

BANKERS IN NATIONAL MOVE FOR UNIFORM FINANCIAL PRACTICES

Would Promote Greater Consistency Among All the State Laws in Respect to Banking Conditions—Uniformity of Practice and Understanding Will Make for Greater Convenience, Efficiency and Safety for All Business.

By S. J. HIGH
President State Bank Division, American Bankers Association

RAPID interchange of business and the quick transportation of goods in the United States, coupled with almost instantaneous means of inter-communication by telegraph, telephone and wireless, have welded the country into an economic unit. The nation is not, in a business sense, conducting its affairs in water-tight compartments, as in a measure it did in the days of slow travel and remote places, but styles, methods, commodities and business practices flow freely today in all directions. Therefore it is desirable that finance, trade and industry throughout the country operate along generally uniform form or at least consistent lines, so that a contract or an agreement or obligation in connection with business transactions shall mean virtually the same thing in all parts of the country. Particularly necessary in this connection is the establishment of uniform financial and banking practices so as to facilitate the flow of trade along accepted and understood lines.

S. J. HIGH

Banking in the United States is recognized as a semi-public type of business and is therefore subject to laws to define the scope and character of its activities. These laws at present set up a great diversity of conditions under which banking is conducted in various parts of the country since they come from both state and federal authorities. The national banks are all chartered by the federal government and therefore operate on the same lines in every state of the Union, but there is no such regularity in respect to the conditions under which the state banks chartered by the respective forty-eight states must conduct their business. All state banking codes, while they have similarities, also have many great dissimilarities in respect both to the national bank laws and the banking laws covering state bank operations in other jurisdictions.

Bankers Move for Uniform Laws
The State Bank Division of the American Bankers Association, which later includes in its membership banks of all descriptions throughout the country subject to all the variations of state and federal banking laws, is committed to the effort to bring about greater consistency and uniformity among the statutes of all these various jurisdictions. This body is conducting a vigorous nation-wide campaign urging that active steps be taken to secure greater coordination in banking legislation, more equitable conditions and more uniformly efficient public supervision of banks in the several states.

The organization is particularly concerned with fostering this movement to bring about more uniformly desirable conditions throughout the United States in respect to the public supervision of banking institutions by the state banking departments. It is on record as favoring the policy that the important office of state bank commissioner should be kept as free from entangling partisan politics as the judiciary itself and should be completely detached from all other functions of state government.

It is also on record as favoring the policy that the tenure of office of state bank commissioners should be made more secure and lasting than is now the case in many state jurisdictions and that this important public officer be granted sufficient compensation and discretionary power so that the office shall attract and retain the services of men of outstanding executive ability and successful banking experience.

It is also a part of this policy that the bank commissioner's ability to serve well should be strengthened by providing him with adequate forces of bank examiners, selected on the basis of merit from men having the requisite qualifications of honesty, ability, training and banking knowledge to carry out the duties of their office on the highest plane of usefulness to the public as well as to banking.

The Trend of State Laws
The Association's State Bank Division has recently conducted a nationwide survey of state banking legislation and conditions and in general has discovered a definite trend along the following lines:

There is a distinct tendency among the states to raise the minimum capital required for banking institutions to \$25,000 and also to give the bank commissioners or the banking boards sole power as to the granting of charters for new banks, thus enabling them to use discretion as to the need or desirability of added banking facilities or the fitness of the organizers to enter the banking field. In this connection many states are creating banking boards to act in an advisory capacity with the state bank commissioners.

There has also been observed a tendency to increase the compensation of the bank commissioners and to lengthen their terms of office and to give them power to appoint necessary deputies and examiners so as to build up an adequate force to carry out their responsibilities and duties. An important augmentation of the powers of

SCOTCH AGAIN

Ole, the night porter, was testifying before the jury after the big bank robbery.

"You say," thundered the attorney, "that at midnight you were cleaning out the office, and eight masked men brushed past you and went on into the vault room with revolvers drawn?"

"And a moment later a terrific explosion blew the vault door off and the same men went out past you carrying currency and bonds?"

"Yah," said Ole.
"And what did you do then?"
"Aye put down my mop."
"Yes, but then what did you do?"
"Well, aye say to myself, 'Dis baned hell of a way to run a bank.'"

GELATIN CAKE PUDDING

1 package cherry or raspberry flavored gelatin
1 cup boiling water
1 cup cold water or fruit juice
2 cups plain cake, diced
(Stale cake may be used)
Dissolve the gelatin in boiling water. Add cold water or fruit juice. Chill. When slightly thickened, fold

in cake. Pile in sherbert glasses. Serve plain, with custard sauce, or with whipped cream. Serves 6.

ORANGE AND RHUBARB SAUCE

2 pounds rhubarb
2 oranges
1 1/2 cups sugar
1 tablespoon granulated gelatin
1 tablespoon cold water
Wash rhubarb, cut into inch pieces; pea borages, removing membrane with peel, and cut in small pieces; put rhubarb, orange, and sugar in an earthenware or glass baking-dish, and cook about one hour. Dissolve gelatine in cold water, add to rhubarb mixture, and when cool, fill individual pastry shells with sauce, and decorate with whipped cream, forced through pastry bag and rose tube.

AMERICA LEADS THE WORLD IN SAVINGS

The past year saw the greatest gains in savings in a single twelve-month ever recorded in the United States, bringing the total savings deposits in banks to over \$28,400,000,000 on June 30, 1928, held in more than 52,000,000 individual accounts. It is reported by the American Bankers Association. These are the biggest figures in this field shown by any country in the world.

These figures are indicative of prosperity more general than any time since the business depression of 1920 the report declares. Only three states failed to show a gain and the 1928 volume of savings constituted an increase of more than \$2,327,000,000 above the 1927 figure. The gain per inhabitant for 1928 over 1927 was \$11 and the gain in number of savings depositors was 2,496,079, an increase of 5.2% as against a growth in the population of the country of 1.2%.

The gain in savings per inhabitant in New England and the Middle Atlantic states over the previous year was \$26. These groups of states, with 29.5% of the population of the United States and 23.5% of the total savings deposits, have the largest savings rate \$441 per inhabitant, of any area in the world. The per capita savings for the United States as a whole this year stands at \$237 as compared with \$227 last year.

"An acre of alfalfa for every cow in Howard County, Iowa," is the slogan adopted by the county bankers association there after watching several hundred thousand dollars go out of their county last winter for feed.

Where you use Natural Gas for a fuel, and your stove or furnace is connected, you find all your requirements whether for heating or for kitchen range has been attended to, far in advance of your need. This as species of preparedness, that we would like you to consider.

Your use of gas may probably be trifling, during the warmer months, but all the resources of a great company, to give you 100 per cent service, 365 days in the year, are maintained in full efficiency in order that you may be fully protected throughout the winter. We like you to know this; we like to tell you, otherwise you might not know it."

been informed that the business of this printer was closed several months ago because he could not pay his paper bills. Since then he has opened a small shop in his backyard, using an outbuilding to house his equipment. If all business men were like him, there would be no cities and all the printing offices would be makeshifts; and it would be impossible to get a first class job of printing done. Whitewright business men as a whole are loyal to The Sun, and seldom does a cut-throat printer get much business here. We appreciate their loyalty and try to give them the best for the least possible money.—Whitewright Sun.

MANY PROFESSIONS REPRESENTED AT TECH

LUBBOCK, Texas, March 14.—The accusation that colleges are operated for the benefit of the rich is not borne out by an analysis of the occupations of the patrons of Texas Technological College. Registration statistics of the 2,025 students enrolled this year show that 43.5 per cent of the patrons of the institution are engaged in rural pursuits.

Of 886 such occupations there are 714 farmers, 119 ranchers, 25 stock farmers, 10 cattlemen, nine dairymen five landowners, one planter, one irrigation farmer, one agricultural engineer, and one farm executive.

These figures indicate that a large number of Tech's students are products of rural life and that they come to college with strong healthy bodies and from a wholesome environment, even though such environment is often surrounded by hardships and privations.

If history repeats itself much may be expected of some of these boys and girls who come in from the broad open spaces with a vision and a desire for an education.

In the list are 35 ginners and 13 cotton buyers, an indication the king cotton has extended his reign over the great prairies where once the cattle baron held undisputed sway. Eight grain dealers are shown.

As an indication that the western part of the state is building and that carpenters' wages are good, there are 41 students who give this as their parents' occupations. There are 46 contractors who have children in Tech, which is a further indication of the great building activity in progress in a new country. Twenty lumbermen in the list gives additional proof of great building activity.

There are 135 merchants who are sending their children to the big new school at Lubbock, 12 automobile

dealers, 34 bankers, 10 barbers, 16 druggists, 8 garage men, 6 hotel proprietors, and many other business classifications where a small number are represented. Children of only 46 teachers are seeking to make Tech their alma mater, closely paralleled by 48 doctors. Insurance agents are keeping up their average with 25 in the list, and the real estate business is represented by 45 students.

If tradition holds good there are 38 "bad preacher" boys adding their influence to the composite whole in Texas Technological College. Eleven republican postmasters are sending their children to what is probably the most democratic school in the country.

As an indication that the old order has not entirely changed six blacksmiths are still in the land and making enough with their strong right arms to keep the children in college. They are far outnumbered, however, by automobile dealers and mechanics.

The man who told the story that it was so healthy in a certain western Texas town that they had to kill a tramp to start a cemetery would find some argument on his side from the fact that in all of the state only one undertaker is sending his boy to the Texas Tech.

Salesmen are evidently finding the land flowing with milk and honey since 53 of them are able to send their children to college. Only one editor is supporting the school, just one capitalist, one collector, one credit manager, and many other trades and professions are represented by only one student.

Two students refer to their par-

ents as invalids, and ten say their parents are retired. A large group of parents are in the railroad business, and 28 are classified in the oil business.

Two janitors are able to send their children to college, while only one judge has selected Texas Tech. One mayor, one miller, two miners, one city marshal, one city secretary, and two caretakers are sending their children to the institution. Also one game warden, one United States marshal, and one junk dealer are sending their boys and girls to the same place.

Numerous other classifications might be made which would go to show that the student body of Texas Technological College is made up of

Of interest to every car owner: A statement of General Motors' Policy by Alfred P. Sloan, Jr., President

THE public has been visiting the automobile shows in the larger cities of the country to see new models.

Suppose you could drop a curtain over the 1929 automobile shows and raise it immediately upon the shows of ten years ago. How vividly the changes would then appear!

Go back five years, or even three, and the contrasts are amazing. So fast have the improvements followed one another that every year has offered you more for your automobile dollar—in performance, in comfort, in safety, in beauty and in style. Never was this fact quite so impressive as in the cars now on display.

This is real progress, and inevitably General Motors has been a leader in it. You cannot have hundreds of engineers, in one organization, thinking and working day and night without knowing more about making automobiles than was known the year before. You cannot have great Research Laboratories, the Proving Ground and the unmatched resources and skill of Fisher body without developing constantly better processes and new ideas. The patronage of the public makes possible all

this machinery of betterment; so the public is entitled to each improvement as promptly as it has been provided.

In this way came the self-starter, the closed body, durable Duco finish, four wheel brakes. By the same process one of the remarkable feats in industrial history has just been effected: Chevrolet has been transformed into a six-cylinder car within the price range of the four—almost overnight. Similarly, the new brakes and transmissions of Cadillac and LaSalle are a fundamental improvement; while the new models of Buick, Oldsmobile, Oakland and Pontiac all represent values that could not have been offered before.

Such progress, born of the inherent ambition of an organization of active minds to do better and to give more, is of benefit to all. It offers you more for your money with each succeeding year. It gives you more value for your present car when you trade it in.

This is our policy. This is real progress.

Alfred P. Sloan, Jr., President

Detroit, March 1, 1930

AN INVITATION

General Motors would like you to see the progress which it has made during the past year and which is represented by its new models. More than that, it invites you to peep behind the scenes at the methods employed to assure further progress. Simply check on the coupon below the products in which you are most interested. Full information will be sent without obligation plus a valuable little book which tells the inside story of the General Motors Institution. This book—"The Open Mind"—has real value to every one owning or planning to buy a car.

COUPON

office at O'Donnell, Texas, under the
Act of March 3, 1897.

Knocking on wood or against your
home town won't bring you any good
luck.

The problem of what's wrong with
youth would easily be solved if au-
tomobiles could talk.

You can catch more customers
with advertising than you can by
standing out in front of the store and
complaining about how rotten busi-
ness is.

There are some people who go
away from O'Donnell to buy the same
merchandise they could get at home
for the same or less money. They
do not seem to value their own time
very highly.

YOUR OWN COMMUNITY

If you were traveling in foreign
land, and saw our starry flag you
would be glad to feel that you be-
long to America, and that its long
arms reaches out to protect your
journeys.

Whenever you hear the national
anthem played, you feel a thrill of
pride, and you have a share in this
land of achievement.

Fine sentiments these. They should
be paralleled by a similarly ardent
feeling for the community in which
you live.

Your home town gives you daily
bread, modern comforts, education
for your children, cherished friend-
ships. Let us love it dearly, defend
it from unfair criticism, and go to
work for its welfare.

MY VISIT TO THE SEASIDE

(Written by Earl Howard)
We left here early one morning
and reached Balinger about four
o'clock in the afternoon. We stayed
all night there with my grandmother.
Early the next morning we left for
San Antonio. We got to San Anto-
nio about night, and the next morn-
ing we visited some of the historical
places. Then we went to Corpus and
got there in the night. We got a
camp house. The next morning we
went to see the bridge raise and the
ocean liners passed under. Then
we went to the wharf to see them
loading cotton. A crane was used
to load the cotton. That was a won-
derful sight. There were four to
be loaded. They were going to Geo-
many. We then went across the
bayou in a big motor boat to the
gulf. We went in bathing but did
not get out very far because the un-
der-tow was too strong for me. We
stayed in about two hours and then
ate lunch. There was a house where
music was played in different rooms.
I bought a soda pop and some candy.
While we were waiting for the boat
to come to the Island I saw a wolf,
which was tied to a chain. Then we
saw the boat coming, and went back
to Corpus.

We fished a while, but did not
catch anything but two crabs and
two fish. They were all little, so
we had to buy some for our supper.
That night we drove around in Cor-
pus and heard the band play.
We left the next day for the Rio
Grande Valley.

CARD OF THANKS

I wish to thank my seventh grade
classmates for the beautiful "fruit show-
er" given me last Tuesday.

I have the best seventh grade stu-
dents in O'Donnell, that I have ever
found any place.

Your teacher and life long friend,
A. S. Graham.

CARD OF THANKS

We wish to express our apprecia-
tion to our neighbors who were so
kind to us after the fire that des-
troyed our kitchen on last Monday;
also to the fire boys who responded
so nobly to the alarm. We sincerely
appreciate everything that was done
for us during and after the fire.
Mr. and Mrs. W. A. Tredey.

J. P. Bowlin made a business trip
to Lubbock Wednesday.

Mr. and Mrs. John Hardberger
left Sunday for the Fat Stock Show
at Fort Worth.

Mrs. Ira Hodges was taken Sat-
urday to Carlsbad, where she under-
went examination at the sanitarium
there. At this date (Wed.) we do
not know how long she will be there.

Born to Mr. and Mrs. W. H.
Crunk on Saturday, March 9, a fu-
ture football star and president of
the United States. The young man
weighed 8 1-2 pounds.

Viola Wyatt added another star
to her crown of knowledge this week
by leading the seventh grade history
class in "special reports."

Choose bright days to water the
hotbed and water it only in the morn-
ings. Watering in the evenings or
on cloudy days chills the bed, with
danger of freezing the plants. After
watering, ventilate the bed well, to
dry the plant foliage and the soil
surface. This will prevent loss of
plants from damping-off or mildew.

Water with which dairy utensils
are scalded must be boiling to be
effective. The method sometimes
used of rinsing one utensil after an-
other by pouring water from one to
the next does not sterilize them. By
the time the last ones are reached the
rinse water which was boiling hot to
start with has become cooled and so
heavily infested with bacteria that
it may be worse than useless.

In deciding when to turn the dairy
cows on pasture, consider both the
cows and the grass. Very early pas-
turing is of little value to the cows
because the grass is watery and low
in nutrients. Neither is early pas-
turing good for the grass, as the lat-
ter yields will be reduced and more
damage from trampling may occur.
Keep the cows off the pasture until
high and abundant enough so that
the grass is at least several inches
can get their fill in a few hours.

**Scout Wins Honor
Medal and \$1600**

For saving the life of another boy
at dire peril to his own, a Boy Scout
of Elizabeth, N. J., again demon-
strated the value of Boy Scout training
and in such signal fashion as recently
to win unusual recognition. The
Scout's name was Ralph C. Raughley,
Jr., and although the rescue which he
formed stands out by merit of un-
usual circumstances, in the main, it
is not unlike hundreds of others cred-
ited to Boy Scouts each year.

Scout Raughley, convalescing from
malaria, swam far out into a pond to
rescue a drowning boy, older and
heavier than himself. He was almost
exhausted by the effort, but he won
out and used his remaining strength
to administer artificial respiration
and restore the other boy to con-
sciousness.

His brave act won for him the
Gold Honor Medal of the Boy Scouts
of America. He showed such particu-
lar heroism, however, that the Car-
negie Hero Fund Commission not
long ago awarded him a certificate
and \$1600 toward higher education.

Each year the record of lives saved
by Boy Scouts grows longer because
Scouts are trained in life saving.
Most of the rescues are made with
small risk to the rescuer because of
this training. There are many in-
stances of life-saving by Scouts where
the facts are never revealed by the
brave but modest Scouts.

It is a tribute to Scout Training
that more than 21,000 boys were
taught to swim at Boy Scout camps
last summer. A score of Honor Med-
als for life-saving awarded last year
tell the story of some of the Scouts
who risk their lives so save others.

This is in keeping with the tenth
Scout Law, "A Scout is Brave."

Which all goes to remind us that
we should have a Boy Scout organiza-
tion here.

There are a number of boys in
Wilson that should be receiving this
training. Quite a bit of enthusiasm
has been shown by some of the boys
here toward a Boy Scout Troup, but
they are looking for some one to
lead them. We take a lot of inter-
est in our land, live stock, etc.,
let's take a little more in our boys
and help them get a Boy Scout orga-
nization started here.

**MARKET: ~ a topic for
conversation ~**

TEXAS is the heart of a six billion
dollar market. Texas industries have
a market for their products within over-
night shipping distance, comprised of
12,000,000 people. This population is
rapidly increasing. The wealth of people
in the Texas trading area is growing more
soundly and more steadily than that of
any other section of the country today.
Natural resources are just now entering
a period of intensive development.
Texas industries thrive because they
have a sound and growing market for
their products.

News Items From The Wells Community

The Wells B. Y. P. U. visited O'Donnell B. Y. P. U. Sunday night, and we sure enjoyed the program that they presented, and also enjoyed the preaching service.

Mr. and Mrs. Felix Jones entertained the young people last Friday night and we hope they will again soon.

Mr. A. R. Tyler hasn't heard from his car yet. The car was stolen last Tuesday.

Greenwood Gin company are drilling for water on their lots now. The gin has ginned about seventeen hundred bales this season.

Ed Cook and his son went to Levelland Sunday to look at some land near town.

Miss Alice Tyler was disappointed

Sunday night, because she didn't see a certain person.
The Reporter.

MESDAMES STREET AND EDWARDS ENTERTAIN

Ushering in St. Patrick's season with all the appropriate symbols, Mesdames Irvin Street and D. A. Edwards were charming hostesses Saturday afternoon, when they entertained a number of friends at the home of the former.

Tally cards and score pads for bridge and forty-two carried out the St. Patrick's theme and were dainty touches in the decorations.

At the end of the games, unique refreshment plates bearing chicken salad, hot chocolate, tiny hot rolls, and green and white marble cake were passed to the guests. Plate favors were sham rocks and the good saints pipe.

Included in the guest list were Mesdames Mack Garner, E. T. Wells, Sam Eaton, Guy Bradley, B. J. Boyd, J. W. Campbell, Paul Gooch, John Hardberger, Harvey Jordan, C. E. Ray, J. W. Shaw, and Vernon Martin, Misses Grace Harville, Lulu Rice and Jessie Gary.

Subscribe for your home paper.

Mr. and Mrs. Louis Robinson formerly of Woodrow, are now making their home in O'Donnell in the Tom Mansell house. Mr. Robinson has come here in the interest of his gin recently purchased from Mr. John Hardberger. Mrs. Robinson is a sister of Miss Muriel Smith, our popular math teacher.

Buying farm seeds of unknown or inferior quality at reduced prices is false economy. Millions of weed seeds are sown each year because uncleaned or half-cleaned seed grain is planted.

Both the seed and the soil are guilty of carrying wheat scab. Control of this disease in the Central States and eastward depends not only on using clean seed, but sowing it on clean, well-prepared land. If wheat is sown on corn land, all corn stalks should be removed and the stubble well plowed under. Scab flourishes in moist, warm weather and the wheat should be sown when the ground is cool, on the earliest safe date in Spring or the latest safe date in fall.

Seventy-five new uniforms with which to dress up Plainview's two municipal bands have been ordered by the Board of City Development. This includes 35 mens uniforms and scarlet caps and capes for the younger band.

JOE BAILEY 4-H CLUB MEETS

The Joe Bailey 4-H Club met in a regular meeting at the school house Friday, March 1, 1929. Eleven members were present and one new member was added to our club. Miss Thelma Greenwade, County Home Demonstration Agent was absent. Mrs. Anna Ragan, Club Sponsor, was present. She called the roll. Each club member answered with what they had done on their work. Ina Maye Bowles finished sewing box, practiced button hole stitching, fancy stitches, made muffins once. Mildred Cottrell finished sewing box, has sixteen eggs setting, material bought for night gown, chicken coop made and cooked five meals and completed button hole stitching. Bertie Payne finished sewing box, completed button hole stitching, material bought for night gown, chicken coop made, and cooked five meals. Allie Brewer finished sewing box, fancy stitching and five button holes, made muffins three times, cooked five meals. Laverne Godwin, material for apron, chicken coop made, cooked muffins five times, cooked five meals. Letta Godwin, material for apron, chicken coop made, cooked muffins five times, cooked five meals, sewing box, apron cut out, practiced button holes, made muffins once. Theo Warren finished sewing box, apron made, two chicks, chicken coop, made muffins three times, cooked five meals. Lois Cottrell finished sewing box, apron made, chicken coop made, sixteen eggs setting, four button holes, cooked three meals. Dorothy Payne finished sewing box, material for apron, three button holes, chicken coop made. Beatrice Beckham, sewing box, cooked five meals. The entire club is interested and we are hoping to do good work this year. —Mildred Cottrell, Reporter.

This opinion of the Attorney General will be very agreeable to Dawson County. If upheld it is estimated that it will mean a reimbursement of approximately \$65,000 to Dawson County. However, it must not be expected that this reimbursement will be made immediately. The State moves in deliberate and majestic manner. An appropriation will have to be voted and this will take time. There will be doubtless many formalities to comply with before the money is actually received. In the meantime each farmer should prepare his accounts carefully and clearly, so that when the ponderous machinery of the State begins to move there will be no unnecessary delay through obscure and unintelligible returns.

The following letter from an assistant attorney general gives an explanation of this decision: Hon. Carl Rountree, Member House of Representatives The Capital Dear Sir: House Bill No. 162, passed by the present session of the Legislature, contains the following provisions: "In all regulated or restricted areas now established or that may hereafter be established, all persons, firms or corporations required to comply with said regulations imposed upon them by law or any constituted authority shall be entitled to receive compensation for the actual expense incurred by reason of said restrictions and regulations."

In your inquiry of even date you wish to be advised as to the applicability of the above provision of the 1928-1929 cotton crop. Please be advised that it is our opinion that the above provision will apply to the 1928-1929 cotton crop because the actual losses that will be sustained by persons complying with the provisions of Chapter 3, Title 4, Revised Civil Statutes, 1925, in the process or producing the 1928-1929 cotton crop is yet to be determined, and the amount of loss sustained cannot be determined until the crop is fully harvested, ginned and marketed.

Very Truly yours, BRANN FULLER, Assistant Attorney General. Dawson County Journal.

BUYING THE ROCKY MOUNTAINS Tony DeCapello was one of several hundred Americans and near-Americans who at one time or another had been offered the Rocky Mountains, the Washington Monument or the Woolworth Building at a ridiculously low price. Some had fallen by the wayside and purchased. Tony hesitated, and saved himself by the tarrying. "Why you no buy da Rocky Mountains?" asked a friend. "You see," remarked Tony, "there is too mucha da bunk in dis America. Before I buy, I picka up da big magazine to read all about the big mountain. On one page da words say for me to reacha for a cigarette and no eat da sweet. Dat make me skiny. Ho! Ho! My wife, Marie she eat moocha sweet and she skiny like spakhet. He, I smoke all da time and I weight two hundred pretty near. Too mucha da bunk. Dose Rocky Mountain owned by men named Denver, already. No can fool Tony lak dat. No, sir. Dese American girls eat many sweets and most times day skiny. Over in Italy candy too expensive for most—and everyone but my Marie look like tub. b meot [CraowbezhPpickadpuatETA Too mucha da bunk.

WHAT HE THOUGHT "Well, I declare," said Lot, as he realized that his wife had been turned into a pillar of salt. "That's a strange phenomenon. I always thought the old lady was largely pepper."

Sagerton (Haskell County)—How contouring land to conserve moisture doubled the cotton yield is told by W. P. Trice, county agent, in describing a demonstration with G. H. Nehring who lives near here. "Due to the lateness of the season only two contour lines were run last year on this farm and from 30 acres of cotton planted on this contoured land 7 bales were gathered. Mr. Nehring's son planted 50 acres of the same land, only separated by a turning plow, in rows running up and down the hill. He made 6 bales of cotton."

R. H. TURNER & SON SELL STORE HERE R. H. Turner & Son have sold their stock of merchandise and their business to Elder W. A. Kercheville of this city and Prof. B. B. Street of Redwine. The new owners took charge immediately and have an ad

CITY TRANSFER CO. J. W. Kirkpatrick, Owner O'Donnell, Texas Drayage and Heavy Hauling

USED LEVEL COTTON ROWS TO BEAT THE NEIGHBORS Albany—By running his cotton rows on the level according to the contour of the land, E. W. Carlson of the Berryhill community made what is described as "the only decent yield of cotton in the community" last year. His field was not very rolling but the contour rows were a great help in holding the few showers that fell, and this meant the difference between a good crop and a poor one. His yield doubled and trebled those of his neighbors. One of them went to the county agent, A. C. Magee, during the cotton picking season with a request for a terracing school, explaining that Mr. Carlson is no better farmer than I am, he didn't plant any better seed than I did, and he doesn't have a better farm than I have, but he made twice as much cotton per acre as I did. The only difference that I can figure out is that he had his rows level.

NEW SMALL GRAIN VARIETIES PROFITABLE Denton—If all farmers in this county had grown Denton wheat last year there would have been an additional \$150,000 farm income, judging by the reports of 14 demonstrators to M. T. Payne, county agent. These men planted 173 acres to this variety from which they threshed an average of seven bushels more to the acre than from ordinary seed. At market prices it represented a net profit of \$1211.

This variety of wheat was originated by the Denton Experiment Substation and has been multiplied and distributed by the Denton County Pedigreed Grain Association which sold the entire production of 2419 bushels of its farmer members to 105 men in many different sections. The Association similarly multiplies and distributes another experiment station variety of small grain, Nortex oats, and the demand has been so great that orders for several thousand bushels were turned down. Eight of Mr. Payne's Nortex oats demonstrators report increased yields of 12 bushels per acre over other seed which represents an increased net profit of \$6 per acre. If the entire oat acreage of Denton county had been sowed to this variety farmers would have received between \$200,000 and \$300,000 more last year, he figures.

It has introduced the world to a substitute for sole leather. It is displacing the truck horse with 40-horse power trucks. It has helped you to an appreciation of Stetson hats, Walkover, Douglas and Emerson shoes. It has made the hand-written letter an oddity in business. It has put Castoria down your throat, left bristles in your gums, and then came along with a rubber set and took them out. It has put a Billet against your hayfield. It has put Marline in your eyes, sold you Cuticura for pimples, Pears for the bath and Ivory for the tub.

It has jammed your proof box, put Paris tips and Tiffany rings on you. It has stuck Robert between your teeth, wiggled your jaw, and what to buy to cure bunions and ingrown toenails. Go anywhere you wish and you had a hand in it.—The Retail Index Ads Get Results. Index Ads Get Results.

Slow Progress Made on Oil Well Rather slow progress is being made by the drillers out at the Ash Syndicate well five miles west of Tahoka, due to the unusual tendency of the soil to cave in. "We have had to fight against caving almost from the very start," Mr. Drake, one of the drillers, told the News man Wednesday. They had then reached a depth of 910 feet, according to the same authority, and they were then very busy drawing slush from the well. It is expected that they will soon strike a much harder formation, after which less trouble from caving is expected.—Lynn County News.

There is no Substitute for Experience

The PACE SETTER—since the days of the first Automobile

Back in 1899 Conoco Gasoline propelled the one cylinder "horseless carriage" which were the sensation of the day. In spanning the years to the days of high compression engines, Conoco has kept ahead of motor fuel requirements. Today Conoco, the Triple Test Gasoline, is the fuel in greatest demand for quick starting—snappy pickup, and extra power and mileage.

AND WOMEN WHO EARLY THE GREATEST OF AMERICAN BUSINESS

President Gives the Five Essentials of Sound Thinking in Business—Greater Opportunity Than Ever Before for Young People With Educational Training and Power to Analyze Problems.

By CRAIG B. HAZLEWOOD
President American Bankers Association

Half a century ago Michael Pupin, a shepherd boy, watched his flocks by night among the fields of Serbia. Often lurking in the borderlands awaiting an opportunity to make off with a part of the herd, Serbian boys were taught a method of signalling one another for warning and help. Each carried a knife with a long wooden handle which he would thrust deep into the ground and in case cattle thieves approached he would strike the wooden handle. The sound would be transmitted through the ground to other boys some distance away who could hear and interpret the message.

"Why is it," Pupin asked his mother, "that we can signal this way? Why is it the sound can be heard through the ground, but not through the air? Why is it the signals can be heard in the pasture land so much better than in the plowed fields?" The boy's mother could not answer his questions, nor could the village teacher. However, having an eager mind and great determination, the boy decided to go to America, where he might receive an education and find out the answers to these and other puzzling questions. Hundreds of other boys under the same conditions merely accepted these answers without once questioning them.

Education and Success
Immigrant boy from the age of fifteen landed in America in 1874 and, years later, followed his way through Co. concentrated the problem of sound, which called him a shepherd boy, of his thinking—what he accomplished for the long distance his inventions are known over. "It during the past years this company had intended to do without one in the American Telephone and Telephone service it is giving to more than 100,000,000 more than it has ex-

ventions, in which millions of capital have been investing the result of the thinking of the American who had the simple wonder, the determination and the power to apply what

the imagination and the greatest purpose of education. What American business more than anything else is men and women to think—individually or in groups, those who do not merely approve people's ideas, but who

the world by looking aside traditional, disregarding traditional and pioneering new ideas. The realm of business is undergoing changes are crowding in the executive to look for adequate with the enormous industry of business problems have become the mass of information their solution so are not long for managerial in rushing ahead of the young men and the professional develop genuine greater than ever. The same crying who see clearly and wherever we look wholesaling, retailing, new forms of business are seeking solutions daily. If I were of exceptional days, first, to find to wonder. In business who dared to courage to and who whether some discovery of Amer-

MARRIAGE NOTICE BILL HAS BECOME TEXAS LAW

Governor Dan Moody has signed a bill, presented by Senator Hyer, requiring a notice of three days prior to issuance of marriage license. The bill provides, also, according to press dispatches, that all male persons undergo a physical examination by some reputable physicians, before securing marriage license.

The law is to become effective 90 days after the legislature adjourns.—Slaton Slatonite.

KITCHEN KNOCK

The Recipe Service Co., of 1861 East Toga Street, Philadelphia, Penn. from whom the tested recipes appearing in this publication are procured, purchases each month a Prize Winning Recipe submitted by the housewives who follow this column.

Check for this month goes to Mrs. Emma Rohrbach, of Philadelphia, Pa., for the following very excellent recipe. Send in your choicest original recipe to the Recipe Service Company.

HAMBURGER EN CASSEROLE
2 lbs. of round steak ground or 2 lbs. of lean hamburger.
2 large onions
2 large peppers, green or red
1 large lemon
1 8-oz. bottle of tomato catsup
1/2 lb. or more of bacon according to

taste
Salt and pepper
Butter your casserole dish or pan and lay about 1 1/2 inches of hamburger in bottom.
1 layer of one onion thinly sliced
1 layer of one pepper thinly sliced
Juice of half lemon
Salt and pepper to taste.
Repeat until the meat is used, making the second layer of meat about one inch thick, this will give enough hamburger left for about 1/2 inch thick on very top. Pour a whole bottle (8 oz.) of catsup over and strips of bacon. Bake slowly or in modern oven for one hour and a quarter.

SCOTCH

Two Scotchmen took dinner in a restaurant. After dinner the waiter brought the check. The two sat and talked for a couple of hours, after which conversation failed, and they merely smoked in silence. At 1 A. M. one of them got up and telephoned to his wife.
"Dinna wait up any longer for me, lass," he said, "it looks like a deadlock."

PEANUT RICE SALAD

3 tablespoons rice
1 cup orange juice
1/2 cup finely chopped peanuts
Cream cheese balls
Wash rice and cook for 7 minutes in boiling salted water; drain. Cover with orange juice and cook in double boiler until rice is tender. Cool, mix with finely-chopped peanuts; sprinkle with salt and arrange on lettuce leaves with cream cheese balls. Serve with cream mayonnaise or French fruit dressing.

The number of families in Texas has increased from 575,734 in 1900 to well over a million at present.

J. S. WELLS OBSERVE GOLDEN ANNIVERSARY

Pioneer Couple Visited by Relatives And Friends From Oklahoma And Texas

The Golden Wedding Anniversary of Mr. and Mrs. J. S. Wells celebrated here Wednesday was by far the most pretentious and gorgeous event of this kind ever observed in Tahoka. Surrounded by their children, grand children, great grandchildren, and numerous other relatives, as well as hundreds of their Tahoka friends, the honored couple seemed as buoyant and happy as children themselves.

A most elaborate and sumptuous feast was enjoyed by the Wells families and their kindred who had gathered in the parental home at the noon hour.

Beginning at one o'clock and continuing at intervals of one hour throughout the afternoon, a program of readings, songs, and instrumental music—piano, violin, saxophone, orchestra—was rendered in honor of the happy couple, and as a concluding number on the program and as a most appropriate and beautiful climax of the events of the day, a real wedding was consummated at 6:00 o'clock, when Miss Cleone Wells in a beautiful ring ceremony, became the bride of Mr. Morris O. Bridges of this city. But is related elsewhere in this paper.

All the afternoon streams of visitors from this city and elsewhere came to pay their respects to the honorees of the occasion. They expressed their respect and esteem not simply in words but in many a costly and beautiful gift, until the big table in the dining room was loaded down with silverware, glassware, china-ware, and numerous other useful and expensive articles. The registry book at the close of the day bore names of several hundred relatives and friends.

Like some ancient family patriarch, like the head of some early Scottish clan, Mr. Wells has long enjoyed almost kingly power, but it has been the power of influence—the

"The Wedding March"

reigned alone. He has shared the throne with his companion, the motherly Mrs. Wells. The two have wielded an influence over their children and friends in Tahoka and elsewhere that no human mind will ever be able to compute. The esteem and the reverence with which they are regarded by children and grandchildren is something beautiful—so unusual in its intensity as to be really remarkable.

Among the relatives who came from a distance to enjoy this occasion were two who witnessed the wedding ceremony of Mr. and Mrs. Wells just fifty years preceding. These were T. E. Moore and Mrs. J. A. McElreath, both of Roosevelt, Oklahoma.

There are eleven living children of this couple, all of whom were present, to-wit: W. C. Wells of Tahoka, Mrs. Nora Tomlinson of Pauls Valley, Okla., Mrs. J. H. McCoy, Tahoka, E. T. Wells, O'Donnell, J. C. Wells, R. C. Wells, Mrs. W. H. Edwards, N. F. Wells, Mrs. O. C. Roberts, Miss Frankie Wells, and Karr Wells, all of Tahoka.

Grandchildren present were: Harley Wells, Cleone Wells, Evelyn Wells, Mary Bland Wells, Irene Gallagher, Clay McCoy, Frances McCoy, Grace Tomlinson, Roy Tomlinson, Nora Lee Tomlinson, C. G. Welch, Lela Badgwell, Clifford Jordan, Homan Edwards, Wells Edwards, Billie Jack Edwards, Joan Edwards, George Claude Wells, Marjorie Wells, R. C. Wells, Jr., Valerie Wells, James Elton Wells, John Williams Wells, Eloise Roberts, Betty Sue Roberts, James Forest Roberts, Jack Laughren Wells, Beverley Wells, Jim Ellen Wells.

Great grandchildren were Haley Jean Badgwell and Peggy Jean Jordan.

Relatives from distant points were: J. D. and Annie Pitts of Marysville, Texas, R. G. and Annie Harmon of Milo, Okla., Mr. Harmon being a half brother of Mr. Wells, T. E. and Addie Moore of Roosevelt, Okla., Miss Maggie Dixon of Graham, Okla., J. A. and Mrs. A. McElreath of Roosevelt, Okla., Mrs. Clifford Jordan and daughter Peggy Lynn Jordan of Haldon, Okla., Lee Hudson and Hester Hudson of Wirt, Okla., Mrs. H. J. Badgwell and daughter, Holle Gene of Graham, Okla., Cruce Tomlinson, Nora Lee Tomlinson, Lee Tomlinson, and Nora Tomlinson, all of Pauls Valley, Okla., Mr. and Mrs. W. J. Gallagher of Iraan, Texas, J. Clay McCoy of Lubbock, Mrs. Sallie Salmons, Lubbock, Mr. and Mrs. W. F. Griffin, Tulsa.

YIDDISH

It was a very cold day and Isaac and Cohen had walked about four miles without either making a single remark. "Vy don't you say something?" "Freeze your own hands!" said Isaac.

SCHOOL NEWS

On Thursday morning the second grade pupils of Miss Millwee's room put one of the cleverest and best chapel programs we have seen this year. Characters stepped out of the pages of Mother Goose and acted their parts to perfection. Old King Cole, Little Jack Horner, Simple Simon and all the rest were there for the delight of the Grammar school pupils and the visitors.

The Sixth Grade, Miss Sargen's room will entertain next Thursday.

SEVENTH GRADE

Graduation is the chief topic of interest in this class now. Clothes for the occasion will be discussed and decided on at a class meeting Friday afternoon. Last advices from the company promise class pins some time next week.

Low and High 4th

The pupils in this grade went on a picnic last Wednesday. We liked to the open section in the south side of town where we played baseball, catch and several other games. The refreshments part came when we ate. The refreshments were cakes of all kinds, doughnuts, marshmallows and pop corn. Besides all the pupils and Miss Alta, Mrs. Roy Miles, Mrs. Jack Ash, and Mrs. E. V. Parr went to help with the games and eats.

Garland Smith is a new pupil who started last week in the low 4th grade. We are glad to have Garland Curtis, Monette and Alice Mance

3 Glasses of Water Helps Constipation

One glass of water is not enough—take three glasses one hour before breakfast. Much better results are obtained by adding a teaspoon of simple glycerin, saline compound (known as Adlerika) to each glass. Adlerika acts on both upper and lower bowel and removes old waste matter you never thought was in your system. Stops gas and sour stomach in TEN minutes! Relieves constipation in two hours. (Name of drugist.)

and W. C. Ables back in school since their round with the measles.

We enjoyed the monther Goose play Miss Millwee's room gave in chapel Thursday.

We had our room tryout in Tiny Tot Story, in Talking Tuesday. Norma Ruth Vermillion won first place, Hope Shook second and Merl Miles third. Norma Ruth is working hard to beat her sister Margaret, who is a sub-Junior also, in spelling.

PUMP IS PLACED ON GARZA WELL

POST, Mar. 9.—The Boren No. 2 well, of the Emerald Oil Company, located near the city limits of Justiceberg, in Garza County, was put on the pump today.

Officials at the well would not divulge details of the amount of production. Another location has been made by the same company, about 360 feet from the present well.

This proposed well will make the third in the immediate section. The discovery well, located in the river bed of Double Mountain fork of the Brazos, is to be "shot" early next week.

BIBLE STORY CLASS STILL GROWING RAPIDLY

Mrs. B. M. Haymes has almost reached the conclusion that she'll have to build a new room on her house in order that she may be able to take care of her rapidly growing Bible Class of boys and girls.

At last meeting twelve boys and ten girls were present for the program. They are studying the life of Christ, until Easter.

As a recent meeting little Miss Hope Shook was elected president of the class and Bobbie Carroll secretary.

The last program was as follows:

- 1. Song—Bring Them In.
- 2. Song—Jesus Loves Me.
- 3. Lord's Prayer—In union.
- 4. Story—Betrayal and arrest of Jesus—Mrs. Haymes.
- 5. Song—Keep Sweet.
- 6. Prayer.

SUNDAY SCHOOL CLASS CELEBRATES ST. PATRICK DAY

Among other parties honoring the Saint of the Emerald Isle, that of the Young People's class of the Methodist Church on Tuesday evening was one of the best. This class of which Miss Christine Millwee is president, has for its social leader Miss Irma D. Palmer.

The Church has never looked more beautiful with shamrocks in each window and green shades for the lights.

The guests were divided into two sides and a number of contests kept the entire crowd in roars of laughter. At the end of the games the winning side was given a pipe tied with green ribbons.

Sandwiches and green lemon, with tiny green hats as plate favors, were served to Misses Alta Rodgers, Rebecca Schoole, Eva and Era Harris, Irma D. Palmer, Vivian Pierce, Alice and Jeanette Thomas, Beulah Estes, Mary Jo Gates, Louise Edwards, and Grace Harville, Messrs. J. A. Duncan, Harvey Liele, Vernon Kirkland, Ollie D. Harris, Gordon Slaughter and Rev. C. A. Duncan.

MISS CHRISTINE MILLWEE ENTERTAINS

A number of young ladies enjoyed the precious hours of the evening when the beautiful Christine Millwee entertained when the entertainment party. John Vermillion, Jeanette Thomas, and Miss Hope Shook holding their places until the last game, while Miss Alice Tomlinson and Miss Alice Tomlinson.

At a late hour consisting of salad, cake and hot chocolate, a color scheme carried over to the party. The guests were seen Jessie Gary, Grace Rice, Alta Rodgers, Roxie Hancock, Thomas, Irma D. Palmer, Margaret, and Messrs. V. B. Yandall, Harvey Liele, and others.

KNOW

The total population of farms in Texas as of 1910 was 1,000,000. On owned farms there were 500,000.

The number of farms has increased from 500,000 to well over a million.

The present population of Texas is estimated at 10,000,000.
