Nebraska tests this newly-discovered insecticide was so effective it eradicated mange with one treatment. Not only did it eradicate mange — it also got rid of lice. This makes the old mange treatments obsolete.

In the Nebraska tests, crude benzene hexachloride (a wettable powder) was mixed with water (10 pounds powder in 100 gallons) and sprayed on the hogs.

One objectionable feature of the crude benzene hexachloride is its terrific odor. This odor is not present to any marked degree in commercial hog oils prepared by use of a solvent which takes the active ingredient (the gamma isomer) out of the crude benzene hexachloride and leaves behind the ineffective ingredients—the ones that have the disagreeable odor.

## Herds and Flocks

Pond water piped to farm buildings for livestock can be filtered by building a solid housing of soft brick (laid in cement) over the end of the pipe in the bottom of the pond.

Water filters through the pores of the brick.

First treatment for cattle grubs should be made early in winter, as soon as the tall-tale bumps appear on the backs of animals. Several treatments a month apart will be necessary. Use a cattle grub dust containing 1 1/2 per cent rotenone. The current shortage of feed makes it important to do continuous culling in the laying house.

Dairy cows lose a lot of energy pulling through heavy mud in the barn lots. Lost energy means less milk. Paved lots that take cows out of the mud soon pay for themselves.

## Mow and Spray in One Operation Pays Well

Prof. B. B. Robb of Cornell university demonstrates a mow and weed gadget for applying 2,4-D to lawns. A regular garden sprayer is filled with 2,4-D mixture and pumped up ready for use. Fastened to the lawn mower the sprayer carries a two nozzle boom ahead of the blades and contains enough mixture to cover at least half an acre of lawn.

## Midwest Barley Growers To Compete in Contest

A \$30,000 contest which stresses the importance of certified seed, early planting, seed treatment, use of commercial fertilizer and timely and careful harvesting in growing barley as a cash grain crop that under proved methods of production commands a premium price is announced by the Midwest Barley Improvement association, Milwaukee. The prizes are offered to farmers in seven Midwest states.

**Methods Suggested For Treating Lice Second Application is Generally Necessary**

The poultry grower has a choice of several effective methods for treating lice. Which one he uses will depend on his preference or the availability of remedies, according to Washington State college. Whatever method is used, birds should be examined 10 days to two weeks after treatment to see if any lice still are present.

Louse eggs are not always destroyed by the treatment used, and these will hatch later. A second

Mass of body-lice eggs attached to feathers.

treatment usually is necessary and should be applied about two weeks after the first treatment.

One method is to fumigate with a 40 per cent nicotine sulfate solution. In this case directions of the manufacturer should be followed.

Lice powder also is effective. These may be DDT, nicotine sulfate or commercial sodium fluoride or sodium fluosilicate. These may be applied by the pinch method. It consists of placing on the skin of each fowl about 10 pinches, rubbing into the breast, each thigh, below the vent, on each side of the back, on the neck and head and on the underside of each outspread wing. The fowls also may be dusted, sprayed with dusting material or dipped in a solution. In some parts of the country louse ointments are widely used.

**Corn Production**

Many things are required to produce 100 bushels of corn per acre. The growing crop must have plenty of nitrogen, phosphate, potash and other plant nutrients. A shortage of any will hold down yields and lower the quality and feeding value of the crop. So the use of fertilizer is vital. For high corn yields, the soil must store water for drouth periods. The accompanying chart shows how much of these it takes to produce 100 bushels of corn. Organic matter is especially important. While not a

Nitrogen, phosphate and potash are the most important plant nutrients for growing corn.

plant food, it is essential to crop production. Organic matter improves tilth and keeps the soil loose and open. It is a sponge that soaks up water readily for crops to "drink" in dry spells. It allows air to reach roots and soil bacteria. Organic matter can be built up by growing deep-rooted legumes and grasses frequently in the rotation. To get good stands, liming based on soil tests and a generous feeding of phosphate and potash are needed. Organic matter can be replenished, too, by returning barnyard manure, straw and corn stalks to the land. When plant food, good tilth, organic matter and other soil conservation measures are combined into a team, maximum corn production per acre is assured.

**Rice as Poultry Feed Proves Satisfactory**

Whole and ground rice, rice bran and rice polish are excellent feeds for egg production and growth in chickens when they are adequately supplemented with vitamin A and reasonably free from rancidity.

Whole rough rice proves to be a satisfactory substitute for whole yellow corn when included to the extent of 75 per cent of the grain feed and ground rough rice replaces ground yellow corn.

The annual loss from weeds in the nation has been placed at \$1 billion.

Short pieces of wire, nails and similar articles take the lives of many dairy cattle each year. Watch for hardware in feed.

**"- BUT I WAS RIGHT DEAD RIGHT!"**

"I was going into that intersection first. I had the right of way—that truck driver should have stopped when he saw me—I was right, dead right!"

"Yes dear — you always were right — the other fellow always wrong. That's why we're here."

You know the kind, you've met him on the road—and ducked. He always barges through traffic when it's a question of split-second judgment. Never anticipates other drivers' actions — just assumes that traffic will give way. Owns the road. Drives with his horn.

He may get away with it for a time, plus a few tickets, because other drivers are more careful, more conscientious. But his kind eventually steps on the gas once too often—and for the last time he is "right—dead right!"

## STREAK OF IRISH

By GARTH R. SPENCER

Russ Van Hosen was late but feeling good, with the check from another car sale tucked in his pocket. He walked in at the back door. Pat was stirring something at the cupboard. She heard him, but didn't glance around.

Russ squeezed her shoulders and kissed her, then waited hopefully. Pat didn't respond. After a minute Russ turned away and walked on into the living room. So Pat was still sore. Well, one thing was certain; the next peace move would have to come from her.

He sat down and reached for the sport page. Golf was opening at the Wyaconda Sunday. Well, they probably wouldn't go now; they probably wouldn't go anywhere. Lately, it seemed, they'd been quarreling all the time.

It had begun this time as usual, with a quick sizzling flash of Pat's Irish temper. One of those brief flash-ups which usually ended with little damage done. Only this one hadn't ended yet; it was still dragging on. Well, let it drag!

Maybe by the time it was over Pat would have learned to keep that streak of fighting Irish temper down.

Pat came in from the kitchen. "Russ Van Hosen," she said sharply, "put that paper down!"

"All right," Russ knew what Pat wanted — to carry on from where they stopped last night.

"I want to know," Pat said tightly, "just why you left the party with that Gertrude Hale last night?"

Russ' jaw grew stubborn. "I told you; I went out to start her car, that's all."

"It certainly took you a good long time . . . Where was her husband — why didn't she have him start it?"

"I don't know — he was somewhere around, I guess. Anyway, I had sold her the car."

"Yes," Pat said, "two years ago — before I'd even met you . . . Russ, are you getting a little tired of me?"

Russ groaned. Pat knew better, of course. All she wanted was a row. Maybe he had spent too much time with Gertrude, but what of it? What about Hal Kirk last week? Pat had asked him to stop over and see her on his way in to Chicago. Talk about old pals!

"Well?" Pat insisted. Russ turned back to his paper. "I've said all I have to say."

Pat started to speak again, then stopped. Over the paper Russ saw her face tighten. "All right," she said quietly.

Russ watched her walk across the room and begin to climb the stairs. He listened, and after a moment he could hear her moving about in their bedroom above. Doing what? He wondered. After ten minutes he went to the foot of the stairs and called.

"Pat!" No answer. "Pat!" he called again.

Pat was coming down the stairway; she had on her hat and coat. She carried her bag in her hand.

"Pat," Russ demanded, "where are you going?"

"Why," Pat answered coldly, "should you care?"

Russ studied her face. She was bluffing, of course; threatening to leave. Well, two could bluff. "That's

right," he said, "why should I?" "I'm going back to work for Hal, if you want to know."

A little stab went through Russ' heart. "Simply because of Gertrude Hale?"

"Not entirely. . . . Russ, we simply can't go on fighting all the time."

"You know," Russ said evenly, "I've been thinking that same thing."

Pat's lips whitened again. "So that's settled. . . . I'll need some money," she said.

Russ took out his billfold. It held three fives and a ten. He offered her the bills. Without looking at them Pat shook her head.

"That's not enough," she said. "I'm taking the next plane at the airport."

Russ was sure now that she was stalling, giving him a chance to beg

her to stay. If he gave in this time he'd have to give in always. The stubborn lines of his jaw hardened. Taking the car check from his pocket he endorsed it with his pen.

"This is on Conway & Company," he said; "you can cash it anywhere in the state."

Pat's cheeks went fiery red. Her voice was low, but it trembled. "Russ Van Hosen, I could murder you! Give me those bills and let me go!"

Russ said nothing. He watched her back the car out onto the drive.

Not until then did full realization come over him. He had held firm; he had won a moral victory. But Pat was gone.

Russ walked slowly back into the living room. He was still dazed, unable to believe it. Ten minutes passed, a half an hour. Then memories began to rise and choke him; a hundred memories of the sweet times they'd had together—

From that first day when they'd met at the golf course. They'd played together and he'd beaten her, in spite of the ribbing she'd given him over his mis-matched patched-up clubs. He'd been saving to buy a new set — but he'd bought her a ring instead.

If there were only some way to get her back—

Russ swallowed against the painful aching in his throat. What a fool! To think their little spat had mattered — as if every couple didn't have them during their first year. . . . Maybe even now, if he should call the airport—

The clock struck ten, booming through the awful emptiness of the house. Russ grabbed the phone; the plane left at ten. Feverishly he dialed the number. "Airport? . . . Listen, has the plane — It's gone!"

The silence of the house beat against his ears. He couldn't stand it here; he had to get out, do something. Russ started for the front door, then remembered it was raining. His raincoat was in the closet off the kitchen door.

The closet was dark; his searching arm knocked down a package, a long package that clinked as it fell. He dragged it into the light.

Russ took out his billfold. It held three fives and a ten. He offered her the bills. Without looking at them Pat shook her head.

From Kirk's Sport Shop, Chicago. It contained a set of perfectly matched clubs.

So that was it! That was why she had had Kirk stop there. To get a present — for him. All these months, Pat had been scrimping on her clothes, pinching, saving—

What a heel—WHAT A HEEL—he had been!

A sound from behind startled him, the turning of a latch. He whirled. Pat stood in the doorway. Pat's eyes were blazing; her cheeks were on fire.

"Russ Van Hosen!" She stamped her foot, and it shook two bright tears out on her cheeks. "Russ Van Hosen, I COULD MURDER YOU!"

"Honey," Russ gasped. "Honey-girl!"

"Don't honey me! For a half hour you've let me sit out there in the drive. In the rain! Waiting . . . for you to come out and get me. But you wouldn't. Oh, how I hate you! Instead you waited until I had to give in myself — humbling my pride—"

Suddenly Pat's voice broke. Her arms went around him. "Oh, Russ, I don't care what you did. But say you love me—that you'll always love me! . . . Because, I love you so!"

Russ didn't answer; he didn't want to answer. All he wanted was the assuring feel of her in his arms.

"Russ," Pat was sobbing, "even while we were quarreling I loved you. If you could only forgive that streak of Irish in me—"

"I can," Russ said humbly, "if you can overlook a streak of stubborn Dutch."

## Shoes Require Special Care in Wet Weather

Shoes often suffer from wet weather. Once soaked they may never look as well or fit as comfortably unless they are properly dried and cared for.

Extension clothing specialists say that wet shoes should be taken off as soon as possible. Leather is weak when it's wet. Wearing wet shoes may pull them out of shape and cause breaks and other damage.

Wet shoes should be stuffed with soft paper or absorbent cotton to take up moisture. Never use tension shoe trees because they may stretch the leather out of shape. Instead of drying the outside of shoes by rubbing, which may roughen the leather, pat with a soft cloth. When the inside moisture is absorbed, remove the stuffing and let the shoes dry slowly away from the heat. Fast drying with heat makes leather shrink, harden or crack.

As the shoes dry, clean them with saddle soap. Follow this with a little sun-dried castor oil rubbed in by hand. This treatment keeps leather soft and pliable. Work or play shoes that do not need polishing may be softened and made to resist moisture by rubbing them with beeswax, tallow, wool grease or petroleum jelly. Well-oiled shoes not only turn off moisture but also last longer.

Outdoor work or children's shoes may be softened after getting wet by rubbing them with warm—not hot—neat's foot oil, castor oil or tallow.

Leather soles can be made moisture resistant by setting the shoes in a pan of just enough warm oil to cover the soles. Let them stand in this 15 minutes, taking care not to get the heels in the oil, for oil rots rubber.

## Good Soil Increases Farm Crop Yields

### Tests Reveal Value Of Proper Nutrients

High crop yields per acre on the farm, like mass production in industry, are the secret of financial success, according to Emil Truog, professor of soils at University of Wisconsin.

"It costs no more for seed and tillage — usually the main expenses in crop production — to grow a \$50 crop than a \$25 crop," he declares.

Wisconsin tests show that additional crop yields resulting from heavy fertilization cost only \$2 to \$3 per ton for alfalfa and 10 to 15 cents per bushel for corn and oats.

"The extra cost of a larger yield per acre lies simply in the

Proper fertilization has paid on thousands of farms, whether applied to corn, wheat, oats, soybeans, cotton or any other crop.

additional fertility removed from the soil. But even this is partly compensated for in the case of legumes by the greater amounts of nitrogen the bigger crop supplies to the soil.

"High acre yields are also the secret of success in erosion control and soil conservation. When yields on less erodible land are doubled or tripled through adequate liming and heavy fertilization, a bigger acreage of more erodible lands can be returned to forests and permanent grass. That means more and better food for all."

## Herds and Flocks

Damp litter in laying houses frequently results in colds and other diseases. Dampness around water containers can be eliminated in pens with running water by putting a drain pipe through the floor and setting the watering pan on a frame over the drain pipe.

Dry litter pays off.

Feed is wasted when animals die. A pullet that dies in December represents a loss of 40 pounds of feed. The loss of a newborn pig represents a loss of 140 pounds of feed.

To avoid excessive loss of butterfat in skim milk in winter, run enough hot water through the separator bowl so it will come out the cream and skim milk spouts. Do this as soon as separator is up to normal speed.

Moldy or inferior corn is less likely to cause trouble when fed to cattle than when fed to horses and mules.

## Mechanized Hog Farm Makes Pig Raising Easy

A fully modernized and mechanized hog farm can be so rigged that one man can handle 100 sows and bring to market each year 1,500 to 2,000 hogs—a half-million pounds of pork on the hoof, according to Dr. Waldo Semon of the B. F. Goodrich company.

This is possible by mechanized means of conveyor belts, chutes and other devices. Tests show, he said, that rubber-tired tractors and other farm vehicles require only 40 to 50 per cent as much pulling power on plowed ground or sod as do steel wheels, and can plow a field in 25 per cent less time and with 25 per cent less fuel consumption.

## Deep Litter Will Help Keep Laying House Dry

Deep litter will help keep well-insulated and well-ventilated laying houses dry this winter, says Iowa State college. Not only will there be more eggs to put in the crate, but also the house need not be cleaned as frequently if the litter and droppings are kept dry. A deep litter keeps the floor dry because it develops heat as it slowly decomposes in the laying house, insuring better flock health.

## HOUSEHOLD HINTS

Casters that are oiled periodically make furniture easier to move while cleaning.

If a dress pattern calls for ruffles or flounces, choose crisp material for them.

The suction attachment of an electric vacuum cleaner may be used for cleaning hot air registers.

To keep order in the bathroom and prevent squabbles, assign wash cloths and towels of a certain color to each member of the family. Never change the color scheme, though.

## Grand Relief FROM SNIFFLY, STUFFY DISTRESS OF Head Colds!

A FEW DROPS WORK FAST . . . RIGHT WHERE TROUBLE IS

Instantly relief from head cold distress starts to come when you put a little Vicks Va-tro-nol in each nostril. And if used in time, Va-tro-nol also helps prevent many colds from developing. Follow directions in package.

## VICKS VA-TRO-NOL

COMMON SENSE . . . proved thousands upon thousands of times! **ALL-VEGETABLE LAXATIVE**

In NR (Nature's Remedy) Tablets, there are no chemicals, no minerals, no phenol derivatives. NR Tablets are different—act different. Purely vegetable—a combination of 10 vegetable ingredients formulated over 50 years ago. Uncoated or candy coated, their action is dependable, thorough, yet gentle, as millions of NR's have proved. Get a 25¢ box. Use as directed.

## LOOKING AHEAD

by GEORGE S. BENSON  
President - Harding College  
Searcy, Arkansas

## For All the People

America, we sometimes say, is made up of Fords and Frigidaires, Kodaks and Coca-Cola. We like brands and trade-marks. We respect the successful products of industry, and have confidence in them. We're even likely to take these things for granted, without knowing the how or why behind them. America is the only land where initiative, enterprise, and competition have been allowed to work for the good of all the people.

Yet, to view our industry as comprising a few great names and trade-marks only, is to have a confused and off-balance picture. To think that manufacturers of goods we all like to buy—automobiles, for instance—are the "great monopoly" is to fail to see how big and how productive the nation really is. Neither General Motors, nor any of the others, could get by without their hundreds of helper factories that make everything from cotter-pins to hub-caps.

## Where the Supplies

These helper factories are in turn supplied with parts and materials by hundreds of other firms. A supply line may even go back to a simple "alley shop," where three or four men grind or polish a part. Or take a town like Worcester, Mass. The total wage bill there for workers in plants supplying the automotive industry was almost \$40,000,000 in 1946. That's a good sized payroll.

Or take the whole parts industry, of which there are more than 1,000 companies, with plants spread all over America. Most of these parts producers are small businesses, employing less than 500 workers each. Usually their origin may be traced to fertile minds that invented and patented an idea for improving automobiles. Many newcomers are still getting into the parts and equipment field. Under the American system, this is possible.

## Each Has a Part

Mistaken in their complaint about monopolies, in the next breath some folks berate the "machine age" for not offering the worker a chance to take pride in his work. Just putting in cotter-pins all day in the same old assembly-line position, they say, is poor substitute for craftsmanship. Right here, I want to go on record as praising the free and responsible American who put the cotter-pins firmly and safely in the chassis of my automobile! He did a good job.

I'll give the average American worker the praise that is his due. He has the intelligence to see his place in our method of mass production of goods for the use of everybody. Not so long ago, war workers were being told they were "right behind the man behind the gun." Indeed, the lowliest assembly-line worker or file-clerk is a part of peace-time production. And it is this production that makes America the best land in the world in which to live.

Yes, hundreds and sometimes thousands of suppliers and fabricators are the craftsmen behind the automobiles we drive, the radios we hear. As workers in a free America, we can never overlook the importance of the place we have behind the name tags on the products of our skill. As we work, and to the extent that we understand and depend upon that system, so shall we succeed in preserving American ways and liberties.

**Lice Inflict Heavy Damage on Cattle**

**DDT Treatment Cuts High Winter Losses**

Lice are injurious to all types of cattle. Animals produce less meat and milk if lice are unchecked. Young animals and poorly-nourished old animals suffer most from lice.

The winter season is the time lice are bad on cattle. The louse population builds up then. Dr. Harold Gunderson, extension entomologist at Iowa State college, says one louse unchecked in fall means 1,000 the following March.

For lice control on cattle, DDT is being used successfully. Early in fall, before cold weather arrives, it is mixed with water and sprayed on the animals. After cold weather comes, a DDT dust is recommended. Farmers are being advised to use a dust containing 10 per cent DDT. Some of the powdered louse killers on the market contain less than 10 per cent DDT, but have other effective insecticides combined with the DDT.

The rotenone dusts recommended for cattle grub control can be used for lice control. Usually they are diluted for lice, to cover greater area and reduce the cost. For instance, one pound of a cattle grub dust containing 1 1/2 per cent rotenone can be mixed with two pounds of flour to make an effective louse killer.

**Proper Treatment Will Halt Termites**

**Tests Show Need for Protecting All Lumber**

A visit to tropical Barro Colorado Island in the Panama canal zone 21 years after a termite test building was erected to test effectiveness of coal-tar creosote and zinc chloride in protection of wood against ter-

Panama test house. This photo shows that treated wood had not been attacked by termites.

mites has shown that despite this "termitic heaven," inhabited by some 45 different kinds, termites can be defeated by proper wood treatment.

This will be good news to farmers and home owners who see their wood foundations, walls and floors fall away before the onslaughts of the wood destroying "disease."

After 21 years the impregnated wood was sound, but a cot of untreated wood left in the house was riddled by termites.

This would seem to indicate that in building a house or farm building, lumber, including the shingles, should be treated as well as the fence posts. It was found that when the termites found no edible wood, that is untreated wood, that they soon moved to new territory.

Tests have shown that soil-poisoning, although beneficial, is less permanent and should be resorted to only where structural control methods are impractical, or in addition to them.

Another aid is to discourage termite activity by adequate drainage, ample ventilation and removal of wood debris.

**Bunching Vegetables**

Bunching vegetables for retail sales takes a lot of work when the produce must be taken to a packing shed. The tying wheel designed by Alfred F. Foote can be taken into the field and moved from place to place. The notched rim of the wooden top holds a standard bunch of broccoll while it is being tied. The pipe frame is welded to the wheel spindles, and the whole machine can be handled like a wheelbarrow.

**Light Bulb Brooder**

It is possible to construct an electric brooder for baby chicks at little cost. Box lumber, wall-board or similar material may be used. The globe is protected by a tin can. For the curtains, burlap may be used. The burlap or cloth should be cut three or four inches high about every two inches.

**Flies Resistant to DDT**

Developed by Scientists  
 A strain of DDT-resistant houseflies, requiring nearly twice as much of the chemical to kill them as ordinary flies, has been developed by the USDA. The possible future development of DDT-resistant houseflies in nature is of considerable importance to public health. The problem depends somewhat on how long it may take for wild flies to develop such resistance. This would complicate control.

**World's Largest Potato Yard Found in Chicago**

The world's largest potato yard is located — not in Idaho, nor in Maine — but in the largest city near the geographical center of the nation — Chicago.

In the Wood street yards of the Chicago and Northwestern railroad,

an average of 20,000 carloads of potatoes are handled annually. Many thousands of tons of other vegetables also pass through this yard.

The yard is the central marketing point for potatoes, which come in from virtually every state in the union. Dealers and brokers assemble in the yard each day before dawn to buy, sell or reconsign an average of 36,000 bushels daily. The Wood street yard is a far cry from the wooden platform which served as a terminal years ago.

WHEN YOU PLAN TO BUILD, REMODEL OR ADD NEW ELECTRIC APPLIANCES...

**BE SURE Your Electrical Wiring Will Efficiently Carry the Load**

There's a lot of thinking and planning being done now which will result in the building of many new homes and much remodeling and modernization of existing homes when spring rolls around.

Right now, when all this activity is still in the thinking and planning stage, is the time to carefully consider the problem of providing Adequate Wiring for Tomorrow's Electrical Living.

Adequate Wiring simply means LARGE ENOUGH WIRES to satisfactorily carry enough electric power to lights and appliances—ENOUGH ELECTRICAL CIRCUITS to prevent overloading—PLENTY OF CONVENIENCE OUTLETS and SWITCHES to make sure that your electrical appliances can efficiently and conveniently do their job of making housework easier and home-life more comfortable.

Before you build or remodel, consult your architect, builder or electrical contractor about Adequate Wiring.

**HOW TO SIGNAL A CAR FOR HELP AT NIGHT**

IT'S MIDNIGHT. It's an emergency. How to "flag down" a passing motorist? Your flashlight is your best bet. Swing your flashlight across the road... with the beam down! Be sure it's powered with "Eveready" batteries... powerful, dependable, they outlast all other brands!

**KEEP YOUR LIGHT MOVING**, says the AAA. Standing about 50 feet to the rear of your car, wave the flashlight across the road... with the beam down! DON'T throw the beam into the eyes of the oncoming motorist! A light in a driver's eyes can cause a serious accident!

**KEEP A "DANGER SIGNAL" HANDY!** Red means "danger." So here's what you can do to turn a flashlight into a danger signal. Roll a sheet of red cellophane around the head of the light. Hold it in place with a rubber band. Twist the ends of cellophane to resemble a flare. Keep an "Eveready" flashlight handy.

Proof!... in the laboratory, in your own flashlight...  
**'EVEREADY' BATTERIES OUTLAST ALL OTHER BRANDS!\***

Brighter light, longer life! That's what you want in a flashlight battery—and that's what you get with "Eveready" brand batteries. Laboratory tests prove it. And the best "laboratory" of all—your own flashlight—proves it! That's why "Eveready" batteries outlast all other brands—because they outlast all other brands!

**Pumping Oil Fields in Reverse**

PITTSBURGH, PA.—By pumping water and natural gas into the depths of the oil fields, modern science is bringing 10 to 50 per cent more oil to the surface. This typical cross section shows one way it's done. Here gas is pumped in above the oil pool, and water underneath it. These artificial pressures, from above and below, force the oil to flow thru the sand or rock in which it is imbedded and up the well shaft. Sketch is based on an explanation by Gulf Oil.

Rats found in Texas are the Norway rat and Alexandrine rat. The Norway rat is on the ground under buildings, in attics, lofts, under roofs in double walls.

son and properly used will give excellent results. Thoroughly cover the area where rats harbor with one application. Wait at least two weeks before spreading poisoned bait again.

The annual whaling season is on in the Antarctic and due to the world fat and oil shortage, it is an important business.

**8248**  
12-20"  
Two Styles in Blouses

**A** YOUNG miss of three to eight is certain to adore this sweet little frock that can go to school or parties depending on the fabric. Try a lively striped cotton for instance with the stripes going this way and that.

**N**OW'S the time to plan on some exciting new blouses for your spring suit. The two styles shown go together easily and have a choice of sleeve lengths — a wonderful way to pep up your winter wardrobe, too.

Pattern No. 1707 is for sizes 3, 4, 5, 6, 7 and 8 years. Size 4, 1 1/4 yards of 35 or 38-inch.

Pattern No. 8248 comes in sizes 12, 14, 16, 18 and 20. Size 14, bow blouse, 2 yards of 35 or 38-inch; round necked blouse, 1 1/2 yards for short sleeves, 2 1/2 yards for long sleeves.  
You won't want to miss the Spring and Summer FASHION—32 pages of smart easy-to-make styles; special features, fashion tips; free knitting directions; free pattern printed inside the book. 25 cents. Send your order to:

**HOUSEHOLD HINTS**

**Rub scuffed places on shoes with white of egg. The albumen sticks the scuffed leather down and helps prevent further peeling.**

**When fitting a garment for sloping shoulders, deepen the seams in line with the tip of the shoulder.**

**Leather upholstery — and be sure it is genuine leather — can be best cleaned with ordinary saddle soap.**

**To mend cracks in china dishes, boil milk in a stain-resistant utensil such as porcelain enamel. Place damaged dishes gently in the milk. Allow to remain a few minutes and the crack should be mended.**

**In using a chisel be sure the work is clamped tightly to a vice, especially if you are working on a small piece. Chip in a direction away from the body.**

**If the seat of a cane chair has worn through, and the chair does not warrant a new cane seat, buy a leatherette one at the dime store and tack it over the vacancy.**

**Splendid Cough Relief Is Easily Mixed at Home**

To get quick and satisfying relief from coughs due to colds, mix this recipe in your kitchen. Once tried, you'll never be without it.  
First, make a syrup by stirring 1 cup granulated sugar and one cup of water a few moments, until dissolved. A child could do it. No cooking needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.  
Then get 2 1/2 ounces of Pinex from any druggist. This is a special compound of proven ingredients, in concentrated form, well-known for its quick action on throat and bronchial irritations.  
Put the Pinex in a pint bottle, and fill up with your syrup. This makes a full pint of splendid medicine and you get about four times as much for your money. Never spoils. Tastes fine. And for quick, blessed relief, it is surprising. You can feel it take hold in a way that means business. It loosens the phlegm, soothes the irritated membranes, and eases the soreness. Thus it makes breathing easy, and lets you sleep. Money refunded if not pleased in every way.  
**Pinex Is Swift Acting!**

**"Gosh, I wish we could have new piston rings!"**
