Oil Found In Water Well West Town

School Taxes Being Collected Satisfactorily

MAN WILL INSTALL TELEPHONE SYSTEM AT GAIL

Mr. Gail, who for the past year has been chief constructionist of the O'Donnell Telephone Company, has decided to engage in business himself. He has recently secured the Ackerly telephone system to this he had secured the right to install a system in Gail. He plans to connect with the plant. He also plans to connect with the Ackerly and other towns section with the Gail plant. It is known, Gail is the county seat town in Texas in connection with the outside by telephone or telegraph communication of Mr. Bradshaw will prove a great convenience to the people of that town. The extensive oil development in that section, there is no doubt the business should not be neglected.

School taxes are being paid in by the patrons of the O'Donnell Independent School District very satisfactorily according to Messrs Fairley and Haynes, collectors. Already more than 50 per cent of taxes had been paid up to Monday of this week and it is estimated by Collectors Fairley and Haynes that 80 per cent will have been paid by the time the penalty will be attached which is February 1st.

This shows the interest of the patrons in the school as well as speaks well for the condition of the country financially. Collections are coming in as well or better than at the same period last year which proves that the O'Donnell country is not broke by a long shot. It was predicted by a few pessimists some thirty or sixty days ago that the O'Donnell schools would have to close because people would be unable to pay the taxes. They have probably changed their opinion by now.

Tech Student Gives Blood To Save Man's Life

LUBBOCK, Jan. 25.—Boys have been known to do everything from firing furnaces to acting secretary to the president of an institution in order to get through school. So greatly did one Tech student value the opportunity to pick up extra money that he sold a pint of his blood for twenty-five dollars at a local sanitarium.

The boy, Ethridge Eagan, works in a down-town coffee shop, and has missed no time from his work as a result. In an interview he said that every cent of the money could be used to an advantage, and that he had suffered no ill effects.

The transfusion was made Monday morning to save the life of E. M. Goodpasture of Brownfield.

NORRIS ACQUITTED BY JURY IN KILLING OF D. E. CHIPPS

COURT ROOM, Austin, Jan. 25.—Dr. J. Frank Norris, fundamentalist Baptist pastor of Fort Worth, tonight stepped forth for the third time from a court room a free man.

He was acquitted by a jury in Travis county district court of murdering Dexter E. Chipps, wholesale lumberman of Fort Worth, whom he slew in his church office on the afternoon of last July 17.

A jury of his peers, composed of farmers, laboring men, a former sheriff, clerks and merchants, said that Norris shot Chipps to save his own life when the latter came to the pastor's private study to protest against attacks Norris had made on Mayor H. C. Meacham of Fort Worth and other friends of Chipps.

There were tears of joy and also tears of another kind from other eyes when the brief simple verdict of "not guilty" was read in loud tones by S. A. Philquist, court clerk. The tears of joy were those of Norris and his wife. As soon as the verdict rang out in the court room, Norris stood at his seat, where he was surrounded by his wife, their two sons, and a circle of friends. There was a wan smile on his lips, but he showed no emotion until his attorney, Marvin Simpson, shook his hand. He embraced Simpson and went.

Shortening the Long Winter Nights

O'Donnell Farmer Sets Example For Others

Mrs. McClung's Father Dies In Boswell, Okla

Mrs. J. E. McClung received word last week upon her return from C. C. Turner, her father, who had passed away on January 4, at his home in Boswell, Okla., burial being had on the following day. Besides a wife, Mr. Turner is survived by one son, D. C. Turner, and four daughters, Mrs. J. E. McClung of O'Donnell, Mrs. M. Davis of Saxton, Mo., Mrs. S. L. Turner and Mrs. J. C. Powers of Boswell, all of whom were present at the time of his death except Mrs. McClung. He was 68 years of age at the time of his death and had lived in Oklahoma seventeen years, having formerly resided in Texas, being one of its pioneer citizens. At the age of fourteen he professed religion and joined the Baptist church and since that time had lived a true christian life.

The many friends of Mrs. McClung extend their sympathy in her hour of sorrow.

REV. MATHEWS WILL PREACH AT CHRISTIAN CHURCH

The Index has been requested to announce that the Rev. J. F. Mathews of Lubbock will fill the pulpit at the First Christian Church on next Sunday morning. Rev. Mathews is one of the strongest men of his denomination in this section of the country and will have a spiritual message for all who hear him.

whose father Norris killed. The boy, small for his age, is 14.

When asked about the verdict, tears came to his eyes and he choked up. Later he said: "I'm so sorry for mother, it will hurt her."

The boy was alone of all his family, and as the great crowd pressed around to shake the freed man's hand the lad walked slowly out, very un-gotched.

The verdict came after fourteen days of argument and testimony, which was aided with a heated appeal by the defense. E. McClung of Fort Worth, one of the special prosecutors who said as he pointed the finger at the pastor, "If you had let out to kill the pastor, he would have been killed."

Large Crowd Witness "Womanless Wedding"

The "Womanless Wedding" presented at the high school auditorium on Tuesday night was the biggest home talent hit of the season. Every part was played by male characters and was a scream from start to finish. The new high school auditorium was filled almost to capacity. Had the weather been fair and warm no doubt the auditorium seating capacity would have been overtaxed. Each of the characters deserve special mention, however being so many we will refrain from such comment. Some of the men were transformed into modern flappers which caused many O'Donnell women to sit up and take notice.

The play was sponsored by the Women's Missionary Society.

TECH PRESIDENT WEARS SUIT MADE FROM PLAINS COTTON

LUBBOCK, Jan. 25.—Dr. Paul W. Horn, president of Texas Tech, is this week wearing the first suit of clothing to be tailored from cloth woven in the textile mills of the Texas Technological College. The process of manufacture was all done in the textile mills with the exception of the tailoring. The suit is of dark gray pattern and the cloth made up into an attractive finished product. The material is all cotton. The thread was spun from cotton on the spindles, dyed in the textile department and woven in the Tech mills. Dr. Horn takes much pride in modeling the suit which is the first to be produced by the Tech mills. It will be worn by him when he appears before the legislature, now in session, in the interest of the appropriations for the college.

FIRE BOYS ANSWER ALARM WEDNESDAY

The O'Donnell Fire Department answered an alarm about 12:00 o'clock Wednesday and made a record run to the West Side of the square where a stove had caught fire in a hamburger stand. The fire was extinguished by the time the truck arrived without any serious damage.

Master C. E. Klum and G. E. Brader were Lubbock visitors standing

OIL BROUGHT FROM WELL ATTRACTS MUCH ATTENTION

The Index has contended all along that the O'Donnell country was the lid to a great oil pool and only need puncturing to bring the golden liquid to the surface, but so far the man with the drill has passed the country up, preferring to take his chances in proven territory. To find oil, one usually has to drill for it, often meeting many obstacles before it was encountered, but this week the reverse took place in E. D. Yeatts' water well—the oil just simply drilling its way into the well; good old greasy, high gravity oil, giving off a gas that is easily ignited. From a poor farmer that was not able to meet the notes on his land, Mr. Yeatts stands a chance of becoming a millionaire in short order.

A few days ago his water well pump failed to work and to ascertain the cause he pulled the piping and found that the well had caved to the extent that it required a drilling machine to slush out the debris and when the bucket was let down and brought up, no water was in the bucket, but instead it was filled with oil. As the oil was drawn from the well it again filled several feet. Some gas is reported as coming from the well.

Mr. Yeatts and Tom Cole came to town Monday bringing a bucket of oil from the well and it attracted quite a bit of attention. Several business men have visited the well during the week and they express the opinion that the oil has been forced into it somewhere above the water level by gas pressure. The well was originally 160 feet in depth but it is now filled to within 107 feet of the top with the cavings.

The Yeatts well is on one of the highest points of the country and on a very pronounced oil structure. Last summer Mr. Yeatts complained that his White Leghorn chickens were not doing well; that instead of being white and glossy, they had a dirty and greasy appearance, so he set about to find the cause. He found that the chickens were dusting themselves in some loose sand near the house, and taking a spade he dug down and found the sand was thoroughly soaked with oil. A sample of this oil was sent to the University of Texas for examination and it was pronounced a pure lubricating oil and the idea was suggested that it came from the crank case of a tractor which had been drained on the ground. One expert said it was where the Comanche Indians had barbecued a buffalo and the grease from the carcass had soaked into the ground. A prominent oil man of Dallas said it came from a large mesquite tree which had grown there in prehistoric times, the oil being cooked out by a prairie fire which had destroyed the tree. Mr. Yeatts was not discouraged by these reports and continued in the belief that the oil was forced to the surface through a fissure in the underlying clay and thus by gas pressure and the oil breaking into his well this week has convinced him that he was right. Since his water well has been destroyed by the oil, he plans to immediately drill another well and if he hits oil instead of water, he says he will pump the oil and continue to haul his water.

Car Turns Over Twice Occupants Uninjured

While enroute to Amarillo last week, Mr. and Mrs. J. E. McClung had a close call from a serious injury when a tire blew out on a casing causing the car to turn over twice. Aside from a nervous shock, none of the occupants were injured. Mrs. McClung was in five miles of Amarillo at the time of the accident and the help of another car that was on the trip with little loss of time. The car was damaged to about \$200.

September 28, 1923, at the post
office at O'Donnell, Texas, under the
Act of March 3, 1897.

The Slatonite carried an announce-
ment last week announcing the con-
solidation of the Slatonite and Slaton
Times. The Slatonite will take
over the subscription list and all ad-
vertising contracts of the Slaton
Times and Mr. Smith editor of the
Times, will move his plant to another
field. In our estimation, this was a
wise move on the part of the two
plants, as no town the size of Slaton
can well support two weeklies.

NOTICE CITY TAX PAYERS!

Remember all city taxes are now
due and payable at the City Hall.
Monday, February, 1st is the last day
to pay your taxes before a 10 per
cent penalty will be added. Call at
City Hall and get your receipt before
Monday.

T. A. Wimberley, City Tax Collec-
tor.

CARD OF THANKS

We wish to sincerely thank all our
friends who so kindly and lovingly
assisted us in the sickness and death
of our darling little Erma Lee. May
Gods richest blessings rest and abide
with you now and forever.

Mr. and Mrs. Jesse Lane.
Mr. and Mrs. E. A. Gleghorn and
family.

THANKS TO EVERYONE

We find that words are inadequate
when we try to express our apprecia-
tion to the people who helped to make
our play "The Womanless Wedding"
such a marvelous success.

First we feel we should thank
Brother Horn, who so ably acted an-
nouncer, when we had used every
man available in our church as well
as a number of others.

The men who took part in the play
made it possible for us to put this
over, by their untiring efforts and
patience. And we thank them every
one, especially those from the other
churches.

Without the help of Mrs. Guy
Bradley we know we would have fal-
len far short of the things we did
accomplish.

Let us express our deepest grati-
tude to the public who patronized
us so generously in other words we
extend thanks to all O'Donnell.

The Woman's Missionary Society
of the Methodist Church, O'Donnell,
Texas.

BAPTIST CHURCH

Next Sunday night the Glee club,
which is managed by Mr. King, will
sing at the First Baptist Church from
about 7:30 to 8:15. Everybody is
given a special invitation to be there
and hear this splendid group of young
people.

The ladies of the W. M. U. will en-
tertain the ladies of the Baptist
church of Tahoka on Tuesday of this
week.

On Friday night the Young folks
class will be entertained at the
Church by their teacher Mrs. W. E.
Gaye. Every one be there and en-
joy the evening.

The program last Sunday night at
the church, rendered by the B. Y. P.
U. was entirely a success. Our young
folks are renewing their forces for
some splendid constructive work, and
all the young folks who are not in
work at other churches are given a
splendid invitation to be there next
Sunday evening at 6:30 and enlist.
We need you and you need us.

It was a joy to have Rev. Curry
preach for us last Sunday night. Every
one enjoyed so much his good
message—it brought new determi-
nation and zeal to all present. And
then on last Sunday and Sunday
night too, Rev. B. N. Shepard of
Tahoka exchanged pulpits with the
local pastor and preached two won-
derful messages.

Mrs. V. O. Morgan who was called
to the bedside of her sister Mrs. W.
Cathy last week, returned to her
home at Memphis, Texas Thursday.

Mr. Sims who moved his stock of
goods to Crane City recently was
in the line of the week looking at
the business and visiting the
town some 12 countries.

Mr. and Mrs. Ben S. Coin have as
their guests this week, Mr. Israel
"Chub" Coin of San Antonio, Mr.
Philip Lieberman of Robstown and
Mr. Alex Lieberman of Floresville.

Mr. and Mrs. Charles Shook of
Amarillo, are the guests this week of
Mr. and Mrs. E. J. Bean and family.

Hardberger. 10-tfc

**NO LONGER DANGER
IN SHOOTING COAL**

**Electric Spark Helps Gas
Save Miners' Lives.**

Ordinary soda-fountain gas and
sparks of electricity may soon save
hundreds of coal miners' lives by do-
ing the work of powder and dynamite
in getting the nation's coal out of the
ground. This harmless gas, so well
known for the refreshing quality it im-
parts to various drinks, is just now
making a favorable showing in a
southern Illinois mine of the J. K.
Dering Coal company at Eldorado,
where, under experimental conditions,
it is replacing dangerous explosives.

Nearly all of the 300,000 tons of coal
mined in the United States nowadays
is loosened underground by shots of
explosive planted in holes that have
been drilled into the coal "face." This
dangerous factor in mining annually
causes many deaths. In 1925, explo-
sives in mines were directly responsi-
ble for 89 fatalities and underground
explosions of mine gas and coal dust—
ignited usually by flames from powder
and dynamite shots fired in the coal-
killed 344 more, according to the
United States bureau of mines.

In addition to the element of dan-
ger, the old method of shooting coal
slows down mining operations be-
cause most state laws prohibit firing
of shots with men in a mine. This
usually has meant that expensive load-
ing machines capable of fast work
have been compelled to stand around
idle during parts of each day, waiting
for the night's round of shots to loosen
new tonnages.

But during the latter part of No-
vember and the early days of Decem-
ber the mine at Eldorado, Ill., has
been proving out the new method.
Carbonic acid gas, or CO₂, compressed
into small steel cylinders at about
2,000 pounds per square inch, has
been slipped into shot holes bored in
the coal by swift electric drills and
tamped tight. Wires leading from
these cartridges are led off at a dis-
tance. They are touched to a mine
trolley wire or otherwise supplied
with electric current. The gas inside
the cartridges, heated by electricity,
generates terrific expansive pressure
and the wall of coal is suddenly blown
down—but without a flame. As much
as 42 tons have been loosened by one
cartridge.

This kind of mine "shooting" is ex-
pected to proceed at any hour of the
day while men all through the work-
ings go ahead safely with their labor.
Electric loading machinery will thus
have an opportunity to do its full
service in getting out huge tonnages
cheaply to reduce the cost of coal.

Diet to Save the Teeth

Before many years the dreaded visit
to the dentist may be a thing of the
past. In place of drillings and fillings
to preserve the teeth, we may substi-
tute an easy diet of milk and cabbage.
This, says Popular Science Monthly, is
the recent prediction made by Dr.
Bernard Gottlieb, of the University of
Vienna. Tooth decay may be pre-
vented by eating certain foods, he de-
clared, and within five years the den-
tists hope to have enough data to pre-
sent a definite tooth-preserving diet.
"Experiments with sea foods have en-
couraged us to believe we are now on
the right track," he said.

He named cabbage, brussels sprouts
and spinach as valuable tooth builders,
for the reason that they contain lime
salts which are the basis of tooth
enamel.

Oh, Grammar! Grammar!

Only a school teacher knows the
stress that is placed on the study of
the verbs "sit" and "set." Only a stu-
dent knows the monotony of the fre-
quent drills to gain their mastery.
These verbs, however, continue to sup-
ply pitfalls for the high school pupils.
In a recent examination in a home
economics class a girl, who is in many
respects above the average, was
caught in the snare of the following
question:
"Name two methods of setting on
ruffles."
"Two methods of setting on ruffles
are as follows: First, smooth the
ruffles out well before you set down;
second, if the ruffles are wide enough,
raise them up and do not set on them
at all," was the well-organized, neatly
written answer.

Stone Lantern Is Old

Probably the most picturesque, artis-
tic and enduring object in the realm of
Japanese art is the stone lantern. Its
origin is unknown, but it is believed
that it was first made to illuminate the
road at night to protect travelers from
attacks by robbers. Whatever its
origin, the stone lantern is believed to
have been in existence for more than
13 centuries. This view is main-
tained on the belief that the stone lan-
tern in the compound of the Kitsu tem-
ple in Yamato was erected at the time
when the empire was built by Prince
Sushun some 13 centuries ago.

**ITEMS FROM BERRY
FLAT COMMUNITY**

Dear editor and subscribers here is
blue eyes again.

We are having some more wet
weather. We sure have a fine sea-
son. Maybe we will make a good
crop this year, but I hope that we
wont plant much cotton.

M. F. and J. E. Calcote have re-
turned from the Borger oil field
where J. E. has been at work most
all fall and winter until present.
They are going to farm M. F. Cal-
cotes place this year. We are glad
to have the boys back in our com-
munity.

Mr. Johnson's family are on the
sick list at this writing. Also E. Q.
Smith.

Neal Fuller and John Kocurek
was in Lamesa last week-end on
business.

Milton Fuller happened to the
misfortune of getting his harness
stolen Friday night.

Mr. and Mrs. Jim Stewart returned
Saturday morning from a business
trip south of here.

The Mr. Zedletz's are preparing
to leave. We regret very much to
lose these fine young men, but wish
them well in their new location.

Mr. Sparkmans are also moving
from our community to Mr. Wrights
place four miles south of O'Donnell.
We sure will miss this good family
too, but hope they have much suc-
cess in their new home.

—Blue Eyes

**DODGE BROTHERS
1926 PRODUCTION**

Dodge Brothers, Inc., last year
sold to dealers 331,764 passenger
cars and trucks, making 1926 the
biggest year in its history. The gain
over 1925, which was the company's
best previous year, is 27.6 per cent.
The 1926 record is remarkable as it
surpasses the huge output of 259,967
cars and trucks in 1925 by 71,797
units and was made without the sales
impetus which many companies gain
from the frequent introduction of
new models.

Dodge Brothers Inc., rate of
growth last year was nearly nine
times as rapid as that of the Auto-
motive industry as a whole, which
made a production gain of only 3.3
per cent over 1925. Figures com-
piled by the National Automobile
Chamber of Commerce for 1926
place production of all automobile
manufacturers at 4,489,000 cars and
trucks.

Graham Brothers, the truck divi-
sion of Dodge Brothers, Inc., also
made a striking showing with a gain
over 1925 of 55.7 per cent in sales to
dealers. The rate of gain was ap-
proximately eight times as fast as
that of the entire truck industry last
year. National Automobile Chamber
of Commerce figures show that the
output for the whole truck industry
was 7 per cent larger in 1926 than
in 1925. Total sales of Graham
Brothers trucks and motor coaches
to dealers in 1926 amounted to 37,

**AN APPEAL FROM
YOUR FAMILY PHYSICIAN**

Did it ever occur to you that it was
your family physician that so gen-
tly assisted you when you made
your advent into this wide world?
That it is he who is sacrificing his
time, his health, and life, day and
night, through cold and stormy
weather, to your every beck and call
when sickness and death invades
your home?

That it is he who will linger at
your bedside to soothe your pain-
racked frame when your soul makes
its exit from this cage of clay?

Then why will you show your in-
gratitude by making him wait to the
very last to pay him up, and then
perhaps a very small percent of what
you owe him?

Why not make him among your
first to pay for that service he has
so devotedly given you during the
anxious hours of your dire distress,
so that he may be enabled to pay
his bills for gas, tires, medicine, and
equipment, so essentially necessary
for him to render to you that prompt
and efficient service that you so per-
sistently demand. Think it over
and act accordingly.

**SWEET CLOVER FOR GRAZING,
HAY AND SOIL BUILDING**

**A. K. Short, Director Agricultural
Service Bureau, Robert Nicholson
Seed Company**

Sweet clover is fast becoming one of the most dependable crops grown in almost all sections of the state. It is very probable that it is the most widely adapted crop grown in this country. There are few if any sections of the state where it fails to grow under wild conditions. It can be found growing along the roadside upon the North Plains, in the El Paso country, in the Rio Grande section, in East Texas and in the Blackland belt.

It is one of the most satisfactory grazing crops that can be grown and it can be grown successfully with Bermuda and other grasses. It is one of the best soil building crops that can be planted. It will furnish an abundance of humus to the soil and supply nitrogen. When handled right it is one of our best hay crops, both from the standpoint of yield and quality of hay.

Sweet Clover has about the same feeding value as does alfalfa and will grow upon land that will not grow alfalfa.

Time of Planting

On the Experiment Station at Denton and from the experiences of many farmers, it is proven conclusively that January and February plantings have been the most successful. Sweet clover planting in the fall will often seed the following Spring and in shortening the growing period its value is lessened. There are very few instances where a stand has been secured when planted later than the last of February. When planted about time of planting small grain a good stand is usually secured, or Sweet clover may be sown broadcast without the use of a grain nurse crop. In all instances the best stands have been secured when the land is firm with only loose seed bed sufficient to cover seed.

The advantage of planting the clover with grain is that a crop may be secured from the land the first year. The main disadvantages are, that the grain crop may become so dense, or blow down so that the small clover plants are smothered, or if moisture is low, the grain may dry out the land until the stand is injured. If it is seen that there is a shortage of moisture the grain may be cut early for hay instead of growing until it matures.

Owing to the fact that sweet clover matures seed and dies the second year, if it is desirable to keep it permanent in one field there should be a second planting made on the same land one year from the date of first sowing. With this method, there are one and two year old plants on the same land, and the clover does not seed until about July the second summer.

Rate and Method of Seeding

Sweet clover is usually sown broadcast at the rate of from 15 to 20 pounds per acre. Owing to the extremely hard seed coat, it is best to sow scarified seed to insure a stand. As an added insurance it is best to inoculate the seed before planting.

The Denton Experiment Station has reported that probably the most satisfactory results have been obtained from planting sweet clover with small grain in late January and early February. The grain may be sown with drill and sweet clover then sown broadcast using a drag or section harrow with teeth down, to cover the seed.

Sweet Clover for Grazing

From reports from many sections

of the state, it has been shown that sweet clover will furnish grazing for from one to four mature sows per acre from early spring until the first freeze. It is equal to alfalfa for grazing with all types of livestock. It can be grazed over a longer period than can alfalfa and there is little, if any, danger from bloating.

Sweet Clover for Hay

On the average, sweet clover will yield from 1 1/2 to 2 tons of hay per acre. The best quality of hay is obtained by cutting when the plants are about knee high. Two cuttings are usually made during the second season, the sickle for hay, and especially during the second season, the sickle bar should be raised to about six or seven inches. When cut close some of the plants will be destroyed. When cut high the main stems left out small limbs at each joint which produces a finer quality of hay the next cutting. If it is desirable to let the plants produce seed the second year, the clover may be cut one time, the second growth allowed to seed.

Sweet Clover for Soil Building

Sweet clover is a nitrogen gathering plant, that is, it has the power to take free nitrogen from the air and store it in the soil. A hay crop of 1 1/2 tons of sweet clover contains approximately 43 pounds of Nitrogen, 8.5 pounds of phosphoric acid and 27.5 pounds of potash. If we value Nitrogen at 25 cents per pound and phosphoric acid and potash at 6 cents per pound, one and one-half tons of sweet clover hay would be worth \$12.71 from the acre yield of the plants, in addition to the value of organic matter that would be returned to the soil. When used for grazing, the greater amount of both the organic matter and plant food is returned to the soil.

The enormous root system of sweet clover makes this crop very desirable one to improve the physical

condition of the soil, which in turn, increases the feeding area of the crop following clover.

Alfalfa should be grown on all land that is adapted to this crop. Alfalfa will grow, and return a good annual revenue for several years on suitable land. The value of alfalfa for a soil building crop is clearly demonstrated in the recent "More Cotton on Fewer Acres Contest," Mr. Littleton at Vernon won first prize on cotton following alfalfa, without the use of commercial fertilizer. The basis of soil fertilizer is humus, and the basis of profitable use of commercial fertilizer is humus. The most economical way to put humus in the soil and at the same time to put plant food in the soil is to grow alfalfa clover and other legumes.

FOR RENT—220 acre farm, three and one-half miles north of O'Donnell all in cultivation and fair improvements. Apply to T. M. Ward of O'Donnell or T. A. Smith Lockhart, Texas. 15-1c

LOST—One black horse 9 years old, weighs about 12 hundred pounds, has wire cut on right front foot, and roach mane. A. J. Warren, O'Donnell, Texas. 17-2tp

FOR TRADE—Will trade Howard piano for Ford touring car in good condition. A. W. Angel, 3 miles east of O'Donnell, Texas. 17-4tp

General Practice and Electro-Therapeutics. Piles cured without detention from work or business. Office half block Southeast Index Building, O'Donnell, Texas 4-20tp

FOR SALE—Pure bred Buff Wyandotte cockerels cheap if sold soon. Also a limited supply of eggs for fall setting. W. Applegate, Haskell, Texas. 52tf.

A special Gasoline for special Requirements

DOES your motor knock when going up a slight grade? Has it a slow pick-up in traffic? Is it sluggish and generally out of key?

Most motors act that way when choked with carbon or after long, hard service.

But let it alone! Just get a tankful of Conoco Ethyl Gasoline and "step on it."

Conoco Ethyl Gasoline stops the harmful knocks that carbon causes and turns the carbon itself into power.

Get it at the sign of the Continental Soldier—then note the fast pick-up, the smooth, sustained power on the pistons and the absence of all knocking.

Kaiser's Experts Let

Big Opportunity Pass

Colonel Depont, inventor of the "75," the rapid-firing gun that saved France, died a few years after the war. Before he passed away the colonel wrote the story of the gun and revealed how France came within an ace of losing the plans and models long before the war. When the first models had been constructed, they were carefully sealed in a freight car and shipped to an isolated section of the country for a tryout. The car was by mistake hooked up to a goods train, destined for Germany and actually landed on German soil. The Germans opened the car and immediately officers of the artillery school came down to examine the guns minutely. But they let them go again, reporting that no officer would be able to manage a battery of guns that could each fire a hundred shots per minute. And so the gun came back, though the Germans managed to make an imperfect copy. The real secret of the hydropneumatique was never mastered in Germany, even in 1914, when the Kaiser's armies captured plenty of models.—Pierre Van Pausen, in the Atlanta Constitution.

Napoleon Unique in Capacity for Work

Napoleon "could work" for eighteen hours for a stretch at one subject or many. No 8-hour day for him. "Never," says Roederer, "have I seen his mind weary; never have I seen his mind without spring; not in the strain of body, wrath or the most violent exercise." One of his mistresses complained that "it would require a constitution of iron to go through with what we do. After a day's ride in a carriage we no sooner alight than we mount on horseback and sometimes remain in our saddles for ten or twelve hours successively." In his fortieth year Napoleon rode ninety miles without stirrups in five hours and a half. His surgeon, Percy, said that he was "made of iron, soul and body, always on horseback, galloping about in all weathers, bivouacking, working like ten men, never ill, never tired." Even his enemies declared that Napoleon had a capacity for work equal to that of four other men.—Scientific Monthly.

Few Truffles in America

Truffles are subterranean fungi, and in Europe, especially in France, are collected quite extensively for food. While a few varieties of truffles or related forms are found growing wild in this country, their cultivation is not a commercial proposition. It is recognized that truffles grow especially in association with certain oaks, and some years ago the Department of Agriculture imported and distributed two or three species of these oaks, but the industry has never really been developed in this country. Abroad, in regions where truffles are abundant, they are collected by aid of a dog or pig, or small animal having a keen sense of smell. Truffle hunting is an important business and requires considerable experience and knowledge of forests.

Didn't Hatch

A school teacher relates that she was giving her small pupils a lesson on birds, and after telling about the hatching of the eggs, the care of the mother bird and the first lessons in flying, she said: "Now, children, I am the mother bird and you are the little birds nestled in your cozy nest. I want you all to spread your wings and fly away."

Each child, waving arms to the music she beat, skipped to the dressing room, with the exception of one little fellow who remained motionless in his seat. Turning to him, she said: "Donald, why didn't you fly away with all the other little birds?"

"'Cause," came the prompt and unexpected reply, "'Cause I was a bad egg."—Boston Transcript.

First "Elevator" Ideas

The first parents of the today's elevator came into being in Europe in the reign of Louis XIV, and began the revolt of weary legs against the age-long tyranny of dark, corkscrew stairs. The first in date, 1870, was the "curious invention" by which an Italian duchess (of Turin) conveyed herself to her bath. Worked by a pulley and swing (counterweight), it was in the form of a cage, and held one person standing up, who could ascend or descend at will. It was covered with green velvet, and the ropes—for signaling "up" or "down"—were of silk. A similar elevator was said to be in the Palais Mazarin in Paris.

Clever Dog Thief

Within five days the police of Abington, Pa., received reports that 51 quart bottles of milk placed on as many doorsteps had been tapped and the cream extracted. The only clew was that in each milk bottle cap a hole was punctured and the cap lifted from the bottle. Watchers then solved the mystery. The thief was a big collie dog with more than usual intelligence. The dog punctured the cardboard tops with one of his fangs, lifted out the caps and thus was able to lap out the cream with his tongue.

Proof Enough

"The wicked stand in slippery places." "How do you know they are wicked?" "By the language they use when they slip."

No Great Competition for These Odd Jobs

Although at the present time almost every profession is overcrowded, there are still a few that have only one follower.

For instance, out of the seven and a half million people in London there is only one moss gatherer. Twice a week this man pushes a barrow to a spot several miles out of the city, where he gathers his moss, and later sells it for decorative purposes.

At the last census taken in England a man stated that he was a walrus mustache collector. The hairs are used for the purpose of making toothpicks, and as far as is known he is the only person who follows that profession.

There is only one lady veterinary surgeon in England. A British firm employs a man whose job is simply to strike matches in order to test them.

Still another of these unusual jobs is that of toad breeder. There is one man who does this, and he sells his toads to gardeners for the purpose of destroying insect pests.

There is no overcrowding in these jobs!

Layers of Warm and Cold Waters in Lakes

It has been found that some of the salt lakes in Hungary present the peculiarity of a layer of warm, or even hot, salt water between two bodies of colder water. Thus, in the Medoc lake, the surface temperature in summer is about 70 degrees, but at a depth of a little more than four feet the temperature becomes 133 degrees, declining again to 66 degrees at the bottom.

The surface water is fresh, but the warm water beneath is intensely saline, and the explanation of the difference of temperature is that, since the specific heat of salt water is less than that of fresh water, the salt water is more easily heated by the sun and, having risen to a higher temperature than that of the overlying fresh water, retains its heat, because the fresh water prevents its escape by radiation. It is suggested that some use might be found for these natural reservoirs, or accumulators, of solar heat.

Heroic Roman Figure

Cincinnatus was one of the favorite early heroes of the Roman republic. In the year 400 B. C. he was elected consul, the chief executive officer of Rome. Two years later, in time of great national danger, he was chosen dictator or supreme commander to lead the army against the nation of Gauls, or modern France, that was threatening Italy. The messenger sent to tell him of his elevation to the dictatorship found him plowing on his little farm. He put on his toga, the robe of a Roman citizen, to listen to the reading of his commission, and then he went to Rome and took command. He decisively defeated the enemy, and 16 days later he was at home again at work on his farm.

He Wasn't a Bigot

Like Sir James Percy, the Irishman who never forgets a good story that he hears, and later gives it an extra twist of interest through the glow of his own personality, Sir James Taggart, ex-lord provost of Aberdeen, is among the recognized story-tellers of the country. He is telling just now of a certain man of the kirk who was found lying drunk not far from his door by a Roman Catholic priest. The priest picked him up and helped him to his home. As he felt for the latch of his door, the intoxicated one turned to the priestly helper and looked hard at him. "Oh, aye," he said, "I ken ye fine!—the Catholic priest. Never mind, mon; I'm no' bigoted."—London Sketch.

Historic Town

Harper's Ferry is a town in West Virginia at the confluence of the Shenandoah and Potomac and is about 90 miles from Washington. It received its name from Robert Harper, an English millwright, who obtained the grant of this site in 1748 from Lord Fairfax, the friend and patron of George Washington. The original survey was made by Washington himself and it is said that he personally selected the ferry as the site of a national armory. Harper's Ferry is famous in American history as the scene of John Brown's raid.

Personal Experience?

A few weeks ago in one of the state high schools, in an English class, this little episode occurred: The teacher had asked the pupils, for the following day, to write an editorial, and in giving suggestions had said that "puppy love" would be an interesting topic to work up. A member of the class, who was busy copying the assignment when the above statement was made, looked up and innocently inquired: "Does it have to be a personal experience?"—Indianapolis News.

Hobby Is Training Worms

Training worms is the hobby of David Masters, London journalist and scientist. Leading his visitors to his garden, Masters would take a blade of grass and stroke the back of as much of a worm's body as he could get to be out of its hole in the ground. Immediately the worm would emerge from its hiding place, and he would stroke its back, which the worm would arch after a few strokes. "You see, even a worm likes a good turn," Masters tells his friends.

WEST TEXAS NEWS

HASKELL—Work on the city hall here is progressing nicely. When completed, the building will hold offices of the mayor, city secretary and water department as well as housing equipment of the Haskell Fire Department. A city jail is also included in the building, occupying part of the ground floor in the rear of the structure.

STAMFORD—Nine of the 15 men named as Master Farmers of Texas in the recent contest of The Progressive Farmer are men who live in the territory served by the West Texas Chamber of Commerce. Though West Texas entrants in the contest were rather noticeably in the minority, more than fifty per cent of the winnings were carried off by the western section. The Master Farmers of West Texas came from the following counties: Comanche, El Paso, Medina (2), Hale, Kerr (2), Lubbock, and Howard.

PLAINVIEW—Hale county has added 16 fine registered bulls to its bull circles. The animals were brought from Ohio by Paul Huey, County agricultural agent.

SHAMROCK—A two story hotel containing 24 rooms is being erected here. Each room is to be equipped with hot and cold running water and will be heated by gas.

PAMPA—Brick work on the new Schneider Hotel has started, and the building will be ready for occupancy by May 1, according to the contract. Several colors of brick are being used in the work.

STAMFORD—Approximately a quarter of a million dollars annually will be saved by shippers of the south Plains section due to activity of the West Texas Chamber of Commerce in their behalf. The West Texas Chamber of Commerce through its traffic department has successfully presented the Santa Fe differential cases to the Railroad Commission and as a result, South Plains shippers will be relieved of paying the western differential.

LAMPASSAS—Lampassas, 24,000 egg capacity chick hatchery has opened.

BORGER—Outlining a booster and advertising campaign to be launched this month, the local chamber of commerce directors at a recent meeting chose the slogan, "Buy It In Borger", as the initial move toward civic promotion and development. The Booster Campaign is to extend two weeks.

LEVELLAND—Contract has been entered with the Texas Utilities Company for maintenance of fourteen street lights for the business section of the town. The lights are to be of 100 candle power and of the pole and bracket type.

PAINT ROCK—Possibilities of Paint Rock as a summer and health resort are to be exploited if movement on part of leading citizens goes thorough. The town believes its location near the banks of the silvery Concho make it an ideal spot for a summer playground where swimming, boating, fishing, and hunting can be had in abundance.

STOMACH SO BAD CAN'T EAT EVEN FRUIT

"For year was badly constipated and troubled with gas after eating. Could not eat fruit and many other things. Adlerika has done me good—can now eat anything." (signed) W. H. Fletcher. Adlerika removes GAS and often brings astonishing relief to the stomach. Brings out a surprising amount of old waste matter you never thought was in the system. Stops that full bloated feeling and makes you enjoy eating. Excellent for chronic constipation.

Oil Search Is Resumed

Third Well to Be Put Down West of
Town; Green and Lumsden
Let Contract

The News is informed upon reliable authority that a contract for another test well to be drilled near the line of Lynn and Terry counties was let Tuesday of this week. Green and Lumsden of Wilson, who own a ranch on the line of the two counties have blocked up a 10,000 acre block and given a lease on same to one of the big oil companies with stipulation that drilling is to begin within 90 days. Whether the new test well will be located in Lynn or Terry county has not yet been determined; at least no information in that respect has been given out.

Drilling on the Kingsland just over the line in Terry county ten miles east of Brownfield and 18 miles west of Tahoka, was also resumed the first of the week after having been shut down for two or three weeks.

Excellent progress has been made on this well and it seems certain that, barring accidents the well will be completed according to contracts, without further delays of any consequence.

At Edwards No. 1, five miles west of Tahoka, the drillers are still waiting for the arrival of a big bull wheel before drilling can be resumed. It is said that the drillers expect to be back on the job on this well at an early date.

Many oil men have been here during the past few weeks. There is much talk in oil circles, according to local citizens, about the prospective field in Lynn county, and from the interest being manifested and from the fact that the third test well in this section is soon to be started, it would seem that the oil people have considerable confidence in the probability of finding oil here in paying quantities.

Lynn County News.
L. M. Williams, former resident of O'Donnell, who is now residing at Amarillo, was here Wednesday on business.

- Address—Mrs. McLaurin.
- Song—Glee Club Girls.
- Reading—Madame McLaurin.
- Duet—Mrs. Garner and Bro. Hicks.
- Reading—Clydene Jones.
- Duet—Alice Joy Bowlin, Kathryn Veasey.
- Piano Solo—Mrs. Gillespie.
- Vocal Solo—Miss Milwee.
- Piano Solo—Marguerite Hicks.
- Reading—Mrs. Carlton.

PRESBYTERIAN SOCIETY ENTERTAINED WITH SOCIAL FRIDAY

Members of the Presbyterian Christian Endeavor Society and some of their friends enjoyed a social at the home of Rev. and Mrs. J. Wood Parker last Friday evening. After many jolly games were played, Mrs. Parker and Mrs. J. W. Roberts served refreshments consisting of meat sandwiches, cocoa topped with marshmallows and penoche.

Those present were Florence Henderson, Estelle Echols, Mary Dell and Edwina Vermillion, Beulah Estes, Era and Eva Harris, June and Florence Gary, Mary Parker, Knox J. D. and Gene Echols, Harold and Glen Yandell, Otis Harris, J. W. and Gaines Parker, Mr. and Mrs. J. W. Roberts and little daughter Marylyn, and the host and hostess.

M. P. White, manager at Jones Hardware Company is confined to his home this week suffering with a severe case of tonsillitis.

DOCTOR ORDERS VINOL FOR NERVOUS WOMEN

"I was weak, nervous and anemic. Could hardly walk. My doctor ordered Vinol, and I feel 100 per cent better."—Mrs. H. Willis. For over 25 years, this simple, strengthening iron and cod liver compound has been prescribed for weak, nervous women and men and frail children. The very FIRST week you take Vinol you begin to feel stronger, eat and sleep better. Contains no oil—you'll like its taste.

CHRISTOPHER DRUGS

DELIGHTFUL PARTY ENJOYED AT HOME OF MRS. JONES

One of the most delightful occasions of the season was the party honoring Mrs. W. E. Dickinson given by Mrs. C. C. Jones and Mrs. W. B. Hicks at the home of Mrs. Jones Saturday afternoon. After an enjoyable hour spent in playing "42" delicious refreshments were served, consisting of Pie-a-la-mode, coffee with whipped cream and water, and baskets of salted nuts on plate favors.

The climax of the afternoon came when, after a few words of love and appreciation for Mrs. Dickinson, she was presented with a beautiful walnut floor lamp, with a shade of rose and blue georgette.

Because of the disagreeable weather, and everything being covered with ice, some of the guests were unable to attend. Those who were donors of the lamp, and guests of the afternoon were Mesdames Koeniger, Harris, Lines, Randle, Knox, Campbell, Jones, Hicks, Parker, George Horn, McLaurin, Gillespie, Gates, Bradley, Bowlin, Boyd, McCarroll, Davis, Shook, Garner, Haynes, Dennis, John Schooler, Gibbs, Busby, Orson, Veasey, Roberts, Stark, and Misses Mary Lee Toles and Willie Schooler.

We feel that our town and church has suffered an irreparable loss in the moving of Mr. and Mrs. Dickinson. Socially, religiously, and in the business life of the town they have

held a leading place, and their good influence can never be measured in dollars and cents. Our hearts are filled with love and grief but we know they will find friends and appreciation where ever they go, because of their beauty and uprightness of character.

—A Guest.

Nazarene Church

The people of the church of the Nazarene were blessed in having with them their District Superintendent and District Evangelist, Revs. H. C. and Mary Lee Cagle on the past Friday night January 21. Those who know them, know also what a privilege it is to hear them.

Rev. Mrs. Minnie Echols, pastor church of the Nazarene at Post, Texas will preach at the Nazarene church here Sunday, January 30 at 11:00 a. m. Sister Echols is a young preacher, but is one of ability. The public is cordially invited to hear her Mrs. Nora Pruett, Pastor.

The Home Demonstration Club will give demonstration on preparation of school lunches and making pie crusts at high school building, Wednesday, February 2.

Lee Garner, formerly of the firm of Jones Hardware Company, but now residing in Quanah, was here first of the week on business.

Miss Pauline Wilham of Lubbock visited her aunt Mrs. J. G. McCarroll Thursday night. She was accompanied by Miss Mary Joe Ballew who was the guest of her aunt Mrs. J. G. Stokes.

Chevrolet Runs After Six

Driving a Chevrolet through the rough, hilly districts for a total repair cost of 20,000 miles of driving in six years is the record of Mrs. Olen Gentry, of M... The sturdy endurance of the Chevrolet never was attested through its popularity among those who live in the mountains, according to Mrs. Gentry.

In August, 1920 Mrs. Gentry purchased a Chevrolet in December of 1926, she assured that it was about as good a new model "Although still giving excellent prospect to turn it in soon on a Chevrolet Coupe," Mrs. Gentry says. The old car which she purchased was only a '1920' model Chevrolet but steady service from 1920 to 1926, rough, rocky roads feature country and only careful motors, combined with construction, are able to stand the terrific grind of the owner says.

MULES WANTED—A good medium sized young mule to a 24 in. of farming implements. The large good Jersey cow. See the cock, O'Donnell, Texas.

J. D. Liles and family for Abilene where they are building their future home. The Liles family will be kept busy with the care of their friends in O'Donnell.
