O'Donnell Territory Will Be Thoroughly Tested

LYNN COUNTY POULTRY

SHOW WILL BE HELD FEB. 12

Interest in Show and School Growing; Exhibits Promise to Be Excellent

(From The Lynn County News) Local interest in Lynn County's first Poultry and Egg Show and free Poultry School is growing, according to Miss Halsey, County Home Demonstration Agent, and G. H. Nelson, Secretary Tahoka Chamber of Commerce.

Miss Halsey and Mr. Nelson say at the year hearing of more good chicks every day, and at every farmer seems glad of an opportunity to show his birds, and a quality of eggs that they produce. But not only are the poultry raisers becoming enthusiastic about the coming show, the local merchants are trying to help by donating various items to complete the educational features of the show. A modern poultry house, of small size is being donated by one of the lumber yards, a local feed store will furnish materials for exhibits of balanced rations of several kinds, the picture show will run some poultry reels free of charge, and other stores will loan poultry equipment, such as incubators. In other words it looks like Tahoka and Lynn County are pulling together for a good poultry show.

ACREAGE BLOCKED AT MEETING THURSDAY NIGHT

A very enthusiastic meeting of land owners and citizens was held at the schoolhouse on last Thursday night. The purpose of the meeting was to block additional acreage in the new discovery of oil show in the Yeatts farm. Sufficient acreage was immediately pledged for a drilling contract calling for a drilling hole just east of the first block. A well was secured soon after the oil show had ruined Mr. Yeatts' well.

Enthusiasm is increasing daily in O'Donnell territory and it is expected that a number of tests will be made within the near future near the Yeatts farm and surrounding territory.

WILD HOG CLEVER WEATHER PROPHET

From present indications we are inclined to concede the ground hog is a clever little animal. According to old traditions on the second day of February each year the ground hog comes out of his winter home. If he sees his shadow scurries to his hiding place and remains six weeks believing that the count is doomed to suffer six weeks of winter weather. Last week's issue of the Index reported that the ground hog evidently saw his shadow the day was almost like spring. The people were warned to fill up their coal bins.

Today, Wednesday, apparently proves that the ground hog is a very clever weather prophet. When the dawned the thermometer stood below the freezing point and sleds could be heard beating a tattoo on the ice tops. Soon the ground was covered with a blanket of ice. O'Donnell folks awoke to the realization that winter with all its fury is at hand upon us.

As to whether the present spell will last six weeks—well, we only hope the ground hog was mistaken.

METHODIST LADIES STAGE MINSTREL AT AUDITORIUM

The Minstrel sponsored by the ladies of the Methodist church which was given at the High school auditorium on Tuesday night was a splendid success. Due to the inclemency of the weather the crowd was rather small, but those who witnessed the evening's performance declare it an evening well spent.

LAND OWNERS WILL MEET AT T BAR SATURDAY NIGHT

According to information given the Index, a meeting of land owners and citizens of the T Bar community will be held at the T Bar school house on Saturday night, February 12, for the purpose of blocking acreage in that section which will call for a drilling contract in the T Bar community.

All land owners in that community are asked to be present Saturday night at which time pledges will be received and a committee will be appointed to handle the leases and later contract with some reputable oil company for a thorough test in that community.

The oil excitement in the O'Donnell country is increasing daily and the people of the T Bar community are wide awake to the possibilities of development in this section and intend to do their bit in bringing in a new oil pool on the South Plains.

POULTRY AND EGG SHOW AND FREE POULTRY SCHOOL TAHOKA, TEXAS, FEB. 12

Mr. Hall Robinson has kindly given us permission to hold our show in his brick building just west of the Court House. Mr. Nelson will have the coops there for you by Friday, so bring your fowls in Friday afternoon, if possible. At least they must be in place by 9:30 Saturday morning, as we should not disturb the speakers after the program begins. You may take them out after four o'clock Saturday afternoon.

This is your show and it cannot be a success unless you come and bring some of your birds and some eggs.

The following program has been planned and will be carried out in full if possible.

1. Purpose of the meeting—Home Demonstration Agent.
2. Lynn County's Diversification Program in 1927—G. H. Nelson, Secretary Tahoka Chamber of Commerce.
3. Judging Eggs—Advantage of the early hatch—Care and feeding of baby chicks—N. H. Payne, Lubbock.
4. Culling for Egg Production—Feeding for Egg Production—Housing the Flock—D. F. Eaton, County Agent, Lubbock, Texas.
5. Judging Birds.

Noon

6. Slides on Poultry Management and Housing to be shown at Picture Show from 12:45 to 1:15 p. m.
7. Insect Control—Selecting a Breeding Pen, and Advantages of Pen to Build up a Flock—Keeping Records—Mr. Knox Parr, County Agent, Seminole, Texas.
8. Has this show been Worth while? Shall we make plans for an Annual Winter Poultry Show in Lynn County?—G. H. Nelson, Sec'y Tahoka Chamber of Commerce.

Instead of sitting with folded hands and waiting for an oil field to be opened up at our doors, or for Congress to pass some laws to relieve the present situation let's all get to work with what we have at hand. Come to the Poultry Show and let's push Lynn County Agriculture to the front.

HOME DEMONSTRATION CLUB MEETS AT O'DONNELL FEB. 16

A meeting of the Home Demonstration Club of Lynn County is called for February 16th at 2 p. m. at the High School Auditorium in O'Donnell. Miss Halsey, Home Demonstration Agent will be present and give a demonstration and lecture on care of pot plants and home beautification. Several good talks are promised and the general public is invited to be present and help make the meeting a success.

L. L. Babby who is buying cotton in Lockney spent Monday night with home folks returning Tuesday morning.

Locations Will Be Made East and West of Town

Every Effort Will Be Made to Open New Oil Pool In Lynn County

The recent discovery of oil showings in the water well of E. D. Yeatts ten miles west of O'Donnell has caused considerable excitement which has been increasing daily until people in and around O'Donnell have forgotten all about the low price of cotton.

A review of the activities caused by the recent find show that O'Donnell and surrounding country will have several tests for the liquid gold in the near future. Two ten thousand acre blocks in the vicinity of the Yeatts farm are just about completed. The committees who are handling the leases state that within a few more days the red tape will be worked out and both blocks will be ready for the drilling contractors. Both of the above mentioned blocks will call for one dollar an acre and a drilling contract for a 4000 foot hole, unless oil or gas is found in paying quantities at a lesser depth.

Acreage adjoining the town section on the east is being blocked for a 3500 foot test.

Mr. W. S. Willis of Fort Worth, representing W. B. Powell, head of the Texas & Pacific Coal and Oil Co., is here and is being assisted by his father-in-law, Mr. J. B. Miles in blocking fifteen thousand acres which adjoins the town section on the east. There is no guess work as to the drilling contract as said contract is

signed with each lease and everything will be complete and ready for the test when the acreage block is completed. Mr. Willis stated that the work of blocking the acreage was progressing rapidly and at the present rate would be completed within the next week or two.

The location of the test will be made as soon as the block has been completed which will be five miles square and if located on the extreme eastern part could not be farther than five miles from town. J. A. Brashear, merchant of Tahoka, who owns a section of land just southwest of the Yeatts farm, announced that he has already let contract for the drilling of three shallow tests, work to begin within the next twenty days. The three holes will be drilled to a depth of 1,000 feet. It is the general belief that a good shallow pool will be found between 500 and 100 feet.

The people of the T Bar community have called a meeting of land owners and citizens for Saturday night for the purpose of blocking acreage in that section which will call for a deep test. Geologists, scouts, lease hounds and curiosity seekers are visiting O'Donnell daily. A number of sales have been reported lately in leases and royalty which has caused the deposits at the local bank to take a sudden rise.

ASSISTANT CHIEF GANTT GAINES PROMINENCE AT LAMESA FIRE

O'Donnell's Assistant Fire Chief, Mr. Grady Gantt, gained prominence and made of himself a hero in the eyes of the Lamesa Fire Department on last Friday while visiting in the Dawson county capitol.

It so happened that O'Donnell's Assistant Chief was on the streets of Lamesa when the fire siren blew, and sense of duty prompted Mr. Gantt to start for the fire station. After entering his car and starting for the scene of action, he discovered a column of smoke ascending skyward in a certain section of town. He sped toward the rising smoke through the busy streets, dodging traffic, with the call of duty urging him onward, finally reaching the scene in a remote part of the city. Alighting from his car, he dashed through the yard which was teeming with frantic women who was weeping and wailing, caused by the devastating conflagration, finally reached the scene where a small barn and hay stack was being consumed by the demon fire. By his quick wits, he made use of a garden hose which was lying near, attached it to a nearby hydrant, turned on the city water and extinguished the flames before the Lamesa Fire Department arrived on the scene.

The Lamesa fire fighters, dumfounded by Mr. Gantt's heroic work in action, silently surveyed the young stranger, at last noticing the assistant fire chief badge, worn by our own idolized assistant chief, asked in surprised tones: "who are you and where are you from?" He meekly replied, "I am the assistant chief at O'Donnell and hearing the siren blow, decided to run down and assist in extinguishing the fire."

Mr. and Mrs. Henry Cathey of the Lynn community are the proud parents of a 9 pound boy which arrived on Monday in very much exhausted condition.

DEATH CLAIMS MRS. C. E. KELLEY SATURDAY MORNING

In the Divine Providence of the Creator of Heaven and earth, on last Saturday morning at 5 a. m. the spirit of Sister C. E. Kelley was called home after a short illness of about ten days. Every thing that could be done by human skill was done, but to no avail. The local Doctors with the help of others from Lubbock used every precaution and science known to themselves but the hand of man only reaches to certain limitations. The Great Creator said to her in the still moments of the early wee hours of the morning: "Its enough, come up higher and inherit the Kingdom prepared for you since the foundation of the world."

Sister Kelley was born in Rotan, Fisher county, September 3rd, 1904, and at her death she was twenty two years, five months and two days old. She was happily married to Mr. C. E. Kelley at Weslaco, Texas in August 1924. Their life was such as the Divine One willed and words cannot express the anguish felt in the heart of Bro. Kelley. Only men who have undergone this ordeal knows the pain in this most trying hour.

She was converted at an early age in childhood and soon thereafter united with the Baptist church and was at the time of her death a devoted member of the local Baptist church. May it now be said, by those who knew her best, that no more, and greater christian spirit was in the town of O'Donnell. At church she will be missed, in Sunday school her place shall be vacant, and in the realms of social service there shall be a void that will never be filled. She was one of those seldom found, that under all conditions and in all places she was an unassuming, yet true to her Creator, that kind that knew no limitation in lending a helping hand wherever need or apparent need presented itself.

The church and every member stands in awe, and in that submissive spirit yields to the God who gave her to the world and who took her from it. Job, centuries ago asked the question: "If a man dies shall he live again?" Christ answered in an uncertain voice: "Yes", Paul said time over again there will be a resurrection. Nature proves it—God declares it, and so it is.

The First Baptist church will adopt resolutions which will be printed in the Index and a copy sent the family. May the hand of Him who holds the destiny of the world in His hand sustain and support these loved ones in their sad hours.

—Her Pastor.

REV. FRED S. ROGERS RESIGNS AT LAMESA

According to announcement carried in last week's issue of the Lamesa Reporter, Rev. Fred S. Rogers, pastor of the First Presbyterian church of Lamesa, resigned his pastorate on Saturday, January 29, to accept the pastorate of the First Presbyterian church of Stamford.

Rev. Rogers made many friends in O'Donnell last summer while conducting a revival at the Presbyterian church, who regret to see him leave this section, but wish for he and family every success in his new field of labor.

REV. J. F. CURRY MOVES TO MUNDAY, TEXAS

Rev. J. F. Curry and family left Friday for Munday, Texas, where they will make their future home. Rev. Curry has accepted a pastorate in the Munday district.

W. C. MURRAY AND SON WALTER, MERCHANTS OF BYERS, TEXAS, WERE HERE THIS WEEK LOOKING AFTER BUSINESS INTERESTS.

W. C. Murray and son Walter, merchants of Byers, Texas, were here this week looking after business interests. Mr. Murray owns a section of land west of town near the Yeatts farm on which the recent oil showing was discovered, and is included in the block of acreage which is being blocked for drilling contract. Murray is very much interested in the oil show.

Mr. and Mrs. R. O. Stark spent Sunday in Lamesa with friends.

COUNTY COURT IS IN SESSION

Many Cases Disposed of; Thirteen Pleas of Guilty Have Been Entered

(From The Lynn County News) Quite a long list of cases were disposed of in the County Court last week and this. Many cases were dismissed upon motion of the county attorney, most of these being "cold check" cases.

There have been 13 pleas of guilty. Three of these for gaming, two of the defendants drawing a fine of \$10.00 and one \$15.00.

One defendant admitted that he had stolen some turkeys and the Judge sentenced him to jail for two days and assessed a fine of \$10.00. There were other pleas of guilty to theft, swindling, assault, affray, etc.

One man charged with gaming fought his case and the jury returned a verdict of "not guilty."

Another young fellow charged with theft claimed that he was not guilty and the jury after being out all night, decided in his favor.

Still another man charged with the offense of theft pleaded "not guilty" and the jury failed to agree.

In two cases the defendants failed to appear and their bonds were forfeited.

POPULAR NEWMOORE COUPLE WED SATURDAY EVENING

A wedding that came as a surprise to their many friends was that of Mr. Ernest Goad and Miss Thelma Daniels. The ceremony was performed last Sunday evening at the Baptist parsonage in O'Donnell by the Rev. W. K. Horn.

Both the contracting parties are very popular young people of the Newmoore community and have a host of friends who join the Index in wishing them much happiness during their wedded life.

They will make their home in the Newmoore community.

MRS. D. W. HARRIS ENTERTAINS FRIENDS

Monday night Mr. and Mrs. D. W. Harris were hostess to a number of friends honoring Otis Harris' birthday.

First was musical entertainment by Gordon King. Bridge and Forty-two were the outstanding games during the evening.

All were invited to the dining room where a large birthday cake with a large "I. O. O. F." sign made of pecans on each side of the cake. The top was lighted with tiny candles. The future of the person in honor was told, when he blew out every candle on the cake the first trial. The cake was cut and served the guests with a delicious refreshment of sandwiches, olives, cookies and hot chocolate.

The following enjoyed being a guest: Misses Mary Lee Towles, Thelma Palmer, Eva Dell Harris, Winnie Sorrels, Mable Harris, Messrs Charlie Curry, Gordon King, Eugene Cook, Raymond Sisk, Otis Harris Albert Curry, Ollie D. Harris, O. L. Harris, Mr. and Mrs. John Etter, Mr. and Mrs. W. E. Dickinson, also Little Billie Louise Etter and Bill Tom Dickinson.

TIME EXTENDED FOR PAYMENT OF SCHOOL TAXES

At a meeting of the Board of Trustees of the O'Donnell Independent School District, it was decided to extend the time of payment for school taxes until March 1st without penalty.

September 28, 1923, at the post
office at O'Donnell, Texas, under the
Act of March 3, 1897.

Less cotton acreage, more wheat,
small grain and feeds, together with
the Cow, Sow and Hen, seem to be
the general plan of farmers through-
out the O'Donnell territory. If the
farmers in general adhere to the
above plans the coming year, then
this section of the country may look
forward to the greatest advancement
in the history of West Texas toward
prosperity, independence and a
Greater West Texas.

TOWN GRAVE DIGGERS

In nearly every community may be
found quite a number of persons who
consider themselves leading citizens,
but who in truth are helping to dig
a grave for their town.

They do it through their failure
to support the institutions which
make the town what it is. They do
make the town what it is. They do
it by sending away for merchandise
which might be bought with equal
advantage at home. They do it fre-
quently through thoughtlessness, but
often through sheer disregard for the
welfare of the community of which
they are apart.

The doctrine of buying at home is
not advanced solely in the interests
of individual merchants. It is ad-
vocated because every citizen of a
town is to a certain extent depend-
ent upon every other citizen for his
own property. Business men are
sometimes as greatly at fault as any

one else in the matter of out-of-town
trading. If the shoe dealer sends
away for his automobile tires, and
the automobile men sends away for
his furniture, and the furniture men
send away for their clothing, and so
on, how can they expect to build lo-
cal prosperity?

All the fine talk about civic pride
that we may indulge in will never
make a town, so long as the life
blood of the community—the cold
cash—is spent elsewhere.

A man may make boosting speech-
es until he is black in the face, but
unless he spends his money where he
makes it he is a home-town grave-
digger.

**MRS. GILLESPIE ENTERTAINS
THURSDAY CLUB FEB. 3RD**

The Thursday Club met in the
home of Mrs. H. E. Gillespie, Thurs-
day, February 3rd. This was a busi-
ness meeting composed of club mem-
bers only. After the business ses-
sion the hostess, Mrs. H. E. Gillespie
served a plate consisting of coffee,
sandwiches, stuffed cinnamon apples,
to the following members: Mrs. J. F.
Campbell, Mrs. Lawrence Dennis,
Mrs. Mac Garner, Mrs. Waldo Mc-
Laurin, Mrs. J. Wood Parker, Mrs.
J. W. Roberts, Mrs. Ross Stark, Mrs.
W. J. Veasey, Mrs. W. E. Dickinson,
Mrs. B. J. Boyd and the hostess.

The club's next meeting will be
Thursday, February 17th, with Mrs.
L. L. Busby.

**THIN, NERVOUS GIRL
GAINS WITH VINOL**

"I was nervous, run-down, and
my druggist recommended Vinol. I
have gained 5 pounds and feel 100
per cent better."—Marie Remmel.
You begin to feel stronger, eat and
sleep better the very FIRST week
you take this simple, strengthening
iron and cod liver compound. For
over 25 years Vinol has helped weak,
nervous women, over-tired men and
frail children. Contains no oil—
pleasant to take.—Christopher Drugs

**Man's Food Supply for
Seventy Years of Life**

If a man of seventy years were
starving it would probably be of little
comfort to him to reflect that he had
consumed in the course of his life 53%
tons of solid food and 42% tons of
liquid, or about 1,280 times his own
weight in both solids and liquids, but
it would be quite true.

Being a man of average appetite
and purse, he would have eaten 15
tons of bread, which would have made
a single loaf containing 1,200 cubic
feet and appearing about as large as
the average suburban home, and on
this bread he would have spread one
ton of butter. If his bacon had been
cut in single slices the strip would
have been four miles long, and his
chops, placed end to end, would have
extended two miles. Twenty ordinary-
sized bullocks have supplied him with
beef, some 18 tons of which he has
eaten, along with 5 tons of fish and
10,000 eggs and 350 pounds of cheese.
If he had elected to have all his vege-
tables served at once, they would have
come to him on a train of cars, the
pod containing all his peas being over
three miles long. He has had 9,000
pounds of sugar, 1,500 pounds of salt,
8 pounds of pepper and 100 cans of
mustard. Three pints of liquid a day
would have amounted to 76,800 pints
or 42% tons.—Washington Star.

Old English Monarch

Man of Modern Ideas

Burglary insurance is no modern in-
stitution. It seems to have existed
from the time of King Alfred, and was
probably introduced by this king who,
had he lived in these times, would
have made a name as a successful
business man.

The town of Ripon, England, he
gave in 808 into the charge of a coun-
cil, who appointed a watchman to
blow a horn every night at nine
o'clock. Between that hour and sun-
rise the town was quiet and no one
was supposed to be abroad. But
Ripon was not altogether a law-abid-
ing place and presently the town au-
thorities found it necessary to pro-
tect its peaceful citizens against raid-
ers and robbers.

And so a law was passed that any
householder wishing so to protect his
house from robbery should pay 4
pence a year to the authorities. Then,
if his house was entered and his goods
stolen or damaged between the blow-
ing of the horn and sunrise, he could
claim from the town council, who un-
dertook to compensate him.—Music
and Youth.

Natural Pendulum

A giant pendulum, formed by a
strange freak of nature, swings in
Yellowstone National park, not far
from Old Faithful geyser, according to
the official government naturalist
in charge of the lecture and nature
study work of the United States na-
tional park service. It consists of the
trunk of a lodge pole pine, suspended
by its top between two other trees of
the same species and swinging by its
base, so that a mere touch will set
it to swaying. Apparently the tree
fell or was blown over many years
ago, its top becoming lodged in the
tops of its neighbors, which grew out
and surrounded it, supporting it se-
curely. Subsequently several feet of
its base rotted away, leaving it sus-
pended in midair. One of the park
nature trails has been run near this
strange natural grandfather clock, and
tourists are permitted to set it swing-
ing.

Language and Life

The one supremely significant fact
in the universe is, to quote Peabody's
fine paraphrase, "the transformation
of language into life." The belief
is one of immense antiquity, though
only of recent years susceptible of
scientific explanation—the belief in
the strange bewildering identity of
sound and life. It has been claimed
that all the visible creation in its
countless forms has been built up
sound-wise, upon a system of har-
monic vibration—that, in the shell,
the fern, the fir-cone, the reptile, the fish,
the bird, the same laws prevail that
govern the stretched string, with all
their harmonic progressions and "as-
sociated wave-lengths."

Explaining Law Term

Barratry is an old term of English
law, derived from an Italian word
signifying to cheat. Common barratry
consists in habitually stirring up
or maintaining quarrels or lawsuits,
or in continually disturbing the peace
by brawls, or in taking or detain-
ing possession of property the right to
which is in dispute. Habitually breed-
ing discord between neighbors is also
barratry. In marine insurance and in
contracts relating to shipping gener-
ally, the term barratry means any fraud
or knavery or willful wrongdoing on
the part of the master of the ship or
the crew, by which the interests of the
owner are injured.

Franklin a Good Swimmer

Franklin was a great swimmer. On
one occasion he swam for four miles
in the Thames, "performing on the
way many feats of activity, both upon
and under the water." He obtained
such a reputation as a water dog that
he thought seriously of becoming a
teacher of swimming. Even at forty
he still swam for two hours at a
stretch. He astonished his fellow
printers by carrying two forms of type
to their one, and, in his old age, he
was fond of displaying his strength
by lifting heavy books.—Bible
Monthly.

**PRESBYTERIAN AUXILIARY
MET WITH MRS SCHOOLLER**

The Presbyterian Auxiliary met
Monday afternoon, February 7th in
the home of Mrs. R. H. Schooler.
This was regular study week of our
book, "Islam on Trek."

Those present were: Mesdames
Gibbs, Campbell, Williams, Roberts,
Koeniger, Schooler, Smith, Parker,
Singleton and Miss Willie Schooler.
After an interesting lesson we ad-
joined to meet the following Mon-
day with Mrs. Ed Singleton.

WANTED—To buy or trade for
a place in O'Donnell. T. M. Ward.
1tp

Born to Mr. and Mrs. Chas. Cathey
of the Pride community on January
18, eight pound boy.

W. E. Dickinson returned Sunday
from a business trip to San Angelo,
Midland and other points where he
spent the past week.

**MR. MILLER SLEEPS LIKE
LOG, EATS ANYTHING**

"After taking Adlerika I can eat
anything and sleep like a log. I
had gas on the stomach and couldn't
keep food down nor sleep" (signed)
R. C. Miller. ONE spoonful Adlerika
removes GAS and often brings sur-
prising relief to the stomach. Stops
that full, bloated feeling. Often
brings out old waste-matter you
never thought was in your system.
Excellent for chronic constipation.
—Corner Drug Store.

THE FOOD VALUE OF PINEAPPLE

A pineapple is being produced
in large quantities in the
Hawaiian Islands and is gain-
ing a prominent place on the
American bill of fare. It is at-
tracting the attention of food
specialists, scientists and doctors.
In fact, it is credited to the credit
of our college and gymnasium
dietary that it has sustained a re-
pertised when the food value of
any vegetable is tested and when
the most carefully analyzed food
is compared with it, the food
that the American people like to
eat.

Such experiments have been
performed on Hawaiian pineap-
ple, and the following interesting
figures have resulted:

Moisture, sugars, protein, crude
fiber, mineral matter, and fruit
acids in the order named are found
in canned pineapple. Naturally

the largest percentage of the
fruit is the moisture.

Since the vitamin content of
food is regarded of great im-
portance in arriving at a judgment
of its dietary value, various ex-
periments on rats and guinea
pigs are performed to determine
the effect of the food.

These experiments have a re-
sulting question that the
vitamin content of the pineap-
ple is all around sources of
vitamins. This applies to both
canned pineapple and the fresh
just after it has been picked at
right stage of ripeness.

Thus the American house-
wife is justified in her belief that
pineapple is an article of di-
etary value and to be regarded as a luxu-
riously pleasing flavor only!

**TEXAS FARM BUREAU
FEDERATION, SEVENTH
ANNUAL CONVENTION**

Report of Committee on Legislation
It is the common judgment of the
principal farmer organization of the
nation that the McNary-Haugen Bill
now pending in the United States
Congress provides the most efficient
means for controlling American agri-
cultural surpluses. It is their judg-
ment that an essential feature of this
Bill is the equalization fee, which is
designed to provide funds for the
operation of the Farm Board and to
reimburse the Board for any losses
it may incur in carrying and orderly
marketing of a surplus so as to serve
as a restraint upon further over-pro-
duction in any given emergency.
Therefore we earnestly urge that
Texas Senators and Representatives
support this measure and do all they
honorably can to affect its speedy
enactment.

Report of Resolutions Committee
Whereas, this convention has form-
ally endorsed the McNary-Haugen
Bill now pending in the National
Congress, and

Whereas, it has been the policy
and practice of the Texas Farm Bu-
reau Federation to refrain from par-
ticipation in political efforts to ac-
complish the improvement of agri-
culture; but with the great question
before us, as an organized group, as
to whether the American farmer
shall continue as an independent,
free American citizen, or whether
his position shall become one of pean-
try or servitude;

Be it the sense of this convention,
that, in the face of this great crisis
we break away from past policies and
practices in this respect, and that we
pledge ourselves to use every effort
in every legitimate direction, to ac-
complish those things that will bring
about an equality for agriculture, and
a higher standard of living upon our
farms.

To do these things it is not neces-
sary for us to go into politics in any

offensive or improper sense; it is
simply necessary to study our own
interest, in legislation, and let our
views be known to our members of
congress and keep our members,
friends and neighbors informed of
our Congressmen's views and atti-
tude, and support and veto.

We are politically reminded, how-
ever, by some Texas Congressmen
that we are a minority of Texas
farmers, and they have intimated
that they were going to cast their
vote for this measure regardless of
our wishes if their views did not co-
incide with ours. It is true that we
are a minority of Texas Farmers, but
we represent an organized group
and are fairly representative of the
interests and opinions of the cotton
farmers of Texas. Organized labor
is a minority of all labor, but it
speaks for the cause of labor. Cham-
ber of Commerce members are a mi-
nority of all labor, but they be-
speak the business opinion of their
communities.

Therefore, be it resolved, that with
specific references to the McNary-
Haugen Bill now in Congress, we de-
mand of our representatives their
specific approval and favorable vote
on this measure, that we return to
our homes throughout the State and
make our position forcibly known,
and our intentions to expect from our
representatives in Congress the sup-
port to which the agricultural South
is entitled and which was entrusted
to them at the time of their constitu-
ents placed them in the responsible
positions they now hold, and

Be it further resolved, that the
Farm Bureau News, official organ of
cooperative marketing in Texas, de-
voted space in the future setting forth
the views, attitude, support and vote
of our Congressional representatives
to the end that our people may know
their stand on this and similar mat-
ters affecting the welfare and pros-
perity of the South, and

Be it further resolved, that this
convention call upon our Congres-
sional representatives at this time for
a clear, definite, understandable
statement as to their attitude toward
the McNary-Haugen bill in order
that it may be published in the co-
operative marketing official organ
for the information and enlighten-
ment of organized farmers of Texas.

**NO FOREIGN MATTER CAN
REACH 'INNARDS OF DODGE
BROTHERS' ENGINES**

Probably no single mechanical fea-
ture now in use is more effective in
prolonging the life of a motor car
than the air cleaning device.

The cleaner which is now standard
equipment on Dodge Brothers motor
cars is very simple in construction
consisting of only the outer shell and
a rotating fan. The clarifying of the
air is accomplished by centrifugal
force; that is the rotation of the fan,
through which all the air passes,
throws the particles of dirt against
the side of the outer shell and they
drop through the bottom of the clean-
er, allowing only the clean air to pass
through to the combination chambers.
When we realize that an automobile
engine breathes from fifty to one
hundred times as much air as we do,
we can readily see that the air clean-
er by preventing dirt and grit from
mixing with the engine lubricant in-
sures longer life in the main and con-
necting rod bearings, the pistons and
rings and the cylinder walls.

According to figures furnished by
the professors of automotive engi-
neering of Purdue University, fifty
per cent of the wear and tear on an
engine is caused by road-dirt and
dust which enters through the intake.
Likewise, this same dust combining
with the oil of the engine is the chief
ingredient of the so-called carbon
which accumulates in the combustion
chambers. It is appreciated by the
automobile driver that Dodge Broth-
ers, in equipping their car with the
air-cleaner, have eliminated 85 per
cent of this trouble. Dodge Brothers
engineers in testing the new device
in the dusting desert in the West de-
clared it to measure up to Dodge
Brothers exacting high standards.

True Distinction

The Most
Beautiful Sedan
in Chevrolet History!

A masterly example of the coachmaker's art, the
Chevrolet Sedan with its Body by Fisher reveals a
distinction usually found only on the costliest
custom-built creations. It is literally true that no
four-door enclosed car, priced so low, ever exhib-
ited such marvelous beauty of line and color.

It is finished in rich Marine Blue Duco, gold strip-
ed, and its handsome proportions are emphasized
by new full-crown one-piece fenders and bullet-
type lamps. In addition it offers the host of im-
provements which helped make the Most Beauti-
ful Chevrolet the greatest sensation of America's
greatest industry. AC air cleaner, AC oil filter,
large 17-inch steering wheel, new frame-mounted
tire carrier, gasoline gauge and many, many others.

Come in! You need only to see this new supreme-
ly beautiful and mechanically finer sedan to real-
ize what amazing value it represents at its greatly
reduced price.

Tribe Named "Seneca" by Dutch Colonists

Seneca is not properly an Indian name. It became the designation of one of the Iroquoian Five Nations by a curiously roundabout way, according to the explanation given in the "Handbook of American Indians," published by the bureau of American ethnology.

The five great tribes of the Iroquois were the Mohawks, the Oneidas, the Onondagas, the Cayugas and the Senecas. When the Tuscaroras were admitted to the confederation it became the Six Nations, "the great hill people," and that was the name of their oldest village, situated on a hill at the head of Lake Canandaigua. Their cousins and allies the Oneidas were "the people of the standing stone"—the Onenlute-o-ka or Onenlute-ron-non, and the name Oneida is simply an Anglicized simplification of the tribal name.

The Dutch settlers of New York first came to know the Five Nations through their nearer neighbors, the Mohegans. The Mohegans called the Oneidas the Skinnekins, a translation of "standing stone" into the Mohegan tongue. But the Dutch, adopting the term, applied it to several tribes of western and central New York, to only one of which, the Oneida, was it properly applicable. Then "the name Skinnekins became the tribal name of the Seneca by a process of elimination which excluded from the group and from the connotation of the general name the nearer tribes as each, with its own proper native name, became known to the Europeans."

The other settlers followed the Dutch in employing the term, and thus "the great hill people" had fastened upon them the name of another tribe, in another tongue. And even this under the influence of the Roman name, became modified into Seneca.

Powerless to Resist Sweep of Avalanche

There were several destructive avalanches in the St. Gothard region in 1925, when the railway was damaged at several points, and many peasants and workmen were killed. But one rainy Sunday in September, forty-five years ago, 150 persons perished when a large portion of the Plattenbergkopf split off and slid down on the village of Elm.

Early in the day great boulders began to come crashing down with disturbing frequency, and quite a number of men were out watching them. Suddenly they saw a whole cliff sway and topple over. Seventeen minutes later another cliff fell, and, to their horror, the doomed villagers saw that the mountain had thus been undermined, and was poised over thin air far above them. Four minutes later it fell, shattered into millions of fragments, and came sliding down at terrific speed. Through the village went the avalanche, across the tranquil meadows of the valley, and up the opposite mountain-side for a couple of hundred feet, when it diverged right and left, like the wash of a spent wave, for many hundred yards.

Douglas Fir Entirely Distinct Tree Species

The Douglas fir, a native of the Northwest but now being planted extensively in the East, is becoming a popular Christmas tree, according to the American Forestry association. The species was named for a Scotch botanist who discovered it on an expedition in 1825, but its scientific name is pseudotsuga, meaning "false hemlock." As a matter of fact, it is neither a hemlock nor a fir, and, though it is sometimes called a spruce, it isn't that either. The tree belongs to an entirely distinct species. The tree most commonly used for Christmas trees is a real fir—the balsam, so called because its blister-like pockets yield the resinous liquid known as Canada balsam, which is used among other things for attaching cover plates to microscope slides.

Ay, That's the Rub

The word "scrape," meaning a difficulty or some unfortunate predicament, has several synonyms, as "rub," a "squeeze," a "pinch," etc., all of which are younger than the term "scrape," and of slightly different interpretation. "Getting into a scrape" came from Scotland, and the expression is as old as the ancient and honorable game of golf. In Scotland a rabbit's hole or burrow is called a "scrape." When a player's ball rolled into one of these holes it was manifestly impossible to play it, and the rules of the game recognized this fact by naming but a slight penalty for the player. He merely "got into a scrape."—Chicago Journal.

WEST TEXAS C. OF C. MAINTAINING LEGISLATIVE BUREAU IN AUSTIN

The West Texas Chamber of Commerce is maintaining an informational and legislative bureau in Austin during the session of the legislature with Manager Homer D. Wade in charge. This bureau is located at 218219 Littlefield Building and is at the service of all West Texans. Those desiring information on legislative matters or desiring service of the West Texas Chamber of Commerce in legislative matters are invited to write the bureau concerning their needs.

Manager Wade is issuing each week a legislative letter concerning activities in the state legislature. He will keep West Texas informed of the matters of legislation concerning West Texas, and will undertake to give a weekly digest of the proceedings in Austin. This letter will go to all chamber of commerce secretaries in West Texas, will go to all officers and directors and unit directors of the West Texas Chamber of Commerce, and will be sent to all members of the West Texas Chamber of Commerce who will write to the general offices at Stamford, Texas, that they would like to receive same. There will, of course, be no charge for the service.

West Texas fared well in the organization of the legislature and in committee assignments for the past week. Hon. R. L. Bobbitt of Laredo was elected speaker without opposition. Another West Texas, Carl P. Phinney of Brownwood, was selected as chief clerk of the House. West Texas signally honored by the appointment of committee chairman Dewey Young of Wellington becomes chairman of the committee on revenue and taxation, Lee Satterwhite of Amarillo chairman of the Penitentiary Committee. Cecil Story of Vernon is chairman of the Oil, Gas and Mines Committee. Chairman of the Committee on Municipal and Private Corporations fell to E. S. Cummings of Abilene; George Kemble of Fort Worth was made Chairman of the insurance committee

Grady Woodruff of Decatur was appointed Chairman of the Committee on Eleemosynary Institutions. The Committee on Criminal Jurisprudence will be headed by Alfred Petsch of Fredricksburg. The chairmanship of the committee on commerce goes to M. H. Hagaman of Ranger.

Mr. Wade in his first report declares that the West Texas group in the legislature is recognized as one of the strongest contingents in the state law making body. They stand together for the good of West Texas and work as a unit on legislation affecting this section of the state. He reports that the hoppers of both houses are filled with a mass of bills seeking to regulate every line of human endeavor in Texas. However this is customary for the first week of a new legislature. Some bills die in the committee rooms. Others fall in the houses. Within a fortnight the matters of legislation to be considered by both houses will begin to take shape and the attitude of the West Texas Chamber of Commerce concerning the different bills will be announced as they take form.

In the opinion of Mr. Wade, the present session of the Texas legislature bids fair to be a constructive session, and he is optimistic of the outlook.

CHEVROLET COMPANY HOLD NATION-WIDE SALES MEETINGS

One of the most significant events in the automotive industry today is the series of nation-wide sales meetings of the Chevrolet Motor Company now in progress. They are destined to reach 15,000 dealers, associate dealers and bankers in 21 of the largest cities before their close in April.

Sales plans of the company for what is expected to be the largest year in its history are outlined at these meetings by officials of the sales, advertising and service divisions. As the world's largest makers of three speed transmission cars the company is looking forward to 1927 for a measurable increase over 1926, when production records for the pre-

vious year were exceeded by more than 40 per cent. Recently announcement was made that the company's facilities had been expanded to make possible production of 1,000,000 units yearly.

R. H. Grant, vice-president and general sales manager, will direct the meetings and outline the most comprehensive sales campaign ever attempted by a manufacturer of automobiles. The meetings will be held from coast to coast and will place the entire dealer organization in personal touch with company officials and will give first hand information on the workings of the sales plans. A graphic presentation of these plans will feature the afternoon session at the meetings. Playlets will demonstrate new policies of sales, advertising, service and used car merchants under the 1927 program. Dealers will be guests of the company at banquets following the meetings.

Approximately 3,000 bankers will attend the meetings, reflecting their interest in Chevrolet's position and influence in the automotive industry today.

Assisting Mr. Grant in the meetings will be C. E. Dawson, A. W. L. Gilpin and H. J. Klingler, assistant general sales managers; R. K. White, sales promotion manager; J. E.

Dr. Charles Dunn

DENTIST

of Lamesa, Texas will be located in Campbell Building next to Dr. Campbell's office, in O'Donnell, Friday and Monday of each week. Those desiring dental work call at his office.

FORD THE BEST EVER

The 1927 FORD is the best car ever built for the money. It cannot be excelled, in either beauty, performance or economy in operation. You will be pleased with the new color schemes. Call and have us demonstrate the New Ford.

Bankrupt Sale at Salem Dry Goods Co.

NOW IN FULL SWING

Hundreds of people have visited our BIG SALE and left the store with a big bundle for a very little money. Ask your neighbor about this BANKRUPT SALE—they will tell you what a money-saving event it is.

NOW THE GRAND CLIMAX OF VALUE GIVING IS HERE.

If you need shoes, bring the family in and fit them out at prices that will astonish you. Our stock is still very complete as we have added some new merchandise this week.

COME EVERY DAY. DON'T LET ANY OF THESE RARE BARGAINS ESCAPE YOU.

Bankrupt Sale at Salem Dry Goods Store

O'Donnell, Texas

NEWS MEMORY OF WEST TEXAS TOWNS

FALLS—Several hundred in cash and scholarships will be awarded high school girls of West Texas who are successful in presenting the merchandise in the annual "Contest" sponsored by the Texas Chamber of Commerce in connection with their annual convention. Rules of the contest are the same as those of last year.

BIRD—Butter, poultry, and other products in the Lone Star State will be entirely through Texas demands outlets with no danger of reduction according to authorities sent in to the West Texas Chamber of Commerce from the Stackyards Company.

DRINK—A divine drink, made from tree ripened sweetened grape fruits, is receiving widespread approval as a most acceptable beverage. The drink is called grapefruit and is already being adopted in Dallas and Houston. Fruit orchards and surrounding areas are supplying numerous demerits of crates of the new drink and for export.

APPOINTMENT—A meeting of the Board of Amherst of the West Texas Chamber of Commerce was held by President Arthur Wood of the regional organization.

GATE CITY—The Gate City Community in Childress is preparing a modern chick feed. Chickens are to be fed, dressed and marketed in the eastern markets at the rate of \$1.00 per setting or \$5.00 per hundred. Nothing shipped at the above prices, purchaser must come and get them. E. W. Hester, O'Donnell. 20-11c

MISS RUTH PRATT—Miss Ruth Pratt of the Mesquite community became the bride of Mr. James E. Calcott of the Berry Flat community on last Thursday evening, February 27th. The ceremony was performed by the Rev. W. A. Henderson at his residence in O'Donnell. The young couple are very popular and each have a host of friends in their respective communities, who join in wishing them a long, happy married life. They will make their home in the Berry Flat community.

B. M. HAYNES and family are spending the week in Munday, Texas with friends and relatives.

FAR SALE—Single row P. & O. lister planter. Will sell cheap. See W. L. Gardenhire. 20-21p.

Mrs. D. J. WILLIAMS of Lubbock was here Saturday to attend the funeral of Mrs. C. E. Kelley.

TEXAS ALMANAC REVIEW

The Texas Almanac and State Industrial Guide for 1927, published by The Dallas Morning News, has just come from the press. It contains many new features in addition to complete revision and bringing up to date of all statistics on such general subjects as crops, live stock and minerals. A large folded general commercial map of Texas is included with the volume, showing counties, cities and towns and railroads, including new and tentative lines, and the reverse side a revised highway map of the state.

In addition to keeping up to date figures upon matters of general commercial and political interest, it is the purpose of the Texas Almanac annually to devote a considerable portion of each volume to original matter. Among the new features in the volume this year are list of Texas native trees by common and technical names, with location of growth indicated; location and length of all Texas rivers, bayous and creeks of twenty-five miles or more length; latitude and longitude of all Texas towns for which observations have been made; summary of the bills and amendments recommended by the Educational Survey Commission; complete review of tax remission to counties and cities by the State Legislature, showing amounts of property valuation involved, names and addresses of principal poets, novelists, playwrights, musical composers, sculptors and painters of Texas, Texas libraries with numbers of volumes, land holdings, power development and other subjects.

Complete and up-to-date information is given also on population, state district and county officials, public schools, universities and colleges, manufacturing, agriculture, live stock, minerals, railroads, highways, and motor vehicles, utilities, banking, insurance, election results by counties in 1926, reclamation and irrigation, vital statistics, State Government finances and hundreds of other subjects. It is a complete encyclopedia of Texas, carrying latest available facts and figures on practically every field of information.

We have a large flock of pure Berry Strain of Partridge Plymouth Rocks. Also a fine pen of Columbian Wyandotts. Am getting lots of eggs which we are offering at \$1.00 per setting or \$5.00 per hundred. Nothing shipped at the above prices, purchaser must come and get them. E. W. Hester, O'Donnell. 20-11c

PRATT-CALCOTT

Miss Ruth Pratt of the Mesquite community became the bride of Mr. James E. Calcott of the Berry Flat community on last Thursday evening, February 27th. The ceremony was performed by the Rev. W. A. Henderson at his residence in O'Donnell. The young couple are very popular and each have a host of friends in their respective communities, who join in wishing them a long, happy married life. They will make their home in the Berry Flat community.

B. M. Haynes and family are spending the week in Munday, Texas with friends and relatives.

FAR SALE—Single row P. & O. lister planter. Will sell cheap. See W. L. Gardenhire. 20-21p.

Mrs. D. J. Williams of Lubbock was here Saturday to attend the funeral of Mrs. C. E. Kelley.

York Minster Bells

At a recent special service in York Minster, England, the famous bells of the cathedral which had been recast and hung were rededicated. All the bells, previously a peal of 12, cast in 1840, have been recast with additional metal, and a new semi-tone bell has been added between the sixth and seventh, this completing the middle ring of eight in E flat. The peal now consists of 13 bells, with the largest, or tenor, bell weighing three tons, and is said to be one of the finest peals in England. In addition, there is Big Peter, weighing nearly 11 tons, the third largest in the country, the largest being Big Paul and Big Ben.

Kissing Discovered Early

A young Cretan fondly embracing a pretty maid who shyly rests her head on his shoulder is sculptured on a vase recently exhumed on that Grecian isle. It proves that kissing was a popular pastime 15 centuries before Christ and that modern sheiks and flappers could teach the Cretans nothing about the "soul kiss." Ages ago the Cretan civilization was buried on this island—perhaps by an earthquake. Now excavations are bringing to light many evidences of the joys, sorrows and loves of the domestic and social life of its ancient inhabitants. They were people much like us.—Capper's Weekly.

Source of Quinine

Cinchona or chincona is the name of the tree from the bark of which is prepared the valuable medicine called quinine. The tree is a native of South America, growing best on the moist eastern slope of the Andes mountains, but it has been successfully introduced into India, Burma, Ceylon and the West Indies. The bark of this tree is called Peruvian bark, because it was in Peru that the Spaniards first learned of its medicinal properties. It is also known as cinchona bark, and from it quinine is obtained, which in the form of sulphate of quinine has a wide use in the practice of medicine.

Beauty and Good

Indeed, the beautiful is inseparably united to the good and the true. . . . for the very nature of the sense of beauty is such that through it we gain a clearer concept of the other two values. The history of the race has shown that at the height of materialistic success, the desire for artistic enjoyment has been a potent factor in bringing a people back to the higher ideals which underlie a peaceful intercourse between nations.—Herbert Sidney Langfeld, in "The Aesthetic Attitude."

Sweet Revenge

The Mose Jacksons were separated. And knowing that Mrs. Jackson was not at home, a neighbor woman's suspicions were aroused when she saw Mose slip stealthily over the back fence and disappear into the woodshed.

Deciding to investigate, she hurried around to the front gate and met the grass widower emerging with a wash-tub tightly clasped in his arms and trailing a washboard and wringer after him.

"Whut, yo' gwine do wid dem, niggah?" she demanded suspiciously. "Back 'em," was the emphatic reply. "Dat woman ain't gwine to vamp no other niggah wid mah weddin' presents!"

Many Postage Stamps

The little postage stamp is one of a huge family. There were more than 18,000,000,000 of them born in Washington last year, being sufficient for supplying each man, woman and child in the country with 100. They represented a face value of \$450,000,000 and required 900 tons of paper and 370,000 pounds of ink in their manufacture at the bureau of engraving and printing. Placed end to end they would circle the earth eleven times. The cost of production is about one cent for each stamp.

CARD OF THANKS

Words cannot express our heartfelt thanks to our friends and neighbors for the many acts of kindness and comforting words spoken during the recent illness and death of our dear wife, sister and daughter. We especially wish to thank the Eastern Star and T. E. L. Class and all others for the beautiful floral offerings.

C. E. Kelley,
Mr. and Mrs. R. L. Kelley,
Mr. and Mrs. E. C. Couch.

SIMPLE MIXTURE STOPS GAS BLOATING

Simple buckthorn bark, glycerine, etc., as mixed in Adlerika, often helps stomach trouble in TEN minutes by removing GAS. Brings out a surprising amount of old waste matter you never thought was in your system. Stops that full, bloated feeling and makes you enjoy eating. Excellent for chronic constipation. Adlerika works QUICK and delightfully easy.—Corner Drug Store.

GAINS EIGHT POUNDS SINCE TAKING VINOL

"I felt sluggish, drowsy and weak. A friend suggested Vinol. Now I feel fine and have gained 8 pounds.—R. H. Bailey. The very FIRST week you take Vinol, you begin to feel stronger, eat and sleep better. For over 25 years, this simple, strengthening iron and cod liver compound has been helping nervous, run-down women, tired men, and pale, sickly children. Contains no oil—pleasant to take.—Christopher Drugs

VITAMINS IN CANNED PINEAPPLE

CAPTURING vitamins and keeping them is the greatest game of food scientists today. In the case of canned pineapple, sunshine captures the valuable vitamin and canning keeps it. After that the game is easy—any one can eat pineapple because pineapple is easy to eat.

Over there in Hawaii, where comes our canned Hawaiian pineapple, great plantations of pineapple are spread out like a magic carpet in the sunshine of the tropics. There the fruit absorbs sunshine for eighteen months. Being an "air plant," it lives on air and sunshine, and sunshine scientists tell us is largely responsible for the presence of vitamin D. This particular vitamin is beneficial for children since the presence of it prevents rickets.

Other mysterious forces, which only Nature understands, are busy in the meantime capturing two other vitamins, found especially in fruits—Vitamin B and Vitamin C. The former is very essential for children because experiment shows that without Vitamin B young animals soon cease to grow and finally die.

Once captured, the next step is keeping these vitamins. Just as soon as the pineapple is fully ripened in the fields, it is rushed to the big canneries, canned quickly, so that even that most volatile of vitamins, Vitamin C, may have no chance of escape. Canned foods retain vitamins in greater amount than home-cooked foods, recent research at Columbia University has established, due to the intense heat used in the quick process of canning and certain conditions in the sterilizing process.

Oily Chickens and Oil-Filled Water Well Set Lynn Co. on Edge

Western World, Fort Worth, Texas
O'DONNELL, Texas—The chickens that pointed out a future oil bonanza by getting themselves soaked with the fluid and the water well that tried to aid the development by turning into an oil well all on its own hook may yet be historic episodes for future ages in Lynn County.

E. D. Yeatts, Lynn County farmer is the man who will probably prosper most if the predictions turn out true. Early in the week Yeatts and Tom Cole, a neighbor, came to O'Donnell with a bucket of what apparently is pure petroleum, taken from the well, and told the story of the chickens.

The Yeatts well, it seems, is on one of the highest points in the county and on what is believed to be a very pronounced oil structure. It was originally 160 feet deep but cavings have now raised it to a total depth of 107 feet. Last summer Mr. Yeatts began to be worried about his White Leghorn chickens, who apparently were not doing so well. Instead of being glossy white they had a dirty, greasy appearance.

Trying to find out the why of this dirty look, Mr. Yeatts dug into the sand near the house where the chickens were in the habit of dusting themselves and found it soaked with oil. Everybody had a different explanation of how the oil got there, but Mr. Yeatts firmly believes it is coming up through a fissure in the limestone.

Now his well has suddenly changed from a water well to an oil well, following a cave-in, apparently favoring the oil theory strongly.

The pump failed to work a few days ago, Yeatts explained, and when he pulled the casing and examined the hole the thing was completely minus water but filled with oil which continued to flow into the cavity as it was bailed out.

Gas could also be detected, it is stated.

Reports of hens and hole have set virtually the whole county wondering just what will happen next. But if Lynn County does follow suit and place itself in the ranks of Texas oil counties there is one ex-water well and one flock of chickens due to join Texas history, citizens agree.

J. A. Brashear, merchant of Tahoka, who owns a section of land west of town near the Yeatts discovery, announced last week that he had let a contract for the sinking of three shallow test wells to a depth of 1,000

feet, on his farm. Work will begin within the next twenty days according to information given out by Mr. Brashear.

Mr. Brashear firmly believes that oil in paying quantities will be found before he reaches the 1,000 foot depth. His belief is based upon the report of geologists and oil men who have visited the Yeatts well, all of whom are of the same opinion.

CHEVROLET MOTOR CO. ESTABLISHES NEW ZONE OFFICES

Reflecting increased activity under the 1927 sales program, the Chevrolet Motor company has just announced the opening of three new zone offices located at Columbia, E. C., Salt Lake City, Utah, and Richmond, Va., making a total of 37 zone sales offices now operating.

Possibilities of increased sales of Chevrolet automobiles in the territory embraced in the new zones are such that it was vitally necessary to create new zone headquarters, with adequately increased staffs, to handle the business, according to C. E. Dawson, assistant general sales manager of the Chevrolet Motor company.

The new zone offices will supervise more closely the activities of field forces and Chevrolet dealers. Offices will be supervised by zone sales managers, with an assistant and the necessary clerical force to maintain proper records. The opening of the new offices is in line with the Chevrolet Motor company's policy of concentrating more closely on districts where past sales indicate a rapidly growing market.

Following are the changes and appointments made in the various sales zones and regions: H. L. Horton, assistant regional sales manager of the Atlantic Coast Region at Tarrytown, N. Y., becomes regional manager at Tarrytown succeeding D. E. Briston, who becomes regional sales manager of the Middle West region, with headquarters at St. Louis, Mo.; E. W. Fuhr, regional sales manager at St. Louis, becomes Pacific Coast regional sales manager at Oakland

succeeding F. M. Coats, resigned; R. L. Myers, assistant regional manager at St. Louis, becomes zone sales manager at New York City, succeeding G. H. Schmidt, who is transferred to the Atlantic Coast Regional office at Tarrytown to assist Mr. Horton; W. E. Holler, city sales manager at Los Angeles, Calif., becomes assistant regional manager at St. Louis; L. M. Dreyer, zone sales manager at Los Angeles, becomes zones sales manager at St. Louis, succeeding W. J. Burns, who becomes zones sales manager at Oakland, Calif.; G. H. Wallace, zone sales manager at Oakland, assumes a similar position at Los Angeles; E. E. Jones, sales manager of associate zone at Richmond, Va., operating under the Baltimore zone office, now heads the new zone office at Richmond; C. G. Smith, zone sales manager at Little Rock, Ark., becomes zone sales manager at Memphis, Tenn., replacing T. J. Burns, resigned; M. B. Roys, city sales manager, Chicago, becomes zone sales manager at Little Rock; P. A. Watson, sales manager of sub-zone at Columbia, S. C. operating under the Charlotte, N. C. zone office, becomes sales manager of the new zone at Columbia, C. B. Spraker, sales manager of Sub-zone at Salt Lake City, operating under the Denver zone office, becomes sales manager of the new zone office at Salt Lake City.

Rotor Kites

The lifting ability of kites used for meteorological purposes has been improved by the addition of the Flettner-rotor-apparatus, which had previously been applied with success to increase the speed of ships at sea, and which had even displaced sails on an experiment ship. At the twenty-fifth anniversary of the founding of the aeronautical observatory at Lindenberg, Germany, Dr. Hugo Hergesell, its distinguished director, gave a public demonstration of the successful application of this new principle to kite flying.

Concrete Resembles Coral

"Gassing" concrete to give it added lightness is a novel idea recently developed in Sweden. While the concrete, a mixture of sand, gravel and cement, is still soft, gas is introduced into the mixture. This, says Popular Science Monthly, has the same effect on the concrete as yeast has on bread, filling it with small holes. The concrete so produced is said to be just as strong as the ordinary product, but much lighter, requiring less steel to support it.

Born to Mr. and Mrs. C. E. Harris of the Pride community, a fine girl, an last Sunday night.

City Marshall Wimberly spent Thursday in Lubbock on business.

Dr. and Mrs. C. T. Kibbe and son spent the first of the week visiting Dr. Kibbe's parents at Hereford.

TEXAS HAS LARGEST PETRI- FIED FOREST KNOWN TO MAN

Washington, Jan. 26.—The petrified forest recently discovered in Texas is the most marvelous known to man, experts of the American Forestry Association declared in a statement today. Two geologists, Dr. C. O. Gaither and Prof. S. I. Cade are the discoverers. The forest is situated in an almost inaccessible valley of the Big Bend region of Texas, nearly one hundred miles from the nearest railroad.

Doctor Gaither and Professor Cade state that they found tree trunks standing to a height of 100 to 150 feet, also many great trunks of trees prostrate, of a size unparalleled in the world, both in diameter and in length. One tree trunk measured 896 feet in length. The upright trunks are so large that they appear from a distance to be great symmetrical columns of natural rock.

Few white persons have visited the valley, which is split by a deep arroyo leading into the Rio Grande. A thick layer of volcanic ashes and pumice stone covers the surface, which evidently came from a peak in the neighboring Chisos Mountains. Since the prostrate trunks are covered with ashes it is evident that this volcanic eruption occurred long after the forest passed into its present petrified state.—Exchange.

The petrified forest of the Big Bend has been known to the inhabitants of that sparsely settled region for many years, but since it did not contribute to the business of raising goats and cattle, they viewed it with passing curiosity and forgot about it until somebody would mention petrified trees in their presence, and they rarely mentioned the petrified forest of the Chisos Mountains for fear their veracity would be questioned.

A legislator once planned to induce the Legislature to appropriate money for the purpose of placing a petrified tree from the Big Bend on the Capitol grounds at Austin, but he could not conceive a plan by which even a small petrified bush could be hauled out of that country, so he abandoned the idea.

The romance and beauty of the Big Bend country is little known to the outside world, for it was heretofore "discovered" and exploited only by the taciturn cowpuncher, and the effete considers his judgment in

such matters should be naught, for he is a miser and incapable of beauties and rare things. But since the petrified Big Bend has been a "Dr." and a "The inaccessible place" puncher rides his horse won't be long to look well to her few more "discoverers" and the blacktail move on to make that is ever seeking nature. —Sterling

TWELVE WEEK SCHOOL WILL AT

LUBBOCK, Tex.—Twelve weeks summer school at Lubbock, Texas, at the Lubbock Normal College, will begin Tuesday, Jan. 26, and will continue until Friday, August 26, and will be divided into two terms of six weeks each. Work of colleges of liberal arts, engineering, and agriculture will be offered, but instead of a six-week term, the program will be extended. The schools of liberal arts, engineering, and agriculture will be offered, but instead of a six-week term, the program will be extended. The schools of liberal arts, engineering, and agriculture will be offered, but instead of a six-week term, the program will be extended.

Since the climate is unusually pleasant, it is expected that many teachers and warmer altitudes attend here, combining vacation with a period of study. The altitude is 3251 feet.

Last summer a trip to Carlsbad Cavern was the institution and a interesting feature. The repeated this year, with the hope that other trips of historical interest will be made. Those who bring the program to Lubbock will find of interest in the country which may be sure and profit.
